WHAT ABOUT The FUTURE?

★

A NOOSE ON YOUR NECK?

How does it feel, do you suppose, to hear a judge say—not to someone else, but **to you**—"I sentence you to **be hanged** by the neck until **dead!**"

Probably you do not know—or you likely wouldn't be here to read this today. But you can imagine—and shudder!

What a numbing realization must come: absolutely severed from the simple pleasures of—just living—by the jerk of the noose.

But above all, what must be the bitterness of the realization that your presence in the world is no longer desired. Bitter it must be to realize that your fellows detest you enough to kill you.

Depressing to think about, isn't it?

Out of Joint

Why would society choose to banish an individual anyway? For the simple reason that it has found that individual so out of joint with the rules of safe conduct that it feels more secure with him put out of the way—and it probably is.

Could it happen to you, do you suppose? That depends primarily, of course, upon yourself. You can choose to obey the laws of a free land, and remain free (odd thought, isn't it—having freedom by obeying laws?)— Or you can choose to violate the laws, flaunt the order of society—and incur the penalty.

The Bible clearly forecasts a perfect world order, soon to be established upon the ashes of this present one. We do not know exactly when it will be established—we only know from the Bible, that it will be startlingly soon!

Listen: In that new and perfect world—no imperfection could possibly be tolerated. It would be foreign. Can you imagine God's new world inhabited by immortal sinners? Of course not.

Then, let's be logical. Before that perfect and eternal order is established, there has to be a sifting process to determine just who, among the multitudes of the centuries, is worthy to enter into it. By the same token, it must be decided just who is unworthy.

This Is It!

This is the judgment, friend! Can you measure up to its great standard: The Law of God?

The great sifting process is now going on. The Bible declares that in these days preceding the return of Christ and the End of the World—"The hour of His judgment is come." Rev. 14:7. The process will be completed before the End of the World—and your eternal fate decided: an eternity of contentment in the new world, or eternal extinction. No alternative.

Before Christ returns to this earth, a fateful announcement will be made: "He that is unjust, let him be unjust still: . . . he that is righteous, let him be righteous still . . . behold, I come quickly; and my reward is with me." Rev. 22:11, 12

It will not be long now! But listen, what if it were a thousand years? Your death is the end of the world for you!

How do you stand? The future is far from hopeless with this assurance: "The world passeth away . . . but he that doeth the will of God abideth forever." I Jno. 2:17. A new world and a new life, coming, friend. It is yours for the asking. **(Next: Is Heaven a Humbug?)**

This is No. 4 of a series, telling briefly of the beliefs and hopes of 700,000 of your Seventh-day Adventist neighbors and friends.

Special Permits For Hunting In Ocala Forest

Tallahassee — Special permits for hunting in the Ocala National Forest from December 6 to 31 will be available only from County Judge D. R. Smith, of Ocala, this year, according to Coleman Newman, director of the State Game and Fresh Water Fish Commission. Permits will go on sale about November 15.

Hunting will be permitted in that part of the forest not included in the Federal Game Refuge, with the first five days open to hunting, and Mondays, Tuesdays and Fridays closed thereafter. Special permits, costing $2.00 for persons under 18 and $5.00 for persons over 18, will be required in addition to the regular hunting licenses.

Bag limits this year will include one bear, or one panther, or one buck deer with one or more visible antlers. Other game species may be taken according to State and Federal regulations. Both turkeys and marsh hens will be closed, and .22 rim-fire rifles will be prohibited in the taking of deer.

Warning that we are entering an era which could be the most critical small business in the food industry has ever faced, J. Frank Grimes, president of the Independent Grocers Alliance of America, told retailers that unless the smaller independent grocery stores receive some practical help quickly, "they will face a doubtful fight for their very existence."

Poultry Industry In Florida

The poultry industry in Florida ranked fifth as a revenue producer in 1949 and has made rapid strides in recent years. Poultry producers have more than $50,000,000 (Fifty Million Dollars) invested in land, houses, equipment, and stock of birds on hand, so reported by the Florida Poultry Council. This does not include what egg dealers and poultry processors or storage operators and wholesale dealers have invested in plants and equipment.

The annual product, which includes eggs, broilers, chickens and turkeys, has a gross Florida farm value of more than $25,500,000 (Twenty-five and one half Million Dollars). The farm value of poultry meat, including broilers and fryers, was the largest single item of farm income for Florida poultry producers and accounted for $12,500,000 (Twelve and one-half Million dollars) of this income. The total estimated volume of poultry meat produced in Florida in 1949 amounted to approximately 37,000,000 pounds.

The next largest farm income for poultry producers came from eggs. The yearly production was slightly over 249,000,000 eggs or more than 20,000,000 (Twenty Million) dozen. The gross farm income from eggs was almost $12,000,000. Many old-time poultrymen have increased the size of their flocks and many new flocks have been started especially by Veterans; some of the Vets have migrated to Florida after getting out of the Army. They were here during the War in training camps and liked Florida, so they returned as civilians to make their homes here.

POSITION CLASSIFIER GS-7 AND GS-9

A Civil Service examination for position Classifier Jobs in the Federal Service at salaries of $3825 and $4600 a year was announced today by the Fifth U.S. Civil Service Regional Office, Atlanta, Georgia.

No written test is required. Competitors will be rated on a scale of 100 on the extent and quality of their experience and training relevant to the duties of the position. In addition to three years of responsible personnel or administrative experience required, applicants for the $3825 job must have had at least one year of specialized experience in position classification and job analysis. For the $4600 job an additional one year of specialized experience of the same general type is also required.

Further information and application forms may be obtained from the commision's secretary, Gladys H. Smith at the Postoffice. Applications must be on file with the regional director, new Post Office Building, Atlanta, Georgia, not later than the close of business on November 21, 1950.

FARMERS FOR DEFENSE

Farmers are being urged to be very careful with their farm and motor equipment - with the shortage of steel many parts will be hard to replace.

Steel like food is needed in our defense and all must be preserved and taken care of stated Asher Frank, Director of the Florida Safety Council.

With the shortage of man power every precaution must be taken to protect the worker. Equipmen must be kept in good condition and operators must be careful at all times.

Tractors and farm equipment continue to be the chief cause of death and injury on the farms.

Children should be kept off tractors while in operation and operators must not oil or make any adjustment while motor is running.

Reports show that a 2 yr. old child near Bradenton was killed, 2 young boys near Seffner were severely injured, a boy from Wildwood lost his arm and a farmer at Homestead was killed and many others injured throughout the state.

CALDWELL NAMED SIGMA DELTA CHI "ROASTMASTER"

Gainesville — Political figures will get a ribbing from one of their own number this year at the University of Florida Sigma Delta Chi Gridiron Banquet, Nov. 25.

Former Governor Millard Caldwell will fill the traditional role of "roastmaster" at the annual dinner sponsored by professional journalism fraternity.

Originally scheduled to follow the Florida-Georgia football game, the banquet has been postponed until November 25, following the Florida-Alabama game. It will be held in the Grand Ballroom of the Seminole Hotel, Jacksonville.

The banquet has been a yearly gathering of some of the state's top political figures and newspapermen. It is an off-the-record affair in which the politicos are the butt of jokes and skits by the newsmen.

The all important fact that distinguishes the forest resource from most of our other natural resources - such as coal - is its ability to grow new stands of timber as old ones are cut.

This Week In Tallahassee

By J. Kenneth Ballinger

Tallahassee — The state supreme court has heard arguments in a case which may determine most future rate making for public utilities, and now is preparing its opinion. In this case, the Jacksonville Gas Company has sued the state railroad and public utilities commission, contending they ought to be allowed to charge rates for gas service based on the "present fair value" of their properties. The utilities commission is contending that rates for gas, and for telephone and transportation and other services also, should be based on what the utility actually paid for its property, plus additions from time to time, and minus reasonable depreciation. On this decision may rest the question of whether all utility rates sharply increase, if the Jacksonville Gas Company side prevails, or if they remain on a more moderate basis, if the railroad and public utility commission argument prevails.

• • • •

Tallahassee — Attorney General Richard W. Ervin this week gave his opinion on the following general questions:

GAMBLING—It is not unlawful to own and operate a pin ball machine that doesn't dispense free games or anything else of value.

ISLANDS — The island of Dry Tortugas is within the area of Florida and therefore shrimp grounds around it may be regulated.

NEPOTISM — Person related to two members of county board may not be employed if either member has employed another close relative.

SIGNALS—State controls placing of signal lights and signs on state highways passing through cities.

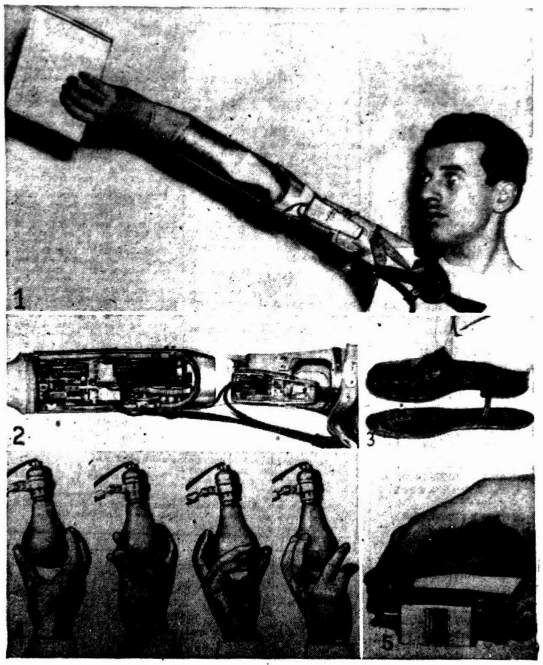
CENSUS—Last state census controls population laws.

WIDOW—Tax exemption cannot apply to unremarried widow of man killed in World War II, because exemption specifies "veteran".

• • • •

Tallahassee — William H. Cates, chairman of the Florida Department of Veterans' Affairs, has announced that service activities of the Veterans of Foreign Wars has again been merged with the department. Claims, hospitalization and other matters in the future will be handled for VFW as for other former service men and women, in the department office here.

ELECTRICAL ARM — INDUSTRY'S GRATITUDE TO AMPUTEE VETS



While it will not be available for some time, this electrical arm and hand (1) has been developed by International Business Machines Corp., in cooperation with the Veterans Administration. IBM announced the development as a token of gratitude to amputee veterans. The electric mechanism is housed in the forearm (2) and arm movements are controlled by pressure upon pneumatic bladders (3) under the big and little toes. The arm and hand make almost all the natural movements of the human arm and hand, and some the latter cannot. The nylon hand (4) can be rotated continuously at the wrist. A 8½ ounce electric motor (5) occupying 2 cubic inches was designed for the arm. Power is supplied by a battery that can be recharged overnight.

"WHAT D'YA MEAN...MORE PAYLOAD?"
DODGE "Job-Rated" trucks GIVE IT TO YOU!
DODGE

IT'S A MATTER OF
better weight distribution

You can haul more payload than ever in a Dodge "*Job-Rated*" truck, because the load is better distributed. Most trucks carry too much of the load on the rear axle—too little on the front. Because the engine of a Dodge "*Job-Rated*" truck is moved forward and the front axle back, *both* axles carry the right proportion of the load. That means you can haul *bigger payloads* without overloading.

NOT THIS The payload on most trucks—like the girl in this boat—rides too far to the rear. Result: there's too much weight aft, not enough forward.

BUT THIS In "*Job-Rated*" trucks, the load is moved forward—as the girl is now positioned. Results: proper weight distribution—bigger payloads—easier handling.

"SMALL BUSINESS"

By C. WILSON HARDER

Small businessmen are reporting signs of a business slump. While mounting prices are a contributing factor there is a greater primary cause.

* * *

"We are being jaw-boned into a depression," observers say. They point to the great number of bureaucrats, from cabinet rank on down, who miss no opportunity to cry "Wolf."

* * *

An example of this is the statement by Commerce Secretary Sawyer that heavier taxes, serious shortages, and business controls can be expected for many years to come.

* * *

Observers say Sawyer may or may not be a competent Commerce Secretary. But all agree he is ill-equipped to assume the role of a prophet; even less qualified in international relations.

* * *

It is pointed out that bureaucrats were almost openly scornful when Gen. MacArthur in July said the turn in Korea had been reached.

* * *

Yet, MacArthur with inspired American fighting men scored a success. But since the end of World War II in 1945 no single bureau plan for the promotion of peace has succeeded.

* * *

According to all reports, there is now a concerted drive to keep war scares and rumors flying so that the people will not get curious about domestic affairs.

* * *

Responsible military men are saying nothing. Some did explain how peace could be secured; were immediately cracked down on by bureaucracy.

* * *

The facts are that socialistic planners have been uncurbed too long. That's the reason for the present inflation.

* * *

Now there's only two alternatives. One is to honestly admit what has happened. The other is to further socialize private enterprise.

* * *

Washington observers don't look for honesty. They see, instead, the drive under way to further socialize America being pushed.

* * *

The plan is "Scare them to death, and a frightened people will sign away their freedom."

* * *

In the meantime, bureaucratic spending of taxes takes weird forms. Now, it develops Marshall Plan funds are being used to play traffic cop to the world.

* * *

ECA Bulletin #6 reports that Marshall Plan funds have been used to build a traffic inspection station in Athens so Athenian police can check vehicle registration, license plates, brakes and lights.

* * *

Use of American tax dollars for such purposes could create a storm that would topple over entire bureaus.

* * *

So public attention is kept focused on a constant series of alarms. Loud mouthed bureaucrats fail to realize they are shattering public morale; slowing down the American economy.

* * *

And this fact may cause the eventual disappointment of Socialist planners.

* * *

For when, and if, they take over the goose that laid the golden eggs—independent American enterprise—they may find the goose died from fright.

Tallahassee, Fla.—Forrest Davis, Jr., 21 Quincy, named Star Farmer of America at the Kansas City convention of the Future Farmers of America, came home to a rousing welcome when he was met by Governor Fuller Warren, Gadsden County Tobacco Festival Queen Inez Sheffield and a host of fellow townsmen. An old fashioned barbecue was held at the Quincy baseball park and the town declared a holiday to honor the young shade grown tobacco farmer. Davis has been farming for eight years and has netted more than $45.000 from his efforts.

Special Meeting of Episcopal Church

A covered dish dinner and a Special Meeting of the entire Parish will be held in the Parish House of the Church of the Redeemer Tuesday evening, Nov. 14, at 6:30 P. M. As a representative of a force of two thousand carefully selected and well-trained laymen of the Episcopal Church, Mr. Robert Taylor of St. Agnes Episcopal Church, Sebring, will speak to the congregation telling the story of the Church's Mission at home and overseas.

The members of the Church of the Redeemer will also hear, by transcription, messages from the Missionary Bishop of Arizona, the Missionary Bishop of Honolulu, and the Bishop Coadjutor of South Florida.

The theme of Mr. Taylor's address and the messages of the Bishops, "For a Christian Nation in a Christian World", is singularly appropriate at this time when most people are so conscious of the world struggle between the fanatical evengelism of atheistic materialism and the basic principles of Christianity.

The Vicar of the Church of the Redeemer, the Reverend Frank M. Butler, and the members of the Vestry Committee have asked for a 100% attendance of all Episcopalians at this important meeting.

Sr. Woman's Club Hears of Women In Florida History

A review of the book, "The Women of Florida", written by Lucy Worthington Blackman, was the main feature of the program at the regular meeting of the Woman's Club, held Friday afternoon, November 3. Mrs Esther P. Hornbaker presented the interesting review, which covered a resume of the part women have played in Florida, beginning with the time when living conditions were extremely primitive.

Mrs. W. J. Carson of Sebring gave a talk on jail conditions in Highlands County. It was thereafter decided that before the new jail is built in Sebring, the Club would, through a letter and a delegation sent to the County Commissioners, ask that provision be made for the segregation of youthful first offenders.

The Club also enjoyed hearing two vocal selections sung by Miss Lynn Longbottom, accompanied by Mrs. J. B. Coen, Jr.

Mrs. Charles F. Kinney had charge of the devotional. She also, as director of district 9, gave a report on the state board meeting at Tallahassee.

It was announced that approximately $150.00 had been made by the food and candy booths at the Halloween Carnival.

Hostesses will be the mothers of the 9th, 8th and 7th grades, with Mrs. E. Ray Wells in charge of arrangements.

For the past five years, Mrs. Moulton has headed the first sisal fibre industry in India, established by an American Board missionary in 1936 to help the poverty striken people in the area. Birthday cake, ice cream and mints were served from a lace-spread table, centered by a pretty arrangement of watermelon pink hibiscus. The decorations of the cake echoed the pink and green of the hibiscus; this color theme was carried out in the napkins, mint cups, and other acbers and cherokee roses brightened the rooms.

Guests invited to the party were: Delores Stokey, Frances Lee Warren, Elaine Worden, Mary Lou Warren, Delores Still, Harriet Mann, Carlene Atkinson, Martha Renfro, Pat Basemore, Elaine Hunt, Shirley Moseley, Clara Jo Still, Patricia Pickett, Janet Beltz, and Betsey Ginn.

Alarmed over the loss of transportation of motor truck lines, railroads have put in a revised rate schedule that is estimated will save citrus shippers two and one-half million dollars during the coming shipping season.

A revised rate schedule, effective at once, was announced by Gordon Stedman, secretary-manager of the Growers and Shippers League of Florida, after negotiations of several months

About 25,000 woods fires burn thousands of acres of valuable Florida woodlands each year—a loss of over $4.000.000 to the people of Florida.

Avon Park Bombing Range To Open For Supervised Hunting

Through the cooperation of the United States Air Force, a portion of the Avon Park Military Reservation, commonly known as the Avon Park Bombing Range, is being opened for supervised public hunting under the control of the Game and Fresh Water Fish Commission. In order to finance the hunt the Commission is charging a fee of $5.00 per season for hunting permits. All fees so collected will be set aside for wildlife management uses on the Avon Park Wildlife Management Area. These uses will include game protection, habitat improvement and restocking, as well as operation of the hunt.

In addition to the Air Force lands, an area of approximately 8000 acres belonging to Earl Hartt and Roscoe Bass will be included in the Avon Park Wildlife Management Area, and will be opened to deer hunting. The same permit and the same rules will be in effect for all areas except that no quail hunting will be permitted in the Hartt-Bass area. Camping will be permitted on the Avon Park Bombing Range but not on the Hartt-Bass area.

Permits for the Avon Park Wildlife Management Area may be purchased at the Arbuckle Lake checking station at the entrance to the Bombing Range and at the checking station on the Bass-Hart properties.

Hunting on the Avon Park Wildlife Management Area will be permitted on weekends only from November 23 through February 5. Hunters may enter the checking station at 4:00 A. M. Saturday, but must check out before 11:59 P. M. Sundays.

More successful hunting should be found on the Management for the coming year, since intensive protection has been in effect since 1948. Restocking with deer has also been accomplished. The area was restocked with turkey during the past year, but they are on the protected list for the area until sufficient numbers are built up to warrant hunting. Turkey hunting, therefore, will not be permitted during the coming season.

Shopping on the Mall

By Sun Staff Writer

No, it's not too early for Christmas shopping. So here's a few suggestions. All of them can be found in Avon Park stores.

If you're looking for a really splendiferous present for a small boy, how about a gleaming, two-foot model of a trailer van? It's not an inexpensive toy, but it's certainly worth the money. An older boy would like the steam engines that work. For girls, there's a doll that looks so much like a tiny' infant you want to adopt it.

When you buy Christmas cards, do you wish you could find something that looks like the green Christmas we have here, instead of all those snow and ice scenes? Well, Florida Christmas cards can be had—and they're pretty, too.

A pair of hand-wrought cat's head earrings in copper-like metal would make a nice small gift for a feminine stocking. There are a number of other items in this same smart costume jewelry, including turquoise ceramic and copperish metal crabs. And the price is very low for handmade articles—under $2.00 for some of them.

This isn't exactly a gift suggestion, but you can buy a special package that includes a large bottle of creme shampoo by a well-known cosmetic house and a good quality comb, both for the price of the shampoo.

B & B Store To Have New Building

The company operating the local B&B store, started breaking ground this week, east of the new Hilans Theatre, where they will erect a new modern air conditioned store with drive-in parking place for their customers. The building will be 60x100 feet, with all new equipment and parking space for 75 cars. This is the second chain operated store to build new places of business in Avon Park in the last 60 days. The Table Supply is building on South Lake avenue. The Table Supply expect to be in their new quarters by January 1st.

Arthur C. Miller, Vice President; C. F. Eben, Chief Engineer; Minor E. Dean, Supervising Engineer for their Mapping Project on the Kissimmee River Valley and Malcolm Bruce, Chief Geodetic Computer for the company attended this conference which is under the direction of the Civil Engineering Department of the University of Florida in cooperation with the State and Federal Mapping agencies, the Florida Association of Realtors, the Florida State Road Department and the Professional Engineering Societies in Florida.

This year's conference was held on November 15 and 16 in the Florida Union Auditorium at Gainesville.

Since the Kissimmee Valley Mapping Project is probably the largest project in the State of Fla., an entire afternoon was devoted to this project and lectures were given in the following manner; Mapping the Kissimmee Valley by George D. Hardy, U.S. Engineers, Jacksonville; Ground Control Surveys Kissimmee Valley Mapping Project, Arthur C. Miller, Vice President, Michael Baker, Jr., Inc., Jackson, Mississippi; Aerial photography Kissimmee Valley Mapping Project, W. S. Karr, Vice President, Abrams Aerial Survey Corporation, Lansing, Michigan; Discussion led by John S. Beazley, Photogrammetric Engineer, State Road Department, Tallahassee.

After the conference, Arthur C. Miller and C. F. Eben will visit the Michael Baker, Jr., Field Office, Jacaranda Hotel building and make a general inspection of the field and photogrammetric activities here in Avon Park. We are sure that all the people within Central and Southern Florida Drainage District will appreciate the fact that the Corps of Engineers as well as their contractor, Michael Baker, Jr., Inc., are putting forth every effort to expedite the work on this project, as they now have eleven field parties and an office force of nine here in Avon Park. We are sure the local merchants will be interested in this item as the probable total expenditure by Michael Baker, Jr., Inc., in the vicinity of Avon Park amounts to the sum of approximately $200,000 a year.

40 'BOAT-A-CADE' CRUISERS DOCK AT OKEECHOBEE

About 40 boats of more than 80 that set out Sunday at Kissimmee completed Tuesday a "jungle" cruise down the Kissimmee River to Lake Okeechobee.

A barbecue provided by the Okeechobee Chamber of Commerce marked completion of the trip, and hardy crews of 10 vessels later set out on a return voyage.

Owners of other boats were met by friends or members of their families with trailers there, and planned to make the trip back over land.

W. D. Mitchell, state Game and Fresh Water Fish Commission pilot who accompanied the tour in a seaplane, said a survey of the route showed no boats "lost". Many dropped out along the way and returned home.

Keith Collyer Writes Informative Letter On Signing Ballot Stub

Avon Park, Fla.
Nov. 13, 1950

Editor
Avon Park Sun
Sir:

The subject of this letter is SIGNING ELECTION BALLOT STUB.

I have noted at least two letters to a leading daily paper and have heard several intelligent citizens of Avon Park and Sebring make comments deploring the new requirement of the law which requires the signing by the voter of a stub attached to his ballot when he goes to vote.

Critics say that this does away with the secret ballot.

If it did, I would be the first to loudly and vociferously protest since I detest every inroad made upon my personal freedom.

However, it does not.

This is why. There are three parts to your ballot. The first part is the stub which you sign. It has a number on it, which is identical with a number on the second stub; this second stub is the second part of the ballot, which the election board official signs. The third part of the ballot is the ballot itself, upon which you vote, and which no one signs or initials. The ballot itself has no number on it, nor anything else which identifies it with either of the stubs, once they are detached.

As soon as you have signed the first stub, it is detached from the second stub. While you vote, the election official checks your registration card, to see that no one is voting under your name, except yourself. When you are ready to put your ballot in the box, another election official looks at the second stub, seeing that it is one which has been signed by one of the election board members, then detaches the second stub, and you drop your ballot in the box. When this second stub is detached, there is no way of thereafter identifying either it or the first stub with the ballot from which they were detached.

The secrecy of the ballot is preserved. Additional safeguards to insure honest elections, by seeing that only registered electors vote, and only official ballots are used, are secured by this new law, enacted by the 1949 legislature of Florida.

Hoping this will help clarify this subject, I am

Sincerely yours,
Keith E. Collyer

CLAYTON FIELDS RECALLED TO SERVICE IN AIR FORCE

Clayton Fields, Jr., now Executive Secretary for the Chamber of Commerce, and a member of the U.S. Air Force Reserve, has been ordered to report to Maxwell Field, Montgomery, Ala., on December 5. He will probably leave Avon Park on December 4. He is classified as a bombardier.

If his physical examination, which he will probably receive in Alabama, shows that he is qualified for active duty, he will be sent to Mather Field, Calif., for further training; after which he believes he will be stationed in Langley Field, Va.

Mr. Fields saw considerable service in World War II, and was a prisoner of war in Germany.

As Chamber of Commerce secretary, he has shown a great deal of enterprise, and it is regrettable that he must leave his civilian career.

Herbert Todd, President of the Chamber of Commerce, has announced that the annual meeting to initiate its membership drive for the year 1950-51 will be held in the main dining room of the Jacaranda Hotel on Thursday, November 30, 1950, at 7:30 P.M.

Mr. Todd states that the [illegible] has arranged an excellent [illegible] a prominent speaker.

The Chamber has recently furnished each of its members a copy of its program for 1950-51 and its officers and directors hope to make that year one of the most progressive in the history of the organization.

The budget for the year has been prepared with great care and has been kept to a minimum consistent with efficient operation. In view of the limited budget the Board of Directors feels that the cost of the dinner cannot be borne by the Chamber, consequently there will be a charge of $2.00 per person (including tax).

All members of the Chamber, including ladies as well as others interested in the Chamber, are cordially invited to the dinner. The Board of Directors look forward to a large and enthusiastic meeting and a good start toward a big year.

Christmas Seals Sale Starts Nov. 20

Mrs. W. J. Head, has been appointed chairman of the 1950 Christmas Seal Sale committee in Avon Park. The purpose of the campaign, part of the nationwide Christmas Seal Sale to be conducted from Nov. 20 to Dec. 25, is to raise funds for the 1951 program of the Highlands County Tuberculosis Association.

Mrs. Head is among the 20 community leaders in Highlands County chosen to direct local Seal Sale committees in Highlands municipalities.

In accepting her appointment, Mrs. Head said:

"We want to make the 1950 Seal Sale in Highlands County the best ever conducted here. Success of the county's Seal Sale will depend, in the final analysis, on its success in each municipality. And on the success of the county Seal Sale will depend the tuberculosis control work of the Highlands County Tuberculosis Association during the coming year.

"Although no age group is safe from tuberculosis, the disease kills more young people between the ages of 15 and 34 than any other disease—kills Americans at the rate of one every eleven minutes, almost a thousand every week, close to 50,000 every year. Moreover, it is estimated that there are approximately 500,000 cases of the disease in the United States at this moment.

"One way all of us can participate in the fight against tuberculosis is by buying and using Christmas Seals. For funds from the sale of Seals constitute the sole support of the Tuberculosis Association which is waging a relentless battle against the disease for us right in our own community."

Since 1925, Mrs. Head pointed out, the tuberculosis association has been carrying on a progressive program of tuberculosis prevention and control through such services to community residents as mass X-ray.
