

FROM CONGRESSMAN
J. HARDIN PETERSON

SOCIAL SECURITY ACT—In view of the third anniversary of the enactment of the social security law, it might be interesting to give a few figures on the operations of the social security board as contained in an address delivered by Arthur J. Altmeyer, chairman of the board. Unemployment compensation laws are in effect in every state, and more than 27 1/2 million workers had earned credit toward unemployment benefits by the end of May of this year.

More than half the states are paying benefits, and Florida and the other states now paying such benefits will be doing so in the very near future. Benefits for full time unemployment now average \$45 per month. There are approximately a million persons receiving unemployment compensation checks now, averaging \$10 per week each. In the first half of 1938, over 2,500,000 wage earners received about \$180,000,000 in benefits, for partial or total unemployment. It is estimated that in 1938, benefits to be paid for unemployment will be about \$375,000,000 and a \$460,000,000. More than 400,000 workers' applications for accounts under the federal old-age insurance system have been received. Most of those covered by this plan, it is believed, will not be ready to claim their old-age benefits until after 1942, when monthly payments will begin to be paid. This is because most of them are young and middle-aged now. Those who reach 65 now, however, and the families of those who die receive single cash payments representing a return of \$5.60 for every dollar paid in by the worker in taxes. Through the public assistance phase of the program, it is estimated that in August more than 1,700,000 are receiving regular cash allowances from combined federal and state funds. There are now 40 states taking part in the dependent children and dependent blind programs, and it is estimated that this month some 609,400 children in 248,700 families, and about 40,000 blind persons, are receiving aid. An overall estimate, counting in all recipients under the three public assistance programs, shows other members of some of these families who also benefit directly, brings the total of needy men, women and children served by this assistance program to at least 3,300,000, Chairman Altmeyer said.

CIVIL SERVICE EXAMINATIONS—Civil service examinations now pending include: senior consultant in public assistance, \$5,500 a year; consultant, assistant consultant and assistant consultant, \$3,800, \$3,200 and \$2,600 respectively, with optional salaries of case work or social research and statistics; first assistant physician (psychiatrist) \$6,000; second assistant superintendent at St. Elizabeth's Hospital in Washington, D. C.; director of personnel, three classifications, \$5,000, \$4,500 and \$4,000 a year, respectively; blacksmith, \$6.62, \$7.10 and \$7.58 per day; carpenter's helper, \$4.25, \$4.41 and \$4.89 per day, and crane operator, electric traveling bridge, \$5.55, \$5.84 and \$5.92 per day, all of the U. S. Navy Yard, at Charleston, S. C. We will be glad to furnish anyone with more complete information about these examinations.

WAGE-HOUR LAW—We still have a few extra copies of a comprehensive analysis of the new wage-hour law, prepared by the Tax Research Institute of America, which is not a governmental agency. The analysis appears to be quite comprehensive and we will be glad to furnish copies to anyone desiring until the end of the year for whatever value they may have. A letter or card addressed to me at Lakeland will bring the analysis forward by the next mail.

INTRACOSTAL CANAL—The Jacksonville district office of the army engineers is continuing its work in connection with putting the data gathered during the physical survey of the canal from the Anacostia to the Caloosahatchee river in proper shape, and advise me that their report should be ready for submission to the division engineer at Norfolk around November 1. The chief of engineers some time ago, following introduction of a bill by the House authorizing a preliminary examination and survey, had the preliminary examination authorized a further physical examination. It is this physical examination which is about completed and the data and which will go forward to the division of (Continued on Page Eight.)

BILOXI BATTLE
HARDSHIP TOLD
TO ROTARIANSCapt. Yates Tells All About
Camp Life Including
The Red Bugs

"The Battle of Biloxi" with the mud, red bugs, cooties and other incidents was described in detail by Capt. Chester Yates Wednesday night at the Rotary Club luncheon at the Jacaranda Hotel. At the close of the battle both armies, the Blues and the Reds, were in full retreat with the red bugs in full control of the area, Capt. Yates said.

Describing the trip to camp, Capt. Yates said Headquarters Battery left here early Sunday morning, July 31 and reached Tallahassee that night. They spent the second night at Yonacola and went into camp the third day. They had motorcycle police escorts through several towns.

The camp was one of the muddest ever experienced, it having rained for a number of days previously and about 10,000 troops were camped in a radius of half a mile. The mud was knee deep but the sun shone afterwards and helped. The mosquitoes were not bad but the red bugs and ticks made up for that.

The battle started Thursday night and Headquarters Battery established communications for the commanding general of the Brown army over a 10 mile front. They had to pick up wires and then lay it down again.

One of the biggest troop movements in history was undertaken that night, two divisions consisting of 16,000 men being moved forward 10 miles without a slip, he said. After the advance there was a retreat of 12 miles and the lines of communication had to be changed again.

Avon Park To Call
On Pardee Bondsman
Following Audit

The Continental Casualty Co., the company which bonded Avon Park's former city attorney, S. C. Pardee, during the latter part of his term of office will be called on to make good the alleged excess credits to his account as cited in the recent audit of Cecil Bryant, C.P.A., of Ocala. This action was determined by the city council Monday night, following the statement that the former city attorney had not as yet replied to the city's request for reimbursement of the excess credits claimed in the audit or an explanation why such reimbursement should not be made.

Councilman A. McKee Elwell had a copy of the bond, which was for \$5,000 and which expired December 31, 1937, and he moved that demand be made on the bonding company and they be furnished with a copy of the audit. Councilman L. D. McGiboney seconded and the motion carried without a dissenting vote.

10 DAYS NEEDED
TO CERTIFY MEN
FOR W. P. A. JOBSPlanning Board Hears of
Procedure; Endorse
Several Projects

It takes about 10 days to get a man certified to a W. P. A. job, Miss Hester Graham said Wednesday afternoon at a meeting of the Avon Park Planning Board. Miss Graham, who is director of the eight of the State Welfare Board, was discussing the 100 extra men promised for emergency W. P. A. work here, and said a total of about 74 applications had been received since Saturday.

The applications are taken by the state welfare board and after investigation are certified to the W. P. A. for work. Only one man in a family is allowed to register and work here, and said a total of about 74 applications had been received since Saturday.

Miss Graham was accompanied by Miss Ruth Unland, supervisor for Highlands, Hardee and DeSoto counties. She said that the planning board had approved three street projects, Highlands avenue, Central avenue and a fine project. The DeSoto Park project was also discussed and the plans presented by Walter S. Betts given addition to the Tourist club house, 24x30 feet, and added recreational facilities. These green courts, two bowling on the green courts, a putting green and clock golf, a barbecue oven, a lake shore playground, croquet and racquet courts, a pier into Lake Verona and reconditioned tennis courts.

Mr. Nicholas to Help
Late Judge's Sister;
Is Still Candidate

T. A. McNicholas, city attorney for Avon Park, stated Monday night he had withdrawn his application for appointment as county judge of Highlands county to succeed the late Judge Selwyn Ives, in favor of Joe Kinsey of Sebring, law partner of the former judge. McNicholas explained he had taken this action as Mr. Kinsey had promised to donate the proceeds of the office for the remainder of the term to Miss Ethel Ives, sister of the late judge, in order that she might further her education. Mr. McNicholas added he had been held in the latter part of September and if successful in the primary would be a candidate for the general election in November.

Result of Car-Train Crash at Lakemont Crossing

Here are two pictures of what was a twisted mass of metal. The car was hit by a Seaboard Air Line train early Saturday morning at the Lakemont crossing. The top picture is a closeup of the car taken from the left side.

The north bank of the railroad and was a twisted mass of metal. The judge was tossed clear, into the ditch further up the track. The top picture is a closeup of the car taken from the left side.

AVON PARK FIRST
TOWN IN COUNTY
UNDER NEW ACTCouncil Passes Resolution
Calling for Benefits of
Wilcox Act

The passage of a resolution by the city council of Avon Park last Friday night was the first action taken by a Highlands county political unit to benefit by the Wilcox Municipal Bankruptcy Act, hearing both Sebring and Lake Placid to the courts with their refunding plans.

Last week Joe D. Kinsey, attorney for Lake Placid, and other officials of that community made a trip to Jacksonville by plane in the interest of the refunding plan of Lake Placid.

Sebring will vote on issuing refunding bonds next month and, as in Avon Park, more than enough bonds have been signed up under the plan to put the refunding into the federal courts.

WHEREAS, it is for the best
interest of said city and its creditors
to put into force and effect;

WHEREAS, there has been presented and considered the petition of said city of Avon Park for filing in said United States District Court for the commencement of said proceedings in said court;

WHEREAS, the City of Avon Park has heretofore adopted a detailed plan for the composition of its bonded indebtedness, and has submitted the same to its creditors affected thereby for the purpose of securing the consent of its said creditors to the filing of proceedings in the United States District Court for the Southern District of Florida under the National Bankruptcy Act as amended, in the same applies to municipal corporations, to the end of effectuating and perfecting the plan of composition and adjustment of the same;

WHEREAS, the creditors of said city affected by said plan owning more than 51 per centum in amount of each class of the securities affected by the plan have accepted in writing said plan of composition; and

Boy Scouts Leave
On Camping Trip

Avon Park Boy Scouts were all away on this morning when they left for a three day camping trip to the Shady Oak camp on Lake Kissimmee, just off the Vero Beach road. They will return Sunday afternoon.

Marine Studios
Seeking Forms
Of Marine Life

St. Augustine, Aug. 18.—(FNS)—Marine Studios' specially designed fishing boat, the Porpoise, and one of its skiffs, has just left for Soldier Key, south of Miami, on perhaps the most unusual expedition ever undertaken, seeking octopi, barracuda, Moray eels, parrot fish and rock beauties specimens for the new aquarium at Marineland, Florida.

NEWSPERMAN DIED

Word was received here this afternoon that Jack Worthington, editor of the Lake Wales "Highlander," died at 11 o'clock this morning. The cause of death was not learned. Mr. Worthington was well known in Avon Park, having visited and attended meetings here a number of times. He was prominently identified with the Sebring Highlanders and other civic organizations.

JUDGE S. C. IVES
DIES AFTER R. R.
CROSSING CRASHCar Hit by Seaboard Train
Early Saturday Morning
At Lakemont

Selwyn Caldwell Ives, 39, county judge of Highlands county and a resident of Sebring for the past six years, was fatally injured early Saturday morning when the car in which he was riding was struck by a northbound Seaboard Air Line train at the Lakemont crossing. The impact threw the car about 50 feet onto the railroad bank and the judge was tossed out into the ditch about 25 feet farther on.

He was picked up, still alive, by John Wilkes, Robert Davis, Jr., and Grady Parrish, of Sebring, and taken to the Sebring hospital, where he died in about an hour. He suffered a fractured skull and other injuries and never regained consciousness. He was so badly disfigured that he was not recognized until placed on the operating table.

The deceased was born in White Springs April 19, 1908, to Norman P. and Mary Elizabeth Litchman Ives, and received his elementary and high school education in Lake City, where he was graduated from the Columbia High school in 1926. He was a student at the University of Florida from 1926 to 1932, where he was graduated with the degrees of LL.B. and B.A. in June, 1933.

During 1929-30 he was managing editor of the Seminole, becoming editor-in-chief the following year. He was chosen president of the student body 1931-32; was a member of Phi Delta Phi, Kappa Sigma and Florida Blue Key fraternities; he served two years on the R. O. T. C.

He was admitted to the bar in 1932 and started the practice of law in Sebring in the office of F. T. Haskins. Following his election to the office of county judge in 1936, he, with his partner, J. D. Kinsey, organized the firm of Ives & Kinsey.

During the 1936 Democratic primaries, Mr. Ives directed a successful campaign for Governor Fred P. Cone, and was also county campaign manager for Senator Pauline H. Haskins. He was appointed a colonel on the official staff of Gov. Cone.

He was also prominent in local affairs, having served as president of the Sebring Rotary Club. At the time of his death he was an active member of the Lions club.

Survivors include two brothers, Norman P. Ives and Wilbur L. Ives of Lake City, and two sisters, Mrs. Kenneth E. Johnson of Lake City and Mrs. Ethel Ives of Lake City and Sebring.

Funeral services were held Sunday morning at 9 o'clock at the Sebring Methodist church, Dr. Lawrence Radcliffe officiating. Mrs. Payne M. Sebring sang. Active pallbearers were Guy Fitch, Dr. Herman Martin, Roy Chappell and Roy Raulerson. Honorary pallbearers were other county officials, W. Z. Carson, Doyle Schumacher, H. P. Pety, L. A. Altmeyer, H. R. Keller and Mrs. Ruth B. Hyton.

The cortege then proceeded to Lake City where services were held at the Baptist church, where the deceased had been an active member. Interment was made in that city. Accompanying the body from this community were Mr. and Mrs. Joe Kinsey, Mrs. Helen S. Peck, Mr. and Mrs. Ivey Fitch, and Ford Heacock.

The county commissioners at their regular meeting held Tuesday at the court house passed the following resolution in commemoration of the death of Judge Ives. Be it resolved by the Board of County Commissioners of Highlands county, Florida, in session assembled, that the death of Judge Selwyn C. Ives, who in the dark hours of the night of August 12, 1938, was carried away on the wings of death to that country from which no traveler returns. We say, farewell to a friend, a distinguished judge and an honorable man. We will miss him around the Court House, but some day we hope to see him again in that eternal rest made with hands, eternal.

Be it further resolved that this resolution be spread in full, upon the minutes of this meeting and a copy sent to Miss Ethel Ives, a sister of our deceased jurist.

"Playing With Dynamite"

By FLOYD GIBBONS
Famous Headline Hunter

HELLO EVERYBODY:

The old phrase, "Playing with dynamite" has come to mean about the same thing as doing something foolhardy. That's the figurative meaning of the expression. But literally speaking, the man who monkeys around with high explosives is usually one of the unsung heroes of our age.

Over in France, twenty years ago, millions of men were playing with dynamite, and T. N. T. and just about every other explosive known. We didn't call those fellows foolhardy. In those days, it was generally considered that they were doing a brave and noble thing. This is a story of another such lad who toyed with danger in a good cause.

Herman Beaver of Chicago wasn't juggling explosives in and out of some sort of firearms over in France. He was taking an even longer chance with the dangerous stuff. On a hot day in July, 1917, he was working in a munitions plant on the northern outskirts of Milwaukee, Wis., on the banks of the upper Milwaukee river.

Grinding Salvaged Powder.

Over in France, millions of men were crouching in trenches, avoiding the explosives that the enemy was hurling at them. But Herman Beaver had no way to avoid the explosive that he was dealing with. His job was to handle the stuff—and to handle it roughly, too. He was grinding salvaged powder that came in to him in chunks and long tubes that looked like spaghetti—grinding it in a machine that looked a lot like an old-fashioned, hand-operated coffee grinder. That powder, when it had been reduced to bits, would be used to load rifle grenades.

In only one way did that machine differ from a coffee grinder. Between the handle that he turned continuously and the hopper into which he fed the unground powder, was a steel plate fixed so as to shield his body in case anything happened while he was grinding. On this day, while Herman ground away, his eyes wandered out the window and down the row of a dozen or more wooden buildings where the work of loading the grenades was going on.

They were little better than shacks, about twenty-five by fifty feet, built about fifty feet apart, in among trees, so as to obscure the plant's

A terrible concussion threw him backward.

position from the air. Even in those days they were concerned about airplanes. Those shacks were filled with men and women, and even boys and girls—all taking long chances, to supply our soldiers with ammunition.

Blast and Deadly Flames.

But Herman wasn't thinking about the chances. The view from the window was pleasant. The trees outside swayed in a gentle breeze. "I was at peace with the world," says Herman.

And then—Without warning, there was a deafening blast. Acid choking smoke filled the air and fire bit into Herman's flesh. He felt the earth rock beneath his feet—felt a terrible concussion that threw him backward. It happened so fast that only when he was on the floor did he realize what had happened. The powder that he was grinding had exploded.

Behind him were benches covered with pans of powder. In rapid succession they were catching fire. Then Herman saw that his own clothing, heavily saturated with powder dust, was afire too. "If they had been soaked with gasoline they couldn't have burned any more furiously," The flames shot many feet above my head," he says. "I was a living torch."

He was stunned for a moment, but he managed to stagger to his feet. His whole body one mass of flame, he ran to the door—and out of it.

By that time people were pouring out of all the buildings in the group. Herman dashed out of the door and kept right on running. He had lost all power of reasoning. All that moved him now was a blind, gripping panic. He wanted to run, and keep right on running until he dropped. And in his terror he was headed for another building—a building that was filled with powder.

"Lie Down and Roll."

If he had run into that building, this story might never have been written.

"But suddenly, through his panic, he heard a voice. Out of all the shouts and yells of that mob of screaming humanity that was watching his plight, that one voice, and that alone, penetrated his consciousness. "Roll." It was shrieking. "Lie down and roll!"

Suddenly, Herman remembered. That was what he should be doing. That was the only way to save himself. He dropped to the ground and began rolling. The pain was unbearable, as burned, smoldering flesh came in contact with the hard earth. He rolled over once—twice—and then he stopped. It was all he could stand. A workman ran over and tried to beat out the flames.

His apron caught fire and he stopped to tear it off. Then the superintendent ran up. He ordered the crowd back, and he himself began rolling Herman over and over. He burned his hands severely, but he stuck at the job until the fire stopped blazing.

When the flames were out, Herman's clothing—what was left of it—glowed and smoldered like one large, live coal. They rushed him into one of the shacks, set him down on a box, and began tearing the charred cloth off his body.

"That shack was filled with powder," Herman says, "but in those circumstances they never thought of that."

"There was powder in the very box I was sitting on. The Lord only knows why the whole place didn't blow up. I know I don't. And I have two large scars, one on my right hip and one on the front of my left leg that remind me every once in a while of what a close call I had."

Nobody will ever know how that explosion started, but Herman thinks a persuasion cap might have found its way into the powder he was grinding. "I was working with the lid of the grinder open," he says. "If it had been fastened down when the explosion occurred, the whole machine would have shattered to bits—and I don't believe I'd be here to tell the story."

Passage of Chimney Tax

The fumage or chimney tax is mentioned in Domesday as paid to the king for every chimney in the house. Edward, the Black Prince, is said to have imposed a tax of a shilling for every hearth in his French dominions. The first statutory enactment in England required a tax of two shillings on every hearth. In certain houses to be paid to the king. The tax was abolished in 1689.

Nature Builds a Bridge

Nature is making a bridge in the Kleinwaal valley in the province of Vorarlberg, Austria. The "structure," which spans the Schwarzenbach river, consists of chalkstone furrows, say the running water. Reports received in Vienna say it has a span of 30 feet and this is growing fast. The arch of the bridge is carried by three pine trees which have grown into it from underneath.

Mechanical Pitcher Throws Only Strikes

Byron Moser, a St. Louis banker with mechanical in clinations, tries out the mechanical pitcher he has built. It pitches four balls a minute, each of which is a strike. The speed and height of the ball can be regulated.

Marathon Golfer Wins Farm

J. Smith Ferabee, young Chicago broker who achieved the amazing feat of shooting 144 holes of golf in 12 hours and thereby winning sole title to a \$20,000 Virginia plantation and a number of cash bets. Ferabee played the four 18-hole courses at Olympia Fields twice, averaging under 100 per round. The bet that resulted in the ocean golf marathon was made with Ferabee's partner, another Chicago broker, who was joint owner of the plantation.

SWIMS BALTIC

Jenny Kammergaard, nineteen-year-old Danish swimming star who entered the Baltic sea at Gdansk, South Denmark, and swam a 37-mile route to Helshagen, Germany, in 40 hours and 9 minutes. She is believed to be the first to accomplish this difficult feat. The young swimmer has been an aquatic enthusiast almost from infancy.

Temperance Women in Conclave

Greeting National President Mrs. Ida B. Wise Smith (left) of the Women's Christian Temperance union as she arrived in San Francisco for the annual convention of the organization is Mrs. Louise J. Taff, state president for California.

Gloucester Fishing Craft Aground on Rocks

Slipped by jagged rocks where she ran aground off Gloucester, Mass., the 100-foot fishing vessel, Uncle Sam, was pronounced a total loss by coast guardsmen after being abandoned by her captain and crew. Nearly 80,000 pounds of fresh mackerel was dumped into the sea to lighten the boat in an effort to save it.

WHAT to EAT and WHY

C. Houston Goudiss Discusses the Food Value of Ice Cream

Nationally Known Food Authority Describes Its Place in the Diet
By C. HOUSTON GOUDISS
6 East 20th Street, New York City.

ONE of the most significant contributions of modern nutritional science was the discovery of the importance of the protective foods—milk, eggs, fresh fruits and vegetables. These foods abound in the minerals and vitamins that help to insure normal growth and health, and safeguard us against the deficiency diseases.

In this group, milk and dairy products made from it assume a commanding position because milk is the best and most practical source of calcium and vitamins A and G. These substances should be consumed in much greater proportions than at present if we are to increase health and efficiency and improve our chances for longevity.

The first rule in providing adequate amounts of the protective foods is to allow daily a quart of milk for every child and at least a pint for each adult. This amount of milk need not always be consumed as a beverage, however. It may be used in cooked dishes or eaten in the form of cheese and ice cream.

Composition of Ice Cream
Ice cream is often regarded as a confection, but it deserves to be classed among our most nutritious foods. It is composed of varying proportions of cream, milk, sugar, flavoring and frequently a binder or stabilizer such as gelatin. The composition varies somewhat between the home-made and the commercial product, and the commercial product differs in various states. That is because standards governing the butter fat content differ widely so that the requirement ranges from 8 to 14 per cent. Most large commercial companies produce an ice cream with about 12 per cent fat.

Guard Against Contamination
Some states require the pasteurization of the milk or cream used in manufacturing ice cream; others stipulate that the entire mix must be pasteurized before freezing. These measures are desirable, as ice cream requires the same scrupulous care that should be given to milk and cream.

Home-Made Ice Cream
An easy way to make certain of the purity of the ice cream you serve is to make the delicious dessert at home. Motor-driven freezers are available, as well as those that are manually operated. And the homemaker who has an automatic refrigerator finds it easier to make ice cream than to prepare many less interesting and nutritious desserts.

Ice cream powders which simplify the preparation of homemade ice cream, can be obtained unflavored, or in a variety of flavors, including lemon and maple. In addition to the popular vanilla, chocolate and strawberry. The ice cream powders may be used with milk or a combination of milk and cream to produce a beautiful dessert.

Effect on Digestion
One frequently hears the question, "Doesn't the eating of ice cream retard the digestion of other foods consumed at the same time?" The answer is that it does slow up slightly the emptying time of the stomach but this delay is without significance and is more than compensated for by the important nutrients it provides.

Many people believe that it is injurious to follow ice cream with hot coffee. But it has been demonstrated that just the opposite is true. The coffee raises the temperature of the food in the stomach and thus modifies the cooling effect of the ice cream.

Another common question concerns the effect of cake or pie a la mode. Experiments indicate that eating ice cream with cake or pie produces a more satisfactory gastric juice than when either of these foods is eaten alone. One must take into consideration, however, that cake or pie a la mode is a rich combination and plan the remainder of the meal accordingly.

Use More Ice Cream
It has been estimated that five billion pounds of milk are used each year in the production of commercial ice cream, which provides about three gallons of ice cream per capita. The amounts of ice cream made at home will run the figure somewhat. But the amount consumed may well be further increased, because when properly made from pure ingredients, ice cream deserves to rank with other dairy products among our most wholesome and nutritious foods.

Send for this Free BULLETIN on Keeping Cool with Food

You and your family will enjoy better health and greater comfort during the summer months if you send for "Keep Cool with Food," offered free by C. Houston Goudiss.

It lists "cooling" and "heating" foods and is complete with cooling menu suggestions.

A 4-page booklet to carry your request, full address, C. Houston Goudiss, 6 E. 20th St., New York City.

sert suitable for every member of the family. They also may be used for less rich but equally refreshing milk or buttermilk sherbets.

A canned freezing mix is likewise available and is especially nice in a fruit flavor as it contains pieces of the whole fruit.

—W—

A Compensator With Milk
If we regard one-sixth of a quart of ice cream as an average serving, and compare it with one cup of milk, we make the interesting discovery that there is a close relation between the two. The ice cream provides about 24 more calories and a trifle less protein, calcium, phosphorus, iron and vitamin A. There is considerably less vitamin G, but ice cream is nevertheless considered an excellent source of this important vitamin.

—W—

A Healthful Food
It then becomes apparent why ice cream is considered as an excellent food, not only for adults but for children and convalescents. And, what the outstanding authority urges the liberal use of ice cream as a means of increasing the vitamin A content of the diet.

Plain ice cream may be used interchangeably with simple milk puddings. Such mixtures, such as those filled with nuts and crystallized fruits, rank with the heartiest desserts and should follow a lighter meal.

Ice cream is so rich in nourishment that it should not be consumed indiscriminately between meals, but should always be considered as part of the day's ration. And, if it is done, one must follow the authority states that its beneficial effects can hardly be overestimated.

—W—

Effect on Digestion
One frequently hears the question, "Doesn't the eating of ice cream retard the digestion of other foods consumed at the same time?" The answer is that it does slow up slightly the emptying time of the stomach but this delay is without significance and is more than compensated for by the important nutrients it provides.

CROP CONTROL GRIEF

The Albany (Ga.) Herald publishes a news article from Moultrie that throws further light on what the farmers are up against in their efforts to meet all requirements of the Federal farm control law. Information contained in the article that cotton farmers, like those who have produced a crop of tobacco this year, are having difficulties in meeting the demand arising from quota provisions of the law.

Disaffection with the crop control program has been accentuated, it is pointed out, by the fact that for the first time it has become generally known that permits are required before cotton can be marketed. Buyers are holding up two cents a pound when they issue checks to safeguard themselves from losses in the event they make purchases from growers who have exceeded their allotted acreage.

This new development comes at a time when the tobacco growers are being penalized if they sell tobacco in quantities of excess of amounts prescribed by the control program, a ruling which has been taken into the courts to test constitutionality of the law.

Further aggravating the situation is the fact that permit blanks such as are required in handling the cotton crop, have been received, and offices of the county agent are advising the farmers that they do not know when they will be received.

According to the Moultrie dispatch, the farmers had believed that they would have no worries about marketing their cotton. Now it develops, however, that they are required to have the serial number of their farms before they can even gin a bale, and any grower who violates the provision of the law is subject to a fine of \$500.

Farmers are described generally as being friendly to the cotton control program, but they are bitter in their complaints because they were given their allotment in order to get their crop off early in an ahead and plant the acreage they thought would be allotted in order to get their crop off early in an effort to beat the boll weevil, which is reported to have wrought greater havoc this season than it has in more than a decade.

As the result of their experience, the farmers are coming to realize that the crop control program has the effect of penalizing energy and skill, and they are overwhelmingly opposed to anything of that character. It is further stated in the article that some of the most successful farmers declare they fail to see why the government agencies have not provided permits showing how much cotton they will be permitted to sell.

They point out that this can become a more aggravated situation than the one growing out of the tobacco program, which has brought such bitter indignation, in that few, if any farmers, have storage facilities to take care of cotton which ginners are told it is unlawful to gin unless the grower has the serial number of his farm, and these have not been provided.

But why complain now? Didn't the farmers ask for a crop control law? Members of Congress, catering to the farmers' vote, gave them what they asked for—or at least thought they did. It is apparent now that these little jokers that are showing their troublesome heads probably were slipped into the bills by the theorizing brain-trusters. Others may be expected to appear from time to time.

The congressmen might have been expected to ferret out provisions that would add such hardships to the farmers. The reason they did not do so is probably found in their desire to be "regular," and do what they were told, and do it quickly, so they could return home and tell their constituents how loyal they had been to the administration.

Be that as it may, these expressions of dissatisfaction by the Georgians are not the first ones, and they will not be the last ones resulting from the hurriedly-enacted and poorly considered laws of the last few years. These instances are but the beginning of what may come in the future—Jacksonville Times-Union.

FORD: SPLENDID AMERICAN

Because Henry Ford, besides being the maker of millions of motor-vehicles and having done a number of things and made statements that were amazing, is truly a good citizen, there has been notice taken of his seventy-fifth birthday anniversary, and some fuss made over him with almost general congratulations being extended, and good wishes expressed. Newspapers everywhere mentioned the birthday anniversary. Mr. Ford talked a little to the newspaper folks who wanted an interview, and as before on such occasions, he spoke cheerfully and optimistically of the continued good work to be done in the United States.

The New York Herald Tribune says that today Mr. Ford is thought of and regarded highly for his typical Americanism—a shrewd, hard-headed, kindly man, with a sense of humor. "To some of our young intellectuals and New Dealers he is too old-fashioned," it says. He still insists on preaching the virtues of hard work, thrift, self-reliance and self-help. He believes in the simple life—and lives it. He is outspoken in his dislikes of dependence and softness in any form. To this extent he is a "rugged individualist." But through his philosophy runs a note of common sense that strikes a responsive chord in the hearts of many Americans. They smile at some of his "notions." They may even realize that there is something anomalous in the greatest exponent of organized mass production clinging so stubbornly to old-fashioned concepts of the duties of the individual.

But the people have come to believe that "Uncle

Henry" is, really and truly a good American, and it is coming to be understood that the America which he is trying to preserve is the America that is dear to their own hearts. They can well know that he is not trying to set the clock back, but rather to arouse again the American people to be importance of those elemental principles which were once so highly regarded as basic American virtues.

"Mr. Ford's resurrection of McGuffey's readers," says the New York editor, "is characteristic of the man. The impulse was sentimental, but the enduring purpose was practical. Mr. Ford felt that the American people of today were the poorer for not knowing McGuffey. To him McGuffey symbolized what was inspiring and of lasting value in American education. McGuffey furnished a moral background which is sorely lacking today. So Mr. Ford has set out to 'save' McGuffey for America."

Henry Ford is active, mind and body, and still learning at the age of seventy-five years. He seems to be more than ever aware that there is something in life besides mere money-making. "The very fact that he has been groping for years has brought him nearer to those other millions who also have been trying to find concrete expression for their dreams and aspirations." Truly to many Mr. Ford typified to a very great degree the makers of modern America. On his birthday anniversary they hail him and extend their greeting with respect for what he has done and what he is, a splendid American.—Jacksonville Times-Union.

TOO LATE TO CLASSIFY By RUSSELL KAY

Daytona Beach—A lot has been written about our winter visitors, but very little attention has been paid to the ever increasing number of folks from other states who come to Florida in the summer.

For many, many years Floridians labored under the impression that because our state was a "winter playground" and the bulk of our tourists came here during the winter months, we would not hope to enter the "summer resort" field and while this feeling is being overcome to some extent there are still plenty of communities and plenty of people who cease all effort at the first sign of spring and fold their lily white arms to sit back and feel sorry for themselves through the long summer months while they wait for the next crop of "winter visitors."

Many so-called Florida tourist cities stick their heads under their wings in April or May and do not become active again until fall. Shops close, hotels cease operations, promotion of every character ceases and the native population grows and groans in their effort to live off each other until the Yankees return south.

A few years ago Daytona Beach took a flyer at trying to build up a summer business. Money was spent for constructive advertising, motorcades toured the southern states inviting folks to try a summer at "Daytona Beach." The city, through its recreation department, provided a splendid program of entertainment, band concerts, bathing beauty reviews, fireworks, automobile races, baseball and other sports. High class concessionaires were invited to set up on the boardwalk; tourist facilities were enlarged and improved with an eye to their year-round use rather than just a few months' operation in the winter.

Travel bureaus, transportation companies, hotels and other organizations were contacted and supplied literature and information concerning Daytona Beach's advantages as a summer resort. Offices were set up in Atlanta and other cities where folks could drop in and secure information concerning hotel and transportation rates, living costs, and other first hand data.

As a result, thousands of summer visitors were attracted from all southern states. Georgia, Alabama, Tennessee, North and South Carolina all send thousands of folk to Daytona Beach every summer and their number is increasing each season.

During the past two weeks I've been given an opportunity to meet and talk with a lot of these people. I find them all amazed at the marvelous summer climate Florida has to offer. They are delighted with the cool nights, absence from mosquitoes and other pests.

Those experiencing their first summer here tell how they were timid about coming and imagined that the heat would be terrible, but they were tempted to try it by friends who had been summering here a time of year and returned with glowing reports. Now they are planning to come back themselves and bring others with them.

Florida truly has more to offer as a summer resort than many states that advertise themselves extensively as such. Our delightful coast cities on both the Atlantic and Gulf are all justified in terming themselves "summer resorts" and should do so, going after their share of this business, for the field hasn't been scratched and the campaign need not be limited to a few southern states but might well take in all the middle west and all eastern states.

I have personally visited every state east of the Mississippi in the summer as well as a good many in the west and none have a summer climate that can compare with Florida's. Florida summer folks compared to the summers in most of those states, is something to talk about and I don't mean maybe. Folks up there go around in a wave of sure 'nuff HEAT that settles down on you like a blanket and leaves you feeling like a bob of drawn butter, and the nights are just as bad as the days. About the only consolation they get is gloating about how much worse off they are down in Florida for they still have the nut idea that because we enjoy a mild climate in the winter it must be abnormally hot in summer and they wonder how we get on.

Our job is to get 'em down here one summer so they can get a load of our natural "air-conditioning," a sample of our fresh cool ocean breezes and cool nights. If they'll just try one summer in Florida, they'll be so amazed and delighted that it won't be long 'till we'll find our summer business as good as insured for the winter season, and all we gotta do is TELL 'EM.

Daytona Beach has proved that it can be done and that it pays and I know of a lot of Florida communities that could follow her example and profit by it.

Church Notes

METHODIST CHURCH

C. R. Mingleford, Pastor.
The more we know about the Bible, the more concerned we are about living its truths. Come and study with us in Sunday school at 9:45 a. m.

Then complete the morning's service by worshipping with us at 11:00 a. m. when the pastor will preach on Sunday serving and every day living.

The senior league is steadily growing in interest and attendance. They meet at 7:00 p. m. You will enjoy worshipping with them. The Juniors invite you at the same hour.

8:00 P. M. sermon by the pastor, evangelistic. Get the surprise of your life at prayer meeting on Wednesday evening at 7:30 p. m. Please note the change in hour of meeting.

The church of tomorrow invites you to worship with their group today. The Intermediates meet at 7:30 p. m. Thursday. They want you, you need them.

EPISCOPAL CHURCH SERVICE

Richard I. Brown, Rector.
Holy Communion—7:30 a. m.
Holy Communion and Sermon—11:00 a. m.

PERSONALS

Ralph Heim, who is located in Orlando, was the guest of his parents over the week-end.

Miss Patty Loomis is visiting Miss Sara Smith in Orlando and Daytona Beach this week.

Aubrey Roberts, who is located in Plant City, was the guest of his parents over the week-end.

Mrs. Anna Lawton and Raleigh Lawton returned Tuesday from a trip to points in the Carolinas.

Mrs. M. M. Foster, J. B. Foster, and David Foster left Monday for two weeks in the Carolinas.

Mr. and Mrs. Paul L. Rumples left Thursday for Daytona Beach, where they will spend several days.

Mr. and Mrs. Lester Armstrong were business visitors in Winter Haven and Lakeland Tuesday of this week.

Mrs. K. W. Minor of Fort Meade spent a few days of last week in Avon Park with her brother, Ellis West.

Mrs. E. G. Todd, Donald Todd, Herbert Todd, and Ryland Todd were visitors in Tampa Wednesday of this week.

Mrs. L. M. Langford, Mrs. Gale Farr and attractive daughter Evelyn, were in Fort Meade Tuesday of this week.

Mrs. Fred Touchton, Miss Mary Letha Touchton, and Fred Touchton left Tuesday for a trip to points in Georgia.

Dr. and Mrs. Stanley N. Reeves are expected to return Sunday from Live Oak where they have spent the summer.

Mr. and Mrs. T. J. McGinnis, Jr. left Wednesday for Sarasota to spend the week-end with Mr. and Mrs. Horace Garner.

Miss Sara Lucy Trent, who is a student at Southern College at Lakeland, was the guest of her parents over the week-end.

Mrs. E. B. Deshong, Mr. and Mrs. Dorothy Deshong spent Thursday afternoon in Fort Meade visiting Mrs. Morris Hancock.

Cecil Clements, who has been spending a week at Alabama Polytechnic Institute as the guest of Winston Wood, is expected home today.

Mrs. T. J. McGinnis returned Sunday from Sarasota where she was the guest of Mr. and Mrs. Horace Garner, who accompanied her home.

Mr. and Mrs. W. T. Hall left this morning for a vacation of several weeks in Pittsfield, Mass., where they will visit their daughter, Mrs. P. L. Christensen.

Miss Lucille Langford, who has been spending a week at Alabama Polytechnic Institute as the guest of Winston Wood, is expected home today.

J. Lawler Wells, E. W. Hartt, C. K. Lanier, and D. G. Perry left this morning by plane for Panama City and Jacksonville in the interests of the State Hospital committee.

Mrs. Georgia Voorhees left Wednesday for Atlanta, Ga., her former home, where she will spend several weeks. From Atlanta, she will go to New York City for the rest of the summer where she will visit her daughter and son-in-law. She is expected to return about the first of October.

Mrs. Deshong Was Shower Honoree

Mrs. J. C. Deshong was honored Wednesday evening at a lovely shower given by her sister-in-law, Miss Dorothy Deshong, at the latter's home. The party rooms were lovely with their profusion of pink and white crepe myrtle, zinnias and roses.

Games and contests were enjoyed during the evening. First prize in the various games went to Mrs. Ben Hagan, Mrs. Kyle Bryan, and Mrs. Glen Levere. To add to the amusement, booby prizes were also awarded. These went to Mrs. Kyle Bryan, Mrs. Ernie Spencer and Mrs. L. L. Hall. A color scheme of pink, white and blue was used throughout the entire party. The favors were small pink and white shoes of crepe paper filled with mints. Delicious refreshments, also carrying out the color motif, consisting of a salad course, satine, cookies and punch were served to the guests.

Mrs. Deshong was the recipient of many lovely and useful gifts from those invited to share the evening with her, including Mrs. Ernie Spencer, Mrs. Grover Langford, Mrs. Harold Epps, Mrs. Ralston Carver, Mrs. James Croley, Mrs. Ben Hagan, Mrs. E. G. Todd, Mrs. Frank England, Mrs. Milford Dilley, Mrs. Raymond Dilley, Mrs. Kyle Bryan of Sebring, Mrs. Jim Tomlinson of Wauchula, Mrs. Fox Ellis, Mrs. Paul Conner, Mrs. J. B. Mueller, Mrs. J. B. Gaster, Mrs. Jessie Bennett, Mrs. L. D. Gibney, Mrs. G. D. Godwin, Mrs. Bob Adams, Mrs. Joe Foster, Mrs. T. J. Ward, Mrs. Vernon Bass, Mrs. Clifford Thomas, Mrs. Floyd Johnson, Mrs. Lawton Dyer, Mrs. Glenn Levere, Mrs. O. A. Ford, Mrs. L. L. Hall, Mrs. Jack Witt, Mrs. Walker Rutherford, Mrs. O. L. Walker, Mrs. Lucille Hogan, Mrs. Ed Gough and Mrs. E. B. Deshong.

Mrs. Mel Bass and son, Mel, Jr., are spending the week-end at Lakeland as guests of Miss Vendella Osborn.

Nine Years Old

Little Yvonne Head, charming daughter of Mr. and Mrs. W. J. Head, who celebrated her ninth birthday Thursday at a party given by her mother at their home on Lake Lotela.

Smith-Griffin Wedding Soon

Mr. and Mrs. J. E. Griffin, of 1003 East Midland avenue, have announced the engagement of their daughter, Elsie Griffin, to Nelson Smith of Avon Park, son of Mr. and Mrs. F. M. Smith, of that city. The wedding will take place early in September.

Miss Griffin has lived in Tampa all her life. She was graduated from the Hillsborough high school and attended the University of Tampa, where she was a member of the Sigma Theta Phi sorority. She was graduated from the Florida State College for Women this summer and is a member of the Phi Mu sorority.

Mr. Smith was born in Avon Park. He was graduated from the University of Florida where he became a member of the Sigma Chi fraternity. He is connected in business with his father, and is a member of the Rotary club and the Flying club.

Rodney Durance of Deland is the house guest of Colquitt Pardee, Jr. this week.

Yvonne Head Has Birthday Party

Mrs. Jack Head was hostess Thursday at a lovely children's party given in honor of her daughter, Yvonne, who observed her ninth birthday anniversary on this occasion. The bathing beach on Lake Lotela was roped off, the limits being designated by gaily colored balloons, and the guests enjoyed swimming during the afternoon.

After a delightful "dip" in the lake, the guests were treated to a delicious refreshment course. The party rooms were colorfully decorated in pink radiance roses. The color motif of pink and white was further carried out at the lace-covered dining table which had a large punch bowl on one end and appetizing three-tiered white birthday cake topped with nine white candles in pink rosette holders at the other end. The middle of the table was decorated with a lovely bowl of pink radiance roses in silver form. With the cake, Mrs. Head served ice cream, ginger-bread and fruit punch.

Yvonne received many lovely and useful gifts from her friends invited to share the occasion with her, who included: Jeanine Crews, Kyle Williams, Barbara Lawson, Margaret Lawson, Dorothy Lawton, Marjorie Hetherington, Norwood Taylor, Frank Camp, Jr., Ann Pabor, Edgar Pabor, Bobby Slaters, Betty Jo Wells, David L. Slaters, Winifred Hood, Harry Hood, Bill Hood, Betty Moffett, Mel Bass, Arden Anderson, Patricia Ann Smith, Bobby Hall, Ethel Hardin, Bill Beckett, John DeLago, Roger Sappington, Margaret Dilley, Roger Dilley, William Bennett, Charles Bennett, Betty Jones of Sebring, Gloria Garber, John Garbar, Dorothy Walker, membership chairman; Betty Lynn Helms, study course chairman; Margaret Dilley, social chairman; Jeanine Crews, personal service chairman, and Winifred Archer, poster and bulletin chairman.

The program for the afternoon was a discussion and study of a Cuban R. A. the brother organization to the G. A. The next meeting of this newly organized group will be held in the basement of the First Baptist church August 24 at 7:30 p. m.

After the meeting, the hostess served delicious refreshments of punch and cookies to the following: Lena Mae Perry, Betty Koch, Dorothy Walker, Betty, Lynn Helms, Margaret Dilley, Winifred Archer, Sarah Curtis English, and Winifred Demorest.

Hqds. Battery Had Picnic Supper Tues.

Members of Headquarters Battery, 56th F. C. Brigade, their wives and friends enjoyed a picnic supper Tuesday night at the home of Col. R. P. Davidson, "Hollywood" on Lake Lotela. The lawn was illuminated with colored lights and a radio provided the music for the evening.

The appetizing repast consisted of baked ham, peas, potatoes, rolls, butter, pickles, ice cream, iced punch and lemonade. This was thoroughly enjoyed by the participants who included: Capt. and Mrs. Chester Yates and Capt. and Mrs. V. L. Yates, and Mrs. Devon Reddick, Holland Stebbins, Mr. and Mrs. A. Gerard, Mr. and Mrs. E. L. Rice, Mr. and Mrs. Paul Allen of Sebring, Mr. and Mrs. A. A. Demorest and Winifred Demorest, Mr. and Mrs. Clyde Clark, Mr. and Mrs. J. O. Bridges, M. H. Parnell, Mr. and Mrs. J. O. Reynolds, Mr. and Mrs. A. Ponce, Mr. and Mrs. E. Williams, R. I. Williams, J. T. Wilford, A. E. Freedland of Sebring, A. A. Bates of Sebring, Mr. and Mrs. J. E. Mathis and M. A. Landress.

Two Hostesses At Tacky Party

Miss Mae Frances Welsh and Miss Garland Turnbull were co-hostesses Thursday evening at a tacky party given at the home of Mrs. Ed Welsh. The guests arrived in their tackiest finery and played games consistent with the theme of the party. Ruth Pendleton was prize winner of the evening.

The party rooms were effectively decorated with summer garden flowers. At the close of the evening, delicious refreshments of congealed salad, cookies, and punch were served by the hostesses to the following: Ruth Pendleton, Frieda Garrett, Luverne Kelly, Dorothy Jane Hagan, Carol Hand, Helen Jarrette, Josephine Brown, Eloise Thomas, Carlisle Welsh, Helen Welsh, Franklin Welsh and Edwin Welsh.

J. M. McCord was in Orlando on business Monday.

REFLECTION TIME IN THE GARDENS

Lovely Marie Ballester pauses for reflections on the summer beauty of Florida and the tropical Cypress Gardens and wishes they were two of her so she could enjoy twice as much.

Organize Junior Girls Auxiliary

On Monday of this week a group of girls met at the home of Ruth Pendleton to organize a Junior Girls Auxiliary. The meeting was opened by the group singing "Get That Good Old G. A. Spirit!" followed by a prayer led by the leader, Miss Tommy Lou Greene.

The following officers were elected by the group: Ruth Pendleton, president; Dorothy Lawson, vice president; Winifred Demorest, secretary; Lena Mae Perry, treasurer; Betty Koch, program chairman; Dorothy Walker, membership chairman; Betty Lynn Helms, study course chairman; Margaret Dilley, social chairman; Jeanine Crews, personal service chairman, and Winifred Archer, poster and bulletin chairman.

Mrs. Luthy Hostess To Missionary Society

Mrs. W. A. Luthy was hostess Tuesday afternoon to the members of the Woman's Missionary Society of the Methodist church.

The meeting was a regular business meeting of the society. The members discussed the sewing which they are doing for needy children and planned to hold the next all-day sewing meeting on the fifth Tuesday of August.

At the close of the meeting delicious refreshments of cake and whipped cream topped with apricots and iced punch were served by the hostess, assisted by Mrs. Howard Johnson. Those enjoying this delightful afternoon included: Mrs. C. H. Pardee, Mrs. Gertrude Johnson, Mrs. Charles Barris, C. R. Minglehoff, Mrs. L. L. Hall, Mrs. R. A. Gerard, Mrs. Rex Reed, Mrs. A. McKee Elwell, and the hostess.

Wimodausis Club Meeting Friday

The Wimodausis club met last Friday afternoon at the Masonic Temple for their regular business meeting. The club met to discuss their annual Robert Morris picnic. Present plans are to hold the picnic August 25th from five until seven o'clock at the American Legion home. All Masons and Stars and their families are invited to attend. The picnic will be a winner unless every one is requested to bring their own weiners, pickles, buns, etc., as well as table service.

At the close of the business meeting, sandwiches and tea were served to those present, including Mrs. H. W. Reddick, Mrs. David Stuckey, Mrs. L. M. McKee, Mrs. B. T. Cox, and Mrs. O. W. Lewis.

Blackwelder-Meeks

Court house records reveal that David Blackwelder and Etta Meeks, both Avon Park residents, were married at Sebring on August 11 by Rev. C. L. Elliott. They obtained their license the previous day.

Walton Touchton, who has been located in Sanford and Deland recently, was in town over the week-end.

Baptist W. M. S. Met Monday

The Woman's Missionary society of the First Baptist church held their regular monthly program meeting at the church Monday afternoon of this week. Mrs. J. L. Collins, who was in charge of the program, was assisted by Mrs. J. R. Bennett, Mrs. David Stuckey and Mrs. Jack Dalton.

Those present included: Mrs. B. P. Martin, Mrs. J. L. Collins, Mrs. W. W. McFarland, Mrs. J. D. Sherman, Mrs. David Stuckey, Mrs. W. C. Touchton, Mrs. J. R. Bennett, Mrs. F. L. Schiert, and Mrs. Jack Dalton.

Ford de Anguera was in town Sunday and Monday.

J. M. Gage of Lakeland was in town on business this week.

Mrs. E. W. Hartt and Miss Jane Harritt motored to Tampa Tuesday.

Mrs. Ruby Latham was in Orlando several days this week on business.

Mrs. Robt Haynie left Thursday for Fort Meade, where she will spend two weeks.

Mrs. Belle D. Clement, who has been visiting her daughter, Mrs. John Hood, Mr. and Mrs. Raymond Dilley, Mr. and Mrs. E. L. Roberts, were holding high score, and Mrs. Lester Armstrong second high.

At the close of the evening delicious refreshments of salad course, hot tea and candy and nuts were served by the hostess, assisted by Misses Marjorie Wells and Mary Clement.

Those enjoying this delightful evening included: Mr. and Mrs. Charles Moffett, Mr. and Mrs. John Hood, Mr. and Mrs. Raymond Dilley, Mr. and Mrs. Floyd Johnson, Mr. and Mrs. Lester Armstrong, Mr. and Mrs. Milford Dilley, Mr. and Mrs. E. L. Roberts, and the host and hostess.

Bridge Club Met At Wells' Home

Mr. and Mrs. J. Lawler Wells were hosts to the members of their bridge club Thursday evening at their home on East Pine road.

Several vases of lovely cut flowers were placed at vantage points in the party rooms.

A very attractive cut glass punch bowl was in constant use throughout the evening. The players being provided with individual cups which were "tagged" with their names. At the close of the games, Mr. and Mrs. E. L. Roberts were holding high score, and Mrs. Lester Armstrong second high.

At the close of the evening delicious refreshments of salad course, hot tea and candy and nuts were served by the hostess, assisted by Misses Marjorie Wells and Mary Clement.

Those enjoying this delightful evening included: Mr. and Mrs. Charles Moffett, Mr. and Mrs. John Hood, Mr. and Mrs. Raymond Dilley, Mr. and Mrs. Floyd Johnson, Mr. and Mrs. Lester Armstrong, Mr. and Mrs. Milford Dilley, Mr. and Mrs. E. L. Roberts, and the host and hostess.

Mrs. Luthy Hostess To Missionary Society

Mrs. W. A. Luthy was hostess Tuesday afternoon to the members of the Woman's Missionary Society of the Methodist church.

The meeting was a regular business meeting of the society. The members discussed the sewing which they are doing for needy children and planned to hold the next all-day sewing meeting on the fifth Tuesday of August.

At the close of the meeting delicious refreshments of cake and whipped cream topped with apricots and iced punch were served by the hostess, assisted by Mrs. Howard Johnson. John S. Mill, Child Prodigy, Tells of Life

By ELIZABETH C. JAMES

THOMAS EDISON'S definition of genius was: "Genius is another name for hard work." To which the public usually adds, "Plus his own superior intelligence." In the case of John Stuart Mill, there was hard work added to great natural gifts. His father used remarkable methods in training the boy's unusual mind. Of these methods, Mill wrote in his "Autobiography." The writer stated that he did not remember when he began the study of languages, but at the age of three he was reading English and Greek. When John was eight years old he was required to teach his lesson of the morning to his younger brothers and sisters in the afternoon. If they did not know their lessons properly when the father heard them in the evening John was held to blame. In this manner John absorbed his knowledge to a degree of mastery. On long walks with his son, the father talked to John of learned matters, asking the boy's opinion at various points. At all times the material was over the head of the child, causing him to stretch mentally to reach it.

Definite Study Plan.
The course of study was laid out for a period of years. One subject at a time was thoroughly covered. For example, the literature of the

CHILD PRODIGY

John Stuart Mill was born in 1806 in London. His father, a writer of note in his own generation, was his teacher until he entered the university. As a boy he was known as a child prodigy, about which Mill writes in his "Autobiography." The Encyclopaedia Britannica says that Mill undertakes the amount of knowledge that he had at various ages in childhood and also undertakes the amount of study and reading that he had done. "About the age of twelve, John began a thorough study of the scholastic logic, at the same time reading Aristotle's treatises in the original." The last years of his life were spent in retirement in a little cottage where he had music, books, friends, and long walks in the beauty of the countryside. His stepdaughter was his companion and solace after the death of his wife. Mill lived until 1873.

world was covered in succession, that of England coming first, with that of Greece, Rome, France and other nations coming in order.

When his son was old enough to take university life, the wise father explained to John that he knew much that other boys did not know because of his father's kindness in taking so much time to teach him. There was never any feeling on John's part that he had done anything unusual.

When he first went away from home, he felt that many adults considered him somewhat ignorant. He states that he did not understand this at the time but later he saw it was because of his outspoken comments on mature topics.

As a man, Mill took an active part in affairs of government, becoming a member of parliament. But this type of work did not appeal to him. He preferred economics and sociology. As long as he lived, Mill wrote and fought for the cause of freedom. In youth he ardently admired Lafayette, then an old man.

Mill's Quotations.
These quotations are from Mill's history of his life. Of school, he wrote, "A pupil from whom nothing is ever demanded which he can not do, never does all he can."

Of family life, "But the children of energetic parents frequently grow up energetic, because they learn on their parents."
On freedom of thought, "The forbearance which flows from a conscientious sense of the importance to mankind of the equal freedom of all opinions, is the only toleration which is commendable."

Mill reveals that he held his father in high esteem but had little affectionate love for him. Of his method of teaching Mill wrote, "A defect running through his modes of instruction was that of trusting too much to the intelligence of the abstract, when he embodied in the concrete."

Mill wrote prodigiously, his works being published in the best periodicals of England, including the Edinburgh Review, Fraser's, the Examiner, Westminster Review, and the Journal. His books cover a variety of subjects, including liberty, the cause of freedom for women, utility of religion, and government.

His life was from 1806 to 1873, and he dominated the thought of England during the third quarter of the Nineteenth century.

Gay Kitchen Means a Gay Housewife!

Pattern 1783

Brighten your kitchen and lighten your tasks with decorative towels. Use up scraps for the applique flower patch—do the entire motifs in plain embroidery. Pattern 1783 contains a transfer pattern of 8 motifs averaging 3 1/2 by 9 1/2 inches and pattern piece for applique; illustrations of stitches; materials required.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York City.

Please write your name, address and pattern number plainly.

Favorite Recipe of the Week

Toasted Coconut Ice Cream (Greener Method)

3 cups milk
1 package unflavored ice cream powder
1 cup heavy cream
1 cup coconut, toasted
Add milk very gradually to ice cream powder, stirring until dissolved, then add cream and flavoring. Pour into freezer can; place in freezer and pack mixture of crushed ice and salt around can (use 8 parts ice to 1 part salt). Turn slowly for 3 minutes, then rapidly. When thick, but not hard add toasted coconut and continue freezing. Makes 1 1/2 quarts.

How Women in Their 40's Can Attract Men

Her good advice for a woman during her change (usually from 38 to 42), who feels that she is losing her attractiveness, is to wear about her face a line of pure, dainty smiles, with a few more wrinkles than she has. Get more fresh air, a hot bath and if you need more beauty, use the new skin cream, Dr. Leonard's Vegetable Compound, made especially for women. It helps build up physical resistance, thus helps give more energy to the eyes, life and same making jittery nerves and disturbing symptoms that are common cause of the "Witch" WORTH TRYING!

Matter of Taste
The greatest element of criticism is taste.—Sainte Beuve.

Sentinels of Health

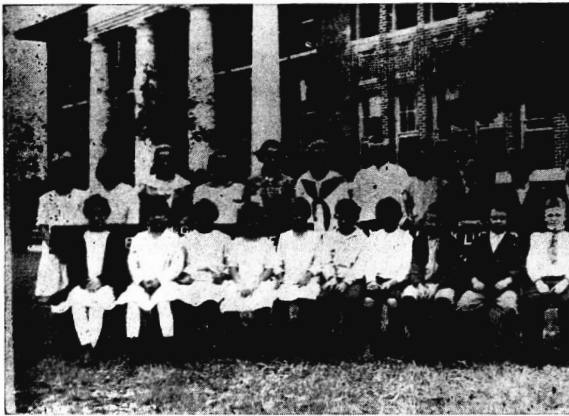

Don't Neglect Them!

Many neglect the kidneys to do a great deal of harm. Their task is to keep the blood clean and free of an excess of toxic impurities. The act of living—the matter of the kidneys must be maintained. When the kidneys fail to function as they should, the blood becomes impure and may cause body-wide distorting and even fatal diseases. Headache, nervousness, backache, attacks of dizziness, itching on nights, swelling, puffiness under the eyes—let tired, nervous, all warn you.

Present, steady or burning pains back, the further evidence of kidney or bladder distillation. The neglected and proper treatment of the kidneys is the only way to get rid of excess poisonous body wastes. Doan's Pills help the kidneys, thus forty years of public approval. Ask your druggist for Doan's Pills at all drug stores.

Zephyrhills Wins Award in Better Homes Campaign

Zephyrhills, August 18 (FNS)—Competing with cities and counties throughout the country in the National Better Homes Campaign conducted under the auspices of Purdue University, Pasco county for the second time won the Merit Award for the state of Florida, the only county in the state to receive this honor.

At the same time Zephyrhills received honorable mention and was the only Florida community so honored.

The National Better Homes Campaign is conducted with the view of bettering the living conditions throughout the United States. The work in Pasco county was under the personal direction of Mrs. Annis Veasey of Crystal Springs.

Working through the county commission, with schools and civic organizations throughout the county, the efforts of all were

coordinated to bring about the improved conditions in the rural homes of Pasco county that brought about the Merit Award. The honorable mention awarded Zephyrhills was due primarily to their social hygiene program in which the State Board of Health and Mrs. Anne Kelly of Dale City, Pasco County Health Nurse, cooperated.

The community campaign, with Mrs. Wilma J. March, chairman, was sponsored by the Zephyrhills Chamber of Commerce.

Miss Lyla Martin and her brother, Albert Martin, are planning to spend Sunday in Tampa. They are going to meet their sister, Miss Florine Martin, of Pelham, Ga., who will spend a week here with them.

Mrs. J. Lawler Wells and two daughters, Marjorie and Betty Jo, returned Sunday from a three-weeks vacation at Blowing Rock, N. C. Mr. Wells flew to North Carolina Saturday and they returned with him.

GROWERS AND SHIPPERS WILL UNITE EFFORTS

Plan to Wage War on "Fly by Night" Operators in Citrus Deal

Orlando, Aug. 18. (FNS)—"United Growers and Shippers Association of Orlando had, as one of its prime organizations purposes, the discouraging, by all means within its power, the activities of so-called 'fly by night' operators in the Florida citrus deal, and welcomed the declaration by the newly formed Florida Citrus Producers Trade association that it, too, will enter the fight to help clean up the Florida deal," Muri Pace, United's general manager, said today.

"We have been working along these lines for over a year now, and are glad that this new group recognizes this problem as we do. We will be glad for their cooperation in this campaign," he said.

At a meeting in Lakeland Monday, the Trade group resolved to curb activity of 'fly by night' operators "who are irresponsible, financially and otherwise, and who through their unscrupulous operations, have brought great damage and loss to the citrus growers and the entire industry."

Mr. Pace pointed out that when the United was formed in 1937 these evils were recognized and action against this class of operator had been one of the principal aims of its group.

"We have gone so far as to set our own house in order. It might be well for other organizations to follow suit and clean out any 'contamination' within their own ranks," he said.

"The United had already gone to the front for a grade and size marketing agreement for Florida along the lines set forth by various government officials in their recent Florida speeches. We recognize that Florida must clean up its merchandise before our advertising expenditures can possibly bear fruit, and we will continue to advocate some sort of equitable grade and size control for the coming season."

"We invite the Trade Association to cooperate with United in this movement because we have been told what kind of an agreement Uncle Sam wants in Florida, and because we know that such an agreement will be of benefit to the deal as a whole."

"The two organizations, working together and cooperating with the newly formed Florida Citrus Growers, Inc., could put a grade and size prorate into effect in a few weeks and build up the confidence of the trade in the north before fruit started rolling from Florida," he stated.

State Chamber of Commerce Meets in Miami Next Week

MIAMI, August 18 (FNS)—Chamber of Commerce will meet Monday at 10 o'clock in the Chamber of Commerce building in quarterly sessions here, August 25, it was announced this week. Discussion of the proposed statewide "tax coordination conference" and the 1938 meeting of the State Chamber will feature the meeting, according to Harold Cole, pres. The selection of the membership meeting will be one of the points to be decided by the directors, he said.

TAMPA PLANNING BIG WELCOME TO COLLEEN MOORE

Famed Movie Star Bringing Famed "Doll House" with Her on Visit

TAMPA, August 18 (FNS)—Colleen Moore, talented Tampa girl who won fame and fortune on stage and screen, will be welcomed home with all the pomp and ceremony that her Tampa friends and admirers can provide.

The famed movie star returns here for a brief visit and brings with her the marvelous "doll house" which will be on display here from Sept. 7 to 16. A small admission charge will be made, proceeds of which will go to charity.

Seeking a central and convenient location, Miss Moore secured permission from Maas Brothers, local department store, for suitable display space on their fifth floor where a premiere showing will be held Tuesday evening, Sept. 6th from 8 to 11 P. M.

The "doll house," which is 9 feet square and 12 feet high, is the most famous and fabulous miniature palace in the world, built at cost of \$435,000. Its fittings and furnishings are the most luxurious and costly imaginable; diamonds and rubies, emeralds and other precious stones, largely Miss Moore's personal jewelry, have gone into it. Platinum, gold, silver, onyx, marble and crystal are all lavishly used in its furnishing and construction.

Many tiny objects as rich and rare as can be found anywhere have gone into the "doll house." Among these fascinating features is an early American market basket which, when actually closed, is a study in diamond, platinum and emerald chairs are in the bedroom of the princess, and, dear to every child, the glass slippers of Cinderella which are but a quarter of an inch in length—the tiniest blown glass slippers in the world.

The library of this enchanted castle is another example of the marvelous perfection of detail which has been achieved by the "doll house," which, begun by Miss Moore as a hobby, now has become a project whereby crippled children all over the country are being helped to regain their health. This library contains the most famous collection of miniature volumes of the first and second editions of the works of Conan Doyle, Edna Ferber, Hendrick Van Loon, Joseph Hergesheimer, Louis Brom-

field, Irvin Cobb, Sinclair Lewis, Gene Fowler, Kathleen Norris, Jim Tuohy, Eleanor Glyn, Rupert Hughes, F. Scott Fitzgerald, Thyra Walander, Warner Fabian, Fannie Hurst, Booth Tarkington, Adele Rogers St. John, Hervey Allen, and many others.

Altogether there are 12 rooms in the house, each with its exquisite furnishings clearly visible through pale glass walls which in no way spoil the charm of the exterior appearance.

During the exhibition, which will begin September 6th and continue through the 16th, Miss Moore will be present personally to greet friends and visitors during the first hour of the afternoon. The "doll house" is displayed and possibly for the entire period.

BEAUTIFICATION OF FAIR GROUNDS HAS STARTED

TAMPA, August 18 (FNS)—Marco Penn, city park superintendent, placed in charge of the beautification of the Fla. Fair grounds for the Pan American Hernando DeSoto Exposition, announced this week that landscaping will begin shortly which when completed will transform the Exposition grounds into one of the most beautiful and artistic in America.

Flowering shrubs and plants arranged in artistic beds about the grounds will provide a riot of color and types planted will be in full flower during the period of the Exposition from January 31 to Feb. 18, he stated.

Rare and beautiful border plants will be used to decorate walks and footpaths; every available nook and corner in the spacious grounds will be given the attention of landscapers, artians and made to contribute to the general beauty scheme. Flowering tropical plants to brilliant colors will be employed in all suitable locations; numerous rose beds will be maintained; stately and graceful palms of varieties best suited for the purpose will be used throughout the grounds.

For months Penn has been growing plants, shrubs and trees in city nurseries for use in the beautification program for the Exposition and the work of transferring these to the grounds will begin shortly and continue up to the actual opening. Experienced gardeners are supervising the preparation of beds and locations on the grounds of tons of rich muck soil will be used to insure speedy and luxuriant growth of

plants when transferred. Underground sprinkler systems will provide water as needed over a good portion of the area and hose will be employed for covering such sections as are not supplied by the sprinkler system. Frost protection will be provided for exposed areas to insure the safeguard of plants should a severe cold occur prior to or during the Exposition.

The entire beautification program is the most complete and comprehensive ever attempted in connection with the Florida Fair, and is made possible because of the generous action of the Pan American Hernando DeSoto Exposition, Penn said.

Rev. Jack Dalton is holding a revival at the Southside Baptist church of which Rev. J. H. McClelland is pastor. The meeting opened August 15 and will continue for two weeks, J. C. Pennington is leading the singing.

J. W. Tuten and C. A. Boxall left this morning for London, Canada for a three weeks vacation. They will be accompanied as far as Orlando by Mrs. Alice Tuten, who will visit her mother, Mrs. Emma Carlson, for several weeks.

Fred Reddick returned Friday from Atlanta where he has been for several days. On the return trip he stopped by Fitzgerald, Ga., and brought Donald Ford, who has been visiting with relatives in Fitzgerald, back to Avon Park.

Mrs. Henry Hughes and Miss Gloria Hughes went to Jacksonville Monday where they were met by Miss Dorothy Hughes, who has been spending two weeks in Smyrna, Ga. Several delightful days were spent shopping in Jacksonville and the three of them returned to Avon Park Friday.

Mrs. Verna Heim, Ernest Wilkerson, and C. A. Boxall motored to Orlando Saturday evening to attend the dance at the Orlando country club given for all the employees of the Florida Public Service company in this district. Mr. and Mrs. R. R. Brown, who were in Orlando all day Saturday, also attended the dance.

PUBLIC SERVICE COMPANY

WASHINGTON NEWS

(Continued From Page One)
The War Department at Washington, and if favorable action is taken it will be recommended to congress for inclusion in the next rivers and harbors bill, to obtain congressional authority for the actual work which will be needed. The engineers did not approve a further survey of the section from the Withlacoochee to the Anclote at this time, but we are still hoping that this will come later on. Construction of this intracoastal canal from the Anclote to the Caloosahatchee will undoubtedly force the building of many of the channels and cuts all along this stretch on which we have been working for a long time, as these will be absolutely essential to furnish entrance to the intracoastal canal. In my opinion this is one of the most important coastal developments which could occur on the West coast and the fact that the chief of engineers authorized the physical survey, which in itself was a costly project, indicates that the army engineers feel the project certainly has merits.

PUBLIC WORKS PROJECTS

Many communities and other political subdivisions in my district are filing or have filed applications for PWA project under the revived program, and many of these will not doubt get through to a final allocation. We are following up on calling, wiring, writing and doing everything else possible to expedite consideration by the Atlanta office and get them sent on to Washington for final action and the allocation. Schools, extensions to electric light systems municipally owned, improvements to water and gas plants, construction or drastic improvement of sewer systems, and many other types of projects are among those which have gone in from my district so far. Officials have shown an unusual sense of appreciation in planning their projects and all of them so far submitted are not urgently needed but appear to come within the scope of the purposes of the revived program. We are urging speed as much as possible so that Florida can get its share of the money available, because the money is exhausted the allocations must stop.

Before your newspaper is put to bed

●When we talk of putting a newspaper to bed we aren't trying to be humorous. It's shop parlance for going to press—the final step in the production of a newspaper.

Before your newspaper is ready to go to bed there's a long series of steps, representing the collective effort of many hands and many hands. The issue you hold in your hands, for example, involved the gathering of hundreds of news items, editing/putting into type, proofreading, making up the type forms and, finally, printing. It could not be done without trained minds, trained hands and a heavy investment in expensive equipment.

●There are many other things, too. The selection of features that make your newspaper more informative... more entertaining. Each one of these features is carefully chosen with the thought that it will prove interesting to all or part of our readers.

Some newspapers seek to lessen the effort and expense of production by limiting their coverage of news and features. Skeletonized newspapers are cheap and easy to produce. But we prefer to offer our readers a complete newspaper. That is why you find in our columns the work of many of today's greatest newspaper names. And complete local news coverage—of course!

SUPPORT YOUR NEWSPAPER
