

Sunday School Lesson

FOR SEPTEMBER 20, 1931.

SUBJECT: The Council in Jerusalem.

GOLDEN TEXT: For, brethren, ye have been called into liberty; only use not liberty for an occasion to the flesh, but by love serve one another.

LESSON TEXT: Acts 15: 22-29; Gal. 2: 1, 2, 9, 10.

TIME AND PLACE: About A. D. 50; Antioch and Jerusalem.

INTRODUCTION: The church in Jerusalem was the mother church, and home of the apostles who had lived and labored with Jesus during the three years of his earthly ministry. The apostles and the Jerusalem brethren naturally felt that they had a responsibility concerning the spread of the gospel and the purity of the doctrine of the new church. The outlying church recognized this natural authority, or superiority, of the Jerusalem church.

It was hard for some Jewish Christians who believed it was absolutely necessary for any Jew to keep faithfully the whole Jewish ceremonial law in order to be saved, and who doubted whether any Gentile could be saved, to submit easily to Gentiles being considered saved who did not keep the Jewish ceremonial law. Such persons in their zeal came to Antioch to preach to the new church the things they felt Paul was omitting. Paul stood against them. Such sides agreed to take the question before the Jerusalem church.

In the council at Jerusalem Peter told of seeing Gentiles converted and receiving the Holy Ghost upon the one condition of faith. He urged that the burden of the Jewish ceremonial law be not put upon the Gentile converts.

Paul and Barnabas told of their evangelism in Gentile territory and of the many who had been saved and of the miracles and wonders that had indicated that God surely put his seal of approval upon the work.

James, the president of the council, was convinced by these reports that the conversion of the Gentiles was a fulfillment of prophecy. He advised that the Gentiles be not required to follow the ceremonial law as a condition of being recognized by the apostles as Christians.

Then the Jerusalem church selected messengers to carry their decision to the church at Antioch (about 300 miles distant), and today's lesson begins.

"Then pleased it the apostles and elders, with the whole church, to send chosen men of their own company to Antioch with Paul and Barnabas; namely, Judas surnamed Barsabbas, and Silas, chief men among the brethren."

Judas is not mentioned elsewhere, and Silas was the disciple who accompanied Paul on his second missionary tour, after Paul and Barnabas had quarreled about John Mark.

"And they wrote letters by them after this manner: The apostles and elders and brethren send greeting unto the brethren which are of the Gentiles in Antioch and Syria and Cilicia:

Forasmuch as we have heard, that certain which went out from us have troubled you with words, subverting your souls, saying, Ye must be circumcised, and keep the law: to whom we gave no such commandment:

It seemed good unto us, being assembled with one accord, to send chosen men unto you with our beloved Barnabas and Paul.

Men that have hazarded their lives for the name of our Lord Jesus Christ.

We have sent therefore Judas and Silas, who shall also tell you the same things by mouth.

For it seemed good to the Holy Ghost, and to us, to lay upon you no greater burden than these necessary things:

That ye abstain from meats offered to idols, and from blood, and from things strangled, and from fornication: from which if ye keep yourselves, ye shall do well. Fare ye well."

This letter formed a guarantee of religious liberty among Christians of different countries and races. Acceptance of Jesus as the Son of God and our Redeemer, and obedience to him constituted the basic principles of Christianity. There should be unity on these things, but on many practices, teachings and creeds there should be liberty among Christians.

In his letter to the Galatian Church Paul spoke of this council at Jerusalem:

"Then fourteen years after I went up again to Jerusalem with Barnabas, and took Titus with me also.

And communicated unto them that gospel, which I preach among the Gentiles.

And when James, Cephas, and John, who seemed to be pillars, perceived the grace that was given unto me, they gave to me and Barnabas the right hand of fellowship; that we should go unto the heathen."

In the letter to the Antioch church, the conditions named were those which the Jews required of a proselyte before he could be admitted to the synagogue; these conditions would not be a grievous burden on the Gentile, yet the Christian Pharisees could not well refuse admission to those who fulfilled the conditions on which a proselyte was admitted to their own synagogue.

The cable station at Punta Rasa near Fort Myers, received all dispatches from the West Indies operations of the American forces in the Spanish-American war.

GREAT INTEREST IN DEMOCRAT RALLY

Meeting at Marianna In November Expected To Draw Thousands

Marianna, Sept. 16.—The committee on arrangements for the state-wide Democratic conference which convenes in this city Friday and Saturday, Nov. 27th and 28th, report a great deal of interest already aroused in every section of Florida.

Letters have been received from many leaders of the party who declare they will present on this occasion and that they regard the conference one of vast importance to the Democracy of Florida. Senator Duncan L. Fletcher writes that such a conference is necessary and that he will be very glad to be present and feels assured that other Congressmen will be on hand to assist in the movement, which is to bring about a united Democracy and which is to formulate plans for future constructive action.

Mrs. Ruth Bryan Owen will also be present and will be on the program for an address. This will be Mrs. Owen's first appearance in West Florida and her coming will in itself draw thousands of people to Marianna.

The co-operation of the National Democratic committee has been secured in order to secure illustrious Americans who are prominent factors. The committee has especially urged the presence of Governor James M. Cox, Senator Pat Harrison, Senator Walter George, Claude Bowers, Franklin D. Roosevelt, and others of like reputation.

Not only will the platform be discussed and also a convention of the party but efforts may result at this meeting whereby Democrats to the national convention will be enthused to support the nominee. This will be the first state-wide Democratic gathering since the convention in Jacksonville in 1900 when the last party platform and the only one we have in Florida was formulated.

The committee expects every county in Florida to be well represented and special efforts will be made to likewise have the Democratic editors of the state on hand during the event. In addition, the leaders, several thousand West Florida people will be present to hear and to meet the distinguished visitors.

The movement is sponsored by leading and influential Florida Democrats and the conference will not be in the interest of any candidate directly or remotely, but for the Democratic party as a whole, and for the purpose of carrying new hopes and inspiration to the Democratic masses of the state.

Still Time To Get Whitefly Fungus

In citrus groves troubled with whiteflies there is still time to introduce the Red Achersonia fungus, declares Dr. E. W. Berger, entomologist with the State Plant Board. This fungus has proven so effective that it is regarded by many as the ideal summer whitefly treatment. Cultures may be obtained from the State Plant Board for about the cost of production, one dollar each. A culture will treat one acre.

Legal Notices

NOTICE OF Application For Tax Deed, Under Section 675 of the General Statutes.

Notice is hereby given that H. B. Coy, purchaser of Tax Certificate No. 515, dated the 6th day of August, A. D. 1928, has filed said certificate in my office and has made application for tax deed to issue in accordance with law. Said certificate embraces the following described property, situated in Highlands County, Florida, to-wit: Lots 5 and 6, Block C, Krommiller's Sub-Division, in Section 27, Township 33, Range 28, East.

The said land being assessed at the date of the issuance of such certificate in the name of Unknown. Unless said certificate shall be redeemed according to law, tax deed will issue thereon on the 30th day of September, A. D. 1931.

Witness my official signature and seal this 26th day of August, A. D. 1931.

L. T. FARMER, Clerk Circuit Court, Highlands County, Fla.

Aug. 21-28-Sept. 11-18.

Longleaf Pine Seed Year Offers Chance Reseed Open Land

This is a longleaf pine seed year, says Lenthall Wyman, associate silviculturist of the U. S. Forest Service, stationed at Starke. He is urging timberland owners to take advantage of that fact and reseed barren spots in their forest lands. Longleaf pine produces a heavy seed crop only once every five to seven years.

To assist Nature in reseeding barren spots, Mr. Wyman suggests that landowners plow firebreak lines around these spots if it does not seem practical to keep fire out of the whole tract.

Another plan which has some merit is the disking or plowing of lines 10 or 12 feet apart over the area to break up the soil and cut down the brush. The lines will serve as a protection from fire, and where there is a heavy stand of brush will reduce root competition, thus allowing the young pines a better start.

Natural seeding will not take place unless the seed are on trees within 200 feet of the opening. If such is not the case young seedlings or harvested seed will have to be used. The seedlings may be purchased through the State Forestry Service.

Longleaf pine seed must be gathered as soon as the cones have matured, but before they have opened. This will usually mean that they must be gathered in October. It is easiest to gather the cones from trees that have been cut for timber, otherwise they must be knocked from the trees with poles. The cones are usually dried in the sun on canvas or on wire racks inside. When the cones open the seed may be shaken out. Those that do not fall out readily are likely faulty. It is not necessary to remove the wings before using the seed.

The seedbed should be on sandy or loamy ground. It should be spaded about February and then leveled. The seed should then be sown at the rate of about one-half pound to 50 square feet. Cover the seed not more than one-fourth inch by sifting sand on them, and then firmly pack the bed. As a substitute for the sand, moist burlap sacks may be kept over the bed until the seed have sprouted. Protection from birds and rodents may be provided by a frame of hardware cloth, eight or 10 inches high, with a removable top over the bed. Watering and weeding complete the care of the seedbed until winter when the plants are ready for transplanting.

Leaflets number 32 and 33 of the U. S. Department of Agriculture contain detailed information about growing pines. Copies may be bought from the Superintendent of Documents, Government Printing Office, Washington, D. C., for five cents each.

Turkey has granted to the Association for the Protection of the Dredge the exclusive right to import and operate automatic vending machines in that country.

Beautiful Shoulders

soft, velvety to the touch and with an alluring, fascinating appearance that will not streak, spot, rub off or show the effects of perspiration. Dance or indulge in sports fully confident your complexion will retain all of its original beauty.

GOODYEAR'S ORIENTAL CREAM

White, Pink and Rashed Shades

HICORIA

Dr. C. T. Dyess and son, W. D., made a business trip to Sebring last Monday.

Dr. Dyess and W. T. Sessions made a trip to Moore Haven last Monday.

Jack Tyre of Venus spent Saturday night and Sunday with Earl Peoples.

Mr. and Mrs. Barwick of Lakeland were in Hicoria for medical treatment last Wednesday.

Mrs. W. Curry, her mother, Mrs. Brown and Mrs. Peoples spent an afternoon with Mrs. Curry's sister, Mrs. Roberts of Okeechobee.

Little Miss Rachel Roberts of Okeechobee is spending a while with her aunt, Mrs. Garry.

Mr. and Mrs. Garrett and baby Bettie, and Mr. and Mrs. Davidson and little Miss Inez made a business trip to Arcadia last Saturday night.

Mr. and Mrs. A. L. Pelham of Lake Placid and Mr. and Mrs. H. D. Register were visitors of Mr. and Mrs. R. B. Franklin last Sunday.

Chas. Shackelford and W. D. Hope attended the Clearing House banquet given by the associated chamber of commerce at Lake Placid last Monday night. Mr. Shackelford expressed himself as favoring the views expressed by the speakers for the occasion. All enjoyed the evening splendidly.

Mr. Horner, son of Mr. and Mrs. Chas. Shackelford, went to the Weems' hospital last Thursday where he underwent an operation Friday afternoon for hernia tumor. The operation was successful and Horace is doing as well as his physicians hoped for. However, he will remain in the hospital yet several days.

Mrs. W. D. Hope and Mrs. Skipper and son Billy, returned Friday after a few days' visit in Deland and Orlando.

Mrs. Will Lyle and family returned to their home in Bartow after visiting Mrs. Euser.

Mrs. Holly of Bunker Landing, spent Sunday with her daughter, Mrs. Lewis Williams.

Wilson Davis of Spring Valley was in Hicoria visiting a particular friend one day last week.

Members of Sir Henry Wood's orchestra adopted dress reform during the Queen's Hall "prom" concerts in London recently when their clothes included silk shirts, polo collars and dinner jackets.

Portugal has ordered inspection of all aerial automobiles created on streets where there are electric car lines, the inspection fee of \$2.25 being charged to the owner.

CAN YOUR WIFE CHANGE A TIRE?

Honestly, aren't you asking too much of Fate to trust those old tires when your wife drives? Hailing strangers for help, if she has a puncture, is often disagreeable. You'd feel a lot better if you knew she were protected also against possible accidents. It will ease your mind and be easy on your purse to have up on some new Goodyears now.

GOODYEAR ALL-WEATHER tires are equally low. Other sizes equally low.

Size Each 4-40-21 \$9.40-40 7.05 4-50-20 \$9.40-20 7.45 5-00-19 \$9.40-19 9.15 6-00-20 \$9.40-20 13.50

Tubes also low priced

For example, a big, heavy, full-corded tire now costs only \$7.05 in the 4-40-21 size

Farm Real Estate Situation In State Among Best in U. S.

The percentage of farm mortgage foreclosures and delinquent tax sales in Florida during the year ended March 15, 1931, was smaller than those of all but three other states, according to the August issue of Crops and Markets, official publication of the United States Department of Agriculture. These forced sales related to defaults in Florida were only slightly over half as numerous during that year as they were during the preceding year. Only seven other states showed declines, all small, while most of the states showed appreciable increases.

Voluntary sales of farms in Florida decreased less than one farm per thousand, while decided decreases occurred throughout the remainder of the United States in all except six states. In Florida, 19.8 farms per thousand were voluntarily sold or traded during the year ended March 15, 1931, as compared to 20.5 the preceding year. The United States total dropped from 23.7 in 1930 to 19.0 in 1931.

Out of each 1,000 Florida farms, 3.3 were sold for delinquent taxes in the latter year, compared to 5.1 the former year. The average for the United States was 7.4 in 1931 and 5.1 in 1930. Mortgage foreclosures and surrender of titles accounted for the change of four farms per 1,000 in 1931 and eight in 1930 in Florida; 18.7 in 1931 and 15.7 in 1930 for the United States as a whole. The total forced sales and related defaults in Florida were 7.3 farms per 1,000 in 1931 and 13.1 in 1930; in the United States they were 25.1 farms per 1,000 in 1931 and 20.8 in 1930.

Commissary at the Sessions Camp Is Looted of Groceries

The commissary of the W. T. Sessions lumber camp on the Lake Annie and Arcadia road was broken open some time after midnight Saturday and a truck load of groceries and other commodities was abstracted. A brace and bit and a hatchet were used to obtain entry and one of the thieves cut his hand as there was considerable blood on the door.

The tracks of the truck wheels were traced to the road but there lost but the took used were left behind and there are being examined for finger prints. Deputies L. C. Pearce and Lamente Wolf investigated the case.

HINTS TO HOUSEWIVES

Weekly from Home Demonstration Specialist, Tallahassee

HANDY HOUSEHOLD HINTS

If you feel that paper napkins are not quite satisfactory enough for some occasions, you will probably like to have a supply of 12-inch ones made from Japanese cotton crepe. Instead of hemming these, fringe the edges back about half an inch. This crepe is inexpensive and the variety of colors are all fast to washing.

With a piece of left-over celotex you can make a very nice frame for one of the attractive colored prints you have admired in the magazines.

First, the celotex should be cut the desired size. Then with a string and pencil, working from the exact center of the piece of celotex, carefully mark the edge to be cut for the inner edge of the frame. Remove this part by means of a key-hole saw. The rough edges can be smoothed down with a piece of sandpaper. The frame should then be painted and decorated, and when dry the print is pasted on the back. A coat of shellac over all will mellow the finish and insure the print's adhesion.

A. J. Collins Died at DeSoto City

A. J. Collins, 52, died at his home in DeSoto City Monday evening about 7:30 o'clock from a series of complications brought on by injuries received in an automobile wreck July last year. Funeral services were held Tuesday afternoon at the funeral parlors of Stephenson & Rhythe, with the Rev. G. H. York, pastor of the Methodist church at DeSoto City and Lake Placid, officiating. Interment was here in Fincroft cemetery.

The deceased is survived by one son, John, and two daughters, Viola May and Clara May, both residing at DeSoto City and a married daughter living at Waubesa.

Capt. "Red" Fordham may be the only regular in place on the Clemson football team this year.

Public Library

Open Mondays, Wednesdays and Fridays, 3 to 5 p. m.

Why risk your neck for \$4.98*

SOONER or later worn tires are going to let go. That may be dangerous.

Honestly now, is it worth taking the chance of going into a ditch or having a smash-up due to a blowout, when you can get fine new Goodyears like these for so little money?

If you have any doubts about the condition of your tires, drive in. We will look them over and give you the low-down. You can believe what we say — we couldn't afford to be anything but on the level. We know that as well as you do.

*Cheaper than accidents — look at these low prices on all sizes: GOODYEAR PATHFINDER

And now some newspaper refers to the late Legislature as a "petting party." Oh, fie!

"Them as has, gets." A South Jacksonville man found a gold dollar and has presented it to Mr. Rockefeller—evidently seeking to give the money to the man who least needs it.

With all the fuss about the gas tax, has it actually made such a difference in your expenses? Haven't you really paid it without knowing it or giving it a thought?

If we were a cotton or a wheat farmer we would declare a moratorium on work for a year and go fishing. That would be far more fun and probably yield just as much money.

Scientific sharps have just made another important discovery—the universe does not exist! If things go as they have of late a lot of us who thought we were a part of the universe will not exist, either.

Mrs. Mabel Willenbrat, who draws a fat salary from the grape concentrate people, contributes \$100 to the dyes. You can't accuse Mabel of totting water on both shoulders. She carries a little water on one shoulder and lots of wine on the other.

Ghandi has one good habit that might be generally adopted with profit. He observes Monday as a day of silence. If each of us would keep our trap shut one day out of every week, this would be a better and more peaceful world.

Fort Myers has been giving free fish to the poor people down there. Any man able to stagger down to the shore of lake, river or inlet, can catch all the fish his family can eat. But of course, some people would prefer their fish ready caught for them.

He who has "a little farm well tilled," and who raises fruit, vegetables and poultry, with a hog or two, and a good milk cow, can laugh at any depression that can be trotted out. But, of course, there's a catch in the darned thing—to many a fatal catch—a little work will have to be done.

Sometimes when we listen in on a bunch of welfare workers, it seems that the general idea is to keep from giving anything to the poor, rather than to find ways of helping them. That's one reason there's so much back-door charity, which at least is spontaneous and well intentioned, even if sometimes misdirected.

Let us hope that the American contender in the international speed races will be cleared of suspicion of unsportsmanlike conduct. Not playing "cricket" in a boat race would arouse more antagonism to us on the part of Englishmen than if we blew up their best battleship. Whatever else may be said of the Britishers, they are good sports.

California, the old braggart, is boasting about an angle-worm farm. But Florida can go her one better with her rattlesnake canning plant, which places canned rattlesnake within the reach of all. Canned rattlesnake is a great delicacy, and eating it does not give you the urge to bite anybody, except some one you particularly like or dislike; but it may make you rattle like a Model T Ford.

Aimee has married again, taking unto herself a singer as a husband. From now on we predict he'll sing low. However, he is running for Aimee's nomination as "What-a-Man," by declaring that he'll give a smack on the nose to anyone who criticizes her. As he weighs 230 pounds, we hasten to assure him we ain't said nothing about Aimee.

An evangelist out in Jonesboro, Arkansas, has caused such a split in the Baptist church that the good brethren have been flying at one another's throats, and martial law had to be invoked. The evangelist places the blame on the Lord, declaring that the Lord told him to go ahead with his rough stuff. We think the evangelist is mistaken. The Lord does not have anything to do with church fights. And a church fight like that one out in Arkansas makes the devil laugh like nothing else.

LET'S GIVE 'EM BOTH BARRELS

About this time of year, whenever a tempest breeze starts up a couple of thousand miles to the south or south-east, "another Florida storm" is predicted. Many people seem to have the idea that Florida must have a violent storm every year. That is a mistake. In the past twenty-five years there have been at least twenty when there was no storm of consequence, and loss of life or property has been to a very large extent confined to the coast areas. The ridge section of Florida is as free from damaging storms as any portion of the United States.

Let us give you a little tip without charge: Don't let anyone take out life insurance on your life which would make the person taking out the insurance the beneficiary in case of your death. If you take out insurance yourself, be very careful whom you name as beneficiary. There never were so many sorrowful tragedies in which murders are committed for the purpose of cashing in on insurance as in these times, when it seems that lots of folks will kill their best friends or nearest relatives to collect a few hundred dollars insurance. Of course, this caution does not apply to your wife. If she kills you for your insurance, you probably deserved to be killed, anyway.

A lady in a neighboring town, whose grandchild, a fourth grade pupil, would not be able to enter school until two or three weeks after the opening, phoned the teacher of the child's grade, to find out what would be taught during that period, intending to coach the child so she would not be behind the others of her class when she entered. She inquired if she should teach the little girl some spelling, numbers, or perhaps the State capitals. "Why, now, indeed," answered the teacher, "during that time we will be teaching about the wind, the rain and the dew." When we went to school we were not taught these important things. Still, eventually we learned that the rain falls, the wind blows, and the dew covers the earth like the Atlanta Journal covers Dixie. Spelling, numbers and geography, indeed! How dreadfully old-fashioned and out of date!

THE COMING CONFERENCE

The Democratic Conference to be held in Marianna Friday and Saturday, November twenty-seventh and twenty-eighth should bring together the largest number of prominent Democrats in Florida's history. The Democratic Party needs such a conference and needs it badly. Had there been in 1928 such a gathering of local leading Democrats, fully determined and working earnestly and enthusiastically, the state of Florida would never have left the Democratic party in that year.

There was entirely too much indifference—too much laxity—too many falsehoods unwarnered. We will greatly benefit by such a get-together gathering of leading Democrats, all earnest for the success of the party and the restoration of good government and prosperity. Thousands of good people were deceived in Florida by the cry of "Hoover Prosperity"—the cry of "vote dry with Hoover" and with demagogic application of intolerance by hypocrites, and paid hearings. Had Florida's Democracy been alert, things would have been different. The coming Conference will turn the trick.—Marianna Floridian.

In spite of depression, cheap cotton and a lot of other disagreeable things, Florida is going to come through standing up.—Jacksonville Times-Union.

RESULTS

By JUDGE JOHN W. DODGE

RESULTS NOT RESOLUTIONS.

"The way to hell is paved with good intentions," is an old saying. We seem to have, in public, political, social, business and other avenues of life, laid millions upon millions of miles of such payment during recent years.

There is a prevalent idea that "good intentions" cover a multitude of sins and errors—that if we only proclaim a benevolent, charitable, lefty, or hopeful purpose we can thereby rest on our oars and drift to our destination.

"Be it resolved," and our meeting adjourns. Enthusiasm, all in a heat, suddenly cools when we have once "resolved." But, that sudden cooling makes our brittle intentions fly, in a cracked mass, into a thousand pieces.

We are loaded down with "Special Committees" and "Commissions," and, these Committees and Commissions having resolved, having furnished copies to the press, having "studied" the question, they finally disband when the necessity for their existence has ceased. They resolute but got no results.

The need of the world, individually and collectively, is results not resolutions. Action not intention, however, good it may be, is the only food and medicine for a sick, suffering, starving humanity.

"We resolve" is neither bread nor meat for any form of life. "Hungry and ye fed me" was not said of either words, thoughts or good intentions. Accomplishment is life's refreshment. One worthwhile thing each day will be a constant inspiration to each of us, and a series of successful days will make 1931-1932 a highly productive year.

Use daily opportunities to the utmost; create and concentrate; do each thing thoroughly, see it finished; compel yourself to do difficult and laborious things, each as it arises; aim to do, and actually do, things better than you have ever heretofore done them.

Convert all resolutions into worthwhile results. If you do then you will see Florida leap forward out of the gloom of past experiences. Get results.

RIGHT WHERE YOU ARE!

(A Worth While Editorial Selected by the National Editorial Association.)

Right where you are, if you'll git-up-and-git, And hustle and rustle and do
And put your heart in it, and never say quit—
There's plenty of good things for you!
The prizes are waiting right there to be got!
You'll find them wherever you are,
By proving if you're a "go-getter," or not—
A "flash-in-the-pan" or a "stair!"

The croakers are croaking about the "hard times,"
And how things are hopelessly "punky."
They're moaning about the shortage of nickels and dimes,
But that kind of junk is the bunk!
And while they are buzzing about his being bad,
The "wise ones" are hopping about,
And copping the prizes right here to be had—
And putting old "hard times" to rest!

It's always hard times, if you're thinking that way,
And prospects are gloomy and blue,
But, while the sun's shining, if you will make hay,
You'll get what is coming to you!
Don't let hard times floor you, and steal your good rep!

Don't dream about "green fields afar";
We know you're a winner—now show us some pep—
Make good on the job where you are!
—James Edward Hunsinger.

In view of the assurance that as a man thinks so is he there is no wonder that a lot of men are ciphers with the rim knocked off.—Tampa Times.

With 5,000,000 people in this country who can neither read nor write it is easier to understand the why of some of our popular songs.—Tampa Times.

DID YOU EVER STOP TO THINK

By EDSON R. WAITE
Shawnee, Oklahoma

One mile south of the border line between the United States and Mexico (Lower California) is located beautiful Agua Caliente, reached after a half hour's drive from San Diego over a fine paved road.

I must confess that I was astonished on my arrival here to find so beautiful a place, and I cannot hope to adequately describe it in this short article. A wonderful Hotel and Casino, of concrete construction in a distinctive Mexican style and coloring, built about a huge patio with beautifully landscaped grounds filled with brilliant tropical flowers, palms, etc. A score of concrete cottages for guests are an added attraction.

Adjoining the Hotel is a great building in which is located the most modern sulphur baths in the world in equipment. The Casino, also adjoining the Hotel, with its great, lofty rooms of dignified proportions, invites you, if you wish to see Dame Chance. Mr. Walter E. Radloff, the manager of the Hotel, was formerly assistant manager of the Ambassador and Alexandria Hotels in Los Angeles. He has developed a fine staff of highly trained employees, numbering about 600, who seem eager to serve you and to make your stay pleasant.

An eighteen hole golf course invites you alongside the Hotel. A short distance away you will find the modern racing plant with its concrete grandstand, club house, mile track and fireproof stables to accommodate easily 2,000 thoroughbreds.

Many people who are not interested in racing or in gambling have found Agua Caliente a mighty restful place to stay, and its sulphur baths are attracting many patrons from the east coast, who thought they had to go to German or French spas to secure relief from rheumatism, etc. A mighty good looking crowd of people here and all having a good time. A better behaved crowd I have never seen.

Echoes of the State Press

INJUSTICE TO NORTH FLORIDA.

Fourteen of Florida's 67 counties are located along the north border of the state. Not any of these counties are what might be termed the "rich counties" of Florida. Eleven of these north Florida border counties are traversed by State Highway No. 1.

This group of counties furnishes an indisputable example of the injustice that would be inflicted upon the less fortunate counties of Florida if Rep. John Mathews' court suit to invalidate the 1931 gasoline tax allocation is upheld and the revenue division section of that law is overthrown.

Along the main trunk highways in Florida's border counties many thousands of gallons of gasoline are consumed every day. Very little of the gasoline on which the state tax is paid is purchased in these border counties.

In these north Florida counties there are main trunk highways that extend northward beyond the border of the state. Motorists are driving over these roads—created and maintained by the counties—in cars that are propelled by gasoline not purchased in Florida and on which no Florida gasoline tax has been paid.

Almost necessarily the gasoline used by motorists entering Florida was purchased in some other state. There is practically no opportunity for the purchase of motor fuel until the motorists are well inside of the state, and most of them do not renew their supply of gasoline until they have reached one of the larger cities.

If the basis for the division of the gasoline tax revenue among the counties of the state is to be fixed by the place the gasoline is purchased, it is manifestly unjust to the north Florida border counties that have built and paid for improved highways over which motorists drive in order to reach their destinations in other parts of the state.

It is fair and just that Florida's border counties have restored to them the money their taxpayers have paid out, or obligated themselves to pay, for the state highways that are used for the benefit of the people. The law adopted by the 1931 legislature returning three cents of the state's seven-cent gasoline tax to the counties as reimbursement for county-built highways that are part of the state's improved road system, deals justly with these north Florida border counties. Destruction of this law, sought in the Mathews' suit, would inflict an irreparable injustice upon these border counties and their taxpayers.—Fort Myers News-Press.

A GOOD LAW

One of the finest ideas in the statute books is that embodied in the law providing that one newspaper in each county, after the close of the biennial sessions of the legislature, shall be paid for printing the session laws for the benefit of the people. The idea is that an informed people will make a better citizenry.

So strong was this idea grounded in the minds of the people of Florida that it is one of the few things calling for the expenditure of money that is incorporated in the state constitution. It is not only by that this idea has been done but it is a constitutional mandate as well.

The need for this information is as sharp today as ever. Perhaps more so than it was 45 years ago when not so many laws were passed every biennium. The law should be brought up to date, for there are some weaknesses in it, and then strictly enforced. It is a good law.

BARBON ON NEWSPAPERS

We are all inclined to take our newspapers for granted—to pay our two or three cents, get a dollar's worth of news and information, and forget entirely the personal, social and economical service rendered us. The manufacturer, the merchant and the consumer all owe a debt to the press which merits their active and aggressive support at all times. No the larger city dailies, but the small country papers as well are performing an economic function absolutely indispensable to the growth of the country. Hence, in these times of hard business, when many concerns are short-sightedly curtailing advertising, I want to make a personal appeal for everyone to get behind his own town paper and boost it.—Reggie Rabson.

COVINGTON SAYS SOME GOT CARDS THRU FRAUD

Full Means of Identification Must Be Furnished By Applicant in Future

When the chamber of commerce inaugurated a campaign for the registration of local labor, it was natural to suppose that a few people would get cards through misrepresentation. In the few cases in which this has happened, steps are being taken to prevent the registrant from using his card to secure local employment.

The following letter from Mark E. Covington, chairman of the committee, says that future registrants must furnish full means of identification if they would be listed as local laborers and entitled to preference in employment by local firms. His letter:

Avon Park, Fla., Sept. 16, 1931.
To the Citizens of Avon Park:

I understand that some men who have received registration cards, only through misrepresentation, are boasting of the fact that though they had not been here the requisite length of time, they had been able to receive a registration card.

Any citizen knowing of such cases should please notify the chamber of commerce at once, whereupon the card of such a person must immediately be voided, a list of all such cards will be forwarded to the various employers of labor, stating the facts and showing that such an individual is not worthy of receiving employment and not to be trusted.

Persons desiring to register must present full means of identification. Such means of identification consisting of electric light and water receipt, bus ticket, receipt, registration card, automobile title certificate, doctor, grocer, mill or drug receipts since the last census.

Asking the heartiest co-operation, I am,

Yours very truly,
MARK E. COVINGTON,
Chairman.

Voice of Firestone Returned To Air Again Last Week

The "Voice of Firestone" returned to the air Sept. 7 to inaugurate a weekly program which musical critics believe is the finest fundamental aim of radio—a program of universal appeal.

A program of noted talent which will be heard to the utmost, and it will be heard each Monday over the nation-wide N. B. C. Red Network, at 7:30 p. m. Eastern Standard Time.

James Melton, without a peer among artists heard on the air, is the tenor soloist. Gladys Rice is the soprano soloist, and is enjoyed by millions of listeners, is the soprano soloist.

There is the "Firestone Male Quartet" of outstanding singers, and William Merrigan Daly, noted conductor, with the 30-piece Firestone Orchestra. Alois Havrilla is the accompanist.

The musical selections too will appeal to all—if popular selections they will be high grade and real. The new old-time selections they will be favorites.

Harvey S. Firestone, Jr., vice-president of the Firestone Tire and Rubber company, tells the romantic story of the development every Monday in a series of brief word pictures. Mr. Firestone has traveled the globe studying the best place to grow rubber and founded the great plantations enterprise in Africa which he directs in addition to his other duties. He has many interesting experiences and unusual highlights concerning rubber.

James Melton, internationally known tenor of the radio and concert stage, combines real genius with an unusual personality. The young star who started his career in vaudeville, glie club and then took up music in earnest, has mastered the technical difficulties of singing through the microphone. The fame of Gladys Rice in the radio world is well known. Her rate gift of pleasing and entertaining all those with whom she comes in contact. She was with a dramatic company until she discovered her voice, at the age of 17. She was the soloist for "Roxie and the Blues" and in Roxie's stage presentation.

William Merrigan Daly, whose latest honor was to be chosen by George Gershwin to conduct the latter's famous "Rhapsody in Blue" when it was played for the first time by the huge Philadelphia Orchestra in New York, was introduced at that time by Deana Taylor, noted American composer, as great to Leopold Stokowski the greatest conductor. American music now living. Walter Damrosch said after that performance "That man Daly is the finest young conductor I have ever heard of." He will undoubtedly have an outstanding success with his "Firestone Orchestra."

ANNIVERSARY OF OUR CONSTITUTION

Was Transmitted By Washington To Congress 144 Years Ago

On September 17 every good American should fix his thoughts on the event which, 144 years ago, made possible his very existence as a citizen of the United States. On that date, we are informed by the United States George Washington Bicentennial Commission, nearly a century and a half ago, George Washington transmitted to the President of the Continental Congress the new Constitution of the United States of America.

Four years ago, in 1927, there was published by the Congress what is known as House Document No. 298, entitled, "Documents Illustrative of the Formation of the Union of the American States." This bound volume of 1115 pages is contained the exact wording of every step in the building of our government, from the Declaration and Resolves of the First Continental Congress, October 14, 1774, through the adoption of the Constitution and its later amendments.

Every American citizen should go to his nearest library and spend as much time as he can over this great lesson in the history of his country and its government, which he will find in the absorbing pages of this volume. It is a book ordered printed for such indispensable instruction of the people.

The Declaration of Independence, which he will find in it, is a book which in his first school years, but much else in the book, such as the Articles of Confederation in force from March 1, 1781, until the adoption of the Constitution will be less familiar and of absorbing interest. But his chief interest will center in the labors of the Convention called by the Annapolis Convention and the Continental Congress to "remedy defects of the Federal Government"—the convention presided over by George Washington. To remedy those "defects," that convention found it necessary to draft a wholly new Constitution for the United States and in this House Document is to be found an exact reprint of the Constitution as it kept throughout the proceedings of the convention by James Madison, delegate to the convention from Virginia, and one of the framers of the Constitution.

It is odd, now, to think that the members of that convention complained among themselves of the length of time they consumed in shaping the foundation of our democracy. The delegates met on May 25, 1787 in the same chamber in Independence Hall, Philadelphia, in which the Declaration of Independence was adopted and signed. At the same desk where President John Hancock had affixed his flourish to the original great state paper, sat George Washington, victor of the War of the Revolution, and now presiding over this assembly to take the country with a federal constitution. For a little more than four months the debate over that instrument went on until, on September 17, it was ready for transmittal to Congress and for ratification by the States.

The bare notes of this debate cover a thousand pages. We of today, aware as we are that the Constitution produced by that debate is a nearly perfect governmental instrument, destined to outlast the ages, may marvel that it took so brief a time. But it took so little difference of opinion. Yet the distinguished delegates to the convention became so concerned over their wrangles and dissensions that they were consuming that Madison records Benjamin Franklin as rising at one point to beg leave, that henceforth prayers imploring the assistance of Heaven, and its blessings on our deliberations, be held in this Assembly every morning before we proceed to business, and that one or more of the Clergy of this city be requested to officiate in that service."

The motion was promptly seconded, but Madison reports that "Mr. Randolph proposed in order to give the favorable aspect of the hour, that a sermon be preached at the request of the convention, on the 4th of July, the anniversary of Independence."

What the delegates urged and argued, the ballots they took, how they put together, line by line, this Constitution of ours, as faithfully reported by the great eye-witness and participant, Madison, reads like what it is—one of the dramas of history.

Finally on September 17, 1787, the president of the convention and the man soon to be first President of the United States, was able to send to the President of the Continental Congress this letter which sums up not only the Constitution itself but the efforts that went into its making:

"We have now the honor to submit to the consideration of the United States in Congress assembled, that Constitution which has appeared to us the most advisable

He's Just the Type

The farmers of north and west Florida have found a "hard time" friend in winter cover crops, says J. Lee Smith, district extension agent. They have long known that manure was one of their best and cheapest fertilizers. Only recently have they started to grow it in large quantities from vetch and Austrian winter peas. Last fall over 150,000 pounds of vetch and pea seed were planted, and so far this year over 100,000 pounds have already been sold to the farmers of 11 west Florida counties.

In nearly every case where farmers have conducted demonstrations, in co-operation with county agents, the yield of corn following the cover crop was from two to three times that on nearby check plots. Similar results have also been obtained with other crops.

Mr. Smith believes that the seed should be planted during October, preferably just after a good shower. He recommends 20 to 30 pounds of hairy vetch per acre, and 30 to 40 pounds of peas. The land need not be especially prepared, but should be given about 400 pounds of basic slag or superphosphate per acre before planting, unless it was fertilized heavily last year. The seed should be inoculated and immediately sown. The land should be disked or flat broken covering the seed three to five inches deep.

The seed may be inoculated simply by spreading them out, putting on a mixture of two parts syrup and one part water, stirring, stirring on the culture, again stirring, and then sowing. The soil from a field on which one of the crops was grown last year may be used, for, as it will contain the nitrogen forming bacteria.

"The friends of our country have long and desired, that the power of making war, peace, and treaties, that of levying money and regulating commerce, and the corresponding executive and judicial authorities should be fully and effectually vested in the general government of the Union; But the impropriety of delegating such extensive trust to one body of men is evident. Hence results the necessity of a different organization."

"It is obviously impracticable in the federal government of these United States, to secure all the rights and liberties of the people by the power of making war, peace, and treaties, that of levying money and regulating commerce, and the corresponding executive and judicial authorities should be fully and effectually vested in the general government of the Union; But the impropriety of delegating such extensive trust to one body of men is evident. Hence results the necessity of a different organization."

"We all our deliberations on this subject we kept steadily in view that which appears to us as the greatest interest of every true American, the consolidation of our Union, in which is involved our prosperity, felicity, safety, perhaps our national existence. This important consideration, seriously and deeply impressed on our minds, led each one of us to consider what his own duty was to his country; and every one appears to have been actuated by the same spirit."

"That it will meet with the full and entire approbation of every state is not perhaps to be expected; but each will doubtless consider that had her interest been consulted, the consequences might have been particularly desirable or injurious to others; that it is liable to as few exceptions as could reasonably have been expected; and that she believes that it may promote the lasting welfare of that country so dear to us all, and secure her freedom and happiness, is our most ardent wish."

"With great respect, We have the honor to be, Sir, 'Your Excellency's 'Most obedient and humble servants. 'George Washington, President By unanimous Order of the Convention 'His Excellency the President of Congress."

The rise of this nation of ours stands in proof of how true were the words of the great eye-witness (the Constitution) may promote the lasting welfare of that country so dear to us all, and secure her freedom and happiness, is our most ardent wish."

It is well to ponder that line written by George Washington, 144 years ago, on September 17, 1787. Next year, on the same date, his words will have still deeper meaning, if that is possible, when we celebrate the Two Hundredth Anniversary of the Birth of The Father of His Country.

Outlook Is Brighter For Poultry Industry

With the price of corn and wheat lower than it has been for several years and the price of eggs on the increase, the outlook for the poultry industry is bright. According to the opinion of Dr. M. A. Jull, poultry specialist of the U. S. D. A., another point in favor of the poultryman is that heavy culling of farm flocks during the past spring has reduced the number of laying hens by about 20,000,000. At the same time, fewer chickens were hatched last spring than usual.

Dr. Jull believes the immediate future of the poultry industry to be fairly good, particularly for those who produce eggs and high-quality poultry for market, for hatchmen who supply the market with quality chicks, and for farmers and commercial poultrymen who give their flocks the best management and who practice efficient culling.

Winter Cover Crops Proving Hard Time Friend For Farmers

The farmers of north and west Florida have found a "hard time" friend in winter cover crops, says J. Lee Smith, district extension agent. They have long known that manure was one of their best and cheapest fertilizers. Only recently have they started to grow it in large quantities from vetch and Austrian winter peas. Last fall over 150,000 pounds of vetch and pea seed were planted, and so far this year over 100,000 pounds have already been sold to the farmers of 11 west Florida counties.

In nearly every case where farmers have conducted demonstrations, in co-operation with county agents, the yield of corn following the cover crop was from two to three times that on nearby check plots. Similar results have also been obtained with other crops.

Mr. Smith believes that the seed should be planted during October, preferably just after a good shower. He recommends 20 to 30 pounds of hairy vetch per acre, and 30 to 40 pounds of peas. The land need not be especially prepared, but should be given about 400 pounds of basic slag or superphosphate per acre before planting, unless it was fertilized heavily last year. The seed should be inoculated and immediately sown. The land should be disked or flat broken covering the seed three to five inches deep.

The seed may be inoculated simply by spreading them out, putting on a mixture of two parts syrup and one part water, stirring, stirring on the culture, again stirring, and then sowing. The soil from a field on which one of the crops was grown last year may be used, for, as it will contain the nitrogen forming bacteria.

"The friends of our country have long and desired, that the power of making war, peace, and treaties, that of levying money and regulating commerce, and the corresponding executive and judicial authorities should be fully and effectually vested in the general government of the Union; But the impropriety of delegating such extensive trust to one body of men is evident. Hence results the necessity of a different organization."

"It is obviously impracticable in the federal government of these United States, to secure all the rights and liberties of the people by the power of making war, peace, and treaties, that of levying money and regulating commerce, and the corresponding executive and judicial authorities should be fully and effectually vested in the general government of the Union; But the impropriety of delegating such extensive trust to one body of men is evident. Hence results the necessity of a different organization."

"We all our deliberations on this subject we kept steadily in view that which appears to us as the greatest interest of every true American, the consolidation of our Union, in which is involved our prosperity, felicity, safety, perhaps our national existence. This important consideration, seriously and deeply impressed on our minds, led each one of us to consider what his own duty was to his country; and every one appears to have been actuated by the same spirit."

"That it will meet with the full and entire approbation of every state is not perhaps to be expected; but each will doubtless consider that had her interest been consulted, the consequences might have been particularly desirable or injurious to others; that it is liable to as few exceptions as could reasonably have been expected; and that she believes that it may promote the lasting welfare of that country so dear to us all, and secure her freedom and happiness, is our most ardent wish."

It is well to ponder that line written by George Washington, 144 years ago, on September 17, 1787. Next year, on the same date, his words will have still deeper meaning, if that is possible, when we celebrate the Two Hundredth Anniversary of the Birth of The Father of His Country.

Outlook Is Brighter For Poultry Industry

With the price of corn and wheat lower than it has been for several years and the price of eggs on the increase, the outlook for the poultry industry is bright. According to the opinion of Dr. M. A. Jull, poultry specialist of the U. S. D. A., another point in favor of the poultryman is that heavy culling of farm flocks during the past spring has reduced the number of laying hens by about 20,000,000. At the same time, fewer chickens were hatched last spring than usual.

Dr. Jull believes the immediate future of the poultry industry to be fairly good, particularly for those who produce eggs and high-quality poultry for market, for hatchmen who supply the market with quality chicks, and for farmers and commercial poultrymen who give their flocks the best management and who practice efficient culling.

CLEARING HOUSE MEETINGS HELD

Series of Gatherings Being Sponsored Throughout Citrus Belt

Winter Haven, Sept. 16.—The educational work that is being carried on for six weeks by Karl Lehmann in relation to the importance of the citrus industry in the business life of Florida will result in meetings this week in Lakeland, Wailes, Lake Placid, Leesburg, Crescent City, DeLand, Orlando, Sanford, Wauchula and Clearwater.

The meetings which were held last week at Winter Haven, Bartow, Lakeland, Plant City and Wailes.

Formal speeches have been delivered by Hon. C. M. Fuller, of Orlando; James E. Morton, of Auburndale; Judge Allen E. Walker, of Winter Haven; A. M. Tilden, president of the Clearing House, of Florenceville; Judge Spessard L. Holland, of Bartow; Grosvenor Lewis of Lake Wales; and Dr. E. C. Aurin, of Ft. Ogden.

An outstanding point of Judge Holland's speech has been the unfair competition in the market for Florida lemons. He has indicated the danger to the industry from patents governing the use of paraffin. Mrs. Fuller pointed out that every citizen has a duty in helping the citrus industry. In one of her speeches she invented this slogan: "An orange a day will keep the sick and the weak away from the market."

Mr. Morton has stressed the importance of consistent interchange of shipping information; the necessity of growers and packers agreeing with the Federal standard; of the importance of advertising; of the importance of points where consumption records are low.

Dr. Aurin has urged for the sake of the industry that better distribution through the clearing house and through full knowledge of the market must be undertaken in view of increasing competition from other states and countries.

In the remarks of Mr. Dave he showed statistically that every additional dollar that can be brought into the State through the successful marketing of citrus represents in round figures twenty dollars worth of citrus activity, and in round figures twenty dollars worth of service in the state.

Judge Walker, who was the first president of the Clearing House in 1928-29, has made the following point: "To gather complete knowledge of market conditions for the benefit of the grower and also to push for greater consumer demand are the tasks of the Clearing House. Such work is too complicated for any one grower or shipping organization to attempt alone."

Mr. Tilden has drawn particular attention to the losses through lack of organization in tangerine marketing and has expressed his conviction that a large proportion of all tangerines will this season be marketed in an orderly fashion by two groups.

The meetings for next week are not fully worked out in detail; they will cover Cocoa, Vero Beach, Arcadia, Ft. Myers, Palmetto and Punta.

Local Editors Attend Meet at Lake Wales

At a meeting last Saturday in Lake Wales of the officers and directors of the Florida State Press association it was voted to hold the next meeting of the association at Live Oak next March.

There were 25 people attended the meeting in Lake Wales consisting of editors and their families and they were entertained at lunch by Jack Worthington, editor of the Lake Wales Highlander.

N. A. Broking, editor of The Highlands County News, and member of the state executive committee, attended from Sebring, and Gilbert Freeman, editor of the Avon Park Pilot attended as a member of the association.

There was some talk of getting the next meeting for Sebring but it was impossible to complete arrangements in time.

"NERVES"

Here's a good way to quiet "NERVES" Dr. M. A. Jull's Effervescent Nerve Tablets, glass of water, a pleasant drink. Nerves relax, sleep, enjoy life. Buy your drug store 25c and \$1.00.

AVON PARK High School News

Seventh Grade News

The 7th grade-A held a meeting Thursday morning during the Chapel period to elect officers. The following were elected: Gladys Helms, President. Frances Cason, Vice-President. Hazel Reddick, Secretary and Treasurer. Dorothy Weisheyer and J. L. Greene, Reporters.

The teachers of the 7th-A are: Miss Pearson, Geography. Mrs. Skipper, Mathematics and Sanitation. Mr. Funderburk, English and History.

The Seventh grade-A has three new members this year. They are: Jimmie Skipper, from Jacksonville; Helen Cason, from Lake Wales; and Rosaleen Sadler, from Miami. Bobby England, an old class mate, is also with the class again. He has been in Pennsylvania and Washington, D. C., for three years.

Qualifications For a Good Class President

In my mind, the very first qualification for a good class president is initiative. If this trait of making a beginning or introducing plans is lacking, it would probably be wiser to look for a person who does have this valuable quality.

After all, aren't class presidents elected for the purpose of introducing projects that are new and at the same time worthwhile? Someone must make a start at new things to prevent this old world of ours from becoming monotonous and so could be more suitable than class presidents?

The next qualification would most likely be leadership. To lead others and help them choose the wiser path is hard to do, yet this is just what your president is supposed to do. A leader must necessarily have a strong character to make people respect him and obey his authority. A good leader is able to see both sides of a question and make an unbiased decision.

A good president should be liked by all his fellow classmates, so that he might be a more efficient leader. He should be honest, impartial, reliable, brilliant, and familiar with all past class officers. His word should be law during a class meeting so that he can hold the attention and the respect of all members.

HELPLESS—The grower of a perishable fruit or vegetable who is compelled to send his product a long distance to the consumer through hands other than his own is helpless as to control and knowledge. He cannot find out, except by elaborate effort and much expense, with what or whom he has to compete in a distant market; nor even the ruling price or the quantities offered.

COURAGE—The grower of fruit from slowly maturing trees has made a heavy investment and sacrificed years of effort to bring his trees into production. He has watched his trees as they gradually increased in stature. He has gone through anxious uncertainties as to weather and as to pests, knowing that his goal was still years ahead. Such a spirit has stayed with the fruit industry of our nation. It is entitled to the best display of common sense, which the grower should, for his own self-interest, be the first to display.

OUR FRUIT—The grower of Florida Citrus is helpless alone, no matter how courageous he has been in nursing his grove through the years. How can he be by himself now a market whose condition is affected by shipments from several states and cargoes from the seven seas?

Headquarters: WINTER HAVEN, FLORIDA

present. He should be the outstanding member of his class in loyalty, scholarship, and achievement. If he is a good sport, he will take all his hardships and knocks good naturedly. "The leader of the class should be a good public speaker, ready at all times to cheer and speak a good word for his fellow classmates."

By G. D. Golwin.

A good class president should possess several outstanding qualities. He must be well liked by the whole class; he must have originality, personality and natural leadership. He also must have a quick, alert brain and a sense of humor. Good sportsmanship should be another of his desirable qualities. Included among these should be initiative.

The proper combination of the above mentioned qualities goes to make up a good class president. And, may I add, he would be a very good class president.

Sophomore News.

Tuesday, September 15, was Election Day with the Sophomores and the following officers were chosen: President, W. A. Maddox. Vice-President, J. L. Shibley. Secretary and Treasurer, Willie Mae Shibley.

Program Committee, Walton T. Linton, Sport Minder, Mildred Lee. The Reporter doesn't know yet whether the class wants to adopt the open-up or shut-up policy, but is making a memorandum to find out. With the present Sophomore membership there will always be plenty to tell—if— Hal Wingate, Reporter.

Juniors Initiate the Doubling Up Plan In Avon Park High

Realizing the general lack of financial stability and how to lighten it in some degree, the Junior class has decided to give Eddie Cantor's Doubling Up Plan as regards their class officers. Two men are assigned to do the work previously performed by one according to this system. The famous comedian advocates two men to drive an automobile (back seat driver extra), two men to serve as President while he thinks eight would

ANSWER—The response to a question and a doubt that has grown more urgent year after year was the creation of the Florida Citrus Growers' Clearing House Association by the most thoughtful work of big men in Florida and by advice both from the State and the Federal Governments.

J. C. Chase, the veteran grower and shipper, says the Clearing House is a benefit to all shippers whether it is supported by those shippers or not.

THREE QUESTIONS—Is there any way of knowing the market except by confidential information pooled in the Clearing House? Does not the whole industry require that the industry should guide itself by facts secured and then made known? Is it not startling to think of a great industry with an investment of \$500,000,000 doubting the need of a common interchange of knowledge to bring orderly competition into being?

SUMMING UP—The industry does not exist for the Clearing House; the Clearing House exists for the industry. It is a common meeting ground for competitive elements to combine for the public good. It does not sell; it tells.

Beaufifies

Instantly Renders

GOURAUD'S ORIENTAL CREAM

The Common Sense of the Clearing House Idea as applied to Florida Citrus

HELPLESS—The grower of a perishable fruit or vegetable who is compelled to send his product a long distance to the consumer through hands other than his own is helpless as to control and knowledge. He cannot find out, except by elaborate effort and much expense, with what or whom he has to compete in a distant market; nor even the ruling price or the quantities offered.

COURAGE—The grower of fruit from slowly maturing trees has made a heavy investment and sacrificed years of effort to bring his trees into production. He has watched his trees as they gradually increased in stature. He has gone through anxious uncertainties as to weather and as to pests, knowing that his goal was still years ahead. Such a spirit has stayed with the fruit industry of our nation. It is entitled to the best display of common sense, which the grower should, for his own self-interest, be the first to display.

FLORIDA HAD 58,966 FARMS LAST YEAR

Bureau of Census Figures Show Slight Decrease From 1925

According to a bulletin recently issued by the Bureau of the Census, showing both State and County Statistics, there was an increase in the number of farms in Florida from 54,905 in 1920, to 59,217 in 1925, but a decrease to 58,966 in 1930. The total number of farms in Florida includes 19,875 having from 20 to 49 acres, 10,459 from 50 to 99 acres, 9,350 having from 100 to 199 acres, and 6,206 from 200 to 794 acres. There were 280 farms having 800 acres and over.

Of the 58,966 farms in the State in 1930, as reported in the census, 29,394 were operated by owners, 2,835 by managers, and 16,737 by tenants. The land in farms decreased from 6,046,091 acres in 1920 and 6,046,519 acres in 1925, and to 6,026,517 acres in 1930. The value of farm land and buildings increased from \$231,419,404 in 1920 to \$478,941,908 in 1925, but decreased to \$423,240,202 in 1930. The value of farm implements and machinery in 1930 was \$15,446,476 as compared with \$14,563,563 in 1925 and \$13,451,773 in 1930.

The total number of mules and mule colts on farms on April 1, 1930 was 40,418. The total, exclusive of mule colts born after January 1, 1930, was 40,889. Mules, and mule colts on farms numbered 42,656 on January 1, 1925 and 42,046 on January 1, 1930.

The total number of cattle on farms on April 1, 1930 was 431,448. The total, exclusive of calves born after January 1, 1930, was 372,942. Cattle on farms numbered 656,217 on January 1, 1925 and 638,981 on January 1, 1930.

The total number of swine on farms April 1, 1930 was 567,115. The total, exclusive of pigs born after January 1, 1930, was 366,878. Swine on farms numbered 497,790 on January 1, 1925 and 765,481 on January 1, 1930.

The total number of chickens over three months old on farms April 1, 1930 was 5,671,115. The total, exclusive of chickens of all ages numbered 2,130,297 on January 1, 1925 and 1,554,898 on January 1, 1930.

Crops were harvested in Florida from 1,454,244 acres in 1929, as compared with 1,369,050 acres in 1924. The total for 1929 includes 613,205 acres of corn harvested for grain with a production of 6,617,724 bushels; 63,435 acres of hay cut with a production of 36,725 tons; 123,451 acres of cotton harvested with a production of 34,426 bales; 16,302 acres of tobacco harvested with a production of 9,258,190 pounds; and 23,460 acres of potatoes harvested with a production of 2,714,323 bushels. In 1929, vegetables grown in the open for sale, with a value of \$17,058,212 were harvested from 138,347 acres. The four most important vegetables were tomatoes, valued at \$5,854,855, harvested from 29,537 acres; snap or string beans at \$3,452,812, harvested from 29,984 acres; celery, valued at \$3,436,546, harvested from 8,420 acres; and cauliflower, valued at \$1,575,970, harvested from 9,650 acres.

A copy of this bulletin may be obtained by writing to the Bureau of the Census, Washington, D. C.

LAKE ISTOKPOGA

Mrs. Sallie Ried who has been visiting at her son's, D. C. Reid and family left Friday night for Olathe, S. C.

Florida Produces 129,000,000 Bulbs During Past Year

During the past season Florida nurserymen produced approximately 129,000,000 narcissus bulbs, according to inspection records just announced by J. C. Goodwin, nursery inspector with the State Plant Board.

According to the best figures available this is about 45 percent of the total production in the United States. A year ago Florida's production was about 100,000,000.

The inspection records show that about 30 percent of this crop is of marketable size and quality. Florida bulbs are finding a welcome in Northern markets, and are rapidly replacing those formerly imported.

Federal regulations require that bulbs be inspected for nematodes and bulb rot. For the first time this year nematodes were found on Florida-grown narcissus. Ten nurseries were affected, but these bulbs have been treated. The state is still free from bulb flies, which cannot be said of other major producing states. Mosquitoes usually give some trouble, but this year they are scarce, the inspection records show.

Green Cove springs was the leading producing section; about 43,000,000 being grown by nurseries in the vicinity. The next largest producing area was around Jacksonville, where the production reached about 29,000,000. Nurseries around Daytona Beach produced about 12,000,000, while Sanford and vicinity had considerably over 7,000,000, and the Hastings area nearly 5,000,000.

As to varieties, paper whites led with 107,000,000. There were about 18,000,000 Chinese Sarcels and 3-

Plant Lilies Soon For Easter Bloom

Easter lily bulbs planted in late September should be in bloom for the Easter season, according to Harold Mowry, associate horticulturist with the Florida Experiment Station. They do best on a sandy loam soil, and should be planted three to four inches deep. He recommends two applications of a general bulb fertilizer; possibly a 5-5-5 or 6-5-5.

Protection from cold may be necessary in the northern part of the state, he says. A frame covered with canvas will usually suffice, but in severe cold some source of heat under the canvas may be necessary.

Wake Up Your Liver Bile - Without Calomel

And You'll Jump Out of Bed in the Morning Rain' to Go

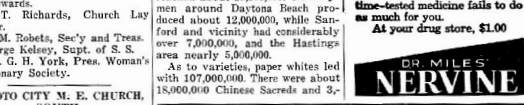

If you feel sour and sunk and the food doesn't digest. It just stays in the bowels. Gas builds up on your stomach. You have a thick, bad taste and your breath is foul, and often breaks out in blotches. Your head often aches and you feel "up and up."

It takes time to get your bowels and liver back to normal. You have a thick, bad taste and your breath is foul, and often breaks out in blotches. Your head often aches and you feel "up and up."

They contain wonderful, harmless, gentle vegetable extracts, making when it comes to making the bowels feel free.

But don't ask for Liver Pills. Ask for Carter's Little Liver Pills. Look for the red label. Carter's Little Liver Pills on the name. Remotest a substitute.

Cholesterol connecting rods are matched in sets of six to within one-quarter ounce, and are individually fitted by hand to the crankshaft. Bearings are of cast iron, and are fitted into the rods under heavy air pressure and at 800 degrees Fahrenheit.

Possessing the basic goodness of sound design and fine manufacture

From the selection of raw materials to the completion of the finished Chevrolet product, each process of building, assembling and checking the Chevrolet Six is marked by extreme care and precision. An exhaustive system of test and inspection makes certain that every part meets specified dimensions exactly. Many of these parts are held to limits of one ten-thousandth of an inch. No manufacturer in the industry uses more care or precision in building and testing than Chevrolet.

Just as every part of the car is soundly built, every feature is soundly designed.

In planning the motor, Chevrolet engineers were not content to offer the public anything less than tried and proved design. They knew that the only satisfactory way to get smooth, flexible power in a car is to use at least six cylinders. So they adopted the six-cylinder engine without compromise. And this is what you get in today's Chevrolet Six.

As a result of this sound designing and sound manufacturing, you can buy a Chevrolet and know you are getting a soundly good automobile—soundly designed, soundly built, basically and technically right.

Twenty beautiful models, at prices ranging from \$475 to \$675. All prices in N. H. Plant, Mich., special equipment extra. Low delivered prices and easy G. M. C. terms.
