THE COMPROMISE rent control bill as sent to the President doesn't amount to much. It continues controls for six months and permits local governments to extend them for another six months if they wish. As a matter of fact, according to all the press reports, the bill is not expected to pass.

Among the measures sent to the White House for signature are bills continuing the national synthetic rubber program for two years; one to provide for reorganization of the army to abolish the cavalry, one of the traditional and romantic branches of the service, and a bill which eliminates or softens most of the penalties for violation of the Hatch act.

Both chambers of the congress hurriedly passed a 35-day extension of the draft act beyond June 30 which was the expiration date. The extension was passed by a 3-2 vote in the senate and a 3-2 vote in the house.

It appears that the tax act, which has been approved by the house ways and means committee and which provides for a billion or more in extra taxes and an increase in corporation taxes, will become a partisan battleground before it gets through. The Republicans are in a quandary. They want to approve the tax act, but at the same time they want to protect their friends in the upper corporate income brackets, etc., that is those above the \$100,000 income brackets by defeating the corporate tax program.

Only two Republican senators, Cain of Washington state, and Hugh Butler, of Kansas, voted against extension of the social security act. Butler described social security as a "waste of money" and Cain said it was "tremendous beyond endurance." But practically nobody but the "reactionary" tab on the social security measure.

Florida's 4-Day Traffic Toll Is 7 Dead, 170 Hurt

Seven motorists died in Florida traffic accidents during the four-day toll on the state highway system, according to a report from the Florida Department of Transportation.

The death toll was lower than the 13 tolls set by the highway patrol, but the accident toll was reported to be the worst in Florida history. In the four-day toll, 170 were injured and 216 accidents were reported.

which extended the benefits to about 10,000 persons and doubled the benefits to about 1,000,000. Vote was 81 to 19 in the house and 74 to 26 in the senate.

As you can imagine, in a case like that, all my well intended resolutions to "stay home" this summer vanished. According to the schedule our party will leave Tampa on Tuesday.

Trans-Canada recently inaugurated a new route from Toronto to Miami via Tampa and Jacksonville. The new route is a Florida group to take the traffic and business from the service offered and the attractions that await the visitor in Florida.

But wait, that's not all. On top of that I received an invitation from my friend Rube, Alvin, Fish, Editor of the St. Petersburg Times, to join him on a cruise on his boat the "Waterbug" to the Gulf of Mexico.

I won't have to leave the state for that, and it promises to be equal in every respect to the trip to Toronto for we will be cruising the East Coast by water route, something I've always wanted to do.

Rube's boat is out of this world. It is his own design, built to his own specifications, and he calls it a Florida Waterbug. It is a sort of combination houseboat and luxury liner, and will be places and do things that no other pleasure boat was ever known to do.

It is a flat bottom, the hull having the appearance of a small barge, the superstructure looks like a houseboat and the thing is powered by two outboard motors and will do up to 10 miles an hour and carries only 5 inches of water. It length is only 20 feet.

'TOO LATE TO CLASSIFY'

By Russell Kay

I hadn't planned any vacation this summer. I had Florida on my mind, but I didn't plan to go there and take my vacation. I had a day or two off now and then to visit some other section of the state, get in some fishing and just have fun in the sun.

If anyone had told me a week ago that I'd be making a trip to Toronto, Canada in July I would have been very surprised. I had a new shirt that I was going to use to show how little we know about tomorrow.

It's funny the things that can happen to a guy who is just having himself and minding his own business, content with the world and things that are. With everything peace and quiet on the home front I received an important letter from Trans-Canada Airlines.

As you can imagine, in a case like that, all my well intended resolutions to "stay home" this summer vanished. According to the schedule our party will leave Tampa on Tuesday.

Williams - Skipper Marriage Held in Alachua, Fla.

Miss Ida Lee Williams, daughter of Mr. and Mrs. Carl Williams of Alachua, became the bride of Francis Henry Skipper, son of Mr. and Mrs. Otto Skipper of Avon Park, last Friday night at 6 o'clock in the First Baptist Church, Alachua. Officiating at the double ring ceremony was the Rev. Jack Dalton assisted by the Rev. Allen E. Younger.

The church was decorated with arrangements of white gladioli against a background of palms. White tapers in cathedral candelabra lighted the setting.

Preceding the ceremony a program of musical music was presented by Mrs. Doris Graham, pianist, and Mrs. Lucien Hutson, soloist.

Given in marriage by her father the bride wore a gown of white imported pail dangle lace and marquette over the bust. The bride, pointed in front at the waistline, had a bertha of lace and a yoke of marquette with pearl neckline. The skirt, with deep lace peplum, swirled into a long train. Her fingertip veil fell from a coronet trimmed with pearlized orange blossoms. The bride's bouquet was of white carnations centered with a white orchid.

Eagle Scout Pabor Tells Of Trip To Historic Valley Forge

By Edgar Pabor
My trip to the Jamboree has been a wonderful experience for me, and I would like to thank everyone that had a part in sending me, especially the Rotary Club and Troop 157. My trip would not have been possible without the help of these two civic organizations.

Monday afternoon, June 28, 1958, I left from Haines City on the A.C. Champion. We were scheduled to arrive at Gettysburg Station at 3:00 the following afternoon, but in the course of our trip we lost two hours in our schedule and didn't arrive until 5:00. When we got off the train, trucks were waiting to take our

Military enlistments also will be used to step up size of the various services.

The text of the short announcement made at the Pentagon follows:

"The situation in Korea, under recommendation of the Joint Chiefs of Staff, contained in the Secretary of Army, Navy and Air, and with the approval of the President, the army, navy and air force have been authorized to exceed the overall budget ceilings for military personnel."

This action constitutes:

1. First step to build up to full operating strength the units of the army, navy and air force to be used in the Korean campaign.

2. To provide further expansion of the military forces to meet the needs of the Korean campaign.

3. To provide further expansion of the military forces to meet the needs of the Korean campaign.

personal baggage to the campsite. We then walked three miles under a very hot sun. Our tents didn't arrive until thirty minutes after we had set up. The night we slept under the stars our first night at Valley Forge.

The next two days were spent putting up tents, dining, fire, camp, and just getting the camp shipshape.

Our days of Jamboree training were spent cooking over charcoal stoves, running around, and having fun.

Friday, the first official day of the Jamboree, our troop went to Philadelphia along with about 1000 other boys. We had to get up at 5:00 so we could eat, dress, and be ready to leave by 8:00. While we were in Philly, we saw Benjamin Franklin's grave, the Rose House, Christ Church, which was attended by Betty Ross, and Independence Hall, where we saw the famous Liberty Bell. When we arrived back at the station, box lunches were waiting for us. The had part of the lunches was that they had California oranges in them. Or should I say lemons? Back in camp that night we went to the arena and heard President Truman officially open the Jamboree. After his speech, a skit was given depicting Washington at Valley Forge. This was very interesting, made us realize better the hardships that Washington and his men really went through during this massive gathering of Scouts and Scouters officials opened the Jamboree.

Saturday we explored the camp, traded and had free time. Most of us wrote home for the first time.

Sunday morning the troop went over to the arena for Protestant church services. About 30,000 of the prettiest churches that we had of our sectional campfire. We had several speakers and a minister show. To end it, we had a skit entitled "Florida under Five Flags."

Tuesday was the day of our troop exhibit. We had boys dressed as Seminoles and displayed our two alligators. These caused much attention throughout the camp and had very many visitors. That night we went to the arena and saw a show on the building of our Nation. After this we heard General Eisenhower speak. He gave the order for the fireworks to begin and when they began it was really something. It lasted for about an hour and a half. Wednesday there was no planned program, so we just roamed around and did anything that we wanted to.

Thursday was the day when we started to pack up and get ready to come home. We spent all day in camp taking down tents and packing up. That night we went to the arena for the fourth and last time. We heard our Chief Scout Executive, Arthur A. Schuch, speak. He gave a very inspiring speech. There was a short program on the Scout crusade to "Strengthen the Arm of Liberty." The Jamboree was officially closed.

Friday was spent cleaning up our campsite and just waiting for the train. We left Gettysburg Station at 3:00 and arrived back at Haines City at 8:45 the next day. We had a very happy bunch of boys, with a better idea of what scouting really is.

In closing, I would like to thank again the Rotary Club and Troop 157 for a wonderful experience. About 30,000
