

More About Birds

By The Bird Woman

My little boy, in case you are still skeptical about the intelligence of birds, I will add a little more to my last article.

Any given species behaves just the same whether its habitat is as far north in the summer as Canada, or as far south as Central and South America in the winter. Every flock of birds that migrates can be recognized by their behavior, although we would be far enough away that we could not see their color and markings or hear their songs or calls.

And speaking of migrating, we think that shows super intelligence. Could man, if he had wings, rise from the ground and without chart or compass reach a specified destination? Yet even the smaller birds migrate for hundreds of miles; a little wren has been known to return to the same nesting box year after year.

If birds were dumb, would they know where to congregate and when it was time to start to migrate? If you should chance to be at either end of the line—"want to go where the wild geese go"—you had better be quick and ready waiting, for they make no reservations, for transportation, neither for night lodgings.

Even those that study bird life closest have been unable to find out just what kind of "cues" it is that starts the assembly moving, or who selects the leader or lines them up into the same formation every time, yet everyone can recognize them high up in the sky by their V formation.

Besides the oriole that we have talked about as being a "weaver", there are a great many talents displayed in the bird realm. We recognize the woodpecker as the drummer boy of the forest. The scarlet tanager and wood thrush are very adept as ventriloquists, and seem to enjoy practicing their art, even before the human family. The mockingbird is really king of mimics, and no note is too high or too shrill for him; neither is any too low or too soft, and the peculiar thing is he usually improves on the notes he imitates. The common crow is really a clown, and if we just take time to watch him for a while, he will hop and skip and even tumble and turn somersaults to attract his fellows, and the larger the audience the more skillfully he performs.

Do you recall the story in our old readers about the thirty crow that sat on the old wooden pump and wished for water? But presently he saw water in a pitcher on the well platform, but couldn't reach down far enough into the pitcher to get it. Had he been dumb, he would have flown away and forgotten all about the water being there. But after some careful turning and twisting his head, he decided what to do, and began to pick up rocks and drop them into the pitcher. Eventually, when he had enough rocks in the pitcher, the water came close enough to the top where he could reach it.

The blue jay is a mischievous fellow. He hasn't all the notes for mimicry that the mockingbird possesses, but he can get a lot of fun out of life with the ability he has. He enjoys giving the cry of a hawk, and then watching all the small birds freeze in their tracks. Did you ever see a hen and chickens scurry for cover from what they thought was an approaching hawk? And as you would scan the trees for a hawk, you would find the innocent jay looking like the cat that swallowed the canary and trying to smother a hearty laugh.

Then there is the cow-bird. It reminds us of the way some human mothers try to shift the responsibility of their offspring. She stealthily watches for the towhee or some other bird that builds on the ground, to get out of sight and she deposits her eggs in their nests and lets them rear her fledglings for her. Is that dumb?

We have also actresses in bird kingdom. Hunters are quite familiar with the actions of the quail when a man or dog, or other enemy is approaching her nest, which is on the ground and protected only by a little dead grass or other small branches. She knows that she is no match for such a formidable foe, so she puts on an act. Even the experienced hunting dog thinks he has found a wounded bird that can be easily taken. But to his surprise, just as it is within his grasp, it rises and flies in the opposite direction from its nest, but not so far as to discourage the pursuer, and it again falls, flutters or flounders enough to attract attention and pursuit, until it has led the enemy away from its nest, then it rises and flies out of sight.

We have seen the little mourning dove put on the same act. There are endless things that could be told about birds, and their intelligence, but we feel that this will suffice.

The whole of West Florida from the Apalachicola River to the Alabama line is now under forest fire protection.

Cold storage pine seedlings may be the answer to tree planting difficulties experienced during the regular planting season in the winter in South Florida.

AUTO ACCIDENTS SHOW BIG INCREASE

JACKSONVILLE, FLORIDA. — Persons using Florida's streets and highways seem determined to make this the most dangerous year in history where motor vehicle accident fatalities are concerned.

A report from the Florida State Board of Health Bureau of Vital Statistics covering the first six months of 1950 which was released today shows a fifty-two per cent increase in such accident deaths as compared with a similar period in 1949.

"If the recent trend continues," says Dr. Wilson T. Sowder, State Health Officer, who maintains headquarters here, "more than a thousand men, women, and children will lose their lives during this mid-century year from automobile and other motor vehicle accidents."

RECRUITING STATION

ON 7-DAY WEEK
Marine Corps recruiting stations throughout Florida are now on a seven-day week basis, according to Captain J. J. Reardon, State Marine recruiting officer. Reardon said that the office, located in the post office building in Jacksonville, Miami, Ocala, Orlando and Tampa, will be open from 8:30 A. M. to 4:30 P. M. Monday through Saturday, and from 1:00 to 4:30 P. M. on Sunday. A full working day will be observed on Labor Day, by addition. "This change in hours," he explained, "has been made to accommodate those persons who are unable to contact local recruiting stations during their regular working hours."

Couboys of the Week

DE ELLEN

For the boys and girls who like the Cowboy Heroes the Sun will run a picture each week they may save. The first 25 children who save a set of 13 different pictures will receive a pass to the Hills.

Florida's losses from forest fires are greater during the winter months, but they drop sharply during the summer months because of the summer rains.

Railroads working through the state are cooperating closely with the Florida Forest Service in keeping down accidental forest fires.

WHAT IS THE REAL TEST OF A GASOLINE?

CONSIDER the pyramid above. The very foundation of gasoline quality is the distillation-range of the base stock. It is on this distillation range that even, thorough vaporization depends. Also important are—whether or not the gasoline contains solvent additives (to minimize gum deposits), and whether it is made in seasonal grades (to assure protection against vapor-lock in hot weather.)

Motorists should not make the mistake of thinking that "octane-rating" is the only gauge of gasoline quality, when it is but one of several factors that determine performance in your car.

Today's Crown and Crown Extra gasolines have added anti-knock power. But along with higher octane, they also possess the other qualities which make for smoother operation, and more power.

The real test of a gasoline is its all-round performance in the motor. How adequately Crown and Crown Extra meet this test is shown by their leadership in popularity in their respective fields.

Agricultural accidents totaled
2,714 during 1949 at a cost of
\$430,379, according to Florida In-
dustrial Commission reports.

Citrus accidents in Florida last
year cost \$275,650, according to
the Florida Industrial Commission.

TOO LATE TO CLASSIFY

By Russell Kay

Courage in the face of uncertainty and abundant faith in Florida and its future were evidenced last week by the board of directors of the Florida Power Corporation when they approved plans for the expenditure of \$60,000,000 in the next few years to finish an expansion program which totals \$26,000,000.

It isn't easy in the face of the present day world situation for any firm or business organization to lay plans for the future. The fact that the Florida Power Corporation is doing so should be both encouraging and comforting to the people of Florida and serve as an example to other firms and organizations who have been hesitating as to what road to take.

A weak-kneed management might have pulled in its horns and said, "This is no time to expand, let's sit back and see what happens." Such a course is just what Joe Stalin is hoping for. He would like to see American business and industry crawl in a hole.

Officers and directors of the Florida Power Corporation know Florida and its needs. They live in Florida and feel that way or no way it is sound business judgment to keep pace with the state's development.

They believe that Florida is a giant that is just beginning to awake. They anticipate a steady growth with many new industries that will require power. They see the area they serve continuing to grow and prosper and are making plans to serve the hundreds of new home owners, farms and business establishments with electricity to meet their needs.

This \$60,000,000 expansion program of the Florida Power Corporation calls for the building of new power plants and substations, new lines and facilities throughout the entire area served by the company.

Diversified industry, agricultural enterprises, the ever-growing year-round tourist industry and the continued trend of home-makers to switch to all electric homes, were some of the basic factors which have prompted the corporation to carry on this vast program.

This program will enable the Florida Power Corporation to continue its full cooperation with the REA and co-op organizations in providing light and power to rural areas throughout the state.

It will also insure adequate power for the growth and expansion of such industries as the Victor Chemical Works and Diamond Braiding Mills at Tarpon Springs, the Botany Mills at Lake Wales and the Minute Maid concentrate plant at Plymouth as well as many others. It was the work of the industrial department of the Florida Power Corporation that these and other major industries were brought to Florida.

In his report to directors, President W. C. Gilman, pointed out that Florida Power is no longer a small company. Its customers now number over 150,000. This year for the first time the company will generate and distribute over a billion and a half kilowatts and is now numbered among the nation's foremost electric utilities.

Florida Power Corporation has shown a phenomenal growth in the past ten years as compared with the average utility company in the United States. For example, in electric sales, Florida Power shows a 309 per cent increase while the U. S. average is only 125 per cent.

In total electric sales revenues, Florida Power shows an increase of 199 per cent against the national average of only 101 per cent. It also shows a substantial lead in the number of customers served, its increase being 110 per cent against a national average of only 47 per cent on annual peak load (thousands of KW) Florida Power has an increase of 202 while the national average is only 99 per cent.

Since 1945, the company has added 65,000 kilowatts of generating capacity through the construction of additional plants that, with their main plants at Bayboro, Inglis and Enterprise, bring the total kilowatt capacity to 181,500.

Within the next four and a half years the company expects to add another 120,000 kilowatts of capacity at a cost of approximately \$20,000,000 and along with the new plant construction must add transmission lines and many new pieces of related equipment.

Florida need have no fear for the future when her industrial leaders evidence the faith and courage of Florida Power and are willing to back it up with millions of dollars in cold cash.

Construction accidents occurred at the greatest cost during 1949 with a total of \$1,087,787 paid in Workmen's compensation benefits, the Florida Industrial Commission reports.

Most forest fires can be prevented if you will follow these rules: Crush out your smokes—Break your match in two—Drown your camp and warming fires. Be sure that every spark is dead out.

Florida's city area populations, with a 56 per cent gain in the last ten years, out-paced the State's total growth, the Florida State Chamber of Commerce stated yesterday.

This week's business review of the State Chamber's research and industrial division lists eight counties in Florida with a preliminary population count of 110,000 or more. These counties have a total population of 1,652,145, or 56 percent more than in 1940. The State grew 44 per cent during that time. Further, these eight counties make up 60 per cent of the total population of the State today, a four point gain over 1940.

Counties listed and populations of each are: Dade 499,838; Duval 294,338; Hillsborough 248,535; Pinellas 137,539; Polk 122,801; Palm Beach 114,144; Orange 114,134 and Escambia 110,766. Next in order, but not included in the group, are: Broward 83,318 and Volusia 73,151.

Following the national trend, Florida turned from a rural to an urban State during the first five years after 1920. Sixty-four per cent of the State's population was living in cities by 1945. Preliminary reports indicate that when the 1950 final totals are available, an even greater proportion of Florida's population will be living in cities.

Wood is composed of thin pliable tubes called cells. These cells form passages for water which carries the soil food that nourishes the tree.

John Lund, Marie Wilson, Dean Martin, Diana Lewis and Corinne Calvet are all in Irma's latest comedy "My Friend Irma Goes West" at the Hilmas Thursday and Friday.

MISS FLORIDA... Corinne Gustafson poses after she has been declared winner of Miss Florida title. She will compete in Miss America contest in Atlantic City.

The average United States family opened 750 cans of food last year, according to a recent survey of the American Can Company. Over 30 billion cans were consumed—two-thirds of which contained food products.

Wood is composed of thin pliable tubes called cells. These cells form passages for water which carries the soil food that nourishes the tree.

Construction accidents occurred at the greatest cost during 1949 with a total of \$1,087,787 paid in Workmen's compensation benefits, the Florida Industrial Commission reports.

believe it or not... IT'S FREEZIN' TIME!

No, we're not kidding. It's because the weather is so hot that we say, "It's Freezin' Time!" Look at it this way: you want to bake often because your families enjoy homemade pies, cakes, rolls and biscuits; you don't want to bake often because it makes you, and the house, even hotter. Wouldn't you rather do lots of baking the first cool day that comes along... store it all in your electric food freezer... and thaw it out, crisp, golden and delicious, any day you like... even weeks later? See your appliance dealer today and learn more about the advantages of owning a food freezer... there are lots of them!

Tropical Fruits Lessen Brain Fog

(Continued from page 5)

supplemented if the body feels that it needs more and is found in citrus fruits and mangoes. The high acid content of these fruits is known to be the reason. The white guava contains Vitamin C, only not the red and yellow varieties contain A also. There is a fruit that contains as much as twenty times the amount found in citrus.

Recently it has become known that athletes who found only in citrus deficient in Vitamin C. With an ample supply of C along with calcium and Vitamin A the condition can be cleared up if it is not long standing. That tired feeling and nervous irritability are symptoms of a deficiency in C.

Mangoes contain a property called lectin which is a nerve specific that exerts off nerve fatigue. This lectin is also found in soy beans and can be purchased at health stores in capsule form.

D seems to be the only vitamin of which we can get too much. In the tropics one can easily get too much of this property. D and calcium work together and it is the best source of both the blood stream to meet its demands in the absence of calcium phosphorus and iron. These are automatically in the excretion-lack of phosphorus the sugar.

Other vitamins, such as brain food and the lack of iron causes low blood pressure.

If one must be in the sun, the best source of iron is the synthetic ascorbic acid, a by-product of beet pulp after sugar has been extracted. It will because of its high potency of C content help him to combat the ill effects of the hot weather.

FLORIDA'S LEATHERNECKS WILL MEET IN ORLANDO

The U. S. Marines will land in Orlando in force August 18 to hold their first reunion and convention in the history of Florida. Held at the Florida ex-Marines and present-day Marines will be the Orlam Detachment. There are approximately 13,000 "Leathernecks" in the State and about 900 in Orange County.

The two-day meeting, to be held at the Anapoli Hotel will begin with a barbecue at 12 noon Saturday at the Gun Club. Registration will begin at 8 A. M.

Lightning causes only two percent of the forest fires in Florida.

Care will prevent many fires from starting. Fires which are not liberally set on lands of others should be brought to the attention of law enforcement officers.

Medical Advertising Campaign To Start In October

Lakeland, Fla. - The recently announced advertising campaign of the American Medical Association should start in October. The individual doctor and his staff will be the main force in the drive to eliminate the use of the word "doctor" in the name of the profession.

Such a campaign should, however, be a consideration of the necessity for continuing education for the public and should be the issue of government. Controlled medicine is a necessary part of the campaign.

The advertising campaign, which will be launched in October, carries a total budget of \$1,000,000 of which \$500,000 will be allocated to newspapers, \$300,000 to radio and \$200,000 to national magazines. The newspaper advertising schedule calls for placing one ad in every leading daily and weekly newspaper in the United States and of newspapers in Hawaii and Alaska will participate.

Space reservation in all papers is approximately 75 lines. The U. S. Marine will land in Orlando in force August 18 to hold their first reunion and convention in the history of Florida.

The program this year covers practically all points in the production of both poultry and eggs. Round table discussions by leading poultry men attending greatly enhance the benefits derived.

Private citizens who are alert to the articles of woods burners may be able to receive \$350 or more for zoning information leading to arrest and conviction.

POULTRY INSTITUTE - The 1956 Session of the Annual Poultry Institute will be held at Camp McQuarrie, August 21-26. This camp is located 30 miles East of Ocala on State Road 40, or 35 miles north of Eustis.

Mr. and Mrs. Malory Tillis and children, Jane, Jean, and Diane, of St. Petersburg, visited Mrs. Tillis' parents, Mr. and Mrs. H. W. Redick, this past week. They returned home Sunday.

Edgar Rutherford left Thursday for Pensacola, where he is stationed with the Naval Air Force, after spending three weeks with his parents, Mr. and Mrs. R. J. Rutherford.

Misses Suzanne Shields and Jackie Degout of Columbus, O., are visiting Mr. and Mrs. J. Paul Garber. Miss Shields is Garber's niece. Both guests are juniors in Ohio State University.

George E. Crawford, Gulf Life Insurance representative, has been transferred to Bartow. The Crawfords and daughters, Karen and Laura Jane, will move to that city this weekend.

Mr. and Mrs. J. T. Landress and daughter, Diane, returned Sunday from a two-weeks vacation spent visiting Wauchula, Tampa, Clearwater Beach and Lakeland.

G. W. (Butch) Stewart, III, of Lake Wales is spending ten days with his uncle and aunt, Mr. and Mrs. Ben T. Stewart. The Stewarts' daughter, Mary Lou, Butch and Cora McQuire all spent last Sunday at Vero Beach.

Mrs. Laney Douglas, of Tampa, has been visiting her son, and daughter-in-law, Mr. and Mrs. E. Douglas, during the time of Mrs. Douglas' stay in Walker Memorial. She will remain here until Mrs. Douglas is fully recovered.

Mr. John E. Pickens, Jr., will supply the pulpit at the Union Congregational Church next Sunday. Rev. H. D. Graetz is expected to resume his duties as pastor the following Sunday, Sept. 2.

Mr. and Mrs. Blake Childress and son Jerry, are vacationing in Tennessee. Their daughter, Jane, accompanied them to attend a family reunion in Tennessee, returning from there to Chicago, where she is a nurse.

J. Paul Garber left the latter part of this week to spend a week in Washington, D. C., with his mother, Mrs. Ella B. Garber. Mrs. Garber's condition is improving and she expects to be out of the hospital soon.

Mr. and Mrs. A. A. Abbott of Birmingham, Ala., and Mr. and Mrs. F. C. Hilley and daughter, Suzanne, from Tallahassee, are guests of Mr. and Mrs. L. B. Rush and Mrs. A. F. Helms this week.

Harold L. Stewart of Tallahassee has returned to his home after spending two weeks with his uncle and aunt, Mr. and Mrs. Ben T. Stewart. He was recuperating from an automobile accident during his stay here.

Select the Service that selects its men—U. S. Marines.

When Government Runs a Business

The two giant enterprises in the communications field in this country are the Bell Telephone System and the United States Post Office Department. The privately owned Bell System paid \$246,144,000 in taxes last year, while the Post Office Department, of course, paid none. The Bell System operated at a substantial profit, while the Postal Service incurred an operating loss of \$577,000. The total value of physical properties owned by the Bell System is reported at \$1 billion dollars. The Post Office Department has no idea whatever of the value of its vast property holdings.

Of the 67 counties in Florida, Taylor County ranked as the number one producer of lumber during 1948.

Some one put it this way: "Our enemy is the cry, wherever it comes from, which constantly urges us to let well enough alone. Mostly, it comes from the cemetery. It is the voice of experience. It is just the wind whistling through the gravestones. The dead, when they were alive, did not talk like this. They honor them mostly because they did not let well enough alone. If they had there would have been no human progress."

The writer of Hebrews has much good advice about progress.

Let's talk about your house... and Adequate Wiring

Our specialists will draw up for you, free of charge, wiring diagrams and kitchen plans to suit your individual needs and desires. If you're planning to build or remodel your home, call on us. We'll be happy to serve you.

Read Hebrews 6:1-12

As an Association meeting of Negro Churches a certain woman was called upon to give some comment. She said: "I don't intend to say anything but since you call upon me I'm going to say this. Back in our church I know we ain't what we ought to be and I'm sure we ain't what we're going to be, but thank God we ain't what we was. In popular phraseology the good man had something there."

Her people had not made as much progress in Christian living as they ought, but she looked forward to the time when they would be more perfect. At the same time she could earnestly thank God they were not as bad as they had been. She had recognized three items which are very important to all of us. The previous state, the present state, and the ideal state—regarding spiritual warfare.

The previous state is important only as something to stay away from as far as possible. The present state is a check on our progress and a condition to be made more like the ideal day by day. It is well for us to consider our spiritual growth, but it is a serious indeed, fatal, perhaps, when we are content with the progress we have made.

Some one put it this way: "Our enemy is the cry, wherever it comes from, which constantly urges us to let well enough alone. Mostly, it comes from the cemetery. It is the voice of experience. It is just the wind whistling through the gravestones. The dead, when they were alive, did not talk like this. They honor them mostly because they did not let well enough alone. If they had there would have been no human progress."

and it is summed up in this way: "Therefore, let us go on unto perfection; and this we will do, if God permit." The Hebrew people had in the main let well enough alone and Jesus pointed out this error again and again.

They were satisfied with the law of Moses and the intricate system of religious observance built around it by the traditions of their fathers.

They had an eye for an eye, and a tooth for a tooth, but I say unto you, love your enemies and pray for them that despitefully use

you. Jesus surely did not let well enough alone. He knew perfection was not obtained that way. What is the sum and substance of Christianity? It is an enthusiasm for living as a son of God. It is an enthusiasm which sends you out, drives you on to a more conscientious effort toward living like the Son of God, going on unto perfection.

The writer of Hebrews might well have had many of us in mind when he wrote "but beloved, we are persuaded better things"

of you, and things that accompany salvation." God will not only permit us to press on, but will help us to do so. Our possibilities are limited only by our wills, our desires, our spiritual ambitions. God expects great things of us and we must not disappoint Him. Are we satisfied with our spiritual health? If so, it will never be better, but worse. But if we are not satisfied then God will work with us. The best proof of this is in the One whom God sent, even Jesus. "Therefore, let us go on to perfection."

In celebration of
40 years of service
Gulf Life presents...

DOUBLE PROTECTION for YOU!

... in Gulf Life's New Low-Cost Special 40th Anniversary Policy!

Yes, you'll want to ask your Gulf Life Man about the amazing features of this NEW policy which, in your younger and more active working years, actually gives you and your family double-benefits, double-protection at surprisingly low cost.

Then in later years, as the children grow up and family responsibilities become less and less, your policy matures as paid up insurance—no more premiums to pay—yet it continues to protect you by guaranteeing payment of single benefits in the amount shown on the face of your 40th Anniversary Policy.

While you're talking with one of the Gulf Life Men listed below, ask him about this company he represents... and he's sure to tell you that Gulf Life now has more than \$500 million of insurance in force and that he's right proud of his company's record of service, its steady growth and financial strength—and the company's proud of him, too!

Our specialists will draw up for you, free of charge, wiring diagrams and kitchen plans to suit your individual needs and desires. If you're planning to build or remodel your home, call on us. We'll be happy to serve you.

Your house is not the one with the octopus outlets and trailing extension cords... or is it? That sort of thing is bad, you know... cuts down on the safety and efficiency of your electric equipment. It's wasteful, too... you're paying for the work Reddy Kilowatt does getting through the twisted wires instead of having his top-notch performance in your appliances. And the more appliances you get, the worse the situation becomes. With Adequate Wiring in your home you won't have this kind of trouble... not now, not in the future, either, no matter how many appliances you add. See us or your electrical contractor for details.
