## TOO LATE TO CLASSIFY

By Russell Kay

The next legislature will probably be called upon to consider amending the law which governs activities of the Florida State Advertising Commission. This subject was discussed at a recent meeting of the Tourist and Development Committee of the Florida State Chamber of Commerce in St. Petersburg.

At the time the commission was set up its activities were restricted to the use of certain types of advertising and it was provided that all money must be spent outside of the State of Florida.

Prior to the establishment of the Commission, Florida had made a name for herself as an exhibitor with sensational exhibits at the World's Fair in Chicago, the Great Lakes Exposition in Cleveland and the New York World Fair. These displays, arranged and staged by the master showman Earl Brown of Deland, so far surpassed exhibits of any other state as to place Florida in a class by herself, the recognized and admitted leader in this field.

Results achieved were phenomenal. The outstanding exhibits enabled us to make direct personal contact with millions of people and the visual education, sold Florida as it had never before. Countless thousands of visitors were attracted to the state new industries of every type and character were attracted to Florida, investment in the state by the millions, all traceable to these exhibits.

Salad gardens, fruit and other Florida products in the areas where these shows were staged sharply increased. New markets were opened up and distribution improved.

Florida was the envy of every state in the union. Her exhibits ranked with those of Ford, General Motors, Firestone, and all other great national industries. So appealing was Florida's presentation that they generated nationwide press and radio publicity worth millions of dollars to the state. Never before or since has Florida received so much nationwide publicity.

The nearest approach has been through the efforts of more national magazines and in the metropolitan areas and news columns of more newspapers and trade journals than any other agency.

The world and the nation have come to recognize Earl W. Brown as the man who put Florida in their particular fields. Whoever you are, wherever you are, if it is an exhibit you want, the man to see is Earl Brown, and if you want the best in photography, news reels or television, anyone who knows will tell you to see Dick Pope of Cypress Gardens.

I doubt if there is any state in the United States that wouldn't jump at the chance to have two such able men on its Advertising Commission, a half a hundred great national advertising agencies, either of them and they could name their own price, but these men live in Florida and while they act as consultants to such firms as General Motors, Paramount, Pathe, the American Association of Railroads and many others, they prefer to live and work in Florida.

As Commissioners go, the Florida State Advertising Commission is as good if not better than those of other states. Funds at its command are limited and it has done a creditable job of orthodox advertising and publicity. Being political in nature, it, as all other commissions, must work under restrictions and handicaps that do not govern free agents such as Brown and Pope.

Lawmakers, enmeshed in politics, sincerely tried to set up a state agency that would do a real job for Florida. They feared to give it too much authority and saw fit to designate the kind and type of advertising and publicity it might handle.

Disregarding Florida's enviable and dominant position as an exhibitor, they forbade the use of State Advertising Funds for exhibits, sharply limited the amount that might be used for general publicity, hamstringing the Commission in other ways.

Governors in appointing members to the commission have never seen fit to recognize Earl Brown or Dick Pope and while the Commissioners are all fine and able men, and all sincere in their desire to do a real job for Florida, they do not have the genius, the vision and the experience of master craftsmen. This is no reflection on the commission or on the good men who are its members.

The next legislature would do well to consider carefully a re-vamping of the law to go on the use of exhibits to promote and publicize Florida and remove other restrictions that now curtail effective promotion.

The United States has 152 national forests that cover a total of 180 million acres of land.

## New Congressman

By Russell Kay

Chester B. McMullen

Chester B. McMullen of Largo, was an easy winner over Tom Watson in Tuesday's election to succeed J. Hardin Peterson in Congress.

## HIGH SCHOOL POW-WOW

By PAT LAGONI

The biggest issue at APHS this week is the election of Student Council officers for the coming year. The candidates, their campaign managers, and supporters are all out to make this the biggest election the school has ever had. Posters, signs, and other forms of campaigning were seen throughout the school. One campaign group even had a duck on the front campus quacking for a candidate for the presidency.

On Monday afternoon, the outgoing president, James Davis, introduced the candidates and their campaign managers to the student body. The campaign speeches were very impressive, and may have helped students to decide who the "best man" was.

The candidates for president were Charles Collins, Gene Cruise, and Douglas Fields. Bruce Spencer and Jack Ward were in the race for vice-president, and Margaret Roan was the only candidate for Secretary-Treasurer.

Tuesday students in the 9th, 10th, 11th, and 12th grades went to the polls for the big election and chose a very capable set of officers. Gene Cruise was chosen to fill the president's position, relieving James Davis. Bruce Spencer will replace Harry Hood as vice president, and Margaret Roan will take Anna Villkitta's job as Secretary-Treasurer.

The Red Devils were forced to give up their Ridge Conference title last Saturday night when they met the Sarasota Blue Streaks in the finals of the Ridge tournament, which was played here last week. The Devils made their way to the finals by defeating Kathleen and Haines City. The final game was nip-and-tuck and the way, but the Streaks came out on top by one run, giving them the conference trophy.

Which had been Avon Park's for five years.

Next Tuesday, Memorial Day, has been declared a holiday for Avon Park students and the Junior class will go on their class picnic to Sarasota beach.

The Devils picnic is to be this Saturday, May 27. Members of the club and their dates will be at the school buses early Saturday morning to go to Sarasota beach for the day.

Monday night of this week, the Red Scout Court of Honor was held at the high school auditorium. Edgar Pabor received the Eagle Scout award, one of the highest honors in scouting.

Last Friday was audio-visual day at APHS, and several visitors attended the regular change program, which was under the direction of Mrs. Sage, sponsor of the Projection Club. A short skit from "The Legend of Sleepy Hollow" was presented by 8-2. John and their dates were the dramatization for the skit, was featured as Iphigeneia Crane.

Book donations are welcomed by our town library.

## Births

Mr. and Mrs. R. L. Cleveland report the birth of a son, Gary Edwin, on Friday, May 19. Gary weighed 8 1/2 pounds at birth.

A son was born to Mr. and Mrs. Dorothy Lee Robinson, 2603 Kings Court, at Dr. Coleman's Clinic, on Saturday, May 20. The baby weighed 4 pounds 1 ounce.

Born at Walker Memorial Hospital on May 18 to Mr. and Mrs. Brantley Wilson of Sebring, a son, David Allen Wilson.

## Florida Mutual Will Meet Here

Growers members of Florida Citrus Mutual will pick the 21 men who will guide the big super-operative during the coming season at seven district elections to be held from June 5 to June 12.

In contrast to last year when all seven elections were held the same afternoon, this year's meetings have been arranged for different days to give Mutual's operating personnel an opportunity to attend each and explain the work of the divisions.

The Avon Park Meeting will be held Tuesday May 7 at 2:00 P. M. at High School.

The elections precede the annual meeting of Mutual to be held at Deland and Dick Pope of Cypress Gardens as geniuses in their particular fields. Whoever you are, wherever you are, if it is an exhibit you want, the man to see is Earl Brown, and if you want the best in photography, news reels or television, anyone who knows will tell you to see Dick Pope of Cypress Gardens.

I doubt if there is any state in the United States that wouldn't jump at the chance to have two such able men on its Advertising Commission, a half a hundred great national advertising agencies, either of them and they could name their own price, but these men live in Florida and while they act as consultants to such firms as General Motors, Paramount, Pathe, the American Association of Railroads and many others, they prefer to live and work in Florida.

## Rock-a-bye Baby!

Cradled in the arms of Ray H. Radley is a baby gassle which he found roaming alone in the desert of Saudi Arabia. Small gassles make good household pets. Radley is a truck driver for Trans-Arabian Pipe Line Company which is building a 3031 inch line to carry 800,000 barrels of oil daily from the Arabian American Oil Company's producing fields on the Persian Gulf to Sids, Lebanon on the Mediterranean.

## Health TOPICS

### EMOTIONS MAY CAUSE ILLNESS

Emotions can be helpful in the life of a man, but they also can be harmful and make him sick. Anxiety is one of the earliest emotions aroused. Not only does anxiety impair one's ability to enjoy life, but one's energy is used up in concentrating on the feared thing.

Hostility goes in several directions to produce disturbances of the upper and lower gastrointestinal tract and headache, ticlike movements, probably epilepsy and disorders of the skin, and plays a role in high blood pressure and other disorders. Feelings of inferiority are closely linked up with the basic emotions of love and hate. There are few people who ever feel quite satisfied with themselves, but in some persons the feeling of worthlessness can be so deep as to destroy the capacity of the psychic apparatus for maintaining physiologic equilibrium.

Ambivalence is a term given to the condition of directing both love and hate toward a person or the world in general. This mixture of emotions can, like the guilt, block off the benefits of straightforward, friendly and wholesome human relations. Guilt can kill the joy of living and may cause the patient to adopt a life of excessive self-sacrifice, which in the course of time produces physiologic disturbances.

The ambitious person does not necessarily have pathologic emotions, but he certainly runs the risk of being infected with envy or excessive competitiveness. These emotions tend to produce tension, and processes of financial and social success of many people has been paid for at a high price, the price of tension, which is prone to express itself through the nervous system on many parts of the body. These emotions play a large role in such conditions as diseases of the heart and blood vessels, migraine, high blood pressure

## GRANDDAD HAD A BETTER VOTING RECORD

→ Potential voters 21 and over - from Census records.

In 1896 when history relates that the election was held on a cold, rainy day, when the roads were bad and methods of transportation primitive, 85 percent of the potential voters of the Nation went to the polls. The issues were domestic. The graph above shows what has happened since. With the exception of the period 1920 to 1940 when the twin influences of radio and the late President Franklin D. Roosevelt were active the trend has been downward. This graph shows the desperate need for action by all citizens to protect our birthright of freedom... not on a partisan political basis but for the good of our democracy.

## The Poinsettia And Its Sisters

By C. S. Donaldson

The Great Spurge Family includes the Castor Bean, Fig, Rubber Tree, Calceolarias, Begonias, Poinsettias and many others, constituting 80 genera. The largest group by far is the Euphorbia genus, of which its best known member is the Poinsettia (*Euphorbia pulcherrima*). The Euphorbia shows great diversity of habit or growth, yet all have the same minute flowers, for example the gay colored bracts of the Poinsettia simply surround the tiny real inflorescence. The flowers are so small they can hardly be seen, while all real cacti have big gorgeous flowers. Another thing, all Cacti originated in America, while all cacti Euphorbia originated in Africa. As the Euphorbia constitute such an interesting group of plants a broad selection of them have been gathered from Florida, New Jersey and California and placed on the west porch of the Walker Memorial Hospital, Avon Park, for all to see. They are all properly tagged, and descriptions are here given:

**Euphorbia Pulcherrima.** The Poinsettia, whether bright red, pink or white. The specific name *Pulcherrima* is the Latin term for "beautiful." It has the long, common term *Poinsettia* in honor of Joel R. Poinsett of Charleston, a distinguished diplomat who while serving as the first minister to Mexico (1825 to 1829) brought these gorgeous plants. It is the Queen of the Euphorbias. In the U. S. Florida has developed the most colorful bracts and evolved the pink and white types.

**Euphorbia Pulchella.** This may well be called the Princess of the Euphorbias. It is strictly a pot plant, very dainty with slender stems massed during winter with almost dime-sized scarlet bracts. It is in high demand in Florida collections. Its specific name comes from the same Latin word that gives us the English "effulgent." It means bright rays.

**Euphorbia Heterophylla.** Often called the Hypericite Plant, a name given to it is pretty especially in massed effect. Its better name is Mexican Fire Plant. While its big sister the Poinsettia was imported by man, this came on its own, traveling a few miles a year until it is established all over Florida. Its name *Heterophylla* is from a Latin term meaning various leaved—leaves of more than one shape. From the same Latin origin we have our English word, Heterogeneous.

**Euphorbia Marginata.** This is the well known Snow-in-the-Mountain of the Southern States. Its white-margined leaves lend soft beauty to any floral exhibit, and should be a popular winter plant in sunny Florida. Apparently it is the only Euphorbia native to the U. S. originating in the Missouri river area, while the three previous succulent Euphorbias came from south of the Rio Grande.

Now we come to a group of succulent Euphorbias all from the region of the Indian Ocean.

**Euphorbia Lactea Havensis.** This may be called the King of the Euphorbias, making heavy growth of stiff, angled branches. Its white mottled markings vividly led the naming botanist to term it *Lactea* or milk white, the being milky in color, Origin India.

**Euphorbia Tirucalli.** The most tree-like Euphorbia will grow in South Florida to over a foot in diameter, and may be seen in Avon Park yards. Its knitted, needle branches grow in a whorl, possibly resembling a wagon wheel or tire. However, the writer has not been able to find the origin or meaning of *Tirucalli*. The Library of Congress in Washington could not figure it out and sent the problem over to the botanists of the Smithsonian Institution who were also puzzled and sent an inquiry over to South Africa where a scientific botanist near point of origin may know. It is known as the Indian Tree Spurge.

**Euphorbia Xylophylla.** The botanist who named this must have been a musician because he coined the specific name based on the Xylophone; its flat branches suggest the graduated bars on this musical instrument. It comes from Madagascar and forms minute leaves which soon drop off, leaving bare blades. Explorers in Africa have complained about running into thickets of "vile, thorny cacti," whereas no cactus ever grew on that continent. They were all Euphorbias, and all are of highly varied grotesque growths. Here is a collection of the most interesting species.

**Euphorbia Splendens.** The well known Crown of Thorns which makes such a splash of scarlet in many yards. However, it is not the Crown of Thorns which Christ wore, which was a thorny Acacia. The specific name means simply, "splendid." To the close observer its flowering is unique for when it starts its new blooming period the first flowers are in pairs, but those which follow are each time increased in numbers so that those which open last are commonly eight in number.

**Euphorbia Lophoglossa.** This lit-

tle cactus plant is very rare and grows slowly — this specimen started life about 1925, yet is so vigorous that it is in bloom constantly, the bracts a soft pink. The word *Lophoglossa* means "crested," alluding to its small crown topped with bloom.

**Euphorbia Hemisphaerica.** This tall species is used by African natives for totum poles and for building defensive hedges, and also for poisoning arrows.

**Euphorbia Acaesata.** A branching shrub. The Latin specific name presumably means "sharp spines."

**Euphorbia Hepiagona.** The Greek word *Hepiagona* means seven sides. This species has strong yellow thorns.

**Euphorbia Pseudocactus.** The name of this species indicates that it tries to be round or spherical and tends to a peculiar pendant growth.

**Euphorbia Valida.** Its specific name means "strong."

**Euphorbia Melanocarpa.** One of the three cactus Euphorbias of Bobbitt, this in Latin term *Melanocarpa* indicates that it is inclined to black color.

**Euphorbia Globularis.** Marked like a piece of gingham. Obese means "fat," or "round."

**Euphorbia Pseudocactus.** Its given names indicate a "false" cactus. It is probably marked with sharply angled ribs.

**Euphorbia Grandicarpa.** Called the most striking of all cactus Euphorbias. It has the longest spines and widest wings of all. Its Latin name indicates a grandiose effect.

**Euphorbia Resinifera.** This 4-angled species makes many branches and as its name indicates yielded the gum and salve of the ancients.

**Euphorbia Caput-Medusae.** Major. The naming botanist thought the branches looked like snakes and he named it for an unfortunate woman of Greek and Roman mythology. *Caput* means "head," and the *Medusa* was a Gorgon who had incurred the ill-will of the Goddess Minerva to whom beautiful temples were erected, was sentenced to having her hair turned to snakes. The tiny flowers of some species are of deeper color but shaped like its sister the

**Euphorbia Caput-Medusae.** Commelinii. This resembles the foregoing, but is much smaller and its snakes are quite small. The added name *Commelinii* is for a German botanist.

**Euphorbia Corallacea.** This grows low and shrubby. Its given name means "blue" and it has a bluish cast. Its thorns are especially stiff and hands offish of the type African travelers dislike.

**Euphorbia Mammillaris.** This is called the Cereus Euphorbia which it resembles. Its given name means "productive."

**Euphorbia Echinus.** A branching shrub. Its spines are in pairs, set to gray. *Echinus* means "prickly."

**Euphorbia Grandident.** This has the most marginal spines, slender branches, triangular trunk. It should grow "big" or "grand" as its name indicates.

## A Tribute

Mary Steele Ewing, wife of the late Dr. W. H. Steele, was born January 4, 1871 in Cecil County, Maryland. Her parents were John and Mary Steele of Pennsylvania but her forbears came to this country during the persecution of the Quakers and was annulled in 1681.

Mary Steele, as she was called by her relatives and family friends, exemplified in her infant body the stern adherence of her relatives to their divided faith for one set were Presbyterians and the others were Episcopalians.

Both sets claimed the infant Mary Steele for their church, so she was christened twice, once in the Presbyterian faith and once in the Episcopal. Later in life she and her husband were members of the First Methodist Church in Avon Park and there is a memorial window for him, placed there after his death.

She afterwards reverted to and remained a loyal Episcopalian.

Mary Steele was educated chiefly in Boston and for a time was assistant bacteriologist for the U. S. Army at the Army Medical School in Washington, D. C.

She ended in the death of her fiancé when she traveled in 1902 to Arcadia where she lived in a small grove and house. At this time she came to Avon Park and also about this time her mother, her sister, Miss Elizabeth Ewing and herself went to Europe where Mary Steele for about two years studied the French language at the Sorbonne, the seat of the public speaking courses of the Sciences and Letters of the University of Paris. Returning home she located in Jacksonville, Fla., where she met and married Robert Wade Swearingen.

He came to Avon Park in 1913 and invested in property that had once belonged to the noted actress, Minnie Maddern Pike. This home burned and was bought by the present owner, Lake Tulane from Marian Whidden. This was altered and enlarged.

Her husband died there in 1923 and her sister gave up her home in Atlanta, Ga., and came to live there with her and her mother, who died in 1927.

Swearingen served two terms as Mayor and was Director and President of the Avon Park National Bank, which the bank failed in February, 1929. Mrs. Swearingen, then a widow, obligated her husband by selling stock to the amount of \$9,000. By selling some of her grove property and taking a Federal loan, by selling clay from a pit she owned, by establishing an insurance agency and becoming a good manager, she paid off the bank obligations, redeemed her home, and sacrificed her health. Always of a bright social nature, and loved by many friends, she lost interest after the severe mental and physical strain she had endured, and was ill three years before she passed away April 30, 1950. Her sister, Miss Elizabeth Ewing, is her only survivor. She will accompany the remains to the ancestral home in Maryland where her ancestors of many generations sleep in peace.

## AVON PARK SERMONETTE

By Rev. Frank Butler

He said unto them, Have ye received the Holy Ghost since ye believed? Acts 19:2

Conversion is the turning of the whole self from sin to God. But the converted man needs spiritual equipment for his warfare against the seven deadly sins (Pride, Envy, Anger, Covetousness, Gluttony, Lust, Sloth) and it is God the Holy Spirit who furnishes him with the weapons. God the Holy Spirit comes to help man live the kind of life God intends him to live. His special work is to reproduce Jesus in human souls. The sevenfold gifts of the Spirit enumerate the spiritual forces needed for true holiness.

Holy fear is reverence for God. Godliness means devotion to God. Wisdom is nothing other than the desire for God. The gift of Understanding brings insight into the mysteries of God. Knowledge is the ability to see the things of God's creation in their proper relation to God and man. Counsel is the very practical wisdom to choose in every situation what thought, word or deed is most pleasing to the Father. Supplicating them all is Ghostly strength, the power to continue in the way of heavenly virtues.

How can we tell when the Holy Spirit is working in us? Chiefly by our ability to see the Holy Spirit working in others, and by perceiving within ourselves the fruits of the Spirit: Love, Joy, Peace, Longsuffering, Gentleness, Goodness, Faith, Meekness and Temperance in all things.

The Holy Ghost is chiefly active within the fellowship of the worshiping family of God. There he restores the penitent, converts the wayward and strengthens and sanctifies the faithful, preparing them for their final end—"to know God and enjoy him forever."

By this shall all men know that ye are my disciples, if ye have love one to another."

Reforestation is the process by which man helps Nature to restore forest cover where the natural timber stand has been destroyed or allowed to deteriorate excessively.

Remember, folks—only YOU can prevent forest fires in Florida. Give our wildlife a place to live—Keep Florida Green.

## WEEKLY BUSINESS REVIEW

A definite increase in per acre yields of Florida fruits and vegetables resulted last year in the production of 5,814,900 tons of food and feeds, the Florida State Chamber of Commerce reported yesterday.

Florida farmers and growers have averaged a greater per acre harvest from the seven leading agricultural crops in Florida since 1940 than they did during the ten years prior to 1940.

Soil and plant research, followed by practical applications of the findings, is credited as the prime reason for the increased current yields in this week's business review of the State Chamber's research and industrial division.

Specific crops for which comparable acreage figures are available show: lima beans up from 69 to 82 bushels per acre; celery from 470 to 480 crates; lettuce from 141 to 151 crates; cabbage from 6 to 8 tons; cucumbers from 92 to 105 bushels; eggplant from 241 to 264 bushels; peppers from 27 to 28 bushels; tomatoes from 100 to 125 bushels; potatoes from 120 to 135 bushels; peanuts for shelling from 558 to 775 bushels; watermelons from 268 to 283 melons and tobacco from 847 to 908 bales. Corn, various hays and most field crops are also showing improvement. In only a few crops is a decline recorded.

T. M. Morris, supervisor of rules for the Seaboard Air Lines Railroad, has retired, according to S. H. Sauls, general manager of the line.

The Holy Ghost is chiefly active within the fellowship of the worshiping family of God. There he restores the penitent, converts the wayward and strengthens and sanctifies the faithful, preparing them for their final end—"to know God and enjoy him forever."

By this shall all men know that ye are my disciples, if ye have love one to another."

Reforestation is the process by which man helps Nature to restore forest cover where the natural timber stand has been destroyed or allowed to deteriorate excessively.

North America, which contains about one-twelfth of the world's population, uses about one-half of all the timber in the world.

Rayon, or artificial silk, made chiefly from wood, was first manufactured commercially about 45 years ago.

Florida farmers and growers have averaged a greater per acre harvest from the seven leading agricultural crops in Florida since 1940 than they did during the ten years prior to 1940.

# Clubs

## Kindergarten Closing Exercises

Robin Duggan, Judy Martin, Jackie Seims, Pat Touchton, Jackie Turner, Nancy Coleman, Joey Hevis, Ann King, Donny Whitcomb, Betsy Ginn, Tommy Felkner, Karen Kirkland, Bill Woodard, Klubberg.

## Mother Goose Comes To Life At Kindergarten

Many Old King Cole, in his purple robes and golden crown, came to life at the closing exercises for the Kindergarten School last Friday evening, May 19, at 7:15 P. M. He sat on his throne, in the person of young Bill Ward, and as he called for his pipe and his bowl, his fiddlers and dancers, his commands were obeyed by the other children of the kindergarten school.

"Mother Goose Comes to Life" was the theme of the evening's program, with Mrs. M. G. Whitcomb officiating as kindergarten and Mrs. Nels Klubberg as pianist. All the small girls were charming in long pastel dresses, and the boys wore long white trousers and blue jackets, that they might be in character for the program. They entertained their families and relatives under gay decorations of yellow crepe paper and multicolored balloons.

The program began with Jackie Seims chanting a rhymed verse to the guests. The rhythm band then played two numbers.

Four episodes from Mother Goose were pantomimed by members of the school, with the rest of the children singing the appropriate songs. Nancy Coleman, Tommy Felkner, Judy Martin and Jackie Turner were the announcers.

Betsy Ginn as Little Miss Muffet was properly frightened by Spider Jackie Turner.

The King's Horses—Jackie Seims, Robin Duggan, Tommy Felkner and Joey Hevis—galloped to the assistance of Humpty Dumpty, played by Donny Whitcomb.

Ann King in the role of Mistress Mary received her guests, Judy Martin, who asked for flowers, and the other little girls who were the flowers, and they gave most vigorously when Mistress Mary watered them with her sprinkling pot.

The last episode showed King Cole on his throne. Following "Mother Goose," the children played a singing game, "Round and Round the Village," with Pat Touchton and Joey Coleman as leaders.

The grand finale was an action song, "Up Pops the Moon." Each child held a yellow balloon on a stick, and popped up their "moons" in keeping with the words of the song. And, when the sun at last arose and displaced the moon, each balloon was popped with a pin, the program literally ending with a bang.

## Ethel Ames Circle Meets

The Ethel Ames Circle of the W. S. C. S. held their monthly meeting at the home of Mrs. J. N. Tormann with Mrs. C. De Shong as hostess. Mrs. J. C. Mathews led the devotional, Mrs. F. Perkins a guest of the circle, gave a very inspiring book study on "Women of the Scripture".

New officers elected for the coming year are Mrs. J. C. Mathews, President, Miss Millie Pearson, Vice President, Mrs. G. E. Crawford, Treasurer, Mrs. R. C. Ann, Secretary.

Those attending this meeting were Mrs. D. Reddick, G. E. Ford, R. Mizell, H. Nute, C. Mathews, C. Shong, J. Tomlinson, Miss Millie Pearson and R. Cason.

Mr. and Mrs. Clayton Fields, Jr., and baby daughter, Lynn, are home for the summer. At present they are staying with Mr. Field's parents, Mr. and Mrs. Clayton C. A. Fields.

# Social Activities

# Personal Items

## J.O.Y. Class Holds Regular Meeting

The regular meeting of the J.O.Y. Class of the First Methodist Church was held Thursday May 18, at the home of Mr. and Mrs. Virgil Tundee, 1900 W. Pleasant.

Mr. Harold Nute presided over the business meeting, in the absence of Mrs. I. H. Ford, president of the class. Rev. L. M. H. McMullen was in charge of the program. After the business meeting a going away gift was presented to Mrs. Eleanor Nussbaum, who will be leaving Avon Park soon. Following an enjoyable social hour, the hostesses, Mrs. Tundee and Mrs. G. L. Harrison served delicious refreshments.

Those present were Rev. L. M. H. McMullen, Mrs. O. F. Workoff, Mrs. Eleanor Nussbaum, Mr. and Mrs. Harold Nute, Rev. and Mrs. H. E. Garrett, Miss Mildred Peterson, Mrs. George Crawford, Mrs. G. L. Harrison.

## Meeting of Triple Link Club

The Triple Link Club held its regular monthly meeting in Tuesday evening, May 23, at 28 South Main Street. A social hour was served before the business meeting.

Three visitors, Mrs. A. W. Workoff, Mrs. A. W. Workoff, and Mrs. A. W. Workoff, were present for the following year, and it was announced that election of officers will be held on the next meeting, which will be June 27.

## METHODISTS TO MEET AT LAKELAND

More than 1000 Methodists of Florida, including pastors, their wives and lay delegates, will meet in Lakeland June 2-6 for the annual Florida Conference of the Methodist Church.

Florida Southern College here, which was founded by the conference in 1885, will be host to the conference, it was announced by President Ludd M. Spivey.

Principal speakers for the conference will be Dr. Roy H. Short, presiding bishop for Florida and C. De Louie Newton, former president Southern Baptist Convention; Dr. Thomas D. Bailey, superintendent of public instruction of Florida; Dr. G. Ray Jordan, professor at Emory University and Dr. H. P. Powell of Raleigh, N. C.

At the conclusion of the five day meeting appointments will be made for approximately 500 Florida Methodist churches.

Mrs. R. A. Craig left Thursday, May 23, for her home in Pound Mill, Virginia. She spent the winter with her sister, Miss Mattie W. Tompkins.

Guests were Mesdames Lee Shackelford, J. L. Landress, Sam Longbottom, J. R. Wells, John Mathis, W. C. Touchton, B. F. Martin, Cora Wray, McKee, E. well, Cynthia, Gallant, Bob Adams, R. C. Adams, M. Martin, John Singletary of Bartow, Darrah Martin, H. L. McCully, Edwin Ford, Cliff Thomas and Miss Edie Camp.

## Glenn Whitcomb Achieves Honor

Glenn Whitcomb, son of Mr. and Mrs. M. G. Whitcomb, was recently made president of Sigma Tau, national honorary engineering fraternity. The membership of this fraternity includes all types of engineering students, such as chemical, electrical and mechanical engineers. There are approximately 80 members from various parts of the country. Selection of members is based on the student's high scholarship, practicality and leadership.

Mr. Whitcomb is the son of Mr. and Mrs. M. G. Whitcomb, and he is now studying chemical engineering at the University of Florida in Gainesville.

## Mrs. Coen Presents Pupils In Recital

Mrs. J. B. Coen, Jr., will present her piano pupils in two recitals. The elementary recital will be on Thursday, June 1, at 8 P. M., and the advanced recital on Monday, June 5, at 8 P. M. There are no admission charges, and anyone interested in music is cordially invited. Recitals by the pupils of Mrs. Coen have been an annual event in Avon Park for many years.

## Former Resident Entertained

Mrs. Alma Lanie, who is visiting here from Tampa, was entertained Monday evening, May 22, at a bridge and conversation party given by Mrs. Raymond Dilley at her home.

Mixed flowers were the decorations and refreshments of lime fruit and cookies were served.

Those present were Mesdames Hester Sellers, T. J. McGinnis, Katherine Kerner, C. E. Clark, C. H. Pardee, W. D. Dornine, John H. Hood, Harry Dilley, Ida Ott, E. F. Armstrong.

## William C. Gilman Elected President Florida Power Corp.

R. R. Brown, manager of Florida Power Corporation, announced today that William C. Gilman was elected president and a director of the utility effective June 1.

Gilman succeeds A. W. Higgins, who has been president of FPC since 1937. Higgins will celebrate his 75th birthday on May 31, and the Board of Directors decided to relieve him of his responsibilities on that date.

Gilman, who is 51 years of age, comes into the presidency of Florida Power with a long record in the public utility and investment field. He graduated with a Bachelor of Science degree from Massachusetts Institute of Technology in 1922 and the following year received a Master's degree from the same university.

After graduation from MIT Gilman was associated with the General Electric Company, Central Hudson Gas and Electric Company and the Carolina Power and Light Company. In 1935 he became director of the public utility division of the Securities and Exchange Commission.

Mr. Gilman established W. C. Gilman and Company in 1937, a consulting engineering firm. His organization has been retained by large utilities, insurance companies and investment banks. During the past 10 years he has worked on the Florida Power Corporation properties and thus has become well acquainted with the company and the territory it serves.

"Of course I am delighted to become officially associated with such a fine utility as the Florida Power Corporation and working with men and women of the company, I feel that Florida Power will continue to grow and expand its services to this rapidly growing state."

R. R. Brown also announced that Mr. Higgins would remain with the company in a consulting capacity.

Mr. and Mrs. John Bartlett of Red Bank, N. J., stopped off on Sunday, May 14, to see Mrs. E. O. Knight and Miss Olive L. Knight. Miss Knight, continuing with them to Key West, Miami, and Ft. Meyers. Mr. Bartlett will be remembered as having been stationed here with Bomb Group 336 during the early part of the war, and Mrs. Knight returned home May 20.

REV. M. D. DURRANCE

Rev. M. D. Durrance was ordained member of the First Baptist Church, Avon Park, May 19, 1949. He is a native of Florida and has been a member of the church since 1928. He is a graduate of the University of Florida and has a Bachelor of Divinity degree from the same institution. He is currently serving as the pastor of the First Baptist Church in Avon Park.

## CRIPPLED CHILDREN RECEIVING BETTER CARE

Many of the children who are crippled in Florida are receiving better care than ever before. The Florida Crippled Children's Society, which has been working for many years to improve the lives of these children, has recently received a grant from the Federal Government to help them in their efforts.

The society has been successful in securing better medical care for these children, and in providing them with the necessary equipment and services to help them live more normal lives.

## A Proclamation

Whereas, citizens of the City of Avon Park served gallantly in the defense of the United States of America in two world wars and many sacrificed their lives in that service; and

Whereas, the memory of those who so died will always be held in highest honor in this city, and will always be a source of patriotic inspiration for us all; and

Whereas, this memory is brightened each year and honor paid to the war dead by the wearing of the Memorial Poppy on the Saturday before Memorial Day; now

Therefore, I, Wiley Sauls, Jr., Mayor of the City of Avon Park, do hereby proclaim Saturday, the twenty-seventh of May, to be Poppy Day in the City of Avon Park, and urge all citizens to observe the day by wearing the Memorial Poppy.
