

Would You Believe?

Over 15 years ago the building material dealers' and their Association thought they could do a better job cheaper than insurance. Now the Florida Insurance Exchange, who handled the self-insurance plan, is no longer and is paying claims to employees of the dealers.

The expression, "white collar" workers, to denote professional people and office workers, started when medicine became a respected profession and doctors began to wear white coats as a part of their uniforms.

Census To Get '67 Employment Figures Here

A selected sample of households in this area will be asked questions about their employment during 1967 as part of the February Current Population Survey conducted by the U. S. Department of Commerce's Bureau of the Census, according to Thomas W. McWhorter, Director of the Bureau's Regional Office in Atlanta.

The 1967 survey questions will be aimed at finding out the number of weeks worked during the year, the amount of time lost because of unemployment and other reasons, and the job held the longest time during the year by each person over 14 years of age in sample households.

The Current Population Survey is taken each month from a representative sample of households in 44 areas throughout the United States, chiefly to obtain national estimates of current employment and unemployment.

The identity of households is confidential by law, and the facts obtained are used for statistical purposes only.

Census interviewers who will interview households in this area during the week of February 19-24, is Mrs. Christine Oates, 1104 Pasadena Ave., Sebring, Fla. 33870.

THE INVENTION EDISON COULDN'T PATENT

He was granted more than a thousand U. S. patents... the phonograph, light bulb, movies—and how they have changed our lives!

But Thomas Edison's greatest invention—which touched off a rush of progress in every field—couldn't be patented. It was team research—as a method of speeding up invention. Research and Development—R & D. Edison believed that results came too slowly to the lone inventor. The Wizard of Menlo Park staffed his laboratory with able researchers.

The electrical industry has never lost the initiative Edison's method gave it. Today, it spends more than \$2.5 billion a year on research and development. One-fourth of all America's engineers and scientists engaged in R & D are employed by companies that manufacture electrical machinery and supplies. Investor-owned electric utility companies also support extensive team research. We do.

The result of this investment by the electrical industry is vast achievement everywhere—from medicine to space exploration to the production of electricity. Economical and abundant electricity is why 90% of the energy that powers productive machinery in the United States is electricity.

And that's why 3 out of 4 new homes in the area we serve are all-electric. All thanks to Thomas Edison's great, unpatented invention... which we salute during National Electrical Week, Feb. 11-17, 1968.

The Princess was written by Grandma Mattoon and translated from Swedish by Joan Bauman. This is a documentary tale about a girl who has true Finnish courage. The author met 23-year-old Nege at a dance in Helsinki. She was dying of cancer of the lymph glands. At most against his will, he fell in love with the Princess, as he called her. "Serving her smile I was reminded of a flower that has been touched by frost before it has had time to open properly," they married.

Gunmar Mattoon believed the Princess needed to know the joy of life—to use her energies to build life. She continued her massive radiation treatments without any change. Finally it seemed less active which they found was the result of pregnancy. The pregnancy, which was a delight to them both, was committing her to life. This is one of the most unusual and touching love stories ever recorded.

Skulls of Indians of the Ice Age were recently dug from a sand pit in California, along with bones of vultures, peacocks, horses, camels, mammoths, saber-toothed tigers, and elephants.

Alpha Gamma Chapter Hold Meeting and Luncheon Saturday

About 50 members of the Alpha Gamma Chapter of the Delta Kappa Gamma Society, an international organization of women educators, met on Saturday, Feb. 16, at the Florida Power Lounge for a business and program meeting followed by a luncheon at Griffin's Restaurant.

Business for the meeting were:

Maryanne Redick, Violet Moore, Ann Karkick, Mary Jean Redick, Sarah Sellers, Alice Sherman and Jamie Edge. The luncheon was served at 12:30 p.m. The tables were decorated with valentine favors and arrangements of flowers.

After a short business meeting called to order by the president, Mrs. Jack Ingle.

The society heard a report from the research committee responsible for the program on Values: "Caught? Taught? or What?" led by Maryanne Redick. The objective was to determine, if possible, how values are transmitted.

The topic was introduced to the group which then was divided into four panels for discussion. A summary was made by Mrs. Redick.

Conclusions as strengthened by research indicate that there is no such thing as values without understanding without knowledge, without subject matter. That values are not eternal truths but instruments that help one relate to the surrounding world of people, things and ideas—that they aren't inflicted by adults on students but that adults should create conditions that aid children in finding values if the child chooses to do so.

The teacher's responsibility is to support the child's choice while realizing value development is a role of the school and should be encouraged by providing regular experiences that will help raise to the value level the beliefs, feelings, interests and activities which children bring with them. In this complicated world children find it increasingly difficult to find what is worth valuing, what is worth their time and energy.

Guests at the meeting included retired teachers from several states and Miss Millie Pearson, former Avon Park High School teacher and past president of Alpha Gamma Chapter brought greetings from Eta Chapter in North Carolina.

Corp. Farabee In Puerto Rican Exercise

Marine Lance Corporal John D. Farabee, son of Freddie Farabee of 80 S. Verona Ave., Avon Park, is participating in a firing exercise at Vieques, Puerto Rico as a member of the Eighth Communication Battalion, Second Marine Division.

During the exercise he will help provide field communications to the division.

His battalion provides communication facilities for the tactical headquarters which may be organized within a Fleet Marine Force, as well as furnishing specialist teams as required to divisions, wings, or Force Troops units.

GIRL SCOUTS from Avon Park get instructions on tree planting before jumping in and setting 2000 pine seedlings at the Bombing Range Saturday.

Girl Scouts Plant Pine Trees At Bombing Range Saturday

Two thousand pine seedlings were planted by Girl Scouts in "Operation Tree Planting" at Avon Park Bombing Range Saturday. This reforestation project was planned for the Girl Scouts by Capt. Henry Smith, forester.

The approximately 80 girls participating were shown a movie on conservation and then were taken to the field, which was to be planted by an Air Force base. With the help of a number of Air Force personnel, the 24 teams composed of three girls each, planted 2000 North Florida Slab Pine seedlings.

These seedlings are a year old and are 18 inches long. When planted, only four inches of the seedling is visible above the ground. The proper method of planting was demonstrated and with a little practice the girls mastered the technique.

A heavy tool, called a "dibble," is used to make the hole deep enough for the long tap root. After the trees were planted, a grass fire was ignited to demonstrate firefighting methods. On this windy day, the fire rushing across the open field, made a deep impression on everyone present.

The Scouts were taken back to a campsite on Lake Arbuckle. There they divided into patrols, and as patrols cooked their dinner. For many of the Scouts this was a new experience, and as a result, probably every Brownie family in town is wondering what a "dough-boy" is.

The leaders of all the Girl Scout Troops in Avon Park are to be commended for making this day possible for their girls. The fact that these busy, young women care enough about girls to spend a whole day planting trees and cooking over a camp-

Thirty-eight came for coffee and doughnuts Tuesday morning. It was brought before the group that we consider the purchase of a gas range for the hall. A committee was appointed to investigate and make their report in the near future. Hilda McClary and Pearl Smith are her guest.

The Barth's, Bernadette and Lorraine, spent the day Wednesday with Wayne's sister and husband, William and Mary Haddy at Tallahassee. They report a most successful good time and a good time up that way.

Barth's, friend of the Barth's, arrived from Tallahassee Tuesday night. Funeral and burial will be in the home state, New York. Mary will remember Mr. Smith, who lived in the Barth's trailer four to five years ago.

Weather was not too good Tuesday afternoon but nine were out to shuffle. Hilda McClary and Harold Adams scored 75 to win over Guy DeWitt and Ray Smith with 46 in the play-off.

Friends have heard from Mrs. Clark that Mr. Clark is not good. They had heard he would be able to move to a nursing home near their home but he was not able to. Our sympathy to the Clarks.

Eight ladies were out for sewing and coffee Wednesday afternoon. Several new ideas were exchanged.

Ray and Pearl Krenner have had as their guests Mr. and Mrs. Arthur Krenner of Troy Grove, Ill. and Mr. and Mrs. Wilson Johnson of Williams, Ill. Kenneth Near of Mendota, Ill. was a recent guest.

Three tables of 500 and one of 1000 were played Friday night at the hall. At 500 Ann Barth was high with 1600. Pearl Krenner was second with 1400.

Mr. and Mrs. Ted Boulton of Brookville, Ontario, are visiting the Grants for a few days. They will be vacationing in Florida for a month.

The Love Left Monday for

Wishes for good health and a speedy recovery are going to Mrs. Lillian Gibb at Walker Memorial Hospital in Room 211 and Dwight Sherman also at Walker Memorial from all their friends here in the park.

We are all happy to have Mr. and Mrs. Maynard Haddaway return to us, as they have purchased a new mobile home and moved it here on Court No. 28. May they have many pleasant winter here with their friends.

Last Saturday night we were treated to unusual pictures of East and West Berlin and Switzerland by Harry Brown. These followed our singing and the awarding of a Charter to the park members and officers of the Federation of Mobile Home Owners Association, Unit No. 1 of Highlands County.

Mr. and Mrs. Eldon J. Wagner and daughter, Donna, from Wausau, Ohio were guests of his parents, Mr. and Mrs. Leo C. Wagner, for a week.

Dinner guests of Mr. and Mrs. Orval Marshall were Mr. and Mrs. (Glen Noel) Syssac, Ind. and Mrs. Beth Shaffer of Avon Park. Other friends visiting the Marshalls from Indiana were Mr. and Mrs. Paul Nuss of Avon Park.

Mr. and Mrs. Frank Garab of Rolling Prairie, Ind., called on Mr. and Mrs. Harold Wainwright, Jr. and Mrs. Louise Shumaker and Mr. and Mrs. George Sakari of North Olmsted, Ohio.

WHAT IS A FLOWER?

It is the blossom of trees and plants and without any doubt God's greatest creation. The love of flowers is universal. From the savage to the most civilized person on the face of the earth, there is found an attraction to flowers.

The Irish say that God sprinkled their land with star dust to form the shamrock and their country's flowers. Another legend says that the angels who admired God's newly created world from a giant rainbow caused it to crumble and break into small bits and pieces that showered the earth with the first flowers.

Here in this newspaper we will be talking about flowers in this column every week. We hope you will join us when you need flowers for any occasion be sure and call us... we are as close as your telephone.

Jimmy Mills Completes Field Training

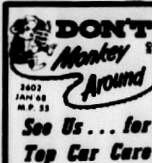

Army Specialist Four Jimmy B. Mills, 26, son of Mr. and Mrs. Virgil Mills, 12 W. Winthrop, Avon Park, completed a month of extensive field training, January 25, with other members of the 4th Armored Division near Hohenfels, Germany.

The exercise was designed to test the combat effectiveness of the division under realistic winter combat conditions. Training stressed the combined efforts of armor and infantry in attack, perimeter defense and live firing.

Spec. Mills is regularly stationed near Zindorf as a supply clerk in Battery B of the division's 1st Battalion, 22nd Artillery.

Not So Rare

Most of the so-called "rare earths," chemical elements, are more common than gold or silver. Some, such as cerium, lanthanum and neodymium, are more abundant than lead.
