

SEPTEMBER USHERS IN TOURIST SEASON

**Reports From Points Over
State Show Fall and Winter
Activities in Varied Lines.**

Tampa, Sept. 3.—Besides being a holiday, September 1 in Florida marked the opening of the tourist season, of the school year and the beginning of the fruit shipping season, according to press reports.

Information from Bureaus all over the State gathering statistics, show that almost without exception the resumption of scholastic studies brought an influx of people who wish to spend the winter in the South and at the same time have their children in school during their stay.

St. Petersburg reported the opening of its Tourist Registration Bureau last Tuesday. Several score persons from other states already on hand. Request for places is double that of the same period last year, registration officials say.

Opening of Stetson University at DeLand, Rollins College at Winter Park and the State University at Gainesville, and other institutions of higher education also caused a sizeable growth in the population of those cities, the figures show.

Jacksonville says medium sized homes and farm land are being examined by prospective citizens.

In the Palm Beaches preparations are being made to make ready houses, hotels and apartments for new tenants.

At Melbourne queries are coming in earlier than usual from people who want to spend part of the year on the East Coast.

Sarasota is building more cottages for its winter population.

At Fort Myers the Thomas A. Edison Bridge, an important link in the Tamiami Highway to Miami, will be ready for use within 10 days. Formal opening is to come next October 14.

Five well known hotels at Miami Beach will be opened two weeks earlier than usual, according to their owners.

Reports from Winter Haven, in the heart of the fruit growing belt, show that grapefruit is above the test prescribed by the State to prevent the shipment of green citrus and packing houses this week will begin shipping the crop North. Oranges did not pass the test made last Thursday but will be available in quantities within a week or more, according to citrus authorities.

GOOD FARM PRACTICES REDUCE WEEVIL LOSS

Close spacing of cotton combined with the judicious use of fertilizer is helping thousands of farmers to outsmart the boll weevil. These two practices make it possible to hurry the development of a large number of bolls so that they are out of danger when the weevil begins to do its worst damage.

Where weevil infestation is heavy it is always difficult to mature the bolls on the upper half of the stalk. Experiments have shown, however, that a full crop of cotton may still be grown by spacing the stalks closer and by leaving two stalks per hill instead of one.

An abundance of plant food is necessary to form and mature the bolls on the two stalks in half the time as was formerly required to mature the same number of bolls on one stalk. The best way to supply this food is to side-dress with quick-acting nitrogen fertilizer at the first or second cultivation after chopping.

The extra plant food speeds up the formation of squares and the development of bolls before the heavy weevil attacks. Although the weevil will likely destroy the bolls at the top of the stalk the large bolls at the bottom, set early in the season, are safely out of danger.

The side-dressing is applied 25 to 40 days after planting or at about chopping time. The common application is 100 to 200 pounds of Chilean nitrate per acre. The nitrate dissolves in the soil just like sugar and is absorbed at once through the roots of the plant.

City Attorneys Meet in Sebring.

Next Saturday Sebring will be the host to a meeting of city attorneys of the state of Florida. This assemblage of legal minds will meet in the court room at the court house and several important matters will come up for round table discussion. It is understood. Sebring's city attorney, M. R. McDonald, says he expects about 20 or 30 will gather here for the conference.

Venus School Bids Opened.

Routine business was the order of the day for the county board of public instruction at their meeting yesterday, this having been postponed from Monday which was Labor Day. Bids were opened for transportation of children to the Venus schools and there

WHEN THE CHILDREN ASK FOR JAM

By MOLLIE MARTIN

"Mother, may I have a piece of bread with jam on it?"

Mother nods her approval and proceeds to furnish the requested delicacy.

"Put lots of jam on it, mother. I don't care if the bread isn't thick."

This little monologue has been heard by countless mothers since the generation when some one first learned how to make a jam, a jelly, or a preserve. Young America, young Europe, and young Africa are born with the proverbial "sweet tooth," and it does not take them long to notify their parents of this fact.

After all, we who study dietetics rather feel that these requests are urged by old Mother Nature herself. It is very easy to furnish a child with too many heavy foods that are hard to digest. Seldom does the child secure sufficient of the necessary minerals and vitamins. Why the child secures plenty of his favorite jam or jelly, he not only adds to his stock of minerals and vitamins, but he furnishes his hard working little body with liberal quantities of sugar—that quick-energy food which is needed as fuel.

It is wise, therefore, to see to it that your larder always contains

plenty of these foods, and the following novel recipes will help you to introduce a pleasant variety.

Seedless Blackberry Jam.

The seeds of blackberries are very objectionable to many, so it is well to get rid of them. Mash berries, cook in their own juice until thoroughly heated, then remove seeds by pressing through a fine sieve. Measure pulp and liquid and add one cup sugar for each pint. Add sugar to pulp and cook rapidly until thick, stirring frequently. Pack in clean, hot jars and seal.

Preserved Yellow Tomatoes.

For each pound of small, yellow tomatoes, use three-fourths pound of sugar and one lemon. Tomatoes about the size of small plums are very desirable. Pour boiling water over them and cover tightly for two minutes, then quickly drain and cover with cold water. This will loosen skins. Peel tomatoes, being careful not to break them. If skins will not come off, treat them again with boiling water. Place the sugar and tomatoes in a crock or enamel dish and let stand overnight. Drain off juice and boil rapidly until it thickens. Add tomatoes and the thinly-sliced lemons. Cook until clear and thick. Seal in clean hot jars.

VENUS

Milton and Vernon Norton were in town Sunday.

Mrs. Mary G. Poole is home again for a few days.

Titus Rowell and family were in town with a new Ford sedan.

Walter McDuffie left Sunday night for Frostproof for the fruit season.

A. H. Farrington and W. H. Cannon motored to Arcadia Saturday.

W. E. Hendry and son W. E. Jr., motored to Arcadia Thursday last week.

Mr. and Mrs. Denis Pool were the guests of his sister Mrs. B. S. Johnson, Sunday.

F. K. McGee preached Sunday at Alva.

He drove over in his new Ford sedan.

Supt. F. N. K. Bailey of Sebring was a business visitor in our town last week.

Mr. and Mrs. G. A. Strickland spent Sunday in Orlando with her parents Mr. and Mrs. Sweet.

L. C. Thorne and Alex McDugald and J. C. Dasey motored to Arcadia Friday of last week.

Mr. and Mrs. A. L. Stalls of Palmdale were the guests of Mr. and Mrs. W. C. Stalls, Sunday.

Mr. and Mrs. Percy Silex and family were in town Sunday, the guests of Mr. and Mrs. F. M. McGee.

Mr. and Mrs. Alex McDugald and son Charles spent Sunday with his daughter Mrs. Myrtle Hendry.

Mrs. N. B. Jackson and daughter Sarah Virginia and Mrs. Sallie Whidden motored to Arcadia last Saturday.

Mr. and Mrs. Lawrence Summerville and granddaughter Ruth, motored to Arcadia Saturday of last week.

Benjamin McGee and family are living in Venus but he is working in Sebring. He was home Sunday.

Mr. Stewart of Tampa and B. W. Johnson of Arcadia and Miss Edna and Jennie Lundquist were in town Tuesday.

Mr. and Mrs. A. H. Farrington and son and Mrs. W. H. Cannon were the guests of Mr. and Mrs. N. B. Jackson Monday.

Mrs. W. E. Hendry, Jr., and Mrs. Alex McDugald motored to Arcadia Wednesday in behalf of the school bus for the next term.

Mr. and Mrs. W. E. Hendry, Jr., and family motored to Hall City Sunday as guests of Mr. and Mrs. L. L. Stalls and daughter Pauline.

Prof. and Mrs. I. C. M. Ellenberger returned to their home in Avon Park Thursday. They will ship a car of early grapefruit while there.

Mr. and Mrs. George Summerville and family and Miss Jeanette Collier motored to Palmdale Sunday as the guests of Miss Collier's parents, Mr. and Mrs. J. V. Collier.

Harrel Stewart and Frank Christof of Lakeport were in town Wednesday. Mr. Stewart brought a load of furniture for S. F. Langford until after the storm is over.

**Suits Filed In Office
Clerk of Circuit Court**

Cases filed in the office of the clerk of the circuit court the past week include the following:

Williams Evans vs. Ray Cogle. Civil action, \$400 damages.

Helen Hall King vs. B. H. King. Divorce.

A. R. Klemm and wife vs. Highlands Crane Groves Co. et al. Bill to quiet title.

With the coming of the automobile in New Zealand, motor lovers have started a craze for attending concerts in distant cities.

CHEVROLET NOTES

SALES IMPROVEMENT

**Representative Says Attitude
of Public Is One of Con-
fidence For Future**

Detroit, Mich., Sept. 4.—Definite signs of immediate improvement in the low priced automobile field were noted by J. C. Chick, Assistant General Sales Manager of the Chevrolet Motor Company, during a recent field survey which brought him into contact with every major marketing area East of the Mississippi.

Sales are picking up, stocks are in satisfactory shape. And the relation of new to used car stock is in decidedly better proportion than in 1929.

"Perhaps the most noteworthy sign, however, is the confident attitude voiced by business leaders I spoke to during the trip," Mr. Chick said. "Merchants, bankers, professional men everywhere seem to feel sure of an improved Fall and Winter, and such opinions are a reflection of the attitude of that part of the public which these men deal with. If, as has been said repeatedly, the recession this year was mainly psychological, then we may expect an early return of new record months, for the public is looking to the future with confidence, where a few months ago it looked with a certain amount of hesitancy."

"The best proof of this changed attitude is proved by the sales chart. In the Carolinas and extreme Southeast, which I visited just before the middle of the month, our sales for the first days of August were above the same period in July."

"Throughout my territory, sales today as against the same period last year are comparatively better than they have been at any time in 1930."

"Our recent announcement of a wider variety of colors, the 440 reduction on all sport models, and wire wheels furnished without additional cost are factors which will tend to aid sales in the late Summer and Fall. But the major factor is that changed public attitude—the replacing of hesitancy by confidence."

**Swap 200 Lbs. "Soda"
For 18 Bushels Corn**

**Yields Increased 100 Per
Cent in Demonstrations on
526 Southern Farms.**

That corn yields in the South may easily be doubled is conclusively shown by the results of 526 side-dressing demonstrations conducted by Southern farmers during the last two years.

A summary of the tests shows that these farmers added 18.2 bushels to their yields and \$13.68 to their net profits from each acre. They side-dressed the corn with Chilean nitrate of soda at an average rate of 250 pounds an acre when the plants were about knee-high.

The average increase in yield resulting from the side-dressing was just about the equivalent of the average corn yield in the South, as shown by Government figures.

The first night game in the New York metropolitan district at Flushing City in the International League, drew 12,000 persons, a near record.

HEADACHE RELIEVED QUICKLY

CARTER'S HEADPILLS

**Sleeps
Like a
Baby**

Mrs. John Simpson says: "At times I am very nervous, and unable to sleep at night. I find that I can take Dr. Miles' Nervine and sleep like a baby. Your money back if this time-tested medicine fails to do as much for you."

FLORIDA BANKS ARE IN VERY LIQUID CONDITION

Remarkable Figures Given In Second Article By Glenn Griswold

The following is the second of a series of articles written for the Chicago Journal of Commerce by Glenn Griswold and reproduced through permission obtained by the Florida State Chamber of Commerce. This second article tells an amazing story regarding Florida Banks according to balance sheets recently made public.

Florida Balance Sheets Tell Some Amazing Stories

By GLENN GRISWOLD.

With further reference to financial conditions in Florida, there is appended a tabulation of certain balance-sheet items of a miscellaneous group of Florida banks which tells an amazing story.

First, it should be explained that these figures are taken from reports to state and federal controllers as of June 30 last, collected in haphazard fashion. I simply wrote to a friend in Florida whom I knew to be interested in one banking bank and some other banks, and asked him to send me immediately such reports as he found at hand. He sent me 15 which he had in his files, large and small, good and bad.

The summary shows, first, that the banks of Florida generally are in a cash and quick asset position, which, so far as I know, is not to be found anywhere else in the country. One of the reasons for this is that the banks of Florida pay off their depositors in cash and quick assets, on a few hours notice; and all of them would need to liquidate a surprisingly small portion of their loans in order to satisfy depositors. Assuming that other balance-sheet assets are sound, almost every one of these 15 banks could pay its depositors in full without collecting a dollar of loans and discounts.

It is the loan and discount item which shows the pathetic state of banking in Florida as a result of public hysteria. The accounting of the First National of Miami, the first bank on the list, is a good example. Here is a bank with more than \$14,000,000 of deposits, almost exactly enough of quick assets to pay them off, nearly \$6,000,000 of those quick assets in cash, and yet the total of its loans and discounts is but \$2,730,439.

The public attitude being what it is, it is undoubtedly good business for this bank to stay liquid, that it could pay off every depositor immediately, and one wonders what kind of banking service can be rendered to a community where the bank maintains in its till more than twice as much cash as the total of its loans.

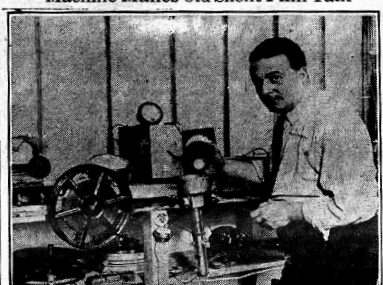

A more extreme example, of course, is the little First State Bank of Tampa Shores, which could pay off its depositors in cash in 20 minutes and have nearly \$6,000 left. That bank is loaning, presumably to the community, but \$7,500.

In this tabulation, deposits include all kinds of deposits. Quick assets include cash, call loans, all kinds of bonds and commercial paper, cash items, and cash in till and due from banks, and call loans, although but two or three of the banks made separate reports of call loans, the latter for the most part the item is entirely in cash.

The quick assets items of all of these banks seem surprisingly sound. Because Florida municipal bonds have been seriously depreciated in a separate item and, where they are so shown, they are negligible in proportion to United States government and other municipal bonds.

The Hillsboro Bank shows a single item of \$970,850 of United States and school bonds, and there is no way of dividing this item. The First City Bank reports \$109,875 of county and municipal bonds without indicating whether or not they are Florida bonds. These are the only banks whose reports do not show clearly that they could not hold enough of Florida municipalities to have any important effect on their condition.

Machine Makes Old Silent Film Talk

Paris, France.—Alfred Lahr, of Paris, with his recently invented apparatus which he claims will transform silent movies into talking ones and bring old stars before the public again in the new medium. The new system requires no film by the "pollicide" method along the edge of the film. A group of actors representing the characters in the film record their roles while watching the film on a screen. Accuracy in synchronization is thus obtained.

Two Ancient Maps of Florida Discovered By Hamilton Holt

Winter Park, Sept. 3.—Two ancient maps of Florida, one an original and the other a copy, were discovered in Europe by President Hamilton Holt of Rollins and his son, Thomas Jefferson, geographer to his majesty, George III, during the English occupation of Florida.

This map, an original, was purchased by Hamilton Holt in London. Although hurriedly prepared, apparently, it served the English for many years but because of its inaccuracy, led to the appointment of William Gerard de Brahm as surveyor general for the Southern Division of North America. It was found by de Brahm that the Romans made the first complete and accurate map of Florida.

President Holt purchased the second map in Paris, Hanna reports. It is an old copy of a map drawn by Le Moyne, the artist who accompanied Laudonnière to Florida in 1664. The embellishments consist of two ships on the high seas, and a large whale with its tail projected high above the water. On this map, the Island of Cuba is more accurately shown than is the peninsula of Florida, or the coast of Georgia, both of which, Hanna reports, are "decidedly erroneous." It is expected that the maps will stimulate additional interest in the course in Florida History at Rollins.

Anti-Mosquito Fight Planned at Ft. Pierce

Fort Pierce, Sept. 3.—Norman G. Platta, local city health officer and superintendent of mosquito control operations for the St. Lucie County Sanitary District, has gone to St. Petersburg to work with Russell Broughman, assistant sanitary engineer of the State, in health, in making of mosquito control survey of Pinellas county. Both the fresh and salt marsh breeding areas are to be surveyed.

Mr. Platta, who has been in charge of the field work here ever since the inauguration of control measures, is one of the recognized authorities of the State in the field of activity and recently has assisted in making surveys of Broward, Palm Beach and Sarasota counties.

One thing in the home town that hasn't changed is the local merchants' taste in calendars.—Notre Dame Juggler.

There have been many bank failures in Florida recently. A few of these failures were due to the fact that the banks just now are liquidating losses of the real estate boom. For the most part, however, these closings are due to an epidemic of deposit withdrawals. That banks can put themselves in such liquid condition as is indicated by the reports of the banks here tabulated, in the face of that condition, is somewhat surprising. How the state can transact business and trust banks as Florida has treated here is even more surprising.

New Recipes—Quick Process

By BETTY BARCLAY

How tempting the peaches are at the stores these days! Be sure to put up plenty of jelly and jam so that winter's menus will be flavored with summer. In making peach jelly and jam, busy housewives prefer the short-bolt method with bottled peaches. It takes only a few minutes, yet you get more glasses of jelly and the flavor is like the fresh fruit. Here are two tested peach recipes, quite delicious:

Peach Peel Jelly

Ingredients: 3 cups (1½ lbs.) peeled peaches; 1 cup sugar; ½ cup (¾ lb.) sugar.

Use only fully ripened fruit. Do not peel. Remove pits and crush peaches thoroughly. Add ½ cup water. Stir fruit mixture in cover, and simmer 5 minutes. Drip through jelly bag. Measure juice and sugar into large saucepan, stir, and bring to a boil. At once add the bottled pectin, stirring constantly, and bring again to a full rolling boil and boil 1½ minutes. Remove from fire, let stand 1 minute, skim, pour quickly. Cover hot jelly with film of hot paraffin; when jelly is cold, cover with ½ inch of hot paraffin. If peaches lack flavor or tartness, add ¼ teaspoon lemon to sugar, and ¼ teaspoon almond extract to jelly after skimming. For a soft, very slow set use ¼ cup less sugar. Requires about 3½ pounds peaches. Makes about 9 eight-ounce glasses.

Ripe Peach Jam

Ingredients: 4 cups (2 lbs.) crushed fruit; 1 bottle cranberry; 7½ cups (3½ lbs.) sugar.

Use only fully ripened fruit. Peel, pit, and crush peaches thoroughly. Measure peaches and sugar into large kettle, mix, and bring to a full rolling boil, stirring constantly. Boil hard 1 minute. Remove from fire and stir in cranberry. Boil again 1 minute, then pour into jars for use in 5 minutes to cold, slightly to prevent floating fruit. Pour quickly. Cover hot jam with film of hot paraffin; when jam is cold, cover with ½ inch of hot paraffin. Roll glass to spread paraffin on. If peaches lack flavor or tartness, add ¼ teaspoon lemon to sugar, and ¼ teaspoon almond extract to jam after skimming. Requires about 3 pounds peaches. Makes about 11 eight-ounce glasses.

Carrot Marmalade

12 raw carrots
4 cups sugar
3 lemons

1 teaspoon ground cloves
1 teaspoon ground cinnamon
1 teaspoon ground allspice.

Grate carrots, add sugar and let stand one hour. Add lemon juice and spices. Cook slowly for 1 hour. Turn into sterilized jars and seal when cold.

Coffee Caramel Parfait

1½ cups milk
2 tablespoons ground decaffeinated coffee.

¼ cup sugar, caramelized
2 egg yolks, well beaten
¼ cup sugar

1½ teaspoon salt
1½ cups cream
1 teaspoon vanilla.

Scald milk with coffee in double boiler and strain immediately. Add caramelized sugar. Beat egg yolks with remaining ¼ cup sugar and salt, and add to first mixture. Cook until slightly thickened, stirring constantly. Cool. Add cream and vanilla. Pour into mold, filling it to overflowing, cover with greased paper, press cover tightly down over paper, and place in ice chest for 3 to 4 hours. Or, place in freezing trays of automatic refrigerator and let stand 3 to 4 hours. Makes 1½ quarts parfait.

Stuffed Celery

3 stalks white, crisp celery
¼ cup cream
1½ cups evaporated milk
1½ cups chopped nuts

FLORIDA CITRUS CROP IS READY TO START NORTH

Estimated at 20,000,000 Boxes By U. S. Agriculture Department

Tampa, Sept. 3.—Florida's new citrus crop, estimated by the United States Department of Agriculture at 20,000,000 boxes, will start on its way to Northern markets this week.

Some grapefruit has passed the maturity test at Winter Haven and it was reported there that the Polk county crop is maturing rapidly. Another week should bring similar reports from other parts of the citrus belt.

The Gentile Brothers Packing company and the American Fruit Growers association began packing around Haines City Saturday, using two or more crews each. They expect to ship their first cars today or tomorrow. The Haines City Growers association is recruiting its forces in preparation for opening its two packing houses this week.

The season starts this year relieved of a great burden it carried at the opening last season. The Mediterranean fruit fly, which has been materially modified, permitting unhampered shipments into the East and Midwest.

Government workers will help shippers prepare fruit for Southern markets under fly regulations and hope to obviate much of the difficulty experienced last season when the railroads were slow.

The canning industry will utilize a big part of this season's crop, shipping a tremendous new market for the industry. The Florida Citrus Exchange has reported that 1,000,000 boxes of fruit have been signed for canning and manufacture into by-products.

The exchange expects the canning industry to have a healthy effect on all phases of the industry, especially the value of groves.

No Fruit Fly Larvae Are Found In State During Three Weeks

Washington, Sept. 3.—Covering Florida in an intensive search for any evidence of the presence or activity of the Mediterranean fruit fly, approximately 600 inspectors are working under the direction of the plant quarantine and control administration of the United States Department of Agriculture.

In the first 21 days of August these inspectors sent to the Orlando, Fla., office of the organization 40,720 larvae which they had found in the course of their work. Experts at the Orlando office examined these and found that none of them was a Mediterranean fruit fly larva, according to Lee A. Strong, chief of administration in the area.

The number of the larvae and vegetables from which they were taken, Strong said, indicate the intensity and the efficiency of the search for the fruit fly in Florida.

The inspectors found larvae in avocados, guavas, papayas, oranges, grapefruit, tomatoes, pears, pomegranates, peaches, plums, wild grapes, grapes, pineapples, lemons, eggplants, persimmons (wild and Japanese), pawpaws, tangerines, papayas, olives, mangos, cucumbers, pears, fruits, custard apples, limes, maypops, bananas, almonds, quinces, low apples, Surinam cherries, sapotas and cantaloupes, it was said.

Edison Bridge at Fort Myers Will Be Opened October 14

Fort Myers, Sept. 3.—Tuesday, October 14, has been set as the date for the formal opening of the new Edison Bridge across the Caloosahatchee River here.

The new bridge, named in honor of the inventor and regular winter resident of this city, will be completed before the date set for the opening. The bridge will be opened to the public on October 14.

Although Edison will not be present at the formal opening of the bridge named in his honor, it is planned to have the inventor participate in the ceremony by giving a telegraphic signal which will start the official party across the bridge.

Then there was the Burglars' Ball, at which every man came with a blind—Yale Record.

½ tsp. onion juice
1 tsp. chopped mangos
Mix the onion, milk and seasonings thoroughly. Pile mixture into the grooves of the celery.

Interesting Foreign Foods

By BETTY BARCLAY

Some of the most delicious recipes come to us from other lands. Foreign chefs have long known the use of sugar as a seasoning to blend and point-up flavors, rather than for its sweetening effect, and the following recipes are practically guaranteed to tickle the most finicky palate.

Tongue In Aspic

Wash and scrub a beef tongue in salted water and boil until tender. Remove skin and place the tongue in a saucepan. Add two onions, one stalk of celery, four cloves, and salt and pepper. Cover with liquor in which tongue was boiled. Add one blade of mace, one bunch of thyme, one bunch of parsley and one teaspoon sugar. Simmer for two hours. Remove tongue. For each pint of the liquor add one tablespoon of gelatin that has been soaked in cold water. Stir for two minutes over very low flame. Strain out meat and tongue. Chill thoroughly, garnish with watercress, and serve.

Peas and Onions

Cook separately, until tender, one and half cups shelled peas and one-half cup little onions. Heat four tablespoons thick cream in a saucepan. Add the peas and onions. Shake lightly until well covered with the cream and very hot. Add one-fourth teaspoon sugar. Mix thoroughly and serve.

Tripe à la Creole

1 pound tripe
3 tablespoons flour
2 cups milk
3 tablespoons chopped onions
Chopped green pepper
1½ cups strained tomatoes
Salt butter, add pepper and onion, and cook until onion is soft and yellowish in color. Add flour, stir until smooth, then add tomatoes, and cook until well combined and thickened. Season to taste with salt. Boil tripe until tender, cut in two-inch pieces, add to sauce, and simmer ten minutes.

Ham Salad Sandwiches

2 small pickles
2 cups hard-boiled cooked egg
½ cup mayonnaise or cooked salad dressing
½ cup evaporated milk
½ cup butter, creamed
Put ham through food chopper, add chopped pickle, egg, salad dressing, and mayonnaise, and mix thoroughly. Spread mixture on bread. When ready to serve cut in triangles. Yield: 16 sandwiches.

Orange Ice-Box Cake

2 cups sugar
1 tablespoon flour
3 eggs
1 cup milk
1 tablespoon butter
½ cup orange juice
Grated rind of orange
21 lumps lard
1 cup cream

Mix sugar and flour and add to beaten egg yolk; add milk and butter and cook over hot water until thick and smooth; add orange juice and rind. Remove from fire, cool slightly and add stiffly-beaten whites of eggs. Line bottom and sides of baking form with ladyfingers, flat side toward the pan and close together. Cover ladyfingers with a layer of filling; place layers in turn on top of this, another layer of filling and a top layer of ladyfingers. Place in icebox for 12 hours to harden. When ready to serve, remove from icebox and cover with whipped cream.

Iced Coffee

(By BETTY BARCLAY)

The usual method of making iced coffee is to pour the hot beverage into glasses filled with ice—a simple process which, however, does not always give the best results.

Iced coffee should be made in this way only when it has been brewed double strength, for it will lose approximately half its strength by dilution when it is poured over the ice. If it is made fresh, however, formal strength, for it will lose approximately half its strength by dilution when it is poured over the ice.

But be sure to avoid another common mistake—brewing the coffee and then letting it stand in the pot or percolator for a long time. When this is done the coffee not only loses its delightful flavor and aroma, but it also is likely to be spoiled by a bitter taste from the metal vessel.

A new and unusual way to make iced coffee is to brew it slightly over normal strength and immediately place it, in an air-tight jar, in the refrigerator to chill. When ready to serve put only a little ice in the glasses and pour in the already-cooled beverage. The result is delicious.

Our idea of a typical first class man is one whose photograph record looks like shrouded when he changes the needle.—Annapolis Log.

GLADES BOARDS LAY PLANS EMERGENCY AID

Radio Communications Plan Considered; Relatively Few Complaints

West Palm Beach, Sept. 3.—Portable short wave radio plants to keep isolated sections of the upper Everglades in communication with the outside world during emergencies was a plan taken under consideration by the Okeechobee Flood Control and Everglades Drainage boards in joint session with Gov. Doyle Carlton here this week. The proposal was referred to a committee on which the Red Cross and the division of the Red Cross told of detailed plans for assisting Everglades committees in case of fall storm season and early crop planting season arriving simultaneously relatively few complaints as to Everglades conditions were heard although some protests were voiced about high water conditions south and southeast of Lake Okeechobee and William Griffith, flood control board member from Okeechobee City, declared Lake Okeechobee to be "in a very dangerous condition."

Representatives of the two boards and of the Red Cross told of detailed plans for assisting Everglades committees in case of fall storm season and early crop planting season arriving simultaneously relatively few complaints as to Everglades conditions were heard although some protests were voiced about high water conditions south and southeast of Lake Okeechobee and William Griffith, flood control board member from Okeechobee City, declared Lake Okeechobee to be "in a very dangerous condition."

Governor Carlton was asked to investigate the alleged refusal of the Federal Farm Loan Bank at Columbia, S. C., to make seed, feed and fertilizer loans in excess of \$2,000 to all of the tenants on a piece of land owned by a single farm individual. Authority was granted for purchase of pumps for the State Experimental Station near Belle Glade from a \$5,000 appropriation.

Farm Manager Is Trampled To Death By Bull

West Palm Beach, Sept. 3.—Harry Rice, 37, farm manager at Hatchet Farm, 15 miles west of here, was trampled to death by an enraged bull yesterday. The animal was in a pen where he was helping a fence.

When the tragedy was discovered the bull was grazing peacefully in a nearby pasture. While his wife and two farm hands were speeding to a hospital here, Rice lay dead on the ground, his body mangled by the animal's hooves. An ambulance was called and all efforts to save him failed. Rice had died on the way.

John Fordham, one of the farm employees, himself once attacked by the bull, said he and other workers had been busy at the time and failed to hear Rice's calls for help until after the bull had knocked him down and trampled him. Rice's body will be taken on to Big Island, Va., for burial.

DESOTO CITY

Miss Sara Leaphart has returned from a trip to Leesville, S. Carolina.

Miss Willye Taylor spent the week with Miss Allie Mae Etheredge.

Mr. and Mrs. E. M. Philpot dined with Mr. and Mrs. L. T. Farmer Sunday.

Col. F. N. K. Bailey and grandson Frank Fuller spent Sunday with R. W. O'Berry.

Lee Etheredge and brother Schuler spent the week end with their mother, Mr. M. R. Etheredge.

The Epworth League enjoyed a chicken picnic last Tuesday night. A very pleasant evening was enjoyed by all.

Mr. and Mrs. J. Peyer, Mrs. Register and Mrs. Perry Etheredge, spent Friday with the 4-H Club boys in Brighton.

Miss Mary Thompson and Mildred Leaphart of New Castle, Del., are the guests of the latter parents, Mr. and Mrs. J. W. Leaphart.

Aged Tasmania Man Falls From Tree and Breaks His Leg

Venus, Sept. 3 (Special to the Times).—John Hendry, an aged pioneer of Tasmania, section, fell from a tree Monday and broke his leg. He was being all alone at the time it was some time before he could secure assistance. Shooting being of no avail, he crawled to his home and fired his gun which attracted Mr. Brown who called Bill Poole who took him to the home of N. B. Jackson.

James May Jr. all alone at the time it was some time before he could secure assistance. Shooting being of no avail, he crawled to his home and fired his gun which attracted Mr. Brown who called Bill Poole who took him to the home of N. B. Jackson.

Salaries Bill For District Judges To Be Considered

Washington, Sept. 3.—Two bills relating to the salary of United States district judges are due to be considered and one of them passed during the approaching short session of Congress which convenes next December.

Under the House bill the salary of district judges serving in the United States district judges are due to be considered and one of them passed during the approaching short session of Congress which convenes next December.

In a statement yesterday Senator Duncan U. Fletcher declared that he would support the Wagner bill. He said also that the question of population should not be taken into consideration for the reason that a change in a district which did not happen to include a city of over a million population worked equally as hard and constantly as a United States district judge residing in a populous city.

Sholtz Heads National Elks Ritual Group

Daytona Beach, Sept. 3.—David Sholtz was notified here yesterday by Lawrence H. Rupp, grand exalted ruler of the Benevolent and Protective Order of Elks, that he had been appointed chairman of the Grand Lodge ritualistic committee. Sholtz has been a member of the committee for two years.

This committee sponsors a ritualistic contest at each Grand Lodge convention and is also sponsor of local contests throughout the country. Sholtz was also advised by Rupp of appointment of district deputies for Florida, William T. Kennedy of Jacksonville being named for the Northern district; Arthur O'Shea of Fort Lauderdale for the Eastern district and James J. Fernandez of Tampa for the Western district.

Sholtz is a grand esteemed local knight of the Elks Lodge, has served as president of the Florida State Elks Association and is a past exalted ruler of the Daytona Lodge.

BOOK LEARNING NOT EVERYTHING.

School days are here again. All over the land thousands of young people with book and pencil and tablet, are congregating in the splendid edifices of the cities, or in the humbler school buildings of the rural districts. The little fellows hardly know what it's all about; the older pupils sense the reason for school but vaguely; and even some of the teachers are not wholly clear as to the real object of school attendance.

That object, in the final equation, is not altogether to learn to read, and write, and "rithmetic"—to "do sums," to "write pieces." A more important reason for school is that the pupil may learn how to live with his kind; may form the contacts through which he may know and respect the rights of others. More important than the "book learnin'" is the discipline of the school—the impressing upon the pupil that he must conform to certain rules in order that the little world of his school may not be subjected to disorder and disturbance because of his wilfulness and indifference. That lesson, well learned, will enable him to go out into the bigger world of adult life prepared to obey the rules of that life, which for the most part are identical with the laws of the land. And that obedience to the rules of life and the laws of the land is what constitutes good citizenship. Then, too, school should teach the pupil, in the competition of class work, and in the rivalry of campus sports, to "play the game," fairly and squarely, that he may be fitted to play the game of life in the same way. A cheat in examinations, a poor sport in athletics, will be a cheat and a poor sport in the larger school of life.

Much of the education indicated will be absorbed by the students through association and through school spirit. Teachers often are harried, and over-worked, and under-paid, and have little time to teach anything outside of the prescribed routine of books. But a hint or a word, now and then, from the teacher, emphasizing the humanities, the equities, the ethics of life, will be planting a seed that long after may flower in the pupil's character, making of him or her a better man or woman.

When the governors met at that drought conference they probably joined in the song, "Let It Rain!"

They must be simple-minded people down in Peru. They seem actually to have expected their Congress to work.

Aimee's face was lifted all right, but it probably fell when she read some of the newspaper comments on her latest didos.

The prize optimists of the country are those who composed the group that met in Tampa last week "to make plans to have L. E. Womack, of Tampa, elected to Congress."

"They're Going to Wear Their Skirts Longer," says a fashion note headline. Yeah—and we are going to wear our pants longer, too, while these hard times are with us.

The only people figuring in the alleged assassination plot who are coming out of the investigation as clean as when it started seem to be Doyle Carlton and Al Capone.

It's a poor Florida town or village that can't point with pride to half a dozen or more sites for the proposed National Soldiers' Home, each absolutely the best site in Florida.

Chairman Legge's suggestion that the women "bake their own," in order to bring down the price of bread, will not make much of a hit with the ladies. Nowadays they want their bread ready-sliced, and probably are long they will insist upon it being cut up into convenient sized bites, buttered on both sides.

Brisbane declared recently that no one knows what is wrong with the country. There is something radically wrong with any country that is willing to pay Rudy Vallee \$12,000 a week—or \$12, for that matter.

Dull times are not confined to Florida. They are not only nation-wide, but exist in many countries. Much of South America is in a ferment of revolution, the prime cause of which is given as depression.

"FERTILE GROUND FOR PLANTING"

Like the Irishman's pig, St. Augustine "is little but she's old." She celebrated her 365th birthday Wednesday of last week.

We do not believe we will attend Lake Wales' Elstedsdoff. We are afraid we would not know how to behave at an Elstedsdoff. Later, if Lake Wales decides to put on an Etain, a Cmfwy, or a Shrdlu, we'll be glad to assist.

H. L. Mencken, who if really pressed would admit that he is the world's smartest lad, is hard to please in the matter of governments. He brands the MacDonald regime in England as a failure, and says the United States has a "comic government." Mencken took to himself a wife the other day, and now he'll be able to study real government at close range.

"Brutally liquid" is the descriptive term Glenn Griswold, of the Chicago Journal of Commerce, applies to the banks of Florida. And if you want to run into something brutally frank, apply to one of these banks for a loan. It's tough on the borrower, but it should make depositors' money safe, which is, after all, the first essential of sound banking.

August Hecksher, speaking on his 82nd birthday, predicts that in eighty years the United States will see the end of dire poverty, disease, and unnecessary suffering. Unfortunately, neither Mr. Hecksher or many of the rest of us, will be here at the end of eighty years to verify his prediction. We predict that eighty years hence a lot of poor, sick and suffering people will agree that Mr. Hecksher did not know what he was talking about.

Many people will miss in the pictures the man of a thousand faces, whose artistry and mimicry so often thrilled them. His accomplishments in this respect were the result and the unlooked-for reward of filial devotion. His parents were deaf mutes, and he practiced facial expression and pantomime that he might amuse them, and that they might understand more readily what he wished to communicate to them. Later he was able to capitalize the skill thus acquired, but love was the inspiration that made possible that skill. One must admire and sympathize with the struggles and successes of a son like that, and all regret his untimely death.

At this writing all that is clear amid a mass of testimony, of more or less questionable veracity, is that the whole affair of the alleged conspiracy to murder Governor Carlton is a dirty mess. It is doubtful if the Governor's life has been at all in danger from the source indicated, because those charged with being implicated in the "plot" do not seem to us to belong to the class having the intestinal arrangements necessary to carry out such a program. At the same time, if such a plot were even discussed in the way the State's witnesses have testified, those said to be implicated are crazy enough to be dangerous. The whole episode is so mixed up with bad whiskey and worse women that it can be approached only with gloves and a particularly long-handled pitch fork.

Echoes of the State Press

AM I MY BROTHER'S KEEPER.

Exploited by unmarred and immoral men of the white race the condition of Florida's Seminole Indians is reported as being "pitiable," by Clement S. Ucker, U. S. Indian commissioner who was sent down to investigate conditions here.

He was sent here on the report that the Indians were suffering from want because of the high water in the Everglades. He found to his surprise that they were not suffering so much from the calamity of high water as from the calamity of immoral sewerage from the white man's civilization.

The Indians are a child race in the hands of a supposedly superior race of people to whom they look for provisions, clothing and more recently that wonderful invention the second hand Ford. To buy these necessities and luxuries they sell the skins of alligators and fur bearing animals—coon, otter, etc., and sometimes they sell a beautifully tanned deer skin that in soft pliability vies with the best chamois, due to their skill in tanning.

Our supposedly better class hardly notice their visits to our communities. They pass with a comment of admiration or perhaps amusement at the Seminoles' bright picturesque dresses, their almost innumerable necklaces of gay colored beads, their dignity, shy reticence and probable distrust, which makes them practically unapproachable on short acquaintance.

Our Christian workers and educators ignore the Seminoles and make no efforts to share the light of their culture with him or his children. On the other hand, our bootleggers and decadents are very social and friendly with him. They show him kindness, take the trouble to gain his confidence, get his money and leave him so drunk he has little recollection how it all came about. In Miami Mr. Ucker reports alarming social immoral conditions wherein the home life of the Indian (the last stronghold of the race which has never before been degraded) is now being exploited by dealers of bootleg liquor and owners of so-called amusement places.

It is time that the Seminoles be given a chance to learn some of the better things of our civilization the same as the western tribes are. A school and community work to teach the Indians to help themselves is needed. They are a child race and are the responsibility of our generation. We are our brother's keeper and we deserve branding with the mark of Cain if we permit present conditions to continue, now that they have been exposed. A good Indian agent is needed as the first step. Stanley Hansen has their friendship and confidence, and we believe he can do this needed work better than anyone else. We hope he will be appointed as Indian agent for the Seminole tribe.—LaBelle News.

BIG MEN NOT WANTED.

It may sound cynical, but it is a fact that the really capable men of the country are becoming extremely shy of politics and political jobs. Whenever a man who has made a success in life is proposed as a candidate for either election or appointment, he is immediately pounced upon by the demagogues and hounded without mercy.

The situation was vividly put some time ago by Will Rogers, who with his characteristic keen insight said of presidential appointments: "Big men won't take them, for they won't take a chance on a Senate insult. If he has ever earned more than a Senator, he is in league with big business. If he ever drove a Standard Oil truck or was a bookkeeper in a Morgan bank, he is in league with monopolies. If he is rich he is in league with the devil. But if he has never done anything and has been a financial failure at that, he will pass the Senate as a brother."

While these are the words of a humorist, they are literally true. The United States Senate has degenerated into a body of mediocre men, who delight in attacking their more able fellow-citizens who happen to be proposed for high appointive offices. This degeneration has retarded democracy in the United States Senate.—Plant City Courier.

WHAT WE MAKE OF IT.

A friend who lives in Winter Haven but who is summering in the north, writes and asks: "What will be doing in Winter Haven this coming winter?" Frankly, friend, we do not know. Much depends upon the attitude of our people. If everyone will perk up and put their shoulder to the wheel we look for above the average season. If, on the other hand, each and everyone sits down and "waits for George to do it," we look for things to stall along about as they seem to be doing all over the country.

One guide is probably as good as another and about all we can do is to judge each for himself.

The Ridge section is very fortunate, as we see it, taking things into consideration. It is primarily a fruit section. Our money crop is the orange and the grapefruit. The crop is above the average in bulk and the quality is exceptionally good. Restrictions have been removed and if nothing further develops it looks as though a fair price can be anticipated. Canning plants and packing houses are ready or will be when the season opens to handle the fruit at good advantage. This will give work to the laboring man and the sales should bring more than the usual amount of money for circulation among our people. There is more trucking than usual planned and owing to the drought in a wide territory in our sales range, prices should be good.

There is ample capital to finance the crop right here in Winter Haven. Conditions have settled down and the aftermath of the boom is fast disappearing. The Chief, like many of our business men, has been marking time the past few months. We haven't tried to make any money and we have not been disappointed. We have kept the four intact and are ready for business this winter. Judging from what the business men tell us we do not expect to be disappointed now. We look for a good business and are going to do our share toward bringing it about. Some folks seem to be a little discouraged but we can see no good reason why they should be. Winter Haven is on a good, solid basis again and it is time to go forward as though nothing had happened. Let's Go.—Winter Haven Chief.

THOSE 59 MEN.

Former Ambassador Gerard has compiled a most interesting list of 59 names, which he says represent the rulers of the United States. He doesn't list politicians, either, Andy Mellon being the only one official included. It is interesting to study this list and compare it with the list the average person would have made. Gerard says that these men are the powers behind the government.

Politicians come and politicians go, and their power and influence goes with them when they leave office. But the influence of these men "behind the government" is transferred from person to person, and remains with the office, rather than with the individual who happens to be elected or appointed to this office.

Money is what makes the wheels go around in this United States, it seems, for the list contains a high percentage of bankers and financiers. Magnates of oil, lumber, steel, automobile, copper, aluminum, public utilities, telephone and telegraph, electricity, tobacco, and the movies, one merchant and six publishers and editors.

Among the familiar names are John D. Rockefeller, J. P. Morgan, Henry Ford, the DuPont family, William Loebl, Daniel Guggenheim, and Charles E. Mitchell. Look at the wealth represented by those few names!

The others include five bankers and financiers, magnates of various industries including mining, oil, lumber, steel, automobile, copper, aluminum, public utilities, telephone and telegraph, electricity, tobacco, and the movies, one merchant and six publishers and editors.

And this in a country where royalty is unknown! Our royalty is that of the almighty dollar.—Moore Haven Democrat.

CROSSING CROSSING.

It is rather disquieting to pick up a newspaper and read where some motorist is struck by a train or that he ran into a train on a railroad crossing.

This to our mind is the least excusable of all accidents. Of course we are living in an age of speed, an age in which human life is of no value whatever. But with all the speed that the motorists on our highways attain, it seems to us that there should always be time to slow their speed enough to be certain whether a train is approaching or not.

In our travels, we have found that nearly all grade crossings are marked by the railroad company on the highways there is a marker 100 yards from the track warning motorists that they are approaching a railroad crossing.

All motorists know that it is impossible for the trains to stop and have a flagman look both ways to see whether a car is approaching or not, and they should know that when they drive their car upon a crossing, that should they meet a train there that the car will in ninety-nine cases out of one hundred be demolished and that the lives of the passengers in the car are in a good way of making their demise from this world.

The railroads spend annually, close to four million dollars printing their crosses, crossings, cautiously campaign posters. And why anyone would deliberately try to test his fate is a chance of meeting a train on a crossing is beyond our comprehension.—Dunellen Sun.

NEWSPAPER ADS ONLY.

One of the most significant and practical tributes ever paid to newspaper advertising is seen in the recent decision of Fox theaters in about 150 American cities to use newspaper advertising exclusively in future.

Hitherto Fox managers have been permitted to exercise their discretion in handling advertising appropriations—using newspapers, direct mail, billboards, radio and other mediums as they saw fit. Now an order has gone out from headquarters that no newspaper ads are to be employed in the dissemination of Fox advertising.

It is significant that the great Roky theater in New York, the outstanding success in the history of entertainment, has never used any medium of advertising except newspapers. Roky's success is said to have largely influenced the Fox interests in making the decision to adopt a similar policy.—Plant City Courier.

The Man About Town

By DON WAHN

A GOOD SLEEPER

I do not like to rise at six o'clock. That seems to me the proper time to sleep.
I much dislike to wake up with a start.
And leave the mattress with a leap. I like to be abed till nine or ten. Or even twelve, if I can have my choice.
And much it troubles me to have my rest disturbed by some unkind, discordant voice.

It makes me angry when a need- less voice, Awakens me before the proper time.

In such a case the awful things I think, Could hardly be referred to in this rhyme.

So everybody in my neighborhood, Will kindly desist from such a task, To let no careless voice disturb my rest.

And let me rest until I choose to wake.

DO YOU?

THE MAN ABOUT TOWN never fails to get a thrill in Lakeland standing on the corner of Lake and South Florida at 8 in the yawning. Automobiles whizzing on the street leading to uptown as rates you.

There they go: Officers hurrying to their post, office men dashing madly to work, milk delivery trucks, fruit peddlers, grocers, bakers, and druggists cleaning shops preparing for a busy day.

DISILLUSIONED.

Bubble, bubble, Toil and trouble, Took a wife— Expenses double.

Where's the guy, Who cracked the pun, That two can live, As cheap as one.

WHOMEVER YOU ARE.

I earnestly entreat you to dispatch your business as soon as possible and then depart, unless you come hither like another Hercules to lend some friendly assistance, for here will be work to employ you and as many as enter this place.—(Inscription on the wall of the workshop of Alatus Manutius, Venice printer, 1501).

Seems strange that not one druggist has named his store RUDOLPH.

—Next!

National Guard Returned Monday

Headquarters company, 56th brigade Field Artillery National Guard returned Monday afternoon over the Seaboard, after a two week's encampment at Camp McClelland, Anniston, Alabama. The unit was in command of Capt. Mark W. Lance.

SEED DISINFECTION TO PREVENT DISEASES

Truck Crop Seed Should Be Treated Before Planting

Disinfecting truck crop seed just before they are planted will prevent many seed-borne diseases from developing on the seedlings, according to Dr. G. F. Weber, associate plant pathologist at the Florida Experiment Station at Gainesville.

The best disinfectant to use is a 1-1000 solution of corrosive sublimate. Simply tie the seed loosely in thin cloth bags, and soak them in the solution. He suggested 15 minutes treatment for cabbage, cauliflower, kohlrabi, mustard, rutabaga, and turnips; 10 minutes for cantaloupes, cucumbers, gourds, and watermelons; and eight minutes for tomatoes, peppers, and eggplants. While the seed are being treated they should be stirred occasionally. Old newspapers make a safe convenient place on which to dry them. Such diseases as angular leaf spot, anthracnose, blackrot, and bacterial blight are prevented by the treatment.

Corrosive sublimate is a deadly poison, and should be handled accordingly. To make a small amount of the solution one tablet dissolved in one pint of water is suggested. For larger amounts one ounce of the crystals may be dissolved in 7 1/2 gallons of water. The solution should not be put in metal containers, since it will react with the metal.

Get the Children Ready For School

Physical defects of children should be cared for before the children return to school, home demonstration specialists at the Florida State College for Women at Tallahassee say, in calling attention to the fact that school days are here again. It is now recognized that much of the listlessness, laziness, and dullness in school children may be caused by poor physical condition, and that by any mental peculiarity or defect.

These specialists also point out the necessity of having the children form regular habits and thus keep in better physical condition. Irregularity in eating is one of the principal bad habits, and easy to acquire during the summer vacation, and letting the child eat when and what it wants and to have snacks between meals, whenever it wishes is bound to develop bad food habits which may leave permanent effect on its physical health. A definite mid-morning or mid-afternoon lunch of milk and bread or fruit may be given regularly if the child needs food between the regular meals. Under no circumstances should it be allowed to nibble sweets continuously between meals.

Regular sleeping habits should also be encouraged and carried out, even on Sundays, to prevent constipation, nervousness, and sleeplessness.

Every member of the family should have an annual physical examination by the family physician. Especially is this true of the children, in whom defects may be detected and remedied at the beginning, when these same defects might grow and become serious handicaps later on.

National Canning Contest Starts Soon

Gainesville, Fla., Sept. 3.—Florida 4-H club girls are eligible to compete for \$2,250 in cash, cups, and medals in the National Canning Contest under direction of the Household Science Institute. The National prize winner will receive \$600, and there are 418 other prizes offered. A bronze medal and silver finish medal will be given the girl submitting the best entry from her county, and a bronze medal will be given to the second best entry.

Contestants may can what and how they wish, and may enter entries in three different classes. Applications must be in by Oct. 1, and they are to be sent to Grace Viall Gray, secretary, National Canning Contest, Shenandoah, Va. Rules, labels, standards, and a book of recipes will then be sent to the applicant.

Out of every \$56 lost from fire in the United States each year \$15 is money from the farm.

WRUF Farm Program

Gainesville, Sept. 3.—Farm radio programs, given daily by the Florida Agricultural Extension Service over State Radio Station WRUF, for week beginning September 6 will present the following talks along with music and other features:

Saturday, Sept. 6.—Florida Farm News and Hints, U. S. Farm Science Snapshots.

Monday, Sept. 8.—Sour or Acid Soils and Their Management—Dr. R. M. Harnette.

Tuesday, Sept. 9.—Plans Now Stop the Lean Jassid—A. N. Tisot. Timely Hints to Truck Gardeners—M. R. Ensign.

Wednesday, Sept. 10.—Progress of the Florida Beekeeping Industry—R. E. Foster.

Thursday, Sept. 11.—Healthy Poultry or Worms a Matter of Sanitation—Dr. E. F. Thomas. Goats have a Place on the Florida Farm—Prof. C. H. Willoughby.

Friday, Sept. 12.—Getting Ahead of Citrus Troubles—E. F. DeBauk and Spuds Johnson.

RURAL COMMON SENSE By Spuds Johnson

PRETTY UP THE PLACE BY PLANTING FLOWERS TO BLOOM THIS WINTER

Mary and I have decided to pretty up our little country home so that it won't look so bare and forsaken this winter. We are going to plant some of the annual flowering plants which would have to be planted in the spring farther north, but if planted now in Florida they will bloom during the winter months.

We have a bulletin from the College on growing annual flowering plants, and in it we have found a long list that can be planted in September. We intend to choose the ones that we personally like best, but since you might like others here is the list: Agapanthus, Calendula, Candytuft, Cornflower, Cosmos, Gaillardia, Gypsophila, Nasturtium, Pansy, Pinks, Poppies, Scabiosa, Snapdragon, Stock, Sweet Alyssum, and Sweet Peas. There are possibly others, and then in October we may plant some Larkspur, Lupines, and Verbena. Then some of the tender varieties, such as Aster, Coleus, Marigold, Petunia, Pinks, Salvia, and Zinnia, will plant about February. Then we believe that we will have a succession of flowers throughout the greater part of the year.

We have a light sandy soil, and we are going to mix with it a good amount of well rotted manure and decayed leaves before we plant the seed. This will supply plant food as well as increase the water holding capacity of the soil. To get a quick growth we are going to put from three to five pounds of fertilizer, like we use in the garden, on the soil about a week before we plant.

According to the bulletin we should sow the larger seed in rows, but should plant the smaller ones in seedbeds and nest them.

We will move them to the open ground when they are about four to six inches high. We will give them about the same care, water, and watering as we do the garden vegetables. In case they turn yellow and seem not to be growing we will then top them up by applying a little nitrate of soda or sulphate of ammonia. On frosty nights we will spread canvas or burlap over the tender plants.

Since feed prices may go higher this winter now is the time to sow winter grazing crops, and seed root crops for winter forage.

"Niggardly feeding of good cows is mistaken economy; likewise liberal feeding of poor cows is just as poor practice.

SUGGESTIONS FOR THE GROVE FOR SEPTEMBER

Timely Hints Regarding the Pumpkin Bug and Whitefly

Mow cover crops in time to beat the pumpkin bug, watch for whiteflies so that they can be presented early with a fall coat of oil emulsion, and give a little nitrogen to those trees that look hungry and yellow, are timely grow suggestions given by E. F. DeBauk, extension citrus pathologist-entomologist.

Due to lack of rain Citrus trees, generally speaking, will bloom a little later this season. As soon as it blooms it may serve as food for the pumpkin bug, and close watch should be kept, and, possibly during the first of September, the crop should be moved six to eight inches above the ground and allowed to lie in on the surface. Beggarweed and cowpeas should be cut below the lower leaves.

Growers should keep a close watch for whitefly larvae on the foliage, and for the sooty covering they may cause. The recommended whitefly remedy is a spray of one to 60 oil emulsion.

He also suggested giving those trees that look yellow or hungry a little nitrogen, simply scattered around the base of the tree and into the ground. He did not recommend any cultivation until the general fertilizer is disced in about November.

Club Broadcast To Feature Leon Girls

Leon county girls will continue the official monthly boys' and girls' 4-H club broadcast from WRUF, state radio station at Gainesville, Friday night, September 5, beginning at 8 p. m., Eastern Standard Time. Miss Flavia Glenn, state home demonstration agent, has announced.

The program will open with a violin solo—Heide Kiti—by Miss Clara Parker, Miss Jean Compton at the piano. Miss Ruby McDavitt, district home demonstration agent, will discuss 4-H Club Work, and Miss Ruth C. Kellum, county home demonstration agent, will speak and Miss Eunice Parker with Miss Compton at the piano, will sing "Milkmen and When I Bring You Colored Toys." Mary Edna Bradley will tell what club work has meant to her, and a true companion of Miss Eunice Parker, violin, and Miss Compton, piano, will conclude the program rendering "O Gaze Thy Singing" and "Morning Wind."

Livestock Awards For 4-H Club Member

Gainesville, Fla., Sept. 3.—Florida 4-H club members who are carrying out a project on beef cattle, sheep, or hogs are eligible to the \$50 gold watch given to the state champion, and the gold filled medal given to each county champion by Thomas E. Wilson, chairman National Committee on Boys' and Girls' Club Work, and president Wilson and Company.

Contestants must give a story of the project in their own words, and a report on the proper form, but first should write R. W. Blacklock, state boys' club agent, Gainesville, Florida.

Poultrymen should be sure that pullets are housed comfortably in the laying house, and should constantly watch for colds and roup.

ORANGE AND LEMON JUICE FOR THE TEETH

Chicago Experiments Prove Their Benefit To Prevent Decay

Jacksonville, Sept. 3.—The juice of half a lemon and a pint of orange juice once or twice a day forms the experimental part of a diet being used by Dr. Milton Theodore Hanke, pathologist of the Otho S. A. Sprague Memorial Institute, of Chicago, who is leading the Dental Research Club of that city in a fight against the decay of teeth caused from soft, spongy or inflamed gums; from trench mouth; from pyorrhea, according to the article "A New Road to Death Fighting" from the pen of Paul de Kruif, appearing in the current issue of the Journal. Home Journal says the Florida State Chamber of Commerce.

Extensive experiments carried by Dr. Hanke and his assistants, the article states, with eighty-five persons showed a marked improvement with many cures where the diet prescribed by the physician was carried out.

While lemon and orange juice formed but a part of the diet used in the experiments, says the article, they represented the real experimental part as no doctor had ever prescribed orange juice in such quantities before.

The theory demonstrated by the experiments, which are still being carried on to ascertain results over a longer period of time, was that it is the lack of "acidic" foods, and hence are suspected as being necessary for strong teeth and good gums, that is responsible for the mouth decay and not the time worn and accepted theory that they were caused by microbes.

While orange juice has been prescribed by many famous and prominent physicians for its health properties, says the State Chamber of Commerce, this is the first printed record of an experiment where it has been recommended for strengthening the teeth and a remedy for trench mouth and other diseases of the mouth. Further experiments and the results with orange juice as the provider of vitamin "C" will be watched with interest.

Field Best Place Select Seed Corn

The field is the best place to select seed corn, and September is a good time to do this small job, according to Fred H. Hull, assistant agronomist at the Florida Experiment Station at Gainesville.

By selecting now, instead of the hit or miss method in the barn later on, farmers can select next year's seed from the best and most prolific stalks. It is best to select from stalks that are free from disease, and good sized ears that are well filled at the ends and covered with husk.

After the seed ears are harvested they should be protected from weevils when they are stored, or else they may be badly damaged by spring. Place the corn in some tight bin and add carbon bisulphide at the rate of one pound per 100 cubic feet of space, which will kill all the weevils present.

National 4-H Broadcast

Washington, D. C.—The U. S. Marine band and 4-H club talks by outstanding specialists and members will be featured over the NBC network Saturday, September 6, beginning at 12:45, Eastern Standard Time. Two Florida stations, WJAX and WIOD—will broadcast the program.

Import Hereford

Ocala, Fla.—Six fine blooded Hereford bulls were recently imported to the state by Jim Taylor, local stockyard owner, and will form a part of his herd improvement plans. He is also seeking considerable more acreage to recommended pasture grasses.

Introduction of new models from America has quickened the automobile trade in India.

A Star In The Light

Large enough to hide a girl are the huge billion candle power "the" searchlights used in motion picture making. Raquel Torres, of M-G-M, shows you where a carbon arc provides the illuminating medium of this light, the largest of its kind in existence.

West Hillsborough Women In Camp

Safety Harbor, Fla., Sept. 3.—About 50 west Hillsborough county women recently enjoyed a week's educational vacation in camp here. They stayed at the Spa Park Inn, and spent the time attending lectures and demonstrations, playing, swimming, and picnicking under the leadership of Miss Allie Lee Rush, home demonstration agent.

Sen. Ma, what's the idea of makin' me sleep up here every night?

Mother: Hush, Bobby, you only have to sleep on the mantelpiece two more weeks and then your picture will be in a Believe-it-or-Not cartoon.—Colgate Bantler.

HINTS TO HOUSEWIVES

Weekly from Home Demonstration Specialists, Tallahassee.

JUDGING THE COSTUME

The selection of a beautiful and becoming costume is a challenge to any woman's art, ability, and sense of the dramatic. Dressing well is not only a matter of appearance, but also of the person and use, and genuineness.

Suit Personality

One must understand the relation of personality to clothes in order to appear well dressed. There is no style suitable to all types, but there are many adaptations from which to select. Is the wearer conservative or extremist? Is she of the athletic type, suggesting a mannish style, or is she exceedingly feminine, calling to mind dainty ruffles and soft materials? Is she dashing and forceful, so that she can wear striking designs and color, and still be a distinct personality beyond her clothes; or is she quiet and retiring? If she is very quiet she will be entirely eclipsed by clothes that are too striking, but she should wear some accent of color to add a little sparkle to her personality. Just as there are designs for every type, there are colors which are particularly suited to brunettes, and others which are excellent for blondes.

Harmony Essential

Another requirement of good dress is that all the clothes which are worn at one time should appear to belong together. Frequently in an impulsive moment a woman will buy an attractive, becoming hat. It may not look well with the other things that she has but she does not think of that. Next a handsome pair of shoes is purchased. They are not quite right for anything in the wardrobe, but they are good looking. A dress is then selected on the same basis. The occasion soon comes when the shortsighted buyer needs to wear her new hat, shoes and dress. She suddenly realizes that they cannot be worn together, and thus realizes the first principle of good buying, and design; namely, things that are to be worn together must be harmonious.—Lucy Belle Settle.

FLORIDA SECOND IN SHIPMENTS TO N. Y.

Farmers Urged To Plant Abundance of Staple Crops

Jacksonville, Sept. 3.—Florida shipped 29,999 carloads of fruit and vegetables to the markets of New York city during 1929, according to the Florida State Chamber of Commerce, which places it second on the list of states supplying these commodities to the nation's metropolis as shown by figures compiled by the New York Sun.

California with 52,552 cars lead the list. The state of New York held third place furnishing 13,374 cars; Virginia fourth with 12,683; while Maine ranked fifth having shipped 12,502 cars into the big city. North Dakota, South Dakota, Nebraska, Wyoming, and Kansas were the only states in the Union not contributing to the fruit and vegetable market basket of New York city.

With forecasts of a big shortage of fruits, vegetables and staple crops throughout greater part of the country due to the unusual drought, says the Florida state will without a doubt be called upon to meet increased demands during the current season.

Farmers in Florida will do well, in the opinion of the state Chamber, to heed the advice of Nathan Mayo, commissioner of agriculture, as to the planting of staple crops this fall. The state has the ability to produce a great quantity of the commodities which will be in demand on the leading markets of the country. With the supply limited satisfactory prices should prevail.

"Excuse my gloves," said the burglar, as he went away without leaving any fingerprints.—M. I. T.

Three Mile Bullet Hits Man. Road, Belfast, Ireland, recently, Thomas Smith was struck in the leg by a bullet, which was removed at a hospital. Rifle range practice was in progress at the Kinnegar field at the time, and it is believed that a ricocheting bullet, which must have traveled nearly three miles, was the cause of the accident.

Channel Gliding Predicted. Herr Kronfeld, the German who has been making records and giving gliding demonstrations in Europe believes that it would be possible to fly the English Channel in an engineless machine. He predicted that the feat will be accomplished within the next year.

HEADACHE RELIEVED QUICKLY

This Purely Vegetable Pill quickly corrects the most distressing headache, removes the intestinal poisons, and sick headache quickly disappears. Your whole system enjoys a tonic effect, constipation vanishes, and you feel a renewed vigor. Avoid the bromides and dopes, they are depressing and harmful. All druggists 25c and 75c per package. CARTER'S LITTLE PILLS.

"NERVES"

Here's a good way to quiet "NERVES"—A Dr. Miller's Effervescent Nerveine Tablet, a glass of soft water, a pleasant, sparkling drink. Nerveine relaxes your mind, sleep, enjoy life. At your drug store, 25c and \$1.00. NERVEINE TABLETS.

SUNDAY SCHOOL LESSON

FOR SEPTEMBER 7, 1930.

SUBJECT: Josiah; a Royal Reformer.

GOLDEN TEXT: "Thy word is a lamp unto my feet, and a light unto my path." Psalm 119:105.

LESSON TEXT: 2 Kings 22; 23:1-2, 21-25; 2 Chron. 34:35.

TOPIC: The World's Debt to Reformers.

Josiah was made king when he was eight years old. His father Amon was a bad king who reigned two years and was killed by the servants of his household. Manasseh, Josiah's grandfather, reigned fifty-five years, and was the worst of the kings, until he was taken prisoner to Assyria where he repented and tried to undo his evil works. Josiah's mother was Jedidah, of the tribe of Judah, probably a good woman, and he grew up under the influence of Zephaniah, the prophet, and the high priest, Hilkiah, and associated with Jehoiakim. In Ex. 10:16, we have this statement, "Woe to thee, O land, when thy king is a child," but Josiah was an exception to this rule. Our lesson says, "Josiah was eight years old when he began to reign and he reigned thirty and one years." And he did that which was right in the sight of the Lord.

Of the first eight years of his reign little is known, but in the eighth year, when he was sixteen, Josiah sent Shaphan, the scribe, probably his secretary, to the temple to have it repaired.

Hilkiah the high priest said unto Shaphan the scribe, I have found the book of the law in the house of the Lord. And Hilkiah gave the book to Shaphan, and he read it. This "book of the law" was the first five books of the Old Testament, especially the book of Deuteronomy. The recognition of the book when found shows that a former use of the book was remembered. Some idolatrous king, probably Ahab, had burned all the copies of the Bible he could find. There are individuals and communities today to whom the Bible is a lost book. Hilkiah and Shaphan, the priest and scribe, when at the temple doing the Lord's work, found the book. Shaphan read some in the book and then took it to king Josiah, who read it and saw how the people were transgressing God's laws. "And the king went up into the house of the Lord, and all the men of Judah and all the inhabitants of Jerusalem with him, and the priests, and the prophets, and all the people, both small and great; and he read in their ears all the words of the book of the covenant which was found in the house of the Lord." This was one of the early and large Bible classes. Its results were good, verses 4-15, Chapter 23 of 2 Kings tell how Josiah cleansed the temple and Jerusalem and Judah and parts of Israel, of idols, images and altars of heathen gods, for the king and priests and people made a covenant to keep the commandments and statutes of the Lord, "And all the people stood to the covenant." It is wonderful what influence a good ruler or public official can have over a community, and the same is true of a bad official. Strong moral character and honesty should govern our choice of officials, rather than some political affiliation.

Then Josiah undertook to re-establish the worship of the Lord. "And the king commanded all the people, saying, Keep the passover unto the Lord your God, as it is written in the book of this covenant." "All the people" including the weak, uneducated, "common" people; and this should be the rule of every religious organization. Chapter 35 of 2 Chron. describes this passover. You should read that Chapter. "Surely there was not holden such a passover from the days of the judges that judged Israel, nor in all the days of the kings of Israel, nor of the kings of Judah."

The effort made by Josiah to destroy false worship is shown in verse 24 of Chapter 23 of the lesson. "Moreover the workers with familiar spirits, and the wizards, and the images, and the idols, and all the abominations * * * of Judah and in Jerusalem, did Josiah put away, that he might perform the words of the law."

But upon the death of Josiah his son, first Jehoahaz, and then Eliakim, or Jehoiakim, reigned over Judah, and both "did that which was evil in the sight of the Lord," and they led the people back into idolatry. In religion, as in other things, the great common people must think and act for themselves. Each individual stands before God alone.

A king stands no higher with God than do you.

COUNTY TO SPEND \$4,000 ON ROAD TO HOOKER HAMMOCK

Conference of Commissioners and Park Officials Very Fruitful

At a combined conference of the board of county commissioners and members of the executive committee of the Florida Tropical Parks Association at the court house Monday afternoon much was accomplished from a financial standpoint and after going into executive session among themselves, the board announced they would honor and pay all bills up to the amount of \$4,000 on the rebuilding and improvement of the Hooker Hammock road. This money will be divided equally from districts one and two, each paying \$2,000. Alexander Blair, spokesman for the parks association and engineer in charge of the work, expressed himself as well pleased with the result of the conference.

Those representing the parks association were Rex Beach, president; Francis Guldner, Alexander Blair, Mayor C. S. Donaldson of Avon Park, R. N. Durran, O. F. Gardner, Walter Cochran and A. C. Altvater and all the county commissioners were present as well as County Attorney J. M. Lee.

Col. Lee opened the conference with the statement that the board of commissioners wished to co-operate with the parks association to the fullest extent of their legal ability and Mr. Blair replied that the association was very appreciative of this fact. Mr. Blair touched on the drainage problems that are being encountered on the road work. Roads and drainage are essential to the success of the project he said and he appreciated the efforts of the board to date. Mr. Blair also pointed out that the park project is county property and must not be taken as benefiting just one section of the county. To illustrate this he noted the fact that the proposed road through the hammock would work through the county parks for another outlet into Hardee county.

Col. Lee promised all possible assistance from the county and said he would do his utmost to secure state aid for the park at the next session of the legislature. The commissioners passed the following resolutions:

Resolution
Whereas, The Board of Directors of the Florida Tropical Parks Association is now engaged in transforming Hooker Hammock into a beautiful park; and

Whereas, by reason of such improvements the traffic has been increased over the road leading from Crewsville road to Hooker Hammock to the extent that said road is inadequate and insufficient; and

Whereas, in order to carry on such improvements and to accommodate public traffic to and from said Hooker Hammock and to enable said improvements to begin immediately it is necessary that certain repairs and improvements be made on said road.

Now therefore be it resolved by the Board of County Commissioners of Highlands County, Florida, in session duly assembled:

1. That the sum of four thousand (\$4,000.00) dollars be appropriated to the repair and improvement of the County road leading from Crewsville road to Hooker Hammock for the year 1930 and 1931.

That said funds be provided by Districts numbers one and two respectively, in the sum of \$2,000 each.

2. That said repairs and improvements shall be made under the supervision and direction of Alexander Blair, civil engineer.

3. That the Clerk of said Board be and he is hereby directed to pay bills for such improvements to the amount of \$4,000.00 when they have been approved by the Engineer, equally and ratably between the several districts numbers one and two of Highlands County, Florida.

Second Resolution
Whereas, The Board of County Commissioners of Highlands County, Florida is fully cognizant of the interest taken in the development of Highlands County by Mrs. Margaret Koebing, made manifest by the expenditure of the sum of \$25,000.00 contributed by her toward the development of the County's most natural beauty spot, known as Hooker Hammock, together with the proposed expenditure of an additional \$25,000.00 in future development in said park; and

Whereas, said Board is fully aware of the fact that this development, if carried out according to the plans and ideas now in

effect, same will be of inestimable value to the County of Highlands as an attraction for thousands of visitors that would not otherwise come to our county; and

Whereas, it is the desire of the Board of County Commissioners to encourage and aid this development to the full extent of its moral and legal ability.

Now therefore be it resolved by the Board of County Commissioners in session duly assembled:

1. That the said Board of County Commissioners extend to the said Mrs. Margaret Koebing, its sincere appreciation of her interest and efforts in the development of this park.

2. That said board pledge its moral and official support of the program undertaken to the extent of their ability.

3. That said Board will use its best efforts to secure such legislation regarding the development, dedication and maintenance of said park as will be in keeping with the plans and purposes of such development and to the best interests of the citizenship of Highlands County and the State of Florida.

4. That this resolution be spread upon the minutes of the Board; a copy be furnished the press of the County and a copy be mailed to Mrs. Margaret Koebing.

Council Places \$1000 In Budget for C. of C.
(Continued from page one)
Luke was placed at \$50 per month.

Councilman Hall asked for the rebuilding of the clay road from Lake Avenue to the packing house of the Citrus Exchange and the Avon Florida Citrus Corporation. Councilman Hall, Head and City Engineer Lacey were asked to get up an estimate of the cost of this work.

While streets were under discussion, Councilman Delaney drew attention to the need of more clay streets in the mill quarters. The city engineer was instructed to look after some needed patching and to see to it that the streets were laid out to save further deterioration.

Avon Park Takes Okeechobee 3 to 1

Avon Park defeated Okeechobee Monday at Cardinal field, 3-1. Milford Dille, doing the hurling for the home set, the "Swamp Rats" lack with two hits, striking out 13.

Dille did not allow a man to reach first after the first frame when two hits coupled with an error gave the visitors their lone counter.

Dille was the batting star, putting out a single and triple in four times at bat.

Score by innings:
Okeechobee — 100 000 010 1 2 3
Avon Park — 100 100 010 3 7 3
Batteries: Clayton and Atkinson; Dille and Jett.

George Crews Files For Commissioner

George Crews filed a petition with the county commissioners Monday and has entered the race as an independent candidate for county commissioner from the Avon Park district. He will be opposed in the general election by John Hood, Democratic nominee and Bert Wilson, Republican nominee.

Ramsey Opens Feed Store In Avon Park

J. C. Ramsey has opened a feed and supply store in his warehouse opposite the Texaco plant, where he formerly operated, a wholesale grocery business. His warehouse is ideally located and well fitted for his business. He is stocking a complete line of feeds, fertilizers and insecticides and states that he will add other lines as the demand justifies it. He expects to carry everything that the farmer needs.

Gulf Fishing Party
J. B. Coen, Mr. Myers, I. H. Ford, D. Ford and J. S. Collins

left Thursday on the Gulf at Fort Myers on a fishing trip, reporting a good catch.

P. T. A. RESUMES ACTIVE MEETINGS

Meeting at High School Auditorium Next Thursday Afternoon at 3:30

With the beginning of the new school year the Parent-Teachers association is becoming active again, and the first meeting will be held at the high school auditorium next Thursday, September 11 at 3:30 in the afternoon.

Our duty will be the subject of an address by Mrs. T. C. Hobbs, president of the association. Next Home Study will be the topic for two talks, one on the Teachers' Side by Mrs. Chas. Sheppard, and the other, the Parents' Side by Mrs. M. B. Wingate.

Prof. R. T. Faurey will make an address from a subject to be selected by him.

Parents of school pupils are especially invited to attend the meeting and join with the association in its work for the betterment of schools.

Eisteddfod Will Be Held in Lake Wales Early Part March

(Continued from page one)
9. Permanent organization.

Scope of Program
The General Committee has decided to correspond with prominent Welsh people in this country and abroad, in order to interest them in what we are attempting to do in establishing a competitive and literary event to be held once yearly at a point on the Scenic Highlands and to be known permanently as the Eisteddfod of the Florida Scenic Highlands, and also to bring out suggestions from them based on experience with other Eisteddfods. This is considered wise because of the world interest in Florida. Judging by the fact that the Eisteddfod in August, 1930, in Swansea, Wales, there is ample opportunity to make a distinct contribution to the musical and literary history of the Florida Scenic Highlands by means of volunteer participants, thereby discovering or revealing musical and literary talents of individuals in our communities not yet recognized as musical centers.

Instrumentals
At the National Eisteddfod—harp, violin, piano, cello, viola, clarinet, flute, brass band, mixed orchestra, string orchestra, string quartet, organ.

Vocal Solos
Soprano, mezzo-soprano, contralto, tenor, baritone, bass, boy under 14, girl under 16.

Vocal Numbers Not Solos
Ladies' chorus, men's chorus, mixed chorus, children's choir, boy's choir, girl's choir, and folk songs.

Dances
Folk dances by boys, by girls, and by mixed groups.

Miscellaneous
Displays of fine arts (including architecture and sculpture), recitations, essays, historical papers, action songs for children, and competitions of mine and factory workers.

From the above features quoted direct from the program of the National Eisteddfod, and from our knowledge of musical and literary activities in the Scenic Highlands, it is evident that we shall be able by means of our bands, orchestras, church choirs, and individual musical and literary talents to produce a program of great merit. Adapting our program to existing conditions, we look forward to vocal contests between the various large groves with many employees, and also between the various citrus packing houses along the Scenic Highlands.

In General
Realizing the great amount of detail that will need to be carried through in order to make the Eisteddfod a success, we bespeak the interest of every resident in the Scenic Highlands, and most earnestly invite helpful suggestions and co-operation.

In closing this first report of the General Committee on Eisteddfod to the Associated Boards of Trade, we desire to state that a very general enthusiasm in relation to the effort has already been aroused. We see in the effort more than merely musical and literary competition. We see in it the revival of many lines of mutual interest that affect the towns of the Scenic Highlands; we expect out of it broader acquaintance and the evolution of a genuine pride in all parts of the Scenic Highlands so as to make its entire development increase the attractions of the State of Florida.

Mrs. O. F. Gardner, Chairman.
Gosvener Dawe, Secretary.

Highlands County Poultrymen May Join Co-Op Asso'n

(Continued from page one)

and third, by selling service and giving the people what they want. He praised Highlands county as an ideal poultry country as to climate, location and transportation and said it could be made the center of the poultry industry in the state by co-operation. He stated that Florida produced only 20 percent of its poultry products last year which showed a great field for expansion if the industry were put on a proper marketing basis.

He was followed by County Agent Louis Almsmeyer, who spoke as chairman of the agricultural committee of the Sebring chamber of commerce and pledged that he would get the poultry business of the county back on its feet. He stated that there were 27,000 birds in Highlands

county in commercial flocks and about 40,000 including smaller flocks, and that there had been an increase of about 24,000 hens in the county in the past four years.

Risher Promises Aid.
F. W. Risher, representative of the state marketing bureau expressed the belief that the problem of local markets could be worked out satisfactorily, with the possibility of establishing a local branch of the association in Highlands county, and pledged to give all the time necessary to the project to aid in working it out.

Mr. Risher cited the better market prices obtained through the associations, because of standard grade and pack as the big reason for joining in the co-operative marketing movement. He stated that Jacksonville was getting not less than 27c during this summer while Iowa was getting only 11c because of lack of organization. The Miami market never fell below 33c during the

summer he said. Another advantage was the sale of broilers which were handled through the associations without cost to members. He also stated that the Orlando association sold the packers about 15,000 cases of eggs this summer for cold storage during the dull market, which could not have been done only through association methods.

Poultry Specialist Speaks.
L. Z. Morris, who for eight years was director of poultry husbandry at the University of Tennessee, and is now chief chemist for Security Feed Mills, Knoxville, Tenn., made a talk on sanitation, ventilation and proper feeding to get the best results.

Cold drinks were served during the session and at the close of the meeting a luncheon was served through the courtesy of J. C. Rampley, host to the association.

Mr. and Mrs. J. L. Wells and family motored to Lakeland Sunday to accompany Mrs. Wells' mother, Mrs. Mabel Lohr to her home there.

Mr. and Mrs. W. H. Phillips and family motored to Bartow and visited friends on Sunday.
