MARKET CO-OPERATION ESSENTIAL TO GROWER

Rotarians Are Told By National Speaker at Their Weekly Luncheon

Speaking before the Rotary club at its noon luncheon Wednesday, Dr. Theodore Macklin stated that the prosperity of not only the citrus growers but the entire state as a whole depended upon the solution of the marketing problem. Dr. Macklin, who is connected with the Federal Farm Board, is making a tour of the state discussing the marketing situation before civic bodies, his itinerary being directed by the Florida Citrus Exchange.

Dr. Macklin assailed the selling methods employed by the state, showing the enormous waste in overhead, caused by the multiplicity of marketing agencies which he stated was making it impossible for growers to make a profit on their produce. He said that there were in the state last year 115 separate agencies selling citrus fruits, handling a total of 26 million boxes, whereas in California a single agency handled 28 million boxes—two million more than the entire output in Florida.

The speaker said that of this total output the Florida Citrus Exchange handled about one-third, which meant that 114 agencies handled the other two-thirds, or an average for each of these 114 sellers of about three-fifths of one percent of the crop. The added and unnecessary overhead expense, said Dr. Macklin, prevented the growers from realizing an adequate profit upon their crop, and every business interest in the state suffered from the effects of the waste.

Through co-operative marketing which would cut down the overhead and concentrate operation of selling at a profit of from 50c to \$1 per box could be realized, the speaker said.

So many selling agencies tend to demoralize the market, and with their lack of system and haphazard methods, these multitudinous agencies disrupt the market and nullify any attempt to stabilize the market by agencies handling a large part of the crop.

Co-operation and organization of the marketing forces is the only solution to marketing the fruit of the state, in the opinion of the speaker, and the Federal Farm Board is lending its efforts to assist the fruit growers to get an organization perfected that will handle a sufficient amount of the crop to insure stabilization in marketing and methods.

Dr. Macklin said that last year the total income from citrus fruits in Florida was 97 million dollars, but the grower received only five million of that amount. Attention was also called by the speaker to the fact that there are 291 packing houses in the state, when half that number or less could handle the fruit. This proved another waste due to the increased overhead of operating so many packing plants part time, when fewer plants operating full time would handle the crop at much less expense, and the saving would be reflected in the receipts of the grower. He did not blame the independent packing houses for this added overhead, but stated that this was the result of a gradual growth of the industry without proper organization.

Another prominent citrus grower, who was a member of the club at the time, stated that he had

If You Can't Sing, Just Whistle It and Nobody Will Know Difference

OH say, can you see, tum tum tum tum tum, and so forth, the generally accepted revised version of the Star Spangled Banner, takes on new significance these days with the replacing of the old flag in the city with a brand new one Wednesday. The American Legion is responsible for the new emblem of our freedom which floats so proudly from the masthead in the center of the city. (Freedom in this case being interpreted literally or otherwise and according to one's views on the eighteenth amendment, the income tax, and divers other regulatory restraints of greater or lesser moment as they strike the individual.) Be that as it may, the flag is "still there" and the raising and lowering of same will have the attention of Fire Chief W. H. McCarthy, a good son of the auld sod who can be depended upon to look after it.

TAX PAYMENT URGED BY SCHOOL TRUSTEES

Local Trustees Make Statement Urging All To Pay Up To Keep Schools Open

School funds are in a serious condition in the Avon Park school district and for that matter throughout Highlands county, according to the board of school trustees for this district, and unless taxes are paid up better than they have been, authorities predict that the county will not be able to run the schools the full term.

In the past, while other counties have been struggling along with part terms, Highlands county has always been able to get in a full term with tax money, but due to bank failures last year and the subsequent loss of county funds the school board is faced with a deficit for carrying on the schools. Large land owners, especially non-residents, have refused to pay their taxes. At a meeting in Jacksonville Tuesday attended by owners of 10,000,000 acres of land in 66 counties this statement was adopted: "That it would be futile, and poor business judgment in our counties to pay the state and county taxes assessed against our properties for the years 1929 and 1930 until some action is taken by the taxing authorities affording relief for future years."

This attitude by the large land owners forces the burden of taxation on the small home owner and city tax payer. The school trustees have borrowed all the money possible for carrying on school, and it now becomes essential for resident property owners to pay up if the schools are to operate, according to the school trustees, who have issued the following statement:

To the Citizens of Avon Park, School District No. 1:
It is highly probable that you are unaware of the desperate situation which now confronts your school board, but matters are in such shape financially that we feel you should be fully advised; and, we believe, being advised you will rally to the support of your schools, and not stand idly by and permit your children to receive full

STAFF OF THE NATIONAL PARK SERVICE EXPECTED

Due To Arrive In Avon Park Saturday To Inspect Hooker Hammock

The National Park Service Staff, headed by Director Horace M. Albright, and accompanied by Ernest F. Coe, chairman of the Tropic Everglades Park association, are due in Avon Park Saturday for the purpose of investigating Hooker Hammock as a national park. Their visit here is the result of efforts of Mayor C. S. Donaldson, who has been working through the park commission of the Department of the Interior to have Hooker Hammock investigated as the first step towards making this tropical beauty spot a national park.

The National Park Service Staff is in Miami this week making an investigation of the Cape Sable area, which is being promoted by the Tropic Everglades Park association as a national park. This association has been successful through Senator Duncan U. Fletcher's Bill S. 4704, instructing the Interior Department, through the National Park Service to make an official investigation of the Cape Sable area and report back to Congress. This investigation is now under way, and according to Mayor Donaldson, the Director of the National Park Service and his staff will come directly to Avon Park on Saturday to investigate Hooker Hammock. The mayor was in telephonic conversation with Ernest F. Coe, chairman of the Everglades Park Association, Miami, on Tuesday and has the assurance of Mr. Coe that the party will visit Avon Park Saturday.

In his efforts to have Hooker Hammock designated as a national park, Mayor Donaldson has had the co-operation of Mr. Coe and his associates of the Tropic Everglades Park Association. As evidence of his willingness to co-operate on the Hooker Hammock park project, Mr. Coe has written the following to The Times:

County Schools To Be Run on 10 Mill Tax

At a recent meeting of the county board of education it was found necessary to run all the schools in the county on the district funds derived from the 10 mill tax. This is on account of the recent decision of the state supreme court and the ruling of the board will go into effect this month.

The schools in districts four and five closed last Friday as there were not enough taxes in sight to justify borrowing any further funds. The Curtis Bright people have paid enough money to keep the Brighton schools in operation and there is a movement on foot to reopen the Sunnyland school by donations next Monday.

According to figures received from Tax Collector D. F. Canfield yesterday the following amounts have been received to date from the sub-school districts taxes in the several districts in the county, Avon Park, \$5,583.13; Sebring, \$4,097.38; DeSoto City, \$469.97; Spring Valley, \$11.74; Bassenger, \$818.17; Lake Placid, \$980.81; Hicoria, \$144.64 and Venus, \$158.65.

Ambitious Hen Tells the World Through a Visible Demonstration

FLORIDA hens are so enthusiastic about the business of laying eggs this fine spring weather that if there is no soft feathery nest available they just naturally up and lay 'em wherever opportunity presents. Or it may be that this particular hen, running true to form, as a publicity seeker and self-advertiser, and "full o' pep" ovey the possibilities of her industry, is telling the world with a visible demonstration of her activities. Anyhow, imagine the surprise—and ah, chagrin—of one of Avon Park's citizens when he went out to his car and discovered that a neighborly hen had deposited one of her finest—and freshest—specimen of hen fruit right in the driver's seat. One of those embarrassing moments—and not a Murad to be had! The specimen, still warm, was taken into Alex's and found its way into an order of hem-eggs, straight opp.

FEMALE MASONRY IS GIVEN BY O. E. S.

Burlesque Sketch On Masonry Well Received By Large Crowd

Female Masonry, a burlesque sketch on Masonry, was presented by the Leigh Chapter Order of the Eastern Star at the school auditorium Tuesday evening. The house was well filled and the entertainment well received by a responsive audience.

Music was furnished by the Ridge Trio Orchestra, composed of Mesdames Smith, Wright and Miss Martha Marsh, who opened the program with an overture, Sacher by Rosey, followed by Passe, by Fred, Gillet.

An original comedy sketch by two colored janitors, Lou and Pete, taken by Messrs. Elwell and Correll, assisted by Miss Christine Reeves as Miss Jessie K. Dragmout, preceded the opening of the lodge and got plenty of laughs as a colored sketch always does.

The burlesque on Masonry started with the opening of Minerva lodge, which as the name implies was a lodge composed of women who took it upon themselves to form a lodge. This was followed by the introduction of distinguished visitors and their responses which provided the specialties for the occasion. Mrs. Sada Myers Brown, as Sister Yelling Screech, delivered an address; Mrs. Elizabeth Garber, as Sister Shumeline, Henk, obliged with a song, as did Mrs. Harriet Yates, as Sister Harriet Lauder, and this was followed by the introduction of Sister Irenia Castile Dancing, portrayed by Miss Ella Maud Lander, of Lakeland, who gave a toe dance.

This was followed by the exemplification of the first six degrees, forced initiation of Intruder Paul Pry, whose presence in the lodge was questionable and as an intruder was forced into initiation much against his will. Then followed the informal "breaking up" of the lodge and remarks by an indignant Mason.

TO PUT FORTH EFFORT WITH RENEWED VIGOR

J. B. Coen Appointed Head of New Drive With \$2000 As Goal

The chamber of commerce membership meeting held in the city hall Wednesday night for the purpose of receiving reports of the membership drive and effecting a permanent organization was disappointing to the faithful few who attended, and who have had to carry the burden of chamber of commerce work in Avon Park. There were twenty-two men and three ladies present. That the drive had not reached the desired end was generally voiced by those present, and the sum raised fell far short of the goal set by the committee.

So keen was the disappointment and so general the dissatisfaction over the result of the drive that the membership voted to appoint a new committee of five, headed by J. B. Coen, with full powers to plan, prepare and develop a campaign for a new drive with a new goal of \$2,000, and report back to a latter membership meeting. Reports of the five teams showed a total of \$512 raised, representing 98 active memberships and 22 associate memberships. An additional amount of \$269 was reported as pledged to the various teams, bringing the total cash and pledges to \$781. The goal as announced was set at \$1000.

The report was characterized by C. M. Elsie as representing a "pitiful" amount for such a purpose, and the speaker stated that unless more money could be raised there was no use of attempting chamber of commerce work. He said that the goal set was too small in the first place, and that the chamber should not consider any sum less than \$2000 for carrying on the work for the year, stating that the first named sum would not pay the secretary and provide anything for stationery and publicity purposes. The speaker criticised business firms who took out only one membership of five dollars, and said that these firms and individuals would have to take out additional memberships if anything was to be accomplished. The speaker made it plain that he was not criticizing the committee who worked for the drive, but laid the blame for its failure on the lack of organization and team work, and lack of interest by the public generally.

J. B. Coen spoke frankly on the good and bad features of the city, and criticized the business interests of the city who were not represented at the meeting, and said the meeting represented only a handful, when the room should have been crowded. He spoke of successful drives in other places in which he had participated and in his opinion thought a drive could be put over in Avon Park if it was gone at in the proper manner.

This led to a general discussion of a supplemental drive being made with a new goal of at least \$2000, a new committee in charge and a more organized effort to raise the money. At this point Gilbert Freeman made the suggestion that the chair appoint a committee of five to take up the drive where it was left off and organize proper committees to put on a supplemental drive without any reference to memberships and to direct the

Review of County Exhibits At the South Florida Fair

4-H Clubs and Schools Also
Had Fine Displays
at Fair

By R. M. FULGHUM,
Assistant Extension Editor.

The crowning glory of the South Florida Fair from an agricultural standpoint, has always been its display of county exhibits. This year's fair, held at Tampa from January 28 to February 8, was marked by a small number of county exhibits. However, the quality of the eight county displays compensated for the absence of the others, and splendid additional features, such as the honey and corn shows, were thrown in for good measure.

The eight counties which exhibited this year were Polk, Manatee, Lake, Jefferson and Madison, in the competition, and Hillsborough, Pinellas and Marion, educational only. Manatee, Lake and Polk had a merry race for first honors in citrus, vegetables, and home canned products, with Manatee having a slight edge, while Jefferson and Madison fought it out for leadership in the hay, grain and forage, meats and some other divisions.

That Florida counties can and do produce agricultural products in wide variety was attested by the county exhibits. The following will give some idea as to the diversity of the products shown by each county:

Manatee: Nearly 100 different kinds of vegetables, over 60 varieties of citrus and other fruits, and 315 distinctly different home canned products, including jellies, marmalades, vinegars, syrups, meats, vegetables, jams, preserves, crystallized fruits, etc.

Lake: Something like 90 varieties of vegetables, 40 of citrus and other fruits, 13 of grapes, and over 250 canned products.

Polk: Citrus, vegetables, sweet potatoes, crystallized fruits, chemically preserved products, etc.

Jefferson: Numbers of feed grains, 24 kinds of hay, and 23 varieties of pecans.

Madison: Seven varieties of tobacco, 35 hays, 25 different kinds of corn, 15 legume crops, and 12 varieties of pecans.

Among the educational displays, perhaps that of Pinellas county attracted more attention, because it consisted entirely of a gladiolus show and home canned products. It contained 1,218 individual flowers of 32 different varieties of gladioli.

Hillsborough, home county of the fair, had an excellent exhibit, naturally featured by strawberries and citrus, but containing also bulbs, and roses, vegetables, canned goods and crystallized products. The arrangement of a small strawberry field and a small citrus tree in actuality, was especially attractive. Both Hillsborough and Polk exhibited strawberries in the new 24-pint crate, which is being used extensively this year.

Marion county had a good general exhibit, which included citrus and vegetables, peas, velvet beans, chufas, peanuts, goobers, corn, tobacco, cane, meat, oats, millet, hays, etc.

The first honey show to be held at the South Florida Fair drew 100 exhibitors from New York, Georgia, Idaho, and Florida. There were about 20 different varieties of honey shown, including tupelo, black mangrove, orange, palmetto, Jamaica dogwood, sea grape, sunflower, galberry, wonder honey plant, black gum, partridge pea, croton, wildflower, goldenrod, summer farewell, buckwheat, alfalfa and sweet clover. The State Plant Board's bee men who were in charge of this exhibit received high praise.

Although one acre out of every two acres planted to field crops in Florida is in corn, very little attention has been paid to this crop in previous fairs. This year the Boys' 4-H Club Department of the Agricultural Extension Division, at the University, had a large and attractive corn show. In addition, the boys' clubs of Hillsborough county had a corn exhibit, featuring the fumigation of corn for

weevils. A weevil-proof crib, which could be fumigated, was demonstrated.

The Smith-Hughes students, or Future Farmers of Florida, had a booth in which were displayed numerous vegetables and fruits. They gave demonstrations from this booth daily. The Plant City school had its special "future farmer" booth. A number of communities and individuals had displays, which were of good quality and attractive. Volusia county bulbs in variety were shown.

Although some of the counties had meat displayed along with their main exhibits, only three had entries in the meat show, which was under glass in a booth of its own. These were Jefferson, Madison and Polk. Polk and Lake were entered in the dairy products show.

The United States Department of Agriculture had a number of instructive exhibits placed at different locations. It co-operated with the State Plant Board in exhibiting host plants of the Mediterranean fruit fly, together with specimens of the fly. Those in charge of the display stated that they had 79 fruits and two vegetables shown, and that in addition there were five fruits which had recently been placed on the susceptible list, and there were a number of vegetables known to be hosts.

The livestock exhibit consisted largely of hogs. Club members of Madison county, B. F. Lawton, county agent, had 83 club pigs entered. The swill-fed Hampshires of Ulmerton Ranch, in Pinellas county, were shown, as were Berkshires, Durocs, Polands and Tamworths from Just-a-Mere Farm, Jacksonville, Boyles, Duroc Farm, Green Cove Springs, and others.

The poultry show consisted of something like 1,500 birds of 35 varieties, 250 pigeons of 15 varieties, and 150 rabbits of 17 breeds. The exhibit of wild ducks (migratory waterfowl) by Davis and Gist, McIntosh, attracted considerable attention.

The State Game and Fresh Water Fish Department had its excellent exhibit of game and fish on display.

In the Negro building, six counties—Alachua, Jefferson, Marion, Jackson, Madison and Leon—showed that the Negro agents who are working with and for local farmers are stressing a food and feed crop program, and that it is bearing fruit. These exhibits all showed a wide variety of live-at-home products produced by Negroes. In addition, the products of the hands were shown in profusion.

Cayana 10 Resists Cane Nematode, Root Rot, and Yields Well

Gainesville, Feb. 13.—Cayana 10 sugar cane is proving far superior to the old varieties, according to J. Lee Smith, district extension agent. "It is virtually immune to mosaic. It is resistant to nematode and leaf stripping. It is apparently much freer from root rot. In demonstrations conducted by county agents last year, where both kinds were planted side by side, it yielded practically twice that of the old varieties. "A stand cannot be secured from the stubbles of the old varieties any more and Cayana 10 has to be planted once in every five or six years," says Mr. Smith. "One can hardly dig up a bunch of Cayana 10 because of its good root system but where there is a heavy infestation of nematodes on other varieties a person can pull up a bunch with one hand. "If one has old varieties that are infected and cannot secure seed of Cayana this year it would probably pay him well to cut off the roots and plant only the stalks on land that is free from nematodes. In this way he would get rid of the nematode infestation which he transplants when he plants the old roots. Nematode is doing a great damage to our sugar cane where the old varieties are being used."

TO CELEBRATE "KNOW FLORIDA BETTER WEEK"

Combined With "Buy at
Home Campaign" Feb.
23 To March 1

Jacksonville, Feb. 13.—"Know Florida Better Week," sponsored annually by the Florida State Chamber of Commerce, and the state-wide "Buy at Home Campaign" of the Florida Junior Chamber of Commerce, have been combined according to a statement issued by Ralph G. Grassfield, General Manager of the State Chamber, following a conference with M. M. Frost, of this city, chairman of the Junior Chamber state committee on Buy at Home, and the co-operative campaign will be carried out during the week of February 23d to March 1st.

The two undertakings are so closely related, said the State Chamber executive, that the programs lend themselves to co-ordinated effort in such a manner as to make them of a great deal more interest to the public and to forecast a much greater participation on the part of the communities throughout the state. To "Buy at Home," applied in its broad sense, the people of the state, as well as those here temporarily, must "Know Florida" and its commercial and industrial activities as well as feel an obligation of civic pride in the home community.

The State Chamber of Commerce is preparing a "Handbook" covering the combined program of "Know Florida Better Week" and "Buy at Home Campaign" for distribution to the local Chambers of Commerce throughout the state. This handbook contains a full outline in detail for a constructive and interesting week's program covering the two subjects. The book is prepared in six parts, with supplemental material, covering participation in the movement by the Chamber of Commerce, civic clubs, schools and radio stations of the state and the press through the medium of its usual custom in publication of Florida Facts and the local programs.

The general plan calls for a local committee from the Chamber of Commerce to handle the "Know Florida Better Week," "Buy at Home Campaign" and the necessary publicity of the local activity. The program also includes, in connection with the "Buy at Home" feature, a display of all locally

manufactured products as well as retail store displays, for the purpose of having local people become better acquainted with what is produced at home. The plan of the State Chamber has been pronounced comprehensive and its ap-

plication to be worth much to the state.

Central Florida Exposition To Be Great Spectacle

Many Counties To Be Represented By Variety of Exhibits

Orlando, Feb. 13.—(Special to The News).—Hailed as the greatest event in the 19 years of its history the annual Central Florida Exposition opens here next Tuesday offering five days of gorgeous spectacles, unequalled amusement attractions and a complete educational display of the industrial, commercial, agricultural and horticultural wealth of the rich hill and ridge section of Florida.

The counties to be represented with exhibits this year are Lake, Osceola, Seminole, Volusia, Marion and Brevard while Orange, the home county, will be represented with community displays from the following surrounding centers: Winter Garden, Ocoee, Apopka, Fairville, Winter Park, Union Park and Zellwood.

The national government, the State of Florida and many prominent organizations will adorn the exposition buildings with displays that portray in a graphic manner the great strides being taken in the progress of the state and nation.

The United States department of Agriculture will exhibit a solid carload of material occupying 164 front feet of space showing the work being done to aid the American farmer. The U. S. Department of Commerce will emphasize wood utilization in its exhibit, a subject of primary importance to Floridians while the American Forestry association will exhibit a display truck with motion pictures, loud speakers and amplifying system urging the preservation of our forests.

The state department of game and fresh water fish will have an elaborate display in a specially built log cabin showing the wild life of Florida and the life and habits of the state's abundant fish. Other state departments to be represented include the school for girls at Ocala, the school for boys Marianna and the prison farm at Raiford.

Among the prominent organizations that will have displays besides the many commercial exhibitors are included the Central Florida Poultry Producers Co-operative association, The Florida Citrus Clearing House association, the Orange County Fern Growers association, the Orange County Citrus Sub Exchange and the American Fruit Growers, Inc.

Never before has a program of entertainment been offered at the Orlando event on such a large and varied scale as this year. There will be colorful parades, day band concerts and fireworks displays, automobile races, a complete circus, the Johnny J. Jones midway attractions and for the first time the Hal C. Worth pageant.

Hal C. Worth of Dallas, Texas, a nationally known producer of pageants will present four spectacular performances. On the opening night the Queen of Central Florida will be crowned selected from beauties representing more than 30 communities in central Florida. On the second night a great pageant, "A Night in Old Japan," will be staged in which more than 600 people will participate. A gorgeous fashion show will be offered as the third attraction while the pageant will be repeated on the fourth night.

The famous Dutton Circus will present the grandstand attractions with afternoon and evening performances scheduled daily. The Johnny J. Jones midway shows, newer and larger than ever, will occupy a midway space stretching nearly a half mile. Automobile races will be run on the opening and closing days featuring some of the world's fastest dirt track drivers.

Governor Doyle E. Carlton will head the list of distinguished visitors to the exposition, Tuesday the opening day having been designated "Governor Carlton Day." Governor Carlton will speak to the grandstand audience in the afternoon and in the evening will participate in the coronation ceremonies by crowning central Florida's queen.

The second day set aside in honor of the winter visitors has been called All-States Day. All winter visitors will be asked to register and badges designating their state will be presented.

Thursday, the third day, will be given over to the Boys' and Girls' 4-H Club work, one of the features being the appearance of Miss Florence Smock of Eustis, the world's healthiest girl.

Friday has been designated as Carey Hand's Big day. On this occasion all school children in central Florida marching in the parade from the business district will be admitted to the grounds free as the guests of Mr. Hand, a prominent local business man. The schools in Orange county will close and the number of youngsters passing through the gates is expected to exceed that of last year when 7,000 children were admitted.

This day is known also as Editor's Day, when all newspapermen in Florida will be guests of the exposition. A press "breakfast" will be staged in the evening beginning at 11 p. m., with an appropriate entertainment program in honor of the Fourth Estate.

Saturday, the closing day, being Washington's Birthday will be fittingly celebrated with a series of great events that will climax the Central Florida Exposition.

HINTS TO HOUSEWIVES

Weekly from Home Demonstration Specialists, Tallahassee

HOW TO HANG PICTURES.

Light pictures are best hung on fairly light walls, and dark pictures on dark walls. For the sake of shape harmony, tall pictures should be hung in vertical wall spaces, and broad pictures in horizontal spaces. Pictures may be grouped so that two or three vertical ones will give a horizontal effect, which will harmonize with a broad wall space. One must be very sure, however, that the pictures which are grouped are in harmony with each other. A painting which shows a broad, bold technique should not be placed next to one which is fine and delicate. Scale is the next consideration when hanging pictures. Small pictures should not be placed next to large ones, nor should they be hung near a large piece of furniture. Similarly, large pictures are out of scale in small rooms, or when hung near small and delicately proportioned pieces of furniture.

Pictures should be so hung that the center of interest comes at about the eye level. One should not first see the furniture in a room, and then look up and see a line of pictures on the wall. Sometimes it is desirable to have them lower than the eye level, in order to form a group with a desk or a table; or higher, as over a bookcase—but the variation should be slight. Most people hang their pictures too high, and the eye is carried up toward the ceiling, instead of being kept at the most interesting points in the room, which are about the level of the eye, and below that point.

Stability in the Room. So many pictures are available that one can find those that will give pleasure and at the same time be appropriate for the setting. A good picture has one or more of the following characteristics: beauty, expressive line, choice creative pattern, excellent arrangement of refined color, or an elevating theme. If the picture is to go into a room it should be in keeping with the furnishings, and should be suitable for the type of room it is placed in.

(Adapted by Lucy Belle Settle from Goldstein's Art in Every Day Life).

Four hundred and fifty-three below zero is the goal in the United States helium experiment.

LARGE LAND OWNERS ORGANIZE FOR RELIEF

Meeting in Jacksonville Represents About One-Third Area of State

Jacksonville, Feb. 11.—At the Florida Land-Taxation Conference held here yesterday owners of nearly 10,000,000 acres in 66 counties of Florida were represented.

W. F. Coachman in calling the meeting to order said: "It is positive that in the entire land-taxation history of Florida, no meeting of greater significance than this has ever been assembled. Only a grave emergency could possibly have brought you men and women from every county in Florida, representing in your own persons or by authority about one-third of the entire land area of the state."

The matter before the meeting was to discuss resolutions passed in Panama City, January 7th, as to the refusal of tax payers in Western Florida to pay taxes "until they are assured by the taxing authorities that in future years relief will be given from this unbearable tax burden."

It was stated that such a refusal by a group of taxpayers is without parallel in the history of Florida, and, carried through as stated, will cause every legislator or other public official in the State of Florida to think and act, before

the support of government disappears.

Letters to and from Governor Carlton were read into the record of the meeting. After five hours discussion, with only one dissenting vote the following statement was adopted:

"That it would be futile, and poor business judgment in our counties to pay the state and county taxes assessed against our properties for the years 1929 and 1930 until some action is taken by the taxing authorities affording relief for future years."

By unanimous vote it was decided to create the Florida Land-Owners association, Inc., a non-profit organization. The officers elected were: President, W. C. Sherman, Panama City and four vice-presidents, W. F. Coachman, Lake Placid; M. L. Fleishel, Jacksonville; C. H. Overman, Bagdad; George F. Benschel, West Palm Beach; and 13 other directors, two from each congressional district and five from the state at large.

Give Cow Plenty of Water.

As milk is about 87 percent water, good dairy cows require a great deal more to drink than cattle not producing milk. Range cattle and dry stock in summer and winter can get along on one drink daily, but this is not enough for dairy cows. The cow consumes a large amount of food that is mostly roughage so must have water in order for the food to be properly assimilated and digested.

Chestnut trees retain their tanning content for a long time after being killed by blight.

Illustrated Lecture On Hawaii Will Be Given On Thursday

An Evening in Hawaii, a lecture of conditions and folk ways in the islands, and exhibiting the scenic beauty of the tropics in screen pictures, will be given in the Congregational Church at 7:30 Thursday, Feb. 20. The speaker, Mr. A. Craig Bowditch is known to many in Avon Park as a fascinating and enjoyable lecturer and one who has had a long residence in Hawaii. This is looked forward to as one of the treats of the winter season.

Colonial Costume Review.

Gainesville, Fla., Feb. 13.—A Colonial costume fashion review was recently presented to the Alachua Senior Home Demonstration Council by the Wacahoota Club, Mrs. Grace F. Warren, home demonstration agent, reported. Luncheon was served, and the afternoon was devoted to an interesting program.

Pasture Demonstration.

Bartow, Feb. 13.—The County Commissioners of Polk county recently visited the feeding and pasture demonstrations of P. E. Williams, Davenport. They were accompanied by County Agent Frank L. Holland, and plans were made for a five year pasture demonstration.

The isolation of the influenza germ is announced by a Chicago professor.

All these added improvements —yet prices greatly reduced!

The new Chevrolet Six is enjoying the greatest public reception ever given a Chevrolet car. For it offers scores of new improvements and refinements that make it a finer car in every way. Yet it sells at greatly reduced prices!

Consider a few of the extra-value features that Chevrolet has incorporated in this greatest of all Chevrolets—a smoother, flashier six-cylinder valve-in-head motor, with its capacity increased to 50 horsepower!

—a stronger, more durable rear axle, with increased gear ratio!

—four Lovejoy hydraulic shock absorbers—assuring a smooth, even, comfortable ride over any road!

—weather-proof internal-expanding four-wheel brakes, with front and rear drums tightly enclosed!

—larger full-balloon tires, a new clutch and a stronger transmission!

—quieter, stronger, more beautiful Fisherbodies—with richer upholstery, more distinctive colors, and wider, deeper seats!

Every factor has been considered that would add to the safety, comfort and convenience of the Chevrolet owner.

Come in today. See this greatest of all Chevrolets! Check over its new features. Drive it. You'll find quality you never thought possible—at such greatly reduced prices!

ADVERTISING RATES FURNISHED UPON REQUEST

The Prince of Wales has taken up knitting and crochet. If that lad don't get married soon he is going to develop into a typical old maid.

Have you a little new tag adorning the posterior proportions of your car? If not, the goblins will get you if you don't look out.

An actor in New York spends much time before a mirror practicing how to look foolish. We never had to bother with such practice. Its a gift.

So many tourists in the State that in a certain South Florida town a little boy exclaimed excitedly: "Look, Daddy! there's a car with a Florida license!"

Coolidge has been registered in the bass tourney up in Lake county. The ex-president may not catch a bass, but he and the fish will enjoy one another's equally sparkling conversation.

Tampa is getting to be a real city, with gangsters and gunmen, 'neverthing. And a sheriff who seems to know what to do with these gentry when he finds them.

Some way we feel that if we were just hunting popularity we wouldn't seek the job of liquidator of a busted Tampa bank. And if we were just looking for health we wouldn't seek the presidency of Mexico.

A New York woman, aged 29, convicted under the Baumes law for shop-lifting, was sentenced to life imprisonment. Its a bet she wasn't a rich woman, or she'd have been merely an interesting kleptomaniac, to be humored and told to call again.

One orange per week per person is said to be about the rate of consumption of citrus fruit in the British islands. Those who fear citrus over-production may contemplate the vast market suggested by such a statement, once the problems of marketing and distribution are mastered.

Two remarkable recoveries are reported in South Florida quite recently, a Tampa man's hearing being restored in one instance, and a Bartow lady's blindness cured in the other. What makes them especially remarkable is that no itinerant "divine healer" has so far claimed them as miracles due to his intervention.

It would have saved a pretty penny if we had just sent Will Rogers over to the naval parley instead of the several solemn statesmen who made up our delegation. About the same real benefits would have accrued, and the accounts of the sessions would have been more entertaining.

Three Mexicans froze to death way down in their country during the cold spell that recently embraced the greater part of this continent. If they had been attending to their normal business of dodging revolutionary bullets, they'd have been kept on the jump too actively to freeze.

An evangelist preached on "Lepers in Bartow" before a congregation in that city, declaring that "if all the moral lepers in Bartow were to leave by the following day, there would be some store buildings for rent and some offices vacant." We have known the people of Bartow much longer than the reverend, and we believe he has them sized up wrong.

Winter visitors should not feel aggrieved if the sun goes behind a cloud down here for a few hours now and then, as it did last week, or if the temperature goes down to where you use a knife instead of a spoon to cut the butter. Florida has been the only place on the continent where weather conditions have not been almost unendurable this winter.

The Florida boy who produced 401½ crates of peppers with a net profit of \$440.64, on one acre of land, is hot stuff. He is of much greater value to the State and his accomplishment is much more worth while, than any of the prize winners in the beauty shows. There is much more pulchritude than peppers in Florida, and there is more pay in the latter.

There was little attention paid to groundhog day in Florida, for several reasons. There are no groundhogs in Florida; if there were, there would rarely ever be a day their shadows could not be seen; and no matter what day they might pick out, they couldn't choose one that would be followed by six weeks' winter, shadow or no shadow.

One gathers the impression from casual reading of the newspapers that basketball and foot-ball are the only things that matter in the modern school curriculum. We used to be the best hand-ball player in school, but we notice the men we meet in business don't seem to want to play hand-ball with us, or to pay us for playing. School athletics are fine, but it seems there ought to be a little book learnin' mixed with it if one is to be equipped for life or for making a living.

The female of the species is not only more deadly than the male, but she shows herself at times more merciless, less forgiving. A woman's organization in Tampa has passed resolutions asking that a pardon be denied J. J. Mendenhall, who has served fourteen years in the State penitentiary for a crime of which he was convicted on circumstantial evidence. He may have committed the crime—the probabilities are that he did; but he has suffered more than most men who have expiated their crimes on the scaffold. But these good Christian women still cry for vengeance. One wonders if they are quite the Christians they think they are.

The oldest inhabitant of Florida has been turned up over Bradenton way—or at least they have found his skeleton. Scientists say he lived about 20,000 years ago. That's some fifteen or sixteen thousand years before the earth was created, but among us scientists a little matter like that makes no never-minds. The cause of his decease hasn't been announced yet, but we'll guess it was because of worrying about taxes, if and when real estate in Florida was coming back, and where the rising generation of the time was headed for.

The birthday of a great American—we may safely say one of the greatest—has been observed this week. Animosities incident to the War Between the States have well nigh disappeared, but everywhere they yet linger there is little disposition to deny to Abraham Lincoln full meed of praise and honor. In the cosmopolitan population of Florida there is perhaps less sectional prejudice than in any other part of the country, and in this farthest southern State there is cordial cognition of the reverence due this great and simple man, whose character and career make him one of the most inspiring figures of our national history.

Florida is to be the second State in which gold star mothers will receive invitations to make pilgrimages to the graves of their sons in France, this being determined by the fact that Nebraska was the first State name to be drawn by Mrs. Hoover, and Florida the second. There is a kindly and gracious sentiment behind the movement resulting in the appropriation that was passed to finance these pilgrimages, and it is to be hoped that every gold star mother will be able to avail herself of the sad but precious privilege of visiting the grave of her son in a foreign battlefield. The expense of the trip, defrayed by the government, will be about \$1,000, and we agree with Brisbane that every mother who finds it impossible for her to make the pilgrimage should receive the equivalent of its cost in cash. That would be but a poor return for the sacrifice of a son, but there are mothers to whom that much money would mean a great deal.

SUNDAY SCHOOL LESSON

FOR FEBRUARY 16, 1930.

SUBJECT: Jesus Healing and Helping.

GOLDEN TEXT: "Himself took our infirmities, and bare our sicknesses." Matt. 8:17.

LESSON TEXT: Matt. 9:1-13; But you should read all of Chapters 8 and 9.

In those two chapters Matthew tells of ten miracles performed by Jesus healing: a leper; the centurion's servant; Peter's mother-in-law; the gadarene demoniacs; the woman who touched the hem of his garment; the daughter of Jairus; two blind men; a dumb demoniac; and stilling of the sea during a storm; and the healing of the man sick of the palsy. The miracle mostly discussed in today's lesson is that of healing the man sick of the palsy; (or paralysis). This disease is thus described by a Biblical dictionary: "A disease characterized by extreme loss of the power of motion dependent on some affection either of the motor centers of the brain or of the spinal cord."

Chapter 8 of today's lesson begins just at the close of the sermon on the mount, which we have studied in our last three lessons. The chapter begins, "When he came down from the mountain, great multitudes followed him."

After the healing of the leper, the centurion's servant, and Peter's wife's mother, Matthew says, Chapter 8:16, 17, "When the even was come, they brought unto him many that were possessed with devils: and he cast out the spirits with his word, and healed all that were sick: That it might be fulfilled which was spoken by Esaias the prophet, saying, Himself took our infirmities, and bare our sicknesses."

Then Jesus "gave commandment to depart unto the other side" (of the sea of Galilee). A sudden storm arose and the boat was about to sink, but Jesus was asleep in the boat. "His disciples came to him, and awoke him, saying, Lord, save us: we perish." "Then he arose, and rebuked the winds and the sea; and there was a great calm." Mark 4:39 says: "He arose, and rebuked the wind, and said unto the sea, Peace, be still. And the wind ceased, and there was a great calm."

You will notice that Jesus gave two commands, one to the wind to cease blowing, and one to the sea to be still. In disputing this miracle some "learned persons" might say "the wind merely ceased naturally, and that was no miracle." But that argument could not apply to the sea becoming at once calm. When a strong wind blows over any large body of water the waves rise to varying heights. The wind may suddenly cease, but the waves, or "swell of the sea" will continue, sometimes for hours. This rise and fall of the water in the waves or "swell," cannot cease immediately, without violating the law of gravitation, and it required a miracle to set aside that law.

On crossing the sea they came to the coasts of the Gergesenes (Gadarenes) and Jesus cast the evil spirits out of the two demoniacs, and permitted the spirits to enter the swine. When the loss of the swine was reported the citizens, disregarding the healing of the two men, besought Jesus "that he would depart out of their coasts." You often hear of people in a community practically asking Jesus to depart from their city, county or state, for the sake of gain or sport though it violate the laws of the community, of morality, an dof God. Even today we have some business men who prefer the herd of swine or the profit of some illegal or immoral business. When thus "besought" Jesus will assuredly "depart out of their coasts." And what is true of the community is true of the individual life.

Our lesson then continues, "And he entered into a ship, and passed over; and came into his own city. And, behold, they brought to him a man sick of the palsy, lying on a bed; and Jesus seeing their faith said unto him, Son of the palsy; arise."

THE BYSTANDER

News, Views and Comment.

Most of the big boys of the country are down here at this time.

The styles may change, but we have seen what we have seen.

To those who have something to say speech often comes haltingly—and others can say nothing so volubly!

It is hinted that the census enumerator will ask some personal questions, but after one gets through filling out that new questionnaire for the tax assessor any other questions will seem like pleasant chit-chat.

Florida ought to be getting good mighty fast, with all these evangelists coming in from everywhere to save us.

Perhaps Mr. Coolidge will combine business with pleasure by writing a few insurance policies while roaming about Florida. These here Crackers are mighty good insurance risks, Cal.

A Tampa newspaper has been conducting a contest for the best deflation of popularity, and how to attain it. There are lots of people who are not popular, who can tell just what to do to become so; and other lots of people who are popular, but can't tell why.

A prominent Republican, writing about National Committeeman Skipper, states that \$93,000 was placed in the latter's hands for party uses, and that thus far not a cent of it had been accounted for. Paraphrasing an old saying, "When Republicans fall out, Democrats get the low-down."

Because he was born in a foreign land, the intolerant might deny that Mr. Bok was an "100 Percent American." But that much abused term described him far more accurately than it does many who have nothing to recommend their Americanism save their capacity to mouth about it.

Federal authorities failed to grant the request of Anti-Saloon Supt. Crooke that Med-fly guards at the Florida border should search cars for liquor in addition to their other duties. Anyway, it might have been possible, if a quart should be found in your auto, to persuade the guards that you were just carrying it along to preserve the Med-fly in if one should chance to be found.

Led by the "cussing" broadcaster over KWKH, antagonism to the chain store idea is not inconsiderable—but it seems to us to be useless. The chain store is a condition, not the basis of a theory. It is an out-growth of modern merchandising methods which it is futile to combat, and it is here to stay. It may work some individual hardships and necessitate some readjustments, but it must be reckoned with—until some new system supplants it. It is not the first departure from the old order that called forth dire predictions of evil—but some way the world always rights itself, and progress goes on.

Son, be of good cheer; thy sins be forgiven thee."

"Certain of the scribes said within themselves, this man blasphemeth." Jesus said to them, "But that ye may know that the Son of man hath power on earth to forgive sins, (then saith he to the sick of the palsy), Arise, take up thy bed, and go unto thine house. And he arose, and departed to his house." "As Jesus passed by he saw * * * Matthew (Levi) * * * and he saith * * * follow me. And he arose and followed him."

Matthew was a despised Publican, a tax gatherer, and the Pharisees criticized Jesus for such association. "But * * * he said * * * They that be whole need not a physician, but they that are sick * * * I am not come to call the righteous, but sinners to repentance."

Episcopal Guild Entertains At a Bridge Tea.

Monday afternoon the Episcopal Guild entertained at the Parish house with a bridge tea. Mrs. Arthur Gregory and Mrs. Nichols as hostesses.

The rooms were beautifully decorated with hibiscus, poinsettias and Japanese honeysuckle. Japanese decorations were carried out very attractively. Novelty score cards, portraying St. Valentine's day were used.

Mrs. S. Y. Hartt reserved five tables and had as her guests Mrs. C. P. Anderson, Mrs. A. D. Roberts, Mrs. Park Anderson, Mrs. C. N. Ott, Miss Mable Seybert, Mrs. Henry Time, Mrs. Norton Smith, Mrs. A. C. West, Mrs. McNicholas, Mrs. W. A. Marshall, Mrs. McCalip, Mrs. Gadmorn, Mrs. Bass, Mrs. Jack Head, Mrs. Swearingen, Mrs. Crumley, Mrs. Cloud, Mrs. Hobbs, and Mrs. N. H. Trent.

Among Mrs. Hartt's guests, Mrs. Park Anderson was awarded first prize for high score, Miss Mabel Seybert won the cut prize, Mrs. Henry Time low prize, and Mrs. McNicholas second low.

Others playing were: Mrs. Archie Pringle, Mrs. Charles Pringle, Mrs. Webster, Mrs. Willow, Mrs. Dickenson, Mrs. Nelson, Mrs. Keller, Mrs. G. A. Gregory, Mrs. Demos Mandis, Mrs. Fred Smith, Mrs. Van Wile, Mrs. Mitchell, Mrs. Lula Bass, Mrs. D. V. Rouse, Mrs. Mark Lance, Mrs. Ellis, Mrs. King, Mrs. Harvey, Miss Lawrence, Mrs. George Edward Smith, Mrs. Nichols, Mrs. Sherman, Mrs. Mann, and Mrs. Benedict.

The high score prize was awarded Mrs. Nelson, Mrs. Benedict received second high, Mrs. G. A. Gregory won the cut prize and Miss Lawrence received the consolation.

Mrs. King poured tea, and Mrs. E. W. Moister poured coffee and served the guests with cake, sandwiches and bonbons.

The Guild will entertain again Easter Monday at bridge and any one desiring to entertain may reserve tables by applying to any member of the Guild.

Mrs. Head and Mrs. Bass Entertain at Bridge.

Mrs. Jack Head and Mrs. Nell Bass entertained at bridge Wednesday afternoon at Lake Byrd Lodge. The tables were arranged on the screen porch overlooking the lake, which was decorated with potted ferns and spring flowers. After five progressions, refreshments carrying out the Valentine motif were served. Thirteen tables were arranged for.

The guests on this occasion were: Mrs. Gilbert Stobbins, Mrs. Gilbert Freeman, Mrs. George Hardey, Mrs. Herbert Reck, Mrs. McAuley, Mrs. G. D. Godwin, Mrs. G. P. Thayer, Mrs. J. D. Hartt, Mrs. J. V. Chapman, Mrs. L. V. Pringle, Mrs. D. V. Rouse, Mrs. Paul Jett, Mrs. Russell Tinney, Mrs. Tom Culler, Mrs. E. F. Carmichael, Mrs. Paul Garber, Mrs. Park Anderson, Mrs. Clarence Rogers, Mrs. C. E. Barnett, Mrs. W. H. Yates, Mrs. Lucy Crumley, Mrs. McKallip, Mrs. Neal Trent, Mrs. C. E. Lanier, Mrs. M. A. Smith, Mrs. Charles Head, Mrs. Swearingen, Mrs. T. C. Hobbs, Mrs. E. E. Melton, Mrs. George Smith, Mrs. Arthur Gregory, Mrs. A. E. Keller, Mrs. L. E. Thomas, Mrs. Mark Lance, Mrs. William Logan, Mrs. Bennett, Mrs. Henry Holliday, Mrs. John Hood, Mrs. Milford Diley, Mrs. Raymond Diley, Mrs. Floyd Johnson, Mrs. Loomis, Mrs. Demos Mandis, Mrs. Martes Covington, Mrs. Tarpley, Mrs. Joe Lander, Mrs. Fred Smith, Mrs. Lula Bass, Mrs. D. G. Perry, Mrs. Sherman, Mrs. C. P. Anderson, Mrs. Mable Seybert and Miss Lillian Meade.

Mrs. Rodgers and Mrs. Pierce Honorees at Bridge.

Mrs. W. T. Coates was hostess at a lovely bridge party Saturday in honor of her mother, Mrs. Julian Rodgers and her sister, Mrs. Robert Pierce, of Jacksonville.

The attractive Coates home in Highland Lakes was beautifully decorated in bright spring flowers, gladioli being prominent. Scores were taken and Mrs. Ethel Lawrence was awarded high prize, a lovely strand of pearls. Low was presented to Mrs. H. A. Latham, which was an attractive pottery vase. Dainty guest prizes were presented to the honorees.

A very lovely and pleasing salad course was served to the guests by Mrs. Coates assisted by Miss Katherine Seagraves.

Miss Almaroe McGinnis Honoree at Picnic.

Miss Gwendolyn Wever entertained with a delightful picnic in honor of her guest, Miss Almaroe McGinnis of Taylorsville, Ga., Friday evening, at the Scout House.

Dancing and contests were enjoyed until a late hour when wieners were roasted and enjoyed by those present. Misses Almaroe McGinnis, Gwendolyn Wever, Opal Cochran, Carmenetta Feigan, Dorothy Roberts, Honey Roberts, Zelda Langford, Verna Heim.

Messrs. Robert Roberts, W. A. Maddox, Paul Baldwin, Claude Daly, Fred Simpson, S. P. Durrance, "Pot," Marshall Jordan, Bill Lacey, Phil Lacey, Tom Matthews, Harrison James, and Jimmie Roberts.

Younger Set Enjoys Picnic.

A delightful picnic was enjoyed Sunday afternoon on the shores of Lake Letta by a number of the younger social set. Outdoor sports proved lively entertainment throughout the afternoon. A delightful picnic supper was served. Those present on the occasion were: Misses Verna Heim, Oleta Bigbie, Novella Connell, Honey Sue Roberts, Dot Roberts, Carmine Feagin, Menophe Hatchell of Tampa, Messrs. Paul Baldwin, Claude Daly, Fred Simpson, S. P. Durrance, Marshall Jordan, and Eugene Zimmerman, of Sebring. The chaperones were Miss Jerry Heim and Miss Virginia Vines.

Benefit Bridge By Local Rebekahs.

The lovely home of Mrs. F. P. Reeves was the scene of much enjoyment Friday evening when the local order of Rebekahs held a benefit bridge party.

Attractive appointments of flame vine were artistically arranged in the party room of her home. Tasty bonbons were served during the games.

At the close of the evening prizes were cut for: Mrs. E. Bloomington winning high for the ladies, and Mr. C. Koler high for the men.

The 15 guests present were served hot chocolate and cookies by the hostess.

Miss Lois Hartt Entertains at Bridge.

Miss Lois Hartt entertained a number of her friends informally at her home Wednesday evening at bridge. The spacious reception room was beautifully decorated in colorful spring flowers. Mrs. Francis Shockley received high prize, a lovely suede pocket book.

Dainty refreshments of strawberry mousse, saltines and coffee were served.

The guest on this delightful occasion were: Mrs. Paul Jett, Miss Ethel Clarke, Mrs. Francis Shockley, Mrs. Russell Tinney, Mrs. Roland Drott, Mrs. Edgar Koch, Miss Christine Reeves, Miss Grace Reddick, Miss Jerry Heim, Miss Lillian Smith, Mrs. Louise Brown of Fort Meade.

Mrs. T. H. Hughes Entertains Wednesday.

Mrs. T. H. Hughes entertained informally Wednesday afternoon at her home on Tulane Circle, complimenting her mother, Mrs. S. W. Pitchford, of Walhalla, S. C.

Quantities of early Spring flowers were used as decorations in the attractive home.

A number of unique contests were enjoyed, at the conclusion of which, Miss Elizabeth Ewing and Mrs. C. H. Gerrard received prizes.

A tempting luncheon was served from dainty appointed tables. Covers were laid for Messdames S. W. Pitchford, E. L. Thompson, C. H. Gerrard, Raymond Gerrard, Ida Callender, S. B. Rawlings, A. H. Hancock, S. E. Roberts, Hughes, and Miss Elizabeth Ewing.

Mr. and Mrs. Scarborough Entertain Friday Evening.

Popular members of the younger set were entertained with a real old fashioned candy-pull, Friday evening at the home of Mrs. Scarborough's parents, Mr. and Mrs. W. A. Sheffield.

Candy and popcorn balls were enjoyed throughout the evening. The guests were: Misses Lora Lee, Estelle Carlson, Barbara Weaver, Hilda Mae Wilson, and Mrs. Edgar Koch. Messrs. Eddie Clark, T. J. McGinnis, Jr., Fredrick Wild, Rodney Durrance, "Buck" Simpson, Colquitt Pander, "Buck" Pander, and Mr. and Mrs. Zed Scarborough.

Mrs. Carolyn M. Graves and C. P. Turner Wed.

Mrs. Carolyn M. Graves, of Buffalo, N. Y., and Charles Price Turner were united in marriage at the Turner home last Thursday morning, the ceremony being performed by Rev. C. C. Corner, pastor of the Christian church. The couple left immediately after the ceremony for a short bridal tour of the state.

Miss Pearl Hamilton spent the week-end in Lakeland with friends.

Miss Marguerite Gross of Orlando was a visitor here Sunday.

Mrs. Anna Fitch spent the week-end with her parents in Lakeland.

Martin Roberts of Wauchula was a visitor here Sunday.

Mr. and Mrs. Paul Jett spent the week-end in Lakeland with his parents.

Miss Eura Lee Durrance and Miss Eloise Hayden spent the week-end in Tampa.

Miss Hazel Overstreet left for Plant City Monday for an indefinite stay.

Miss Ira Gunter was visiting friends in Lake Wales Sunday afternoon.

Miss Nadine Swann, Miss Ruth Smith and Miss Blossom Wells, motored to Sebring Monday.

Miss Wilma Roberts is spending the week in Fort Pierce as the guest of Mrs. Edith Sullivan.

Miss Mary Wolf of Sebring was the guest of Miss Oleta Bigbie Sunday.

Mrs. W. W. McFarland and Mrs. L. E. Haygood were shoppers in Lakeland Friday.

Mrs. Zed Scarborough spent the week-end in Frostproof with relatives.

Those attending the basket ball game in Wauchula Tuesday evening were: Genevieve McClelland, Novella Connell, Margaret Dison, Oleta Bigbie, Pot Roberts, Cleo James, Claude Daly, Marshall Jordan, Harrison James, Clarence Wilcox, and O. R. Perry.

Howard Miller of Wauchula was a visitor of Miss Ruby Hargraves Sunday.

Miss Menophe Hatchell of Tampa is visiting friends here this week.

Owen Perry of Dade City was a visitor of G. D. Perry Sunday evening.

Mr. and Mrs. Bunk Clarke, Miss Lois Rish and Forrest Park, were visitors in Frostproof Sunday.

Mrs. J. H. Payne, and mother of Frostproof were visitors in Avon Park Saturday afternoon.

Mr. and Mrs. William Ferguson left Sunday for their home in Philadelphia, Pa.

Mr. and Mrs. Harry Thorpe of Lake Wales, were guests of Mr. and Mrs. G. D. Godwin, Sunday.

Mrs. W. A. Sheffield, Mrs. Zed Scarborough and Miss Lora Lee, were shoppers in Sebring Tuesday morning.

Mrs. Florence Crews and children, accompanied by Miss Mertice Coker, motored to Wauchula Sunday afternoon.

Mrs. W. H. Carney is spending several days in LaBelle as the guest of Mr. and Mrs. E. L. McClelland.

Frederick Wilde, Clare Park and Rodney Durrance attended the show in Lakeland Sunday afternoon.

William Morefield of Washington, D. C., is the guest of his sister, Mrs. E. F. Carmichael.

Mrs. Edith Sullivan and Frank Sullivan of Fort Pierce were visiting Mrs. W. A. Roberts and family Sunday.

Mrs. Edith Stoughton of Leesburg is visiting Miss Wava Godwin. She will be remembered as Miss Edith Folkes.

Miss Lora Lee, Eddie Clark and Mr. and Mrs. Roy Felkner attended the show in Sebring Thursday evening.

Miss Kittie Martin, Devon Reddick, Miss Margaret Dison and Clare Park, attended the show in Sebring Monday.

Mr. and Mrs. J. E. Dison and daughters, Margaret and Virginia, motored to Arcadia and Fort Myers, Sunday.

Misses Blossom Wells, Ruth Smith and Nadine Swann motored to Sebring Sunday afternoon.

Miss Lora Lee, Eddie Clarke and Mr. and Mrs. Zed Scarborough attended the show in Lakeland Sunday.

Mr. and Mrs. Phil Abrams spent the week-end in Ft. Meade, the guests of Mrs. Abrams' parents, Mr. and Mrs. H. Broades.

Mrs. B. L. Adams returned Thursday from Orlando, where she has spent the past two weeks with her daughter, Mrs. J. H. Morris.

Mr. and Mrs. Dave Skipper spent the week-end in Lakeland as the guests of Mr. and Mrs. W. H. Harris.

C. L. Johnson, local manager of the A. & P., attended a meeting of managers of the different stores in Florida, in Tampa, Thursday.

Mr. and Mrs. C. P. Turner, returned home from their honeymoon, this week, which was spent in Daytona Beach and other popular winter resorts.

Mr. and Mrs. Frank Bradley, Bill Bradley and J. H. Simpson, returned to their home in Middleton, Conn., Saturday.

Miss Lora Lee, Eddie Clark and Mr. and Mrs. Zed Scarborough attended the show in Lakeland Wednesday evening.

Col. and Mrs. J. M. Lee and Mr. and Mrs. W. L. Winchester attended the showing of Hell Harbor in Lakeland Wednesday night.

Mr. and Mrs. C. A. Stimson left on Monday for Detroit, Mich., where they will make their home. They have been visiting their parents, Mr. and Mrs. A. W. Overstreet for the past month.

Mr. and Mrs. E. L. Thomason had as their guests for lunch at their home Thursday Mr. and Mrs. C. H. Wingate, of Minneapolis, Minn., who are spending the winter at Winter Park. This is their first visit to this section of the ridge and they were much pleased with the rolling country. They returned today by way of the Bok tower, where they will attend a concert.

Numerous New Books Available At Library

Twelve new books have been placed on the shelves of the public library, and are now available to patrons of the library. The books are: Laughing Boy, by LaFarge; They Stopped to Folly, by Glasgow; Roper's Row, by Deeping; Splendor of God, by Morrow; Whitehouse Gang, by Looker; Mary's Children, by Davis; Million Pound Deposit, by Oppenheim; Passion Flower, by Norris; The W Plan, by Seton; The Trail of the Lotto, by Armstrong; Murder Yet To Come, by Myers; Huckleberry Finn, by Mark Twain.

A total of 553 books and magazines were loaned during the month of January, the librarian reports.

B. P. W. C. To Give Benefit Bridge Party

The Business and Professional Woman's Club will give a benefit bridge party at the Episcopal parish house on Friday evening, February 14th, beginning at 8:15. Tickets are being offered for sale by the ladies of the club, the price being fifty cents. Prizes will be given and refreshments will be served. The funds derived from the benefit will go to the park fund. The public generally is cordially invited to attend and aid the club in further park improvement work.

MARKET CO-OPERATION ESSENTIAL TO GROWERS

(Continued from page one)
luncheon. They were: E. O. Williams, C. S. Donaldson, W. T. Hall, S. Y. Hartt, N. T. Smith, Parke Anderson, H. F. Sachsenmaier, H. G. Crapo, S. E. Roberts, J. H. Smith, C. H. Walker, V. R. Judson, E. H. Barker and F. B. Bauer, the last four named representing the Avon Park Citrus Corporation. In addition to these 22 visitors heard the address.

STAFF OF THE NATIONAL PARK SERVICE EXPECTED

(Continued from page one)
Miami, Jan. 15, 1930.
Editor, Avon Park Times,
Avon Park, Fla.
My dear Editor:
We have clipping from your valued Avon Park Times under date of December 20, "National Park is Urged by Donaldson." This was read with keen interest.
As you no doubt know, this Association has been quietly promoting the great Cape Sable area of South Florida as a National Park. This does not mean that this Association is necessarily committed to any special area in Florida representative of Tropic or near Tropic conditions other than the real merits of the area warrant.
The National Park Service Staff is scheduled to begin its investigation of the Cape Sable area February 10 following and this Association is certainly very well pleased to learn that through the efforts of Mayor C. S. Donaldson the Hooker Hammock has been brought to the attention of Senator Wilbur and that this National Park Service Staff is to investigate it.
There is no doubt whatsoever that the Hooker Hammock is a splendid example of hammock growth and by all means should be preserved. Let us all bring to bear necessary influence to have this accomplished.

Yours very truly,
ERNEST F. COE,
Chairman.

Several Bright Spots In the Future For Florida Farmers

Report Just Issued By Florida
Agriculture Extension
Division

Gainesville, Feb. 13.—A number of fairly bright spots, some of neutral tints, and some shading into the dark are espied on the agricultural horizon by prognosticators of the Florida Agricultural Extension Division, who have recently been in consultation with the Bureau of Agricultural Economics, Federal Farm Board, and extension workers from other states, regarding the agricultural outlook for 1930. A report on the Florida outlook has just been issued by the Division.

Among the crops and animals believed to be surrounded by fairly rosy hues are corn, tobacco, strawberries, cabbage, potatoes, sweet potatoes, feed crops and hogs. Those having largely neutral tints are watermelons, citrus, pecans, poultry and honey. The list of crops and livestock products for which the outlook is not so bright includes peanuts, lettuce, dairy products, beef cattle and sheep.

In regard to the national outlook, it is stated that "farmers this year will plan production with the prospect of a reduced demand for practically all farm products." The silver lining of this dark cloud is the hope that financial conditions will become better by the latter half of 1930, and will be accompanied by increased purchasing power. Also, "Foreign demand for agricultural products in 1930 is likely to be better on the whole than the rather depressed situation encountered abroad by our products in 1929."

"A somewhat larger supply of labor for farm work will be available, during the first half of the year," according to the report. "Farmers who are planning necessary permanent improvements, such as buildings, fences, ditches, or orchards may find 1930 an opportune time for procuring labor and supplies at somewhat reduced cost."

As to the long-time outlook, it is stated that "the material change from recent levels of total farm income seems in prospect in the next few years."

Concerning the immediate Florida outlook, the report has to say: "An improvement in business conditions may tend to offset in part the influence of increased output, but to obtain a higher level of prices than that which now prevails, farmers would do well to plan to reduce rather than increase the 1930 production."

A summary of the principal points contained in the report concerning individual crops and livestock products follows:

Watermelons.

Growers in Georgia and Florida, where about 60 percent of the 1929 carload shipments of watermelons originated, are unlikely to experience a marketing situation in 1930 as favorable as that of 1929. Much, of course, depends upon weather conditions during the harvesting and marketing period. It is extremely improbable that the small crop of tree fruits of 1929 will be repeated in 1930 and competition from this source is, therefore, quite certain to be greater. Unless the watermelon acreage is decreased from the high levels of the past two years, prices in 1930 can reasonably be expected to decline below the level of 1928 and 1929 prices.

Strawberries.

Prospects for strawberry growers now seems to be better than in any year since 1925. With material decrease of acreage among the second-early and intermediate sections and only a moderate increase for picking in 1930 in the early states, the marketing problem should be greatly relieved this season, provided that yields are not above average and that ripening periods are normal.

In the early states there has been a distinct upward trend of production since 1925, and last year's record crop of 64,000,000 quarts in this group was nearly double the production in 1927. Further expansion of acreage in the early states does not seem advisable.

Cabbage.

With relatively light holdings of old cabbage and reduced acreage in Southern areas, the present prospect is for favorable markets.

The situation next fall and winter will depend largely upon plantings in the late shipping states. The 1929 production of cabbage in the early states (Florida, Louisiana, Texas and California) was the highest on record, chiefly because of large plantings in southern Texas. Even though the early acreage was large, relative scarcity of old stock resulted in good prices for early cabbage.

Lettuce.

With the constant tendency toward expansion of lettuce acreage, particularly high California and Arizona, the industry is faced with a real problem in the orderly distribution of the crop, in the prevention of serious overproduction of shipping periods in competing districts, and in the production of high quality lettuce.

A moderately increased total commercial production of lettuce in 1929 over that in 1928 was marked at higher average prices. The pronounced increase in the demand for lettuce, which has characterized the past several years, continued in 1929 and there is yet no evidence that the peak of demand has been reached. Growers should not, however, assume that markets can be expanded sufficiently to absorb a very large immediate increase in production at the present level of prices.

Potatoes.

Stocks of old potatoes on hand, which have an important bearing on the outlook for early potatoes, particularly in the South, are plentiful on hand a year ago. Reports last fall indicated an intention to increase the potato acreage in the early states by about 12 percent. In view of this situation, the increase seemed justifiable. However, later reports indicate that the increase will be larger than 12 percent. At the present time the reduced buying power of consumers from the high level of 1929 appears to have prevented the seasonal price advance which was expected, so that something less than the intended acreage might be desirable in the Southern states.

Sweet Potatoes.

Sweet potatoes in 1929 brought satisfactory prices in the commercial sweet potato belt and farmers moved them to market and stored them in large quantities. There is apparently a relationship between the supply of Irish potatoes and the demand for sweet potatoes. At present stocks of Irish potatoes are low. It therefore seems probable that sweet potatoes which can be marketed in June, July and August should bring satisfactory prices.

Citrus Fruits.

The 1930 outlook indicates, as did those of the four previous years, a considerable increase in the bearing acreage of grapefruit and oranges. Many trees now in bearing have not reached the age of maximum yield, and a large increase in production may be expected in years when favorable growing weather prevails. Assuming an average of about 70 trees per acre, total orange acreage in Florida is estimated at 190,000 acres, of which 15 percent is non-bearing. Texas, with an acreage of 18,900 acres, has only about 25 percent in bearing. Only three percent of the 160,500 acres of California Navel is classified as non-bearing. Of the total of 112,200 acres in California Valencia, 20,900 acres, or 19 percent, are non-bearing.

Florida, with a total grapefruit acreage estimated at 80,000 acres, has approximately 95 percent of bearing age. Texas, with approximately 70 percent of the acreage of Florida, is estimated to have only about 20 percent of bearing age. The California bearing acreage is reported as 9,000 with a forecast of 11,800 bearing acres for 1932. Porto Rico with an acreage estimated at 3,800 has not fully recovered from the damage resulting from the hurricane of 1928. It is reported that it will be another season before Porto Rico is again shipping as heavily as it was previous to the hurricane.

There are good prospects for a continued expansion in the foreign markets for grapefruit. In 1929 Great Britain took more grapefruit than ever before but the per capita consumption is still far behind that of the United States or Canada. Porto Rico is supplying an increasing share of the British grapefruit market. Continued expansion in European countries are showing a greater interest in grapefruit and the outlet there will undoubtedly expand, particularly if organized efforts are made to acquaint consumers with the merits of this fruit.

The canning of grapefruit offers

another marketing outlet. During the past season 957,000 cases were packed as against 455,000 in 1927. In addition canners put up 202,000 cases of grapefruit juice.

Dairy Products.

There is a surplus of most manufactured dairy products. During 1929 there was a two percent increase in the amount of butter manufactured and eight percent in condensed milk. Cheese was 14 percent less than in 1928. There was only a slight increase in total milk production for all purposes. The number of milk cows in the United States, after remaining practically stationary for several years, was increased three percent during 1929. The number of heifers is six percent greater than a year ago, while a one percent increase in heifers each year is thought to be sufficient to supply the normal increase in consumption of dairy products. The production per cow has continued to increase.

The present market conditions of dairy cattle and milk products throughout the country and a surplus of Florida produced market milk in most of the large consuming centers of the state, are strong indications for Florida market milk producers to do some close culling of their dairy herds. It is quite important that a pasture and forage planting program be pushed by all Florida dairymen.

Present conditions are favorable for Florida farmers and dairymen to get good beef heifers in creamery sections of the South for replacement another year and for introducing purebred bulls and good grade dairy heifers into the livestock program of tick-free counties.

Beef Cattle.

The outlook for beef cattle in 1930 appears less favorable than in 1929. Slaughters probably will be about the same as in 1929 and demand is expected to be slightly less. Beef cattle raisers who contemplate expanding production are faced with a general tendency to increase cattle number and with a downward trend in prices over the next decade. Cattle feeders, also, will need to exercise great caution over the period of declining price levels.

Considering the long-time outlook, the upward trend in cattle numbers promises to proceed at only a moderate rate during the next year or two and may not be reflected in materially increased slaughter until the latter part of 1931. If cattle growers continue their present selling at younger ages, they will be in a position to make fairly quick adjustments in production by close culling of old cows whenever the price situation makes reduction desirable.

Since the state is becoming tick-free, this is an opportune time to introduce purebred bulls and to give special attention to improving the range and establishing permanent pastures.

Feedstuffs.

There is nothing in the outlook for 1930 which indicates that the price of feedstuffs will differ greatly from that in 1929. The effect of the uncertain business situation and because of the price prospect for livestock products and field crops, it behooves the Florida farmer to make every effort to grow all feeds consumed by the livestock on his farm, and to grow these crops with as little outlay of cash and labor as is possible. This can be done by planting crops which can be harvested by livestock.

Hogs.

During 1930 hogs prices are expected to average at least as high as during 1929, and possibly higher. A reduction in slaughter supplies is indicated, but this will probably be partially offset by a decrease in foreign and domestic demand. Storage supplies of pork on January 1 were 6.6 percent, or 44,400,000 pounds, less than those of January 1, 1929.

The North Florida farmer's crop of hogs has been a consistent revenue producer and has been less speculative than almost any other crop produced in that area. As there is a probability for fewer hogs for the market, North Florida farmers should be in a good position during the coming year and perhaps for a longer period. Farmers are urged to hold their hog production equal to or exceeding that of 1929.

However, the profit in growing hogs in Florida depends a great deal on these hogs on cheap feed, and this can be done best by growing the crops and letting the hogs harvest them.

Poultry and Eggs.

Any increase in production of chickens in 1930 for the country as a whole, either for eggs or meat, will tend to reduce prices of poultry and eggs below the levels of recent years. Storage holdings of eggs are less. A slight increase

PERRY VICE-CHAIRMAN OF BARNETT NATIONAL

Former President Florida National Joins Avon Park's
Affiliated Bank In Jax

An announcement of interest to patrons of the Avon Park National Bank appeared in Wednesday's Jacksonville Times-Union, telling of the election of Arthur F. Perry as vice-president and a member of the board by the board of directors of the Barnett National Bank of Jacksonville at its regular monthly meeting Tuesday. Mr. Perry was formerly president of the Florida National Bank of Jacksonville, having been succeeded by Alfred I. duPont, who accepted the presidency of the Florida National last Saturday. Because of the affiliation of the local bank with the Barnett National of Jacksonville, the following sketch of Mr. Perry's banking connections will be of interest to Avon Park people:

Mr. Perry joins the Barnett bank with a background of more than 35 years experience in Jacksonville financial institutions, the last 25 of which he had been connected with the Florida National. Since 1913 he had served as president of that bank.

In joining the Barnett National, Mr. Perry teams up with a close friend of long standing in Bion H. Barnett, chairman of the board, who said it gave him great pleasure to make the announcement.

Since becoming secretary and treasurer of the Southern Savings and Trust company in 1903, his initial banking experience, Mr. Perry has played a prominent part in the banking business of Jacksonville. The name of that institution later was changed to the Mercantile Exchange bank, of which he was elected cashier, a position he retained until the institution was nationalized in September, 1906, as the Florida National bank of Jacksonville, in the service of which he rose rapidly.

His ability and judgment have been recognized on numerous occasions, and in various ways. He served as director from Florida of the Federal International Banking company, the \$7,000,000 Edge law bank for financing Southern communities. During the World war he was state treasurer of the United war work campaign, and later was state treasurer of the Roosevelt Memorial association.

While occupying a high position in the banking world, Mr. Perry has found time to devote to civic affairs, having served from 1897 to 1901 on the city council; from 1903 to 1911 as member of the Board of Bond Trustees, Board of Trade, and vice president of that organization for one year.

In number of laying birds is expected.

Cold storage holdings of poultry are greater, the demand during 1930 is expected to be fair, though probably not as good as during the last two seasons.

Church of the Nazarene.
The coming Sabbath is the third of the month of Stewardship and Prayer being held at the Church of the Nazarene. The previous days have been times of unusual blessing to all that have attended the services. Many comments have been made on the vital theme of stewardship and prayer and many have received help. The public is cordially invited to be sure and share with the church these last two Sundays of special services.

The pastor will preach in the morning on the subject of "The Stewardship of Fasting," bringing out an entirely new phase of the subject. In the evening sermon the thought is to be taken from John 1:29, "Behold the Lamb of God."

Bed Sweet Potatoes.

Brooksville, Feb. 13.—About 300 bushels of Improved Porto Rican potatoes have been bedded by farmers of Hernando county, J. H. Logan, county agent, stated. He expects the planting of about 110 acres.

CONDENSED OUTLOOK FOR FLORIDA FARMS

National Prediction Is For Reduced Demand For Farm Products

Gainesville, Feb. 13.—The principal points contained in the 1930 agricultural outlook for Florida, just issued by the Florida Agricultural Extension Division after consultation with the United States Bureau of Agricultural Economics, Federal Farm Board, and representatives of the extension services of 44 other states, are summarized here.

The national outlook is for a reduced demand for practically all farm products.

Better financial conditions, accompanied by increased purchasing power, are expected for the latter part of 1930.

More labor is available at lower wages.

No material change from recent levels of total farm income is seen for the next few years.

An increase in corn yield in the United States is expected. Florida's corn is used at home, and in view of the livestock situation, an acreage equal to last year's is recommended.

The flue-cured tobacco outlook is fair. A slight increase in Georgia-Florida shade-grown is favored. A decrease of from 10 to 15 percent in peanut acreage is indicated.

Watermelons are unlikely to bring as favorable a price as in 1929.

Strawberry prospects are brighter than for any year since 1926. However, an increased acreage in early states does not seem advisable.

Light holdings and reduced acreage make the present outlook for cabbage favorable.

Expansion in lettuce acreage causes marketing difficulties to arise, but there is no evidence that the peak of demand has been reached.

Since the stock of Irish potatoes is low it seems that sweet potatoes, especially those marketed early in summer, should bring satisfactory prices. Stocks of old (white) potatoes on hand are about three fifths as much as a year ago, and an increase in early potato acreage is intended.

Considerable increase is expected in the bearing acreage in grapefruit and oranges. Foreign markets may expand and canning offers some outlet, but increased acreage should be considered only with much care.

A material increase in production of pecans is expected.

Due to a surplus in most dairy products, especially market milk, close culling, grazing, and forage crops should be pushed.

Beef cattle prices are on a downward trend.

There is nothing to indicate that the price of feedstuffs will change greatly.

Storage holdings of pork are less than last year, and since a lot of hogs in Florida have been sold for revenue the outlook for 1930 is favorable.

An increase in poultry production would mean a decrease in prices. Spring egg prices are expected to be lower.

Little immediate improvement in wool prices is expected. Florida sheep growers should cut costs and reduce losses.

Demand for honey is increasing. A light winter loss of bees, and a honey flow in 1930 up to average are expected.

4-H Club Testing.

Tallahassee, Feb. 13.—Members of the Leon County 4-H Dairy Club are doing register of merit testing through the co-operation of County Agent G. C. Hodge, Hamilton L. Brown, Extension Dairy Agent, and Professor C. H. Willoughby, Professor of Animal Husbandry, Florida College of Agriculture.

Perry, Feb. 13.—J. E. Powell, Leon County Agent, attended a meeting at the Leon County Agent's office, Ga., to register.

Prominent Guests at Pine Crest Club

Mr. and Mrs. Kirk Taylor of Kenilworth, Ill., one of the exclusive residential suburbs of the famous Chicago North Shore arrived at Pine Crest Lakes Country Club Thursday afternoon for an extended stay.

Mr. Taylor is recognized among Chicago's financial and industrial circles as one of the outstanding economists and systematic organizers, as well as a recognized authority on matters pertaining to advertising, for in matters pertaining to advertising he was very high up in executive circles with N. W. Ayer and Company, publishers of "Printer's Ink," and a firm internationally known as advertising experts.

This is the Taylor's first visit to the Ridge, having spent their previous winters in the exclusive Palm Beach colony, and it is due to the close friendship that exists between Mr. Taylor and the Pine Crest Club Manager that the Ridge Section of Florida secured so notable a couple.

Persimmon ice cream, made with pulp of the Oriental persimmon, was recently served as "refreshments" at a meeting of botanists in Washington.

IMPROVED BRAKES NEW CHEVROLET FEATURE

The New Internal Expanding Brakes Make For Greater Safety On 1930 Cars

Evidence of the manner in which the automobile manufacturer is furthering the cause of safety by eliminating the hazard of mechanical mishaps is shown by the many safety features incorporated in the new 1930 Chevrolet.

Notable among the safety devices in the car are the Chevrolet-designed internal brakes which are new in their field. Many a motorist has had the unnerving experience of descending a long mountain grade to find his brakes becoming less effective the farther he descends—a failure known technically as "fadeout" and due to heat generated between the brake shoe and drum which warps the shoe and lessens the contact of the brake lining with the drum. The hotter the brakes get, the less efficient they become.

Tests on the General Motors Proving Ground show that fadeout

has been eliminated in the new Chevrolet brake by a method of construction known as the "articulated shoe type," which compensates for heat distortion, and assures uniform braking facilities under all conditions of temperature. The wear on the brake lining also is uniform, and assures far greater service out of a set of linings than the old type brakes.

Test Chevrolets on the proving ground have obtained as high as 28,000 miles on a set of linings. It is pointed out that the average motorist will obtain considerably greater mileage in view of the severe driving to which test cars are put. Further tests show the brake will stop a car traveling 30 miles per hour in two and two-tenths seconds within a distance of 48 feet.

The brakes are internal expanding all around, operating with equal efficiency on all four wheels. The parking brake is separate and operates on the rear drum. Adjustments are easily accessible without the removal of any plates.

Another safety feature of the new Chevrolet is the non-glare windshield on the new Fisher bodies. By the simple expedient of tilting the windshield slightly inward, instead of mounting it vertically, the reflected light of an approaching or following headlamp is deflected downward away from

the driver's eyes. The twin-beam headlights, which enable the driver to throw the light on the road out of the eyes of an approaching driver, are a further Chevrolet contribution to the greater safety of the highways.

Florida Preferred To California As Poultry Location

After spending a month or more in California looking for a location for a poultry farm, Manly Deeter is now in Highlands county in search of a location. Mr. Deeter says that he is much impressed with this section for the poultry business, and likes it much better for his purpose than California. Mr. Deeter has a poultry farm in Indiana, but the cold and disagreeable winters have sent him south, and he has turned his northern farm over to his son. He attended the meeting of the Highlands County Poultry association at Venus last Wednesday, and in company with F. D. Palmer has been inspecting the Englemann Poultry farm and others in this section with a view to getting acquainted with Florida conditions and methods.

Seven "lost" Islands will be re-attached to the Philippines soon.

One Hundred Years of Service

ON February 10, 1830, a little company of progressive people in Petersburg, Virginia, obtained from the General Assembly of Virginia a charter for the construction of a railroad from Petersburg "to some convenient point on the North Carolina line."

When completed it reached from Petersburg to Blakely, Va., one and a half miles below the falls of the Roanoke River, a total distance of 59 miles.

Not much of a railroad by modern standards! But an undertaking of some magnitude for those times; and one that, its advocates foresaw, would revolutionize industry and commerce.

They were empire builders, those pioneers of the Petersburg Railroad, who had unbounded faith in the future of the South and in the success of the new enterprise. But as great as was their faith they could hardly have envisaged the changes that were to come.

Built as a local enterprise to increase trade, the Petersburg Railroad became in a few years a link in the "great mail" route between North and South and, with more than one hundred other roads, was later welded into the Atlantic Coast Line Railroad Company.

Today what was formerly the Petersburg Railroad is an essential part of a system comprising 5153 miles of railroad in Southeast Virginia, the Eastern Carolinas, Georgia, Florida and Southeast Alabama.

Over the heavy steel rails that long ago replaced the strap-iron track of the Petersburg Railroad, there moves a vast and varied traffic.

From North to South—from South to North—the great trains thunder past. Luxurious mile-a-minute passenger trains, each costing as much as the entire original cost of the Petersburg Road. Swift freight trains, laden with valuable cargoes.

Every train essential to the commerce of the nation. Every train a tribute to the vision of the founders, and of the men who followed after.

The Atlantic Coast Line of today has been a century in the making. It looks to the future with the same confidence as did that President of the Petersburg Railroad who wrote: "Of the final success of such a line, no one can doubt who is the least acquainted with the immense intercourse of the country and with the great value of time in conducting its business."

ATLANTIC COAST LINE The Standard Railroad of the South

This is the first of a series of advertisements by the Atlantic Coast Line Railroad, commemorating the centennial of its earliest constituent company—the Petersburg Railroad Company.

SURVEY CAPE SABLE PARK SITE FROM AIR

Part of Park Service Staff Expected Here Saturday To Survey Hooker Hammock

The National Park Service Staff, in Miami for the purpose of investigating the Cape Sable area, and part of which is due to arrive in Avon Park Saturday for an official investigation of Hooker Hammock as a national park, made a tour of the Cape Sable region both by air and automobile Tuesday. Heading the party is Horace M. Albright, director of the national park service, who is expected here Saturday for the Hooker Hammock survey.

Included in the party making the survey are Horace M. Albright, director of national park service; Ebert K. Burlow, assistant to the secretary of the interior and budget officer of the interior department; Amos B. Cammerer, associate director of the national park service; Roger E. Toll, superintendent of Yellowstone National park; Casper W. Hodgson, chairman of the conservation committee of the Campfire club of America; Dr. T. Gilbert Pearson, president of the Audubon Societies of America; Dr. Herman C. Bumpus, former head of the American Museum of Natural History, New York; Dr. Harland P. Kelsey, Southern Appalachian National park commissioner; Marjory Stoneman Douglas, author; Mrs. Ruth Bryan Owen, member of congress from Florida; and Dr. David Fairchild, president and Ernest Coe, chairman of the Tropic Everglades Park association.

TAX PAYMENT URGED BY SCHOOL TRUSTEES

(Continued from page one)
educational benefit which you owe to them.

The recent decision of the Supreme Court of Florida has caused the loss to this county and similar counties of a large sum of money anticipated to be derived from the increased gasoline tax. Had the Supreme Court held valid the method of distribution fixed by the Legislature the increased gasoline revenue would have been sufficient to run our schools, with even reasonable tax collections. But the people have not and are not paying their general taxes. This is a fact which should be well known to every intelligent person in the county, and because you, citizens and taxpayers, have not paid your taxes we are facing the necessity of closing our schools. Does this impress you, Mr. Taxpayer, as being a serious situation? We think it is; we think nothing is more important to you than the education of your children. Will you cut-off this education, or will you come to your children's relief and pay your taxes so that we can have money to run our schools? All around you schools are being closed, but we believe that the people of Avon Park are patriotic enough—love their children enough—to pay their State and County taxes and pay in advance, if necessary to keep their schools going.

This is the condition which you face; again we repeat, it is a most serious condition. But if you will go down to the county tax office and pay your taxes your child will not lose one day from school. If necessary, to put off for a month the payment on your car, put it off, and make a payment on your child's welfare. It is better that they walk to school, than to have no school to ride to.

Give this matter the earnest and honest consideration which it deserves, and we believe you will; if you do your schools will go on,—if you don't we will have to close.

Faithfully yours,
F. S. Jordan, Chairman
C. M. Elsie,
T. A. Nicholous,
Trustees Avon Park School District No. 1.

CHAMBER COMMERCE CONTINUES DRIVE

(Continued from page one)
drive and report back to a later membership meeting. After a general discussion and several suggestions this was put in the form of a motion and carried. L. E. Thomas moved an amendment to the motion that J. B. Coen be named chairman of the committee with full powers to select his own committee and devise plans upon and carrying on the drive. This also carried, and Mr. Coen accepted the chairmanship, but declined to name the other members of his committee until he had given the matter further consideration. He said he would organize his committee and pledged the members that he would do his best.

The meeting was opened by C. S. Donaldson, temporary secretary, and Col. R. P. Davidson was called upon and made a brief talk, telling of a trip down the east coast and comparing conditions there with the ridge. He said Avon Park compared very favorably in a business way with any town of like size he visited, and he was rather proud of his city and especially the splendid stores here.

Miss Mattie Tompkins was made temporary secretary of the meeting.

M. A. Smith, temporary chairman of the committee of fifteen, then took charge of the meeting and made a short talk on the efforts of the committee to organize the chamber and the purpose of the meeting.

C. D. Ordway was called upon and spoke of the co-operation, coordination and helpful service so essential to chamber of commerce work, and told of the work done by that body in his former home city, of Burlington, Vermont, of which he was formerly president. The speaker stressed the need of more signs along the roads, as did other speakers, and advocated the importance of the chamber furnishing reliable road information to tourists.

Following these talks a committee of three, composed of Fred Smith, Stewart Thayer and Lee Pringle was named as a nominating committee to place in nomination a board of directors. Gilbert Freeman moved that the committee be instructed to nominate thirty names for the directorate and that an election by ballot of members be held, with a voting place in the bank. This was carried, and the nominating committee so instructed.

The 30 names placed in nomination are: W. T. Coates, H. E. Kellar, F. M. Smith, Jack Head, Stewart Thayer, M. A. Smith, L. E. Thomas, Demos Mandis, E. E. Melton, J. S. Schweigart, C. S. Donaldson, W. W. McFarland, H. N. Gump, D. G. Perry, J. B. Coen, I. H. Ford, B. M. Davis, S. J. Pendleton, W. H. Phillips, C. D. Ordway, Mattie Tompkins, Harry Stodden, J. S. Francis, Gilbert Freeman, W. D. Dorminey, W. A. Davidson, Otto Skipper, Paul Jordan, L. V. Pringle, Jr., Roy Jarrette.

Had a big thrill and a proportionate back-fire the other day. Went down in the old pocket and found a big roll of money—estimated at \$3 or \$4. But it was only one of those old-fashioned blanket dollars whose size we hadn't realized until we got used to the smaller ones now current.

ORANGES AND GRAPEFRUIT

By the dozen or box. Oranges 10c per doz. and up. Grapefruit 20c per doz. and up.

Oranges \$2.00 Per Box

Send your friends in the North an assorted box of fruit. Pick it yourself if you wish. My grove has been inspected and I can ship to most northern states.

Furnished House For Rent. Other houses to rent. Acre lots with grove for sale at one half city assessed valuation.

Avon Park, Florida

Avon Red Devils Win Double Header From Sebring Team

Sebring High School Blossoms lost a double header to the Avon Park Red Devils Wednesday night on the Avon Court. The Sebring boys lost their game 19 to six while the girls were topped 16 to five. The Red Devils held the Blossoms to a lone goal until the last quarter, running up a commanding lead at the final whistle.

Hygema, Ewing and Howard each contributed one field goal for Sebring's total, while Martin was high for the Red Devils with five baskets from the field for a total of 10 points.

The Weaver sisters proved a barrier to a girl's win by scoring all of Avon Park's total with eight points each. Sebring was held to one lone point in the first half, a foul goal by Waller. Butts and Mayo each counted one basket during the last half to bring Sebring's total to five at the final whistle.

New Phone Directory Is Being Distributed

The Inter-County Telephone & Telegraph Company has a new telephone directory out for Avon Park and is making distribution of same to its customers. The directory is corrected up to January 15th, and besides furnishing a new and complete list of subscribers has much information of interest to patrons, and carried the usual amount of advertising. The directory was printed in Avon Park by The Times.

Cars Demolished and Two Hurt In Collision

Jack Langston of Sebring and Warren Atkinson of Avon Park were injured in an automobile collision last Saturday night, when Atkinson in a Studebaker coupe ran together on a curve on the Wauchula road a short distance out of town. The cars were badly wrecked, the Chevrolet being almost demolished by the impact.

Both men were brought in after the wreck and received treatment by Dr. W. C. Touchton. While their injuries were painful, neither was seriously injured, and both men were out the first of the week.

It has been found that water pressure prolongs oil flow in Pennsylvania fields.

BUILT TO OUT-PERFORM

... the vital reason
why BUICK out-
sells every other
fine car by 2 to 1

Keep in mind, when you buy your car, that you are buying miles—and that you will get more and better miles in a Buick, as more than 2,400,000 owners have proved.

Buick builds so thoroughly—builds such extra strength and stamina into the Buick Valve-in-Head engine and sealed chassis—that many Buicks, five, ten or fifteen years of age, are still in service... and the speedometers of many of these cars register 100,000 miles and more.

Buick is built to out-perform. This, together with the beauty and comfort of Buick's Bodies by Fisher, explains why America is driving 700,000 more Buicks than any other car in Buick's price class... and why Buick today wins from two to five times as many buyers as any other car priced above \$1200. Come, see Buick's wide range of body types. Then take the wheel! A single drive will convince you that Buick is the big motor car value of the day.

Buick offers 15 body types, priced from \$1260 to \$2070, f. o. b. factory. Marquette offers 6 body types, ranging from \$990 to \$1060. Special equipment extra.

Convenient terms can be arranged on the liberal G. M. A. C. time payment plan. Buick and Marquette delivered prices include only reasonable charges for delivery and financing. Consider the delivered price as well as the list price when comparing automobile values.
