

Scenes and Persons in the Current News

1—First traffic passing over the new \$2,350,000 Rip Van Winkle bridge which crosses the Hudson river between the city of Hudson and the village of Catskill. 2—Scene in an army recruiting station in New York city as the army began the drive to increase its size by the addition of 46,250 enlisted men. 3—Miss Fannie Megawee, queen of the Columbia county annual watermelon festival in Georgia, presenting to White House Secretary McIntyre a prize winning melon for President Roosevelt.

MAYOR REGISTERS

Bernard F. Dickman, mayor of St. Louis, being an ex-servant of marines and a loyal Legionnaire, was the first to register for the American Legion national convention that will open September 23 in the City by the Bridge. Charles E. Downey, registration chairman for Missouri, is here seen receiving the mayor's card.

ARMY

Begins Drive
for 46,000

New
RECRUITS

The biggest army recruiting drive since the World war is now under way at every army post in the United States. Recent congressional action has raised the army from its present strength of 118,750 soldiers to the authorized figure of 165,000. The additional 46,250 men will be enlisted as rapidly as possible.

The photograph above shows a scene in the army recruiting station in New York city as one of the first batches of recruits takes the oath of allegiance.

Increasing the size of the army is but a part of the administration's plan to add to the national defense. Important additions are being made to naval forces as well, both in men and in ships.

SUB FOR AVERILL

When Earl Averill of the Cleveland ball team was sent to a hospital by a premature explosion of fireworks, Milton Galtzler got his chance, and his reputation did not suffer from his work in center field for the Indians.

POULTRY
FACTSLATE CHICKS MUST
MAKE FAST GROWTH

Birds Need to Develop in
Eight, Ten Weeks.

By Roy S. Dandridge, Head of North Carolina State College Poultry Department—WAL Service.

Chicks hatched in the late spring require more careful attention than those hatched earlier in the season. Hot weather and the danger of infection with disease add to the difficulties of raising late chicks.

The aim in good chick development is to secure a rapid growth during the first eight weeks, with the birds attaining a weight of about two pounds at the end of this period.

After this time, growth proceeds more slowly while the birds are storing a reserve in their tissues to take care of the demands made upon them in the egg-laying season.

If hot weather is allowed to check their early growth, the birds may not reach a normal size. They also miss the abundant supply of tender green feed available earlier in the year.

Warm, moist atmospheric conditions appear to increase the spread of coccidiosis among small chicks.

Care should be exercised not to overheat or underventilate houses in which late chicks are being raised. However, the houses should not be allowed to chill on cold nights.

The chicks should be turned out into the sunshine whenever the weather is suitable. Rigid sanitation should be practiced. Drooping and undeveloped birds should be culled out, since they are not likely to develop into good birds and they also may be disease carriers.

During the hot months, a range shelter which can be readily moved provides a good method of protecting the chicks from the heat while allowing them to graze on green stuff. Old liver oil or alfalfa leaf meal should be added to their diet if they do not get an abundant supply of green feed.

First Eggs Index Size

That Pullet Will Yield

The United States Department of Agriculture is authority for the statement that if a pullet's first ten eggs are weighed, the average weight of her future eggs can be determined. The average of the first ten eggs will be almost exactly representative of the average of the eggs for the year.

The information offers possibilities for poultry flock owners. Those who have neither the time nor the facilities to trapshoot throughout the year might be able to arrange to do it for a few weeks during the fall, when the pullets are coming into production.

The research men of the department assure us that this rule is almost invariably followed. The following is true. First, that the pullets are receiving a well balanced and plentiful ration, and second, that they have had an adequate ration since hatching.

People who are troubled with a lot of new eggs from their flocks can well afford to consider trapshoot for six weeks or two months—Wallace Furber.

Use Poultry Houses

Young pullets should be taught to roost in the permanent quarters as soon as possible. Changeable weather with cold, damp nights may cause an outbreak of roup and colds in the flock which will set the birds back considerably in their laying. If they are under cover at night the flock owner will not have to worry about them. Before the birds are to use the permanent equipment and houses, all should be thoroughly cleaned and disinfected with a good reliable germ killer. There is no profit in putting healthy birds in unhealthy surroundings.

Reduces Weight of Eggs

Exceedingly high temperatures may reduce the average weight of eggs from the flock by as much as 10 to 20 per cent. Studies in the flock at the Kansas experiment station indicate that this decline is likely to be noticeable at temperatures above 85 degrees, says a writer in Successful Farming. There was more variation in the weight of the albumen and the shell than of the yolk. The birds were more sensitive to sudden temperature changes than they were to gradual changes.

Milk vs. Beef Scrap

Dried skim milk in rations for egg production did not increase egg production as compared with other scraps except where an equal quantity of dried skim milk was substituted for one-fourth of the meat scrap. This is the conclusion drawn by the Missouri experiment station. Where one-half of all the meat scrap was replaced by an equal quantity of dried skim milk, egg production over a period of 30 weeks ranged from 5 to 22 eggs per week less.

Miss Plague Orchardists

Porterville, Calif.—Page the Pied Piper! Doves of field mice that chew the bark from trees are playing orchardists of this region. In some cases the rodents strip a complete circle of bark, necessitating bark-grafting to save the tree from death.

White Sheers for Summer Chic

By CHERIE NICHOLAS

THE forthright note in summer fashions is the increased interest in femininity. Wherefore the glory of diaphanous materials of rapturous loveliness once more, as in the picturesque days of old, find way in the realm of pretty summery apparel. Everywhere dotted swains, unbordered or plain organdies and nets, chiffons and dainty shirers of multi-type flatter the summer landscape. The call for white is insistent in these weaves of elusive ethereal beauty with new and delectable colors that forthright claim.

First and foremost among the new sheers is a mouseline de soie. The important message about these rapturous mouselines is that modern science has succeeded in producing a washable type—comes from a rubbing as fresh and lovely as ever was. Every woman who heretofore lamented the fact of the un-washability of the exquisite mouseline which are so dear to her heart will rejoice at the good tidings that there is a new mouseline de soie which actually can be laundered.

And here's some more good news—a mouseline de soie which is shadow-patterned in self-color. You'll love it! Makes up adorably over a tulle foundation. Comes in white or pastel, with first honors going, however, to white, since white keeps its shimmer and sheen. For that "one more" party frock to add to your summer collection, why not choose plain or shadow-patterned mouseline de soie?

The lovely, white, frothy, filmy, vaporous frocks in the picture are typical of smartest midsummer trends. At the top to the left a cape and a ruche of crisp white net, which is really more of a tulle than a net, with two wax-white camellias, lend enchantment to a gown of the same tulle posed over white moire.

The young girl seated below is wearing a dainty linguist gown. Chanel uses yards and yards of ruffles edged with fine val lace on the cape and skirt of white mouseline de soie. The pretty creature sitting opposite is gowned in finest of cotton net. The bodice top is modestly skirted. The bolero of matching net ties with a big casual bow at the throat. The voluminous skirt is the very picture of grace, walking, dancing or sitting down. There is a belt trimmed with gold kid leaves with garland to match in her hair.

A sparkling of embroidered net, for a party frock which goes formal, who could think of anything more entrancing than the ensemble worn by the charming girl to the right in the group? Dots embroidered in delicate bonnet colors, pink, blue and yellow, look confetti-like on their sheer white background. Plush satin ribbons tie the throat and the waist. In the graceful matching over a full cape sleeves. Make them prove that they are stronger, last longer, give more light. Lowest in the group is the girl in the white and yellow, just the right size, shape and weaves for longer and better lighting service.

Coleman Mantles are always fresh, guaranteed quality. Dealers everywhere recommend the mantle protects you against summer heat, and it is long enough to cover your shoulders and neck. You get two Coleman Mantles, please, send today. (RM)

FOR GARDEN PARTY

By CHERIE NICHOLAS

Quiet, old time frocks are new fashion for garden party wear. This one is of white mouseline de soie (a favorite fabric this summer). It is piped with mulberry. The broad, brimmed violet colored bany burl hat is flowered in violet shades matching the corsage bouquet. It is a very pretty custom which has been revived—that of wearing flowers to match the posies on one's hat. Imagine a soft white straw encircled with a wreath of real Italian daisies with a necklace of the same daisies about your neck mounted on a velvet ribbon or a stiff old-fashioned bouquet posed at the front of a navy straw sailor, with a matching boutonniere in your buttonhole.

NATION BECKONS
SOCIAL PIONEERS
TO NEW FIELDS

In the Civil war period it was Horace Greeley who had young men, "Go West. Many of those who had worn the blue in the great conflict sought the frontier in the hope of finding livelihood and then going on to fortune. It was these pioneers which made the West different from the East in ways which have never yet been reconciled.

For modern youth there is no great area of land awaiting settlers. If a college graduate needs a place upon a frontier that is open. He must become a social pioneer in the field where urgent problems are to be taken apart and then recast in a form that shall be workable. An entire nation is waiting for adjustments in its vital affairs.

These new degree holders are equipped psychologically for the work that demands attention. During four formative years they have realized day after day that human arrangements good enough in the past have failed to continue in comfort and the security of which America has boasted.

By slow and painful steps the most able of the young people will make their way to positions of authority. As the opportunity appears they will apply their talents to the reorganization of the country in which they will be dominant.—"Uncle Dudley," in the Boston Sunday Globe.

Scientist Claims That

Noises Can Be Deadly

Do women make more noise than motor cars?

According to an American professor of physics, yes. Giving evidence in an action to restrain a factory from making an excessive amount of noise, he described experiments with a sound meter which he had carried out in the district. These showed that women talking in their homes made 40 times more noise than the factory, and 50 per cent more noise than passing cars.

Apparently women talk more loud in the city than in the country. This country show "loud conversation" as only double the noise of a suburban street, and two-thirds of a pneumatic drill at 20 feet distance.

But the worst noise of all, according to one distinguished scientist, is one we can't hear. A few months ago he showed the congress of radio biology how ultra-sound waves could burn the fingers of a man holding a glass tube, although the tube itself was not heated. He claimed that it was possible to be killed by these vibrations, which were really sounds, although they could not be perceived by the naked ear.—London Answers.

Baker, vice president and general manager of RCA, and a noted electronic authority, who heads a committee of the company's research and development engineers that will plan and carry out extensive tests of high definition television under actual operating conditions during the next year and a half. He is shown checking one of the high incoherence tubes which will transmit the television images.

Venezuela Honors Major of Marines

FORDNEY
Stratosphere
Ballooning
Awarded
MEDAL

Maj. Chester L. Fordney, United States marines (left), who is on duty in Chicago as commanding officer of the Central reserve area, has just been decorated by the republic of Venezuela with the "Medalla de Honor de Instruccion Publica." The medal was presented to the major by Senor R. Carlos Lebre (right), consul of Venezuela in Chicago, at a dinner in the Ad-

venturers' club. The decoration was awarded in recognition of the scientific results of the Settle-Fordney stratosphere ascension in 1933, of which Major Fordney was the scientific observer, and also in recognition of the contributions to education of the mathematical exhibits at the Century of Progress exposition of which the major was executive officer.

AVON PARK'S SHOW WINDOW.

The Mall is Avon Park's show window and as such should present the best possible appearance. It is known far and wide for its beauty and should not be allowed to become run-down and full of weeds. Former Mayor S. C. Donaldson spent time and money in making it what it is and it should be kept up in all its beauty.

H. R. Currie does the best he can with the money at his disposal and the center parks, through the business section of the city are kept in good condition. But the ends, especially the west end from the railroad on, are disgraceful and to a stranger entering the city from the north or west would indicate slovenliness and neglect and create a bad impression.

We would suggest that the city council in their next budget, which is nearly due, at least double the present park appropriation in order that the Mall be given the care that is due it. No one can do the work without money and sufficient help and Avon Park's show window should be spick and span at all times and indicate to the visitor within our gates that this is a worthwhile community.

This is just a suggestion on our part. Folks, think it over and tell the councilmen what you think.

CHUCKLE-HEADED BUREAUCRACY AT ITS VERY WORST.

For light on an instance of how bureaucracy works at its worst, we draw attention to a section of Paul Mallon's "Washington Backlogs" dispatch on the page today where he tells about the discharge of 200 Great Lakes boatmen by a contractor because his new contracts for Federal public works require him to employ only persons who are on the relief rolls.

But this is really not any worse than the practice of the Hopkins and other alphabetical relief administrations in considering men already employed in private industry into their service. In work of a few experts, perhaps, this is understandable, but in too many cases it is not necessary. Persons already out of work should have the first call.

Outside of one or two key jobs, for instance, there is no reason at all why the Works Progress and Emergency Relief organizations should not have their staffs recruited wholly from the ranks of the unemployed which include the widest range of professional, technical, skilled and experienced talent. But that is not the case. Why? Is it because the new State-organized setups have allowed the ever-witchful local politicians to get in their job-greedy work?

At any rate it is a ridiculous and exasperating situation when a government agency, specifically created to relieve unemployment, hires men already otherwise employed or conversely causes their discharge as in the case of the Great Lakes boatmen. But that's bureaucracy for you.—Tampa Times.

PUBLIC FORUM

OUR POSSIBILITIES FOR DEVELOPMENT? GROWTH, STABILITY AND SECURITY AS A COUNTY THROUGH OUR RURAL TERRITORIES. VS. THE PROBABILITIES, AS I SEE IT.

Highlands County is comparatively young and undeveloped. Taking into consideration our all-year around climate, our atmosphere, clean and pure and free from excessive salt moisture; our hills and lakes, creeks and rivers, fishing, hunting, and outings of all descriptions, beautiful, healthy and comfortable; many spots of highly fertile lands suitable for strawberries, tomatoes, cucumbers, peppers, celery, watermelons and all other varieties of trucking, I am conscientious in saying that I do not believe there is another county in the U. S. that affords as much foundation for development and happiness as does Highlands County.

I ask you if this is true? Or am I just seeing things?

What is the first step toward this development? Make it accessible to the public by means of roads. That is the whole story. If this is done nature will take its course and finish the job. But it is impossible for either local people or newcomers to utilize any of these wholesome attractions until they are first accessible.

Just a minute, don't jump at conclusions and say we can't because of this or because of that. Because it can be done at less cost than the county has been spending for roads during the past several years and is spending at the present time.

Our entire trouble in this respect lies entirely in errors on the part of our officials. Now follow me closely and see whether or not I am right or wrong. If I am wrong, call my hand.

I have lived in Highlands County since 1925 and I have observed that the standard practice of county road building is as follows: the first step taken is their view of savings to the county by hiring the cheapest man they can find as foreman. And invariably this man knows as much about road building and maintenance as I know about filling prescriptions.

The first step then takes is to pile up a big bank of sand, calling this grading road building. You can mark on your wall, where ever you see this going on, that you will always hereafter have to detour this bank of sand in traveling that road. How about the cost of piling up this bank of sand? That's where your money goes. Yet they figure they are saving the county money—foreman's salary. The next step is to put a steel road power scraper on the roads and tear them to pieces. Then its detour, detour.

Did you ever travel a county road, to say Kissimmee River on any county road in the county? Did

you see any of these sand banks in the road that you had to detour? How was the trip on you and your car? Did you get stuck?

Often times, in addition to the above mentioned grading and errors, the county will buy clay at some clay pit at so much per yard for the clay at the pit. A truck will haul two yards at a load doubling the yardage price per load. Then load the truck with shovels, that haul the clay several miles paying around a dollar an hour for the truck, then spread the clay. And the cost of clay is almost as high as paving with some hard surface.

I say to any county commissioner in the county that I will build any road anywhere in the county, build a decent, passable, cheap road at less cost complete per mile than the cost of some of the above mentioned sand banks that today have to be detoured, including my salary, to be paid only and if the statement comes true.

However, for the sake of Highlands County and its wonderful possibilities, I here offer a few general principles upon which I think should be worked on toward building and maintaining county roads in this county, at least cost than is practiced at present and in the past:

1st. Grading should be limited to take care of drainage and water conditions only. This will give sufficient grading within itself.

2nd. For surfacing, a proper mixture of muck or hardpan and sand thoroughly mixed, dragged and rolled will give a far better surface than our practice of dumping clay. All of the surfacing material can be found close by without having to buy them.

Dragging a road in this country is far better for smoothing than a power road machine.

In this way road building and maintenance cost will be less than our present and past practice and will give a road that can be traveled.

At present the Government is offering to give 80% and loan 20% on WPA projects that are worthy and give 45% and loan 55% of the cost on FVW projects.

I say that Highlands County should get every penny they can under this offer. They can use it worthwhile in much needed development of her assets. This will also relieve the much needed labor situation in our county. The Government says they want this money spent within twelve months.

Yet Highlands County as before, is not getting her share nor are they calling for it.

G. A. HARPER.

Avon Park, Fla., July 20, 1935.

NOW IS THE TIME FOR ALL GOOD MEN TO COME TO THE AID OF THEIR COUNTRY, and put a stop to these GAS BAG GOOSSES, blowing at OUR President of the U. S., of whom we are proud, and his policies.

It is not a question of fear of his defeat. His success is assured. But it is a question of making those SOAP BOX ORATORS, those SMOKE SCREEN BAGS SHUT UP. WE ARE TIRED OF IT.

The biggest Republican in the U. S., Senator Borah from Idaho, was big enough and honest enough to state the President's policies were sound. And that the President did not advocate an unfair TAX THE RIGHT program.

The truth of it is that he is merely trying and succeeding in stopping the big fish from eating the little fish.

Can we so quickly forget the condition of this country at the time the President went into office? The conditions of the banks, of business and the labor situation, the masses?

What caused this condition for the better? Franklin D. Roosevelt and his policies and nothing else.

Is your business better than it was last year? Is it better than it was when President Roosevelt took office?

If everything is so radically wrong and the Republicans know so much what should be done instead of what is being done, why is it that they didn't use some of that wonderful knowledge when they were in power? Can you give the answer to that question? They couldn't even put brakes on conditions going down. Or rather they didn't do it. I won't say they couldn't do it.

They say, "give us back the liberty and freedom that our constitution provides for us, the freedom which was taken away from us."

Listen brother, I am enjoying the freedom more now than when Mr. Roosevelt went into office.

Mr. Hoover and his other gas bag comrades say the country is recklessly on the spendthrift, spending the huge sum of four billion eight hundred million dollars.

Listen brother, that four billion eight hundred million is spent for one hundred and twenty three million people who actually need it. And it is being spent for useful development that is worth more than that amount to the country. The wealthy industries get their share of it don't they? And listen brother, under Herbert Hoover's and the Republicans administration, ONE MAN'S wealth accumulated to over TEN BILLION DOLLARS, ANDREW W. MELLON, Secy. and Treas. under the Republican and Mr. Hoover's administration.

Mr. Mellon is just an example. Yet they squeal and want their kind of freedom and liberty back when OUR President wisely provides less than half of that amount for one hundred and twenty three million people.

Mr. Roosevelt's kind of liberty and freedom suits me better than the kind experienced during the Republican's administration. How about you?

The voting public at the last general election clearly demonstrated that they know the facts. They sent a new set of congressmen and senators to Washington to carry out the policies and that was fully support Mr. Roosevelt's policies. On their first setting they fulfilled their promise. The lobbyist had had time to contact them. The voters will remember this at the next election.

Mr. Franklin D. Roosevelt and his policies are all right. They changed the tide of this country and they are better today than they were at the time he went into office. I for one am going to vote against every Florida congressman and senator that betrayed their promise that sounded so good in their campaign speeches.

Let us honor principles that are honest and good for everybody and condemn the one's that are rotten and political.

Let's shut up those gas bags.

G. A. HARPER.

Avon Park, Fla., July 18, 1935.

The California Exposition

San Diego, July 25.—(FNS)—Termed "America's Fair", the California Pacific International Exposition, staged in beautiful Balboa Park at San Diego, while not as great in scope as the recent Century of Progress in Chicago, is in many respects superior, and attracting a far greater attendance beyond the fondest expectations of its promoters.

Officially opened May 29, the Exposition has already attracted over a million and a half, with crowds increasing daily. From a financial standpoint it is already in the black, nearly four months to go. Tourists and visitors from every state in the union are in evidence; a check of the thousands of cars parked about the grounds reveals that from every state, with a goodly number from Florida.

The most striking first impression one gains from a hurried tour of the Exposition grounds is the marvelous beauty of the settings. The walks, drives, and buildings are all surrounded by a mile of parkways and ornamental plantings with every manner of vines and flowering shrub and tree after tree.

The buildings mostly Spanish architecture, many overgrown with vines and flowering climbers, have an appearance of permanency seldom found in exposition buildings. Exhibits are of the highest character and give evidence of the time, effort and money spent in preparing them.

Those who visit the Exposition with the thought that they can see it in half a day are in for a five days are necessary to see even a comprehensive one-over. There is an actual pedometer test showing a distance of over 14 miles and promenade through the grounds and buildings. Here as in Chicago one experiences aching legs and before many hours of tramping one is ready to head to one of the ground buses, similar to those used at the Century of Progress.

Regular eight-seating tours lasting 45 minutes take you over the entire grounds while other buses provide transportation between East Gate, West Gate and the Palace of Fine Arts.

When the exhibit is a "rickshaw" are also available for those who prefer a more exclusive service and those of course take you through the exhibit buildings as well as about the grounds.

Your first day will probably be spent in visiting such exhibits as the Hollywood exhibit. Here you see motion pictures in the making, an exhibition hall filled with interesting props and costumes used in the making of pictures.

Other exhibits in famous scenes, costumes worn by stars in outstanding pictures and in one corner artists sketch and draw Mickey Mouse is made by drawing hundreds of cartoons in sequence to eventually make the delightful picture you see on the screen.

The Ford exhibit is much like that at Chicago in 1934 and well worth a visit. Other exhibits that attract you are the Standard Oil Tower of the Sun, the Old Globe Theatre, the Old Curiosity Shop, immortalized by Charles Dickens, "Alpha the Robot", the Palace of

Foods and Beverages, Palace of Electricity and Varied Industries, Palace of Natural History and the Mexican Exhibit. You will stop of course for a rest and a delightful meal at the Cafe of the World where for one dollar you will enjoy as wonderful a meal as you could ask for, a splendid floor show, dancing if you like, a bottle of California wine, and then sit again to see more interesting sights.

One of the finest zoos in the world claims the fair grounds and an admission charge of 25c takes you in. Here you could spend an entire day as it covers many acres and there are over 8,500 rare animals on display housed in modern fashion. A hurried trip through the zoological gardens may be made by bus if you prefer, the trip taking an hour, but if you like to really watch the animals you will tramp from pit to pond and see some time enjoying the amusing antics of the bear cubs at play, watch the black leopards slink in and out among the rocks and see the lioness that provides the spacious home, be entertained by the monkeys, seals and hundreds of other creatures throughout the grounds.

Of special interest is the Water Palace. Here the story of Boulder Dam and the task of bringing water to the arid lands of the irrigate desert wastes and provide a water supply to cities as Los Angeles, San Diego and a hundred other communities has been brought about.

At the Ford Music Bowl you hear marvelous symphony concert and "choral organizations. The famous Spreeles out-of-door organ is another enjoyable feature where each day thousands of visitors rest and enjoy an organ recital.

The Palace of Fine Arts, the House of Charm, Palace of Education, Federal Building, Wells Fargo Historical Exhibit, Salon of Photography and Gold Gulch are all worth a visit and will keep you much longer than you anticipate.

The Exposition tells the story of mankind's restless urge toward achievement from the time the high-spirited gallions of Juan Rodriguez Cabrillo sailed into San Diego Bay and claimed Southern California for Spain, through the present time, and gives a glimpse into the promise of the future. The grounds occupy an area of over 1,400 acres with a total of over 1,600 buildings and with the arboreal and floral glory of the park gives the visitors a breath-taking picture.

California and San Diego are indeed to be congratulated upon the enterprise shown in staging such a magnificent exposition and the success it is achieving is a just tribute to the work and effort that have been put in on it.

Every Floridian who can do so should endeavor to visit this exposition and return home determined that our state, blessed as it is with many advantages over this section, historic interest, proximity to centers of population, better transportation facilities, etc., prepare to stage a similar Exposition at an early date.

But wherever we do, let us do it right. No state in the Union has a more colorful history or in better position to stage such a fair as Florida, and properly handled it would pay for itself many times over, bringing millions of people to the state and selling Florida's charms and advantages to the world.

Whether we stage such a fair at Miami, Orlando, Tampa or any other point, it should have the support of every section of the state since it will benefit the state as a whole just as this California Exposition is benefiting all of California, and here you and all other citizens co-operating to make the event the outstanding success that it is.

If you take a trip to California this summer to visit the California Pacific International Exposition, you will be repaid in no way disappointed.

COMMON CAUSE OF BALDNESS

One of the chief causes of baldness is the use of hair oil and pomade. These products are not only useless but they are also harmful to the hair. The only way to prevent baldness is by using a natural hair oil. This oil is made from the seeds of the castor plant and is the only oil that is good for the hair. It is sold in bottles of 10c and 25c. Write for free booklet.

Ford Output Is Better Than Ever

Dearborn, Mich., July 25.—"My biggest job these days is in distributing wealth in a form that people can use," Henry Ford said today, as he smiled broadly and handed newspapermen production figures for the first six months of the year.

Last November Ford announced that he would build "a million cars or better" in 1935. With the year but half gone the figures show that, up to June 30th, the Ford Motor Company had built 810,700 units in the United States and Canada. Foreign manufacture for the six-month period was 37,904, bringing the total world production up to 848,504.

"When do you expect to pass the 1,000,000 mark?" Mr. Ford was asked.

The motor-maker, wearing a fine coat of tan and appearing to be in the best of spirits, again smiled as he said:

"Now, now,—that's something else again. I'm just a manufacturer, not a prophet. Our men here, that had work for which their whole organization is thankful. There are many things that led us to be hopeful for the next six months. We're not dead certain. We are just doing the best we can."

"Basting" The word basting with its meaning of reducing superfluous flesh by diet, was introduced about 1864. The method followed was that of William Basting, a London cabinet maker.

SOCIAL and Personal News

By HELEN BECKETT
Society Editor

Mrs. Coen Hostess To Missionary Circles.

Circle one and two of the Baptist Missionary Society met Monday afternoon with Mrs. J. B. Coen, Jr. Mrs. Coen taught the first chapter of the new study book on "Colossians" by the late Dr. E. Y. Mullins and which proved very interesting and instructive.

It is suggested that all Sunday school teachers take advantage of this study and this is one of the books which gives a credit toward a diploma in the new Sunday school course.

After a short business session the hostess served iced tea and cookies to the following: Mrs. W. A. Davidson and her mother, Mrs. Fanny Johnson, Mrs. Will Bennett, Mrs. S. J. Pendleton, Mrs. J. D. Sherman, Mrs. W. C. Touchton, Mrs. E. C. Weaver, Mrs. Irvin Ford, Mrs. James Spencer, Mrs. E. Spencer and Mrs. C. D. Nolan.

Enjoy Steak Fry at Lake Jackson.

Mr. and Mrs. Frank Costine and Mr. and Mrs. J. B. Coen, Jr. joint hosts Thursday afternoon at a steak fry on Lake Jackson.

Swimming was enjoyed after the steak was fried over an open fire and partaken of by the following: Mr. and Mrs. Frank Costine and daughter, Dolores, Mr. and Mrs. J. B. Coen, Jr. and daughter, Gale, Mr. and Mrs. S. J. Pendleton and children, Julian, J. L. Tommy Lou and Ruth, and their guest, A. S. Nelson of Kissimmee, Rev. and Mrs. Loys Frink and children, Charlotte and Yvonne, and their guests, Dr. and Mrs. Travis and children, LaVerne and Carolyn and Mrs. E. C. Weaver and Mrs. I. H. Ford and son, Donald and Mrs. Hubert Mayo.

Girls Auxiliary Enjoy Camping.

The Girls' Auxiliary of the Baptist Missionary Society met Monday afternoon at Camp Lewis, Lake Placid. There were about 25 young people present with the counselors.

Classes in Bible and missions were taught from 9 to 12 o'clock in the mornings and the afternoons were free for recreation swimming, hiking and other diversions.

The group was made up of young people from Bowling Green to Lake Placid. Everyone enjoyed this, the first camp, and it is hoped to make it an annual affair.

Those attending from Avon Park were: Gail Coen, LaVerne Fortner, Virginia Cochrane, Marion Weaver, Tommy Lou Greene and Susie Lovett. Their counselor was Miss Mabel Collins. Mrs. Loys Frink was general supervisor of the entire camp and Mrs. S. J. Pendleton taught a class in mission study.

Epworth League Meet at Lake Wales.

The Epworth League Union, meeting and annual tract meet was held in Lake Wales Thursday afternoon of last week.

Lake Wales won the highest number of points, Avon Park was second and Winter Haven third in the track and field. Correll of Avon Park was third in total number of points and was second in the swimming contest.

After the athletic events a beautiful picnic supper was served to about a hundred. In the evening the regular business meeting and devotional services were held.

Those attending from here were Miss Merle Graham, Miss Macel Reid, Miss Mary Holland, Miss Letha Young, Miss Faye Gordon, Miss Margaret Loomis, Miss Dorothy Skipper, Miss Lauretta Reid, Miss Jean Correll, Miss Mattie Lee Rogers, George Gerard, George Ewell, Albert Rogers, Tom Gerrard and Rev. J. B. Reid.

Vanishing Party At Davidson Home.

A delightful vanishing party, out of the usual, was given by Mrs. W. A. Davidson, as one of a series by members of the Woman's club, at her home Monday.

A delightful luncheon, followed with dominoes and parchesi, featured the social affair. The decorations were garden flowers of beautiful coloring and unusual fragrance.

In addition to her mother, Mrs. Fannie Johnson, the guests were: Mrs. W. S. Betts, Mrs. H. A. Vickery, Mrs. S. C. Pardee, Mrs. C. H. Pardee, Mrs. L. E. Bass, Mrs. W. M. Moore of Lake Wales, Mrs. Annie E. Holmquist, and Mrs. T. P. Turner. Prizes were awarded to Mrs. Hetherington, for dominoes, Mrs. C. H. Pardee, for parchesi, and Miss Helen Coll for parchesi.

Mrs. Touchton Has Vanishing Party.

Mrs. W. C. Touchton entertained a few friends Tuesday afternoon with a vanishing party.

The house was decorated with beautiful garden flowers and the hostess served an ice course to the guests after several games of bridge.

High score for the afternoon was awarded to Mrs. I. H. Ford and second to Mrs. W. W. McFarland.

Enjoying the afternoon were: Mrs. E. W. Hart, Mrs. Erice Willis, Mrs. W. W. McFarland, Mrs. Jimmie Spencer, Mrs. T. A. McNeel, Mrs. L. H. Ford, Mrs. A. B. Clark, Mrs. Frank Costine and the hostess Mrs. Touchton.

Epworth League Meeting Tuesday.

The Methodist society Epworth League enjoyed a business and social meeting Tuesday evening at the Hut.

After the business meeting games and contests were in play until a late hour, after which punch, sandwiches and cookies were served to the following: Miss Letha Young, Miss Faye Gordon, Miss Macel Reid, Miss Dorothy Skipper, Miss Lauretta Reid, Miss Merle Graham, Miss Agnes Young, Miss Mattie Lee Rogers, Miss Goldie Mae Edes, Miss Helen Cannon, George Ewell, George Gerard, George Ewell, and Melvin Rogers and Thomas Roberts.

Births—

Friends of Mr. and Mrs. O. C. Parrish, Jr. of Lake Placid, will be interested to learn that the parents of a daughter, Mrs. Parrish is known here as the former Miss Martha Walden and is visiting friends here with her little daughter.

Mr. and Mrs. J. W. Pate of Frostproof formerly of Avon Park, announce the arrival of a son on Tuesday. The young man weighed 9 1/2 pounds and was given the name of James Pate. Both mother and son are doing nicely.

Mr. and Mrs. Albert Smith announce the birth of a son on Tuesday, July 23. The young man weighed seven and a half pounds on arrival and was named Kenneth Wayne.

Mr. and Mrs. Wiley McCullough announce the arrival of a son born last Friday. Upon arrival he weighed eight pounds and was named Robert Franklin.

Mrs. McKnight Hostess To Club.

Mrs. George Scott McKnight entertained the members and friends of the Wednesday morning club at her home on Thursday morning of this week.

The house was beautifully decorated with garden flowers and at noon the hostess served a delicious two course luncheon.

Those enjoying bridge during the morning were: Mrs. Charles Bell, Mrs. Phil Abrams, Mrs. Heber Weller, Mrs. Bill Sachseman, Mrs. J. B. Moore of Lake Worth, Mrs. S. C. Pardee, Mrs. C. H. Pardee, Mrs. H. A. Vickery, Miss Mattie Thompson and the hostess Mrs. McKnight.

Mrs. Bass Hostess To Tuesday Club.

Mrs. L. E. Bass entertained the members and friends of the Tuesday afternoon club at her home on Lake Wales this week.

The hostess used hibiscus in the decorating of the card room and served a sweet course to the following guests: Mrs. M. H. Park, Mrs. Clyde Nanny of Bradenton, Mrs. J. B. Moore of Lake Worth, Mrs. C. A. Clark, Mrs. S. Y. Hart, Mrs. C. H. Pardee and Mrs. George Scott McKnight.

High score for the guests was awarded to Mrs. C. A. Clark and for the club members to Mrs. C. H. Pardee.

Mrs. Parks Hostess to Vanishing Party.

Mrs. L. M. Parks entertained Thursday afternoon at the home of Miss Alice Davidson at Holly Hurst on Moore Lake. The affair was one of the series of the Woman's club vanishing parties.

Games and contests were enjoyed and Miss Kathryn Monday, and Mrs. Clifford Craft of Jacksonville were lucky in winning the contests. After an ice course, cookies and punch were served to the following guests: Mrs. Ed Welch, Mrs. C. E. Markham, Miss Mabel Seibert, Mrs. Clifford Craft, Miss Alice Davidson and the hostess.

Episcopal Church Sunday School Picnic

The Sunday school of the Church of the Redeemer, Episcopal, will assemble at the parish house at 1:45 p. m. tomorrow, Saturday for an outing to Lake Wales.

All the parishoners who have cars are asked to meet with the Sunday school to assist in the transportation. The children will bring their lunch.

Ray Wells was a visitor in Lakeland Sunday.

Ed Willey of Tampa was a visitor here Wednesday.

Pat Boyce of Tampa was a business visitor Monday.

Garden Club Notes

The Garden Club held another of its delightful, informal summer meetings last Friday morning, at the home of the chairman, Mrs. M. E. Covington, with a good representation of its membership present.

Every available flower space in the livingroom, held beautiful shrubs from the hostess's own gardens.

There was a general discussion of all varieties of plants and the best treatment for different pests. Members reported plants, trees from seeds, and rooted cuttings, they have in hand to supply any demand for such needs for the Mall, or to share with members. A listing is to be kept of these plants for the convenience of the club.

Some time since a party in town had some double amaryllis bulbs to spare. If this article comes under the notice of anyone having such bulbs, she is requested to communicate with Mrs. Thayer or any member of the club.

To have constant supply of gladioli for bouquets, plant the bulbs at intervals. They make a gorgeous showing, and last longer than most flowers.

The monthly "Birthdays Bouquet" was furnished by Mrs. Vickery, and given to Mrs. J. D. Raab, whose birthday was celebrated.

The hostess served a tasty and cooling punch.

Next meeting will be the third Friday in August, at the home of Mrs. C. P. Turner, Highland Lakes.

Mr. and Mrs. Ed Welch were visitors in Bowling Green Tuesday.

Rondo and Victor Sullivan of Frostproof were visitors here Friday.

Dr. and Mrs. Carl N. Travis and daughters Carolyn and Laverne of Atlanta, Ga. are spending the week here as the guests of Rev. and Mrs. Loys Frink. Dr. Travis is pastor of the Western Heights Baptist church of Atlanta.

Politics, Love and Mystery In 'Glass Key'

George Raft is the star of Dashiell Hammett's "The Glass Key" which comes Sunday and Monday to the Avon Theatre. This enthralling murder mystery by the author of "The Thin Man" presents the popular star as a hard-fisted butler who defies the lordlings of the underworld to aid his friends. It is the first time Raft has played a role of this type since his triumph in "Scarface."

In the well-rounded supporting cast of "The Glass Key," are Edward Arnold, Claire Dodd, Rosalind Cull, Ray Milland and Guinn Williams.

The story revolves about Edward Arnold the shrewd but honest political boss of a big city. When the son of the man whom he supports for Senate is murdered, Arnold's underworld enemies attempt to pin the crime on him.

Raft, who is Arnold's trusted aide, pretends to join his enemies in the fight on the big boss. But he is trapped by them, held prisoner and subjected to torture, without learning the secret of the murder.

It is only in the gripping climactic scenes that Raft assumes the role of the solution and pins the crime on the man who could be least suspected.

Sweet Spiced Peaches. Put in kettle 3 1/2 pounds of sugar, 1 pint vinegar, 1 pint water, 1/2 ounce of ginger root, 1/2 ounce of whole cloves, 1/2 ounce of stick cinnamon. Bring mixture to boil. Let stand over night to absorb spice flavor. Strain and add 1/2 ounce of whole cloves, 1/2 ounce of stick cinnamon. Pour over prepared peaches and let stand over night. Then drain off, boil again and add to peaches, proving that hell is a place of activity. Rev. Parker, the pastor says.

At Rebekah Meeting. Members of the Rebekah lodge from here attending a closed district meeting in Ft. Meade Tuesday evening were: Mrs. C. E. Mann, Mrs. Fanny Spink, Mrs. H. P. Smith, Mrs. Ben Cox and Mrs. G. P. Daly.

A national celebration of the 57th year of cooperative livestock marketing was held July 20 at Goodlettsville, Tenn., the birthplace in 1878 of the cooperative movement in America.

NOT WET YET

BIDS DEFIANCE TO HOT WEATHER

PATTERN 2319

UP-TO-DATE PAPA

Bobby—I saw daddy kissing the new maid.
Mother—That's all right, dear. Father is trying to help mother keep her from leaving.

IN DARK ALLEYS

He—You used to say I was the light of your life.
She—You were, till you started going out nights.

NO SALES TAX

She—But papa says you don't earn enough to support two.
He—What gave him the impression I wanted to support more than one?

GANGWAY

Lawyer—You say you want this damage suit pushed through with the utmost speed?
Client—Exactly. I have a child six weeks old, and I want the money to pay his college expenses.

OLD TECHNOCRAT

"Clarence was awfully misled when he proposed last night."
"Yes, I understand he has a screw loose somewhere."

CURTAIN!

"My wife has a very hard part in this amateur show."
"What makes it so hard?"
"She's not a speaking part."

The hot weather brings us to the problem every woman of generous proportions must cope with—how to keep cool and fresh looking on those wifling days! Well—Looking Cool goes a long way, and pattern 2319, with its loose, easy cape sleeve, and treated waistline gives you a night cool outlook on life. And very interesting, too, are the graceful folds of the cape that does wonders to equalize proportions. The darts over the bust and at the waistline cleverly contrive to avoid a too-fitted look at the strategic points. Pick a summery printed voile or other sheer.
Pattern 2319 is available in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50. Size 36 takes 3 1/2 yards 39 inch fabric. Illustrated step-by-step sewing instructions included.
Send FIFTEEN CENTS (15c) in coins or stamps (coins preferred) for this pattern. Write plainly name, address and style number. BE SURE TO STATE SIZE.
Address orders to Sewing Circle Pattern Department, 245 West Seventeenth Street, New York.

Smiles

CHECKERED CAREER

"You say he's had a checkered career?"
"Yes, he's been following the crossword puzzles ever since they came out in this paper."

Bargain
"Do you favor government ownership?"
"Of course," said Mr. Dustin Starr. "If I can dictate the price at which the government buys and have a hand in financing the deal."

Diplomacy
"It's best to be agreeable," said Uncle Eben. "De boy dat brings de seeden a red apple may not be so quick in his lessons but he has natural sense."

Quite a Surprise
Boss (to office boy)—"What would you do with a thousand pounds?"
Office Boy—Lummie, guv'nor, I wasn't expectin' a million—Pardon's 'Weeky."

WNU—T 25-26

NEWS AND VIEWS ON ECONOMIC PROBLEMS

On April 8, Congress, at the request of the president, passed a bill appropriating \$4,836,000,000 for work relief.

At that time, Mr. Roosevelt stated that by July 1 all the nation's unemployed who were able to work would have federal jobs, and would be off the local relief rolls. July 1 came and passed. More than \$4,000,000,000 had been expended for 474 projects, yet not a single man had been put to work.

The reason is two-fold: First, and most important, the work program is supposed to employ 3,500,000 men for one year. If that is done, the cost per worker, including materials, must be held

down to the very low figure of \$1,143. Second, there has been constant disagreement between Secretary of the Interior Ickes and relief Administrator Hopkins. Mr. Ickes is the head of the Public Works Administration, and Mr. Hopkins guides the Works Progress Administration. The two bureaus inevitably overlap—and both agencies claim jurisdiction over the same projects.

Mr. Ickes is of the opinion that relief money should be spent for projects of permanent benefit—grade-crossing elimination, river and harbor development, road work, etc. Mr. Hopkins, on the other hand, is concerned only with putting men to work, and he knows that the adoption of projects in which material costs are high will defeat that purpose. As a result, he favors projects which require only labor, and demand few or no materials, woodland clearance, malarial control, reclamation of public buildings, etc. The two men are so diametrically opposed in their views that it seemed no compromise was possible.

A fortnight ago the President stepped in and provided a partial settlement to the problem. He decided the question of jurisdiction by outlining which projects are to be controlled by Mr. Hopkins, which by Mr. Ickes. Result: All projects involving the expenditure of less than \$25,000 are to be handled by Mr. Hopkins; all those

costing more, by Mr. Ickes. For example: If the President approves the building of a canal, Mr. Ickes will handle it—if he says it is a ditch, it will be done by Mr. Hopkins. Mr. Ickes will build highways. While Mr. Hopkins builds trails, Mr. Ickes will erect public buildings, and Mr. Hopkins will landscape the grounds surrounding them. As for it, it is not clear.

The works relief program is at last swinging into actual operation and the question that remains to be answered is whether or not it can find employment for the 3,500,000 heads of families who are still out of work. The legislative situation is confused, chaotic. Roosevelt control of Congress is not so certain as once was—as the House vote on the Utilities Act dramatically proved. In spite of talk about adjustment, the chance seems small that Congressmen will be able to take the train for home before September, only a remarkable and unlooked-for burst of speed could bring about an August adjournment.

Here is how some major bills stand: Guffey Coal Bill, this bill, which simply amounts to a rehash of the NRA coal code, seems certain to pass and to be approved by the President, even though it is widely believed to be unconstitutional, as well as unworkable. Wagner Labor Relations Bill, has passed, is apparently doomed to certain disapproval by the Supreme Court.

Federal Alcohol Control, The Supreme Court's NRA decision disposed of the federal government's control over liquor, and so made it necessary to prepare a new bill. The bill has been much debated, but it is expected to pass shortly.

Bus and Truck Bill, this bill is designed to extend the sort of federal regulation now exerted over the railroads, to the buses and trucks. It has almost unanimous support from private and public sources, will doubtless pass, has been held up by debate on other and more momentous measures, but is now getting underway.

Food and Drug Act, Hearings on this bill will start shortly. Consumers' organizations say the bill is not sufficiently comprehensive, while food and drug makers are for it. The debate will be hot when the bill comes up—its chances of passing, in its present form, are only fair.

Black 30—Hour Week Bill, Seems definitely dead, due to Administration opposition. It is thought that the President believes in the bill's principle, but is against forcing so expensive a measure on industry.

Banking Bill, Has been revamped in the Senate, due to the efforts of conservative Senator Glass, father of the Federal Reserve Act. It is no longer so comprehensive for the standpoint of federal control as it was originally. The Administration wants the original bill, as prepared by Mr. Eccles, to pass and a battle looms.

Lake Placid News
By Patricia Whitmore.

Mr. and Mrs. J. R. Morrison returned Monday evening from a vacation in Alabama.

Mrs. M. P. Harris of Humboldt, Tenn., arrived Saturday to visit her nephew, Frank Harris.
