World War II Enters Into New Phase As Roosevelt-Churchill Conference Indicate Continued Soviet Resistance; Unrest Report in Occupied Nations

(EDITOR'S NOTE:—This analysis was prepared in the light of the news of the week ending August 28, 1941, and is not intended to be a forecast of future events.)

Back in Washington after his momentous conference with British Prime Minister Winston Churchill, President Roosevelt conferred immediately with Secretary of State Cordell Hull. The two are shown here in an auto leaving the White House. Secretary Hull carried a number of important papers for the President and the Far East situation was said to be the vital topic of their first discussion.

WORLD WAR II: New Angle

The many-tacled chance of war, which had been since reaching another peak of success, suddenly seemed to veer more to the British-American side following the dramatic conclusion of the Roosevelt-Churchill talks at sea.

Not only did the eight-point pact between the two executives strike with a powerful sound across the front pages of the globe, but the promise of aid to Russia was reportedly based on the assurance given by Britain and the United States that the Soviet troops would be able to hold the Germans at bay throughout the winter.

Indeed, Mr. Roosevelt on his return to this country, made such a positive statement, that it was assumed the "consumers' goods," such as food, clothing, would be made available for Russia during the rest of the summer; that it was assumed the Russian winter would bring at least a partial halt to hostilities, and that more substantial aid could be made ready by Britain and the United States for the opening of the spring campaign.

All in all, there was a quiet confidence as to the outcome of the war, and its continuance during a considerable period of time that was in sharp contrast to the feelings of suspense and of instability that had been marking the news at the outset of the President's dramatic "vacation trip" on the Potomac.

Beside this sort of feeling throughout Britain and the United States and particularly since the President said he did not believe this country was "any nearer in the war" than it was before the conference, the rumbling criticism of congressmen and the byplay of press criticism over more matters of pictures and the identity of reporters at the scene seemed "much" more subdued.

Because Churchill presumably was being well informed by the British military mission in Moscow as to the real carrying out of his war in the East, and if the President was so broadly confident of the continuance of the Soviet defense, it was reasoned that he must have good authority.

PRESS:

Its Reaction

The press reaction to the Roosevelt-Churchill conference and the eight-point statement was far from unanimously favorable.

The critics, however, ranged all the way from an echoing of the British reaction, that it was a "poor plagiarism on Wilson's 16 points," down to a milder reproach that Roosevelt should have raised his life on the battlefield of the Atlantic.

In the main, however, the leading independent papers of the country agreed with the picture of the idealism of the statement, though almost all of them agreed that it was a carefully timed dramatic feat staged "counter peace offensive" against that expected to be launched by Hitler now that his campaign against Russia was about one-third accomplished.

There were many smaller side-lines of criticism, however. Some papers had headlines about "one-way censorship," apparently believing that certain British newspapers and press associations had been permitted to be represented.

Most of this died a quick death when it appeared that the London papers were much upset by the fact that the American press, not represented by photographers, got the pictures first.

Newsweek men expressed surprise when their pictures of the two leaders in action, and the following day, when they saw the movie reels, they promptly announced that they were a rotten job, the work of a "rank amateur," apparently "off center, out of focus and out of gear," and that the two leaders had to be thrown away.

Courage Plus

HATTIESBURG, MISS.—When she graduated from Mississippi Southern college this month, Miss Winnifred Moore (above), native of New Orleans, again proved the mastery of courage over loneliness. Born blind, she has special talent in music and reads music in Braille with her toes while sewing her hands on the piano keys. Her constant companion is her dog Rex, shown here with her.

FORTRESS: In Battle

During the first few daylight bombings of Germany and occupied territory by the huge American flying fortresses, the stories were so clearly that the planes were not aware of their presence until the bombs began to fall, and that they were not aware of their presence until the bombs began to fall, and that they were not aware of their presence until the bombs began to fall.

Presumably, after unloading their bombs, the ships were able to turn about and get back to England before the fighters could climb level with them.

Finally the report came of one of them being in a fight, and apparently suffering some damage. But the report was that the ship was being attacked by seven Nazi fighting planes, and beating them off.

Unrest: Taking Substance

The unrest stories from occupied portions of Europe, which had been largely couched in general terms, figuring the writers of the reports, are now being run into new being moved large numbers of guards for the war with Russia, and that the four-motored American bombers, with their high speed and maneuverability, particularly after their bombs were dropped, and because of the number of their crew, their armament and its location at various parts of the plane, would be more than a match for enemy fighters.

Apparently none of them had believed one such bomber could fight seven fighters, but all were surprised when they learned this had been accomplished, even though with considerable damage.

The still larger bombers projected, they said, would be still more able to withstand and fight off attack.

The tale of the battle in the sky headlined a summing up of British air efforts in which it was stated that more than 1,000 British bombers had dropped over 2,000,000 pounds of bombs on enemy territory in four weeks while in the same period only about 400 bombers from Germany had gotten over British territory.

LONDON: Press comment revealed that the country is reconciled to a long war.

The Evening News said: "It is a fact that we should be told that a long war is now inevitable. It should silence those dangerous optimists who preach the fallacious doctrine that immediate 'shooting' by the United States would be certain to end the war next year."

The Express: "We are entitled to take new heart. We are not entitled to relax our efforts. Peacefulness is illiterate. Optimism may be dangerous. Realism is what we need at this moment. Our position now is sound, if difficult. We want victory, not stalemate, and that is not only. Only our utmost effort and sacrifice can give it to us."

SUIT: London, always horse-trunked and badly dressed, is calmly considering a proposal for the mass production of a single-styled suit of clothing for all the civilians of Britain—one that will save cloth and labor.

DUKES: With the duke of Kent in this country, and stated for an official visit to Washington, it was reported that his elder brother, the former king of England, duke of Windsor and the duke of the Bahamas, would visit Washington at the same time.

In seven or eight kinds of a dinner were the socially elite of Baltimore 40 miles from the national capital, because of the fact that the duchess was born there, and might be "run over" to visit "old friends."

Improved SUNDAY SCHOOL LESSON

JOHN URGES CHRISTIAN LOVE

LESSON TEXT—2 John 1:12-13; 6-7; 13. GOLDEN TEXT—Let us not love in word, neither in tongue; but in deed and in truth.—1 John 3:18.

Love is a word so abused in modern speech that one almost hesitates to use it, and yet it stands for the very finest in all human relationships, and presents to us the very essence of the nature of God. We do well to redefine the meaning of love in our Sunday school class this next Sunday. Love is not that sentimental, "silly-washy" feeling which prompts the writing of sentimental ballads, which are like the supposed love of which they speak. Love is a love that is not love. Nor is it that harsh thing which now parades itself shamelessly as love, when it is nothing but animal passion. Nor is it that weak thing which totalitarian dictators make it out to be when they declare that to attain a people's hate, not love.

"Love is a desire for and delight in the welfare of another." It reaches out to all mankind, coming from God and being made manifest in the gift of His Son as our Savior. It is stronger than any earthly bond. It is the only love that is not selfish; yes, because He loved us Christ bore the sins of the whole world, and He is the greatest thing in the world. Real love is the love of Paul's exalted description of love.

Our lesson reveals two important facts about love—

1. Love is an Evidence of Regeneration. 2 John 1:12-13. There are two groups of people the saved and the unsaved. The unsaved are designated as "the world," meaning the physical world, but the world of unregenerate men who are against God and His Christ. The saved are those who have come to God in Christ, who love Him and are in contact with Him. According to John, an evidence that we know God, there is an interest in the world.

1. The World Hates and Kills (vv. 12-13). The wicked heart of man against Christ is revealed in the tragic events which have embroiled the whole world in conflict. The point is that a Christian should not be surprised if that kind of a world hates us. In fact, we should be thankful that it does not hate us, for if our Christianity means anything, it must be hated and persecuted to a world driven by hatred and the lust for blood.

2. The Christian Loves and Gives (vv. 14, 15-16). The love of a Christian is love for God and love for the brethren. That love demonstrates his genuineness by giving freely to meet the need of a brother, just as God freely gave His Son for our redemption. (cf. James 2:14-17).

The background of such an attitude is a proper understanding of our relationship to God, and an appreciation of His nature.

II. The Very Nature of God is Love (1 John 4:7-12). God is love, and He is love. "Love is the very essence of His nature." (cf. 1 John 4:7-12). Only the one who knows God as love knows Him at all.

There is much thoughtless and meaningless talk about the love of God, as though it meant that He is careless about enforcing His divine law, that somehow He will overlook and excuse carnal and wicked living. The fact is that the love of God has no real meaning unless it is understood in the light of the cross, for

3. God's Love is Manifested in Christ (vv. 9-10). He was sent as the giver of eternal life, to the world, to the sinners, our Saviors, and thus as the highest and dearest expression of God's love. (cf. 1 John 4:9, 10). But the believer in the very center of the love of God. Precious hiding place!

4. Love Casts Out Fear (vv. 17-18). Fellowship is impossible in an atmosphere of fear, but love rules fear out. In Christ we realize that God first loved us, and then we came to love Him in Him. The result of such fellowship with God follows.

5. He Who Loves God Loves His Brother (vv. 19, 21). If we love God, He will love Him, and His command, which to the Christian is, "Love your brother." That is the first and greatest commandment! (cf. Matt. 22:37-40; Deut. 6:5; Luke 10:27-28). There is no use in our talking about loving God if it is not love for the brethren, for in doing so we make God testify against us that we are liars (vv. 20).

POP—Pop Probably Prefers Pressed Steel

By J. MILLAR WATT

And Half Wrong
"Jane says she thinks I'm a great wit."
"Well, she's half right, anyway."

Some Satisfaction
"Would you be happy if you had all the money you wanted?"
"I'd be happy if I had all the money my creditors wanted."

NOT ELASTIC
"I'm going to stretch the rubber band."
"That's all right, but it's not elastic."

Handed Down
"And do you really mean to say I'm the first girl you've ever kissed?"
"Yes, darling. Any girl I may have is inherited."

Internal Use
"And how did you find the bath salts, madam?" asked the druggist.
"Well, they taste very nice," said the shopper, "but I don't think they have the same effect as a real bath."

Chairman of the Dance Committee—Can't you stretch the music a little—just a dance or two more?
Orchestra Leader—Say, this ain't no rubber band!

Speed Fiend (after the run)—Whee!
Don't you feel glad you're alive!
Tired Passenger—Glad as I am, the world I'm amazed.

The theory of flight is being taught in some jails to prisoners. Some of them would probably be more interested in its practice.

Wasn't Asking for Trouble That Early in the Morning
Two travelers had just met. One was doing most of the talking. "Yes," he said, "I arrived home one morning after midnight and, as I opened the door, I saw a stranger kissing my wife. I closed the door softly and hurried downstairs. At 1 a. m. I came back. I opened the door softly—and there was the stranger, still kissing my wife. So I went downstairs again. At 1:15—"

"Just a minute," interrupted the other man. "Why did you keep galloping downstairs? Why didn't you walk right into the room?"

"What?" cried the talker. "And have my wife catch me coming home at that hour?"

LET US TELL YOU MORE ABOUT IT

To The Voters of Avon Park:

A study of the record and accomplishments of the present City Council will convince you that they should be RE-ELECTED, and citizens of Avon Park strongly favor their serving another term of office.

A vote for the present council to be re-elected will be a vote against R. E. Crummer & Co., and their grasping, grabbing tactics to rule or ruin.

THE PRESENT COUNCIL IS

making a valiant effort to arrange a practical refunding of the city's indebtedness in fairness to all tax payers, which will insure the future development of Avon Park.

THE PRESENT COUNCIL HAS

made a good tax collection record, making everyone pay alike. They have been fair to all. Through conservative operation, they have been able to lower the millage.

Under Dynamic Leadership the Present Council Has Done Things for Avon Park

They helped complete the airport and bring a first class flying school to Avon Park, with a large monthly payroll. They have improved the Tourist Center, attracting more visitors.

The present Council has done many other things for the good of Avon Park, and Citizens believe they should be given every chance to finish the good work they have started.

Round About Avon Park

by W. C. Beckel

The Office of City Attorney Every two years at this season Avon Park is thrown into a turmoil over the city election and the future always seems to center round the office of city attorney. We have often wondered why and the figures given in the advertisement on the back page of this issue seem to give the answer. According to these figures the office of city attorney would seem to be a nice little plum and we doubt if anyone else in Avon Park is paid an average like this per year.

It seems to us there is one way to settle this controversy. Take the collection of delinquent taxes out of the hands of an attorney entirely. Let the city proceed in the same manner as the state and county. Hold a tax sale once a year and issue tax certificates against the delinquent property, said certificates to be redeemable under the same conditions as state and county certificates. This procedure would make a change in the city charter but a small one and could be put through at the next session of the legislature and the cause of all the fussing and fighting would be eliminated. Think that over, folks.

Avon Park has no need for the regular employment of a city attorney. We fail to see why five men with average common sense cannot conduct the business of the city without the constant aid of a lawyer. Of course legal aid is necessary sometimes but an attorney could be hired for special needs and paid for that work as it arises.

The latest move of S. C. Pardee to retain his grip on the office of City Attorney takes the form of a quo warranto suit against Harold Livingston who was employed by the present council to collect delinquent taxes. Pardee questions Livingston's right to collect these taxes, claiming to be the legal attorney. As we understand it, Pardee did not make head as required by the city charter and therefore failed to qualify for the office. This council election was held with his services on the ground that he did not get a unanimous vote to do so. Since he has been receiving \$50 per month in salary but the tax collections were taken out of his hands. In his suit against Livingston we understand that Pardee says the salary is purely nominal and is the commissions and other percentages that make the office attractive.

The City Election

Avon Park voters met Tuesday to elect a five councilman and a mayor. We would like to see the present administration returned to office for the good of Avon Park. The present council has done things for Avon Park. Of course they have made some mistakes but there is an old saying that says that no one is perfect. Those who never make a mistake never attempt anything. The present administration has not set and twiddled their thumbs.

Under the able and energetic leadership of Earl Ware the present council has spent money wisely, time and money to further the interests of Avon Park. They have neglected their own affairs and worked for the advancement of Avon Park with no thought of reward except what would come through the prosperity of Avon Park. They spent long hours studying the city's problems and trying to find a solution and are entitled to the full confidence of Avon Park citizens.

They have aided materially in bringing the flying school to Avon Park with its \$40,000 per month payroll. They have reduced expenses and cut operating millage. They have inaugurated a delinquent tax drive which has proved very successful, bringing in taxes that have been delinquent for many years. They are making every effort to adjust the city's bonded debt on a basis that the tax payers can pay and not one that they have to be repaid in a short time, calling for further expenses and fees to attorneys and bond houses. All in all, the present administration has done a good job and are entitled to another term in order to finish the program they have gotten under way.

With regard to the office of mayor, some may think it does not mean much. Mayor Covington has done much to build good will for Avon Park and has made innumerable friends for the city. He is a quiet, unassuming man who is not on hand to bid them welcome, take them fishing and make them feel at home in his mayoralty. So let's give Mayor Covington and the present administration a (Continued on page five)

VOLUNTEER WORKERS ARE FINGERPRINTED

Sheriff's Office Assisted The Defense Council To Fingerprint 79 Members

In accordance with the plans of the State Defense Council of Florida to fingerprint all volunteer defense workers in the state, the Highlands County Defense Council started last Friday with the assistance of Deputy Sheriff Howard Coker, to fingerprint its membership.

Mr. Coker, with one assistant, took duplicate fingerprints of 79 citizens. Over 100 lines of waiting their turn and went home, when told they could come back later and furnish their fingerprints.

J. Edgar Hoover, director of the FBI in cooperation with the SDC of Florida, had prepared a special National Defense Application card on which all civilians will be fingerprinted.

The cards, when completed, will be filed in Washington under a special "Defense Volunteer" classification. This file will be maintained, we understand, in the event of an emergency is over and should serve in years to come as a memorandum of the citizens who have so willingly volunteered their services in the interest of Civilian Defense.

General Albert H. Blagden, former national guard commander, now SDC division chairman of civil protection, points out that this plan will make it impossible for a known espionage agent or criminal with an army record to remain undetected in an important position in the defense organization or in vital industrial employment.

Another useful purpose was outlined by Dr. G. S. O'Connell, SDC division chairman for health and housing. "In case of a disaster, it is difficult to identify the wounded and those who have lost their homes," Dr. O'Connell said. "Fingerprinting will be valuable aid in reuniting these people with their families. There is no stigma attached to it, but it is a patriotic duty and opportunity."

The next step in the SDC fingerprinting project will be to extend the system into telephone exchanges, power plants, harbor facilities and other industrial and business establishments.

Work Being Pushed At Highland Lakes

Work on renovating the former Highland Lakes Hotel and which will be known in future as Lodwick Inn, is being pushed as fast as possible in order to be ready for the cadets when they arrive for the Lodwick Aviation Military Academy. The whole interior of the building is being repainted and renovated. The kitchen is being remodeled under the supervision of H. K. Pettit who will have charge of the kitchen and dining room. He is well known here having been connected with the Jacaranda Coffee Shop.

Cal Pidgeon, one of the officials of the flying school, is already on the job and Byron Rice will be retained as part of the hotel staff. He has been acting in the capacity of caretaker. Rice is at present in charge of a gang of men cleaning the south of the hotel. It is understood this area will be used for recreational purposes by the cadets.

Car Wrecked On Wauchula Road Saturday Morning

A Pontiac coupe failed to make a curve on the Wauchula road about 2:30 last Saturday morning and turned over three times and the occupants were just bruised, according to Road Patrolman Paul. The car belonged to the late Mrs. G. M. Daniels, also of Sebring. The car was being driven by a woman and was accompanied by Frank Hillhouse. The car was travelling west and the S curve just east of the county line was the scene of the wreck.

THE NEW FORD BUS which will be used to transport the flying cadets of the Lodwick Aviation Military Academy from the Lodwick Inn (formerly Highland Lakes Hotel) to the Municipal Airport for their flight training. The cadets will be housed at the Inn and receive their flight instruction at the Airport. The bus, which has an all steel body has accommodations for thirty-two persons. It was purchased by Albert Lodwick, owner of the school from C. E. Lander of the Avon Park Motor Company. It has a 194 inch wheelbase and a 35 horsepower motor.

Much Equipment Is Needed On Farms In Highlands County

The Highlands County Agricultural Defense Council has recently made a survey of the machinery and equipment on Highlands county farms. The figures were compiled by C. F. Anderson, council chairman and Louis Altmeyer, county agent.

Gasoline engines, trucks, diesels and tractors are the most needed items of equipment on the county farms. New trucks and tractors are the number one and number two items on the county want list.

Due to the rapid increase in improved pastures in this county there will be a heavy demand for fencing materials, both woven wire and barbed wire. Estimated needs, county wide, for barbed wire will come close to 400 miles.

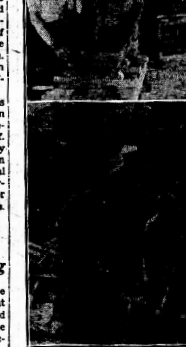

There are between 4,000 and 5,000 factory made implements and machines on farms in this county and only about 20 percent of this equipment is the latest models and types.

The council believes that the county will need much new equipment for 1948. Some of the most important items necessary are: Fifty new tractors, 80 trucks, 20 gasoline engines, 20 plows, 20 harrows, 20 wagons and trailers, 10 cutters and mowers, five engine outers and three drag lines.

Drivers' Licences Now Being Issued

Automobile drivers licenses for 1947-48 are now being issued at the office of County Judge T. A. McNicholas at the court house.

The cost was raised by the last legislature and they now cost a dollar. Examinations for new drivers, those who have not been issued a license previously, are being conducted every Thursday afternoon at the court house by members of the state road patrol. Those who hold licenses do not have to undergo this examination.

LAKELAND, August 28—With 50 boys working full time, Florida Southern College is pushing construction of its new buildings on the west campus. Students are now pouring foundation sections and erecting wall forms for the R. T.

School News

Resolution passed by Highlands County Board of Public Instruction, September 4, 1941.

"First—That in the future it shall be the policy of this board that each Principal of a school or teacher in charge of a school in Highlands County shall set aside on the regular daily schedule, the last period of twenty minutes of each morning to be used exclusively for the reading of passages of scripture, singing of religious or patriotic songs, followed by prayer and a short discourse of a spiritual or character-building nature, by the Principal or by some outside party who is particularly suited for this discourse; and no discourse shall be given of a controversial nature; that this program is not to be carried out by the students, but must always be in charge of the Principal or the Assistant principal."

"Second—That all teachers and students above third grade be required to attend the above exercises."

"Third—That a twenty-minute period shall be set aside so that fifteen minutes will be available for the above program."

"Fourth—That teachers of the first, second and third grades devote the first fifteen minutes of each morning to a similar program arranged to suit the tender ages of their pupils; this to be given in their individual rooms."

Excerpts from report on audit of the accounts of Highlands County Board of Public Instruction as of June 30, 1941, dated August 18, 1941, by W. O. Gentry, Auditor, State of Florida Auditing Department.

"Pursuant to assignment I have audited the accounts of the Board of Public Instruction, Highlands County for the period beginning July 1, 1938, following the close of the previous year and ending June 30, 1941."

(Continued to page five)

Board of Instruction Names New Teachers For Avon Park School

The board of public instruction of Highlands county met Tuesday morning to select new teachers before the opening of some of the county schools. All of the board members were present.

On the recommendation of the Avon Park trustees, the following first period appointments were made: James Davis, to teach English and history; H. A. Rowe, assistant principal; James Crosby, in temporary charge of shop work.

Miss Ruth Dwyer by the consent of the Avon Park and Sebring trustees was transferred from the Sebring grammar school to the Avon Park grammar school. Ford Henshaw of Sebring and Earl Hart of Avon Park, who have been acting as a committee on fire insurance gave their report to the board. Mr. Henshaw stated that the insurance has been divided among the various insurance companies of Lake Placid, Avon Park and Sebring and that they had secured a reduced rate for the next three years.

Colonel P. N. K. Bailey, county school head said Wednesday that with the exception of two vacancies, a commercial teacher for the Lake Placid school, and a rural teacher, all of the teaching positions have been filled.

Election Board Named By Council

The city council has named the following to serve on the election board at the election to be held next Tuesday:

C. R. Giv, manager; C. L. Armstrong, Mrs. Lucille Shockley and Ben Stewart, clerks and A. P. Helms, sheriff.

At their special meeting Tuesday night, held for the purpose, the council purged the city registration books and names of deceased persons and those who have moved were removed from the rolls.

LAKELAND, August 28—With 50 boys working full time, Florida Southern College is pushing construction of its new buildings on the west campus. Students are now pouring foundation sections and erecting wall forms for the R. T.

Pardee Files Suit Against Livingston

S. C. Pardee, former city attorney, has filed quo warranto proceedings against Harold Livingston, Sebring attorney, who has been acting as tax collecting attorney for the city of Avon Park. The suit was filed by Lettner and Lettner, Arcadia lawyers, and requires Livingston to show cause why he is acting as city attorney. Papers were served on Livingston Thursday afternoon and a hearing is set for Monday afternoon before Judge C. O. Rogers at Sebring.

The suit asserts only one city attorney is entitled to collect taxes and that Livingston has no right to collect them. It is further set forth that the salary of \$50 per month is nominal and intimates it is the commissions that count. It further states the city council had no right or authority to employ Livingston.

It is further stated that J. Tom Watson, attorney general was asked to file and be a party to the suit but that he refused and he considered it a personal matter.

9 CANDIDATES FOR OFFICE OF CITY COUNCIL

Protest Administration Asks Re-election. Two Candidates For Office of Mayor

Eight men and one woman will go before the voters of Avon Park next Tuesday and of these nine, five will be chosen to serve as council members for the next two years. Two are offering their services for mayor and one will be elected.

The candidates are: E. H. Ware, P. Anderson, Dr. G. S. O'Connell, Max Wild and Miss Mattie Tompkins. These five constitute the present council and are all seeking re-election. The four newcomers in the political arena are E. A. (Ed) Delaney, S. E. Booth, Charles Lewis and Bert Friswell. Delaney has served on the council before and Booth is clerk to the board of county commissioners.

The other two who are well known to Avon Park voters are J. M. Covington who has proved his worth in the office for a number of years; and James M. Luxton, former night watchman at the Lake Placid Packing Co.

On the surface there has not appeared much controversy in this election but the political pot is reported to be simmering down beneath and may boil over before voting time. As in former years, there are two factions, the ins and the outs. The ins are running on their record of the past two years and the outs do not seem to have any platform to date and some of the candidates assert they are entirely independent of either side.

It's up to the voters to make their choice next Tuesday and all candidates are expected to do their utmost to get as many voters to the polls as possible and therefore plenty of transportation seems to be in prospect for the day.

New Manager At Park Theatre Here

J. M. Sealy of Tampa has assumed his duties as manager of the Park Theatre here. He takes the place of Bill O'Neill who resigned last week. Mrs. Sealy was visiting here this week and Mr. and Mrs. Sealy expect to move here for permanent residence in the near future. He has been connected for the past six years with the Florida State Theatres, Inc., formerly the Sparks chain.

Mr. Sealy announced this week that beginning next Monday the matinees will start each day at three o'clock, except on Saturdays and Sundays when the doors will open at two o'clock and the shows run continuous. The later opening during the week is for the accommodation of school children, Mr. Sealy said.

Return From Trip

I. H. Ford and son Donald have returned from a month's trip to California and other western points. They traveled an even 8,000 miles and covered a number of states. Mr. Ford said he considered the Boulder Dam as most spectacular sight they saw on the trip.

Meditation, moderating human desire, using wisdom and procuring divine power—Mary Baker Eddy. Blessed are the meek, for they shall inherit the earth.—Matthew 5:5.

COUNTY BOARD HAS NUMBER OF ROAD PROBLEMS

Road and Right-of-Way Worries Confronted Commissioners Tuesday

Roads and right-of-ways were the perplexing problems of the board of county commissioners at their meeting Tuesday and their job was not made any lighter when out of clear air they learned that the county is being blamed for the delay in building the access road in to the Basic Flying School and for not keeping up the clay now serving as an access road.

John T. Bize of the state road department, appeared before the board and requested the county to furnish right-of-way for widening of road right from the Lake Annelle corner to the point where it joins with federal route 19. The board passed a resolution to provide the right-of-way.

He stated that the road department wants to pave the connecting road at the same time 19 is paved. He gave as a reason for the delay of 19 the fact that it will be some time before 19 is built from that point north. He stated that the road department is planning to start on the overpass at Lakemont and that needs for the access road to Basic Flying School. He stated that work will be held up on construction due to lack of WPA labor.

A complaint was made to the board that Jess Durranne had fenced a county road and put locked gates across the road. It was also stated that he had built a fence on the road. The board ordered that the gates and fence be removed. Commissioner Jackson stated that the county had spent between \$1,300 and \$1,500 on the road.

The contract for removing building material from the road at Lakemont was awarded to Walter Hyman, Inc., his bid of \$1,447.60. WPA labor was to be used. Mr. Durranne requested that the gates and fence be removed. Commissioner Jackson stated that the county had spent between \$1,300 and \$1,500 on the road.

The board passed a resolution requesting the state road department to survey and designate federal route 19 north of Avon Park and requesting location of county road right from the Lake Annelle corner to the point where it joins with federal route 19. The resolution stated the county would furnish the right of way on either side of Lake Jackson.

In the afternoon, State Road Board member, J. P. Townsend, and State Road Engineer, D. E. Kiley, and W. V. Higgins appeared before the board to discuss the problem of maintaining the access road to the government reservation.

During the discussion it developed that there was a misunderstanding as to who would maintain the road from DeSoto City to the air field area. It was put in shape by the state with the help of the county when the work was first started on the air port.

The result of the discussion is that the county is supposed to maintain the road but neither the state nor county has funds to maintain it or put in the needed improvements.

Major Roddeck To Address Teachers At Public Meeting

Major I. H. Roddeck, project officer of the Sebring Basic Flying school, has accepted the invitation of the county school board to address the teachers of the county at their meeting in the Sebring school auditorium next Saturday morning at ten o'clock. Col. F. N. C. Bailey, county superintendent of public instruction, announced this morning.

Five Selectees Depart Monday

Five county men will report at the court house Monday afternoon from where they will be sent to Camp Blanding. The only volunteer in the group is 20-year-old Neil Robbins, volunteer from Lorida. Other selected men include Marcus James Franklin, age 22; Conklyn Wells Franklinweather, age 23; Avon Park Editor Lee Greene, Jr., age 26; Sebring; and Samuel Joseph Hillhouse, age 25. Sebring.

If we have no peace within ourselves, it is vain to seek it from outward sources.—La Rochefoucauld.

CAREY'S PAY

Railroad Unions Demand A Modest \$900,000,000

Carey Jones:

Said, "I want nine hundred million."

Carey Jones:

"And I want it on the line."

Carey Jones:

"I got to have more money."

"Or I'll strike this busy railroad."

"Till they're ready to sign."

—Carey Jones (chance) 1941 version.

If somebody will please tell that guy over on the other side of the roundhouse to make less noise, we'd like to ask a few questions. Now as we understand it, the railroad brotherhoods and unions are demanding higher wages. You want a total of \$900,000,000 a year added to your wages and salaries. That is a stable chunk of dough. According to American Railroads, which we admit is an organization sponsored by your bosses, \$900,000,000 is enough to equip completely 4,250,000 soldiers in the U. S. Army. With that sum, you could build eighteen of the new 50-million-dollar dreadnaughts or 150 brand new (and badly-needed) destroyers.

O. K. So what? So if you railroad men really deserve a pay raise, the railroad can stand the gaff and you've got it coming to you. It's all right to us. But that brings up those questions we mentioned.

You know better than we that for the first time in more than ten years, the railroad industry is starting to get business. The foot soldiers of railroads have been and still are in reeducation. Many are just beginning to show black ink on the ledger. And now here you men come along and demand pay amounting to more than double the aggregate fares paid by all railroad passengers in the nation last year. Is that reasonable?

You, Carey, what kind of pay are you getting? We'll tell you, you're engineer on a passenger locomotive. Your "basic" pay (for 100 miles) is \$7.34. If your daily run is 150 miles, you get \$11.01. But the union—not the railroad—says you can run more than 4,800 miles a month. So you make \$352.32 a month—about \$4,228 a year. In our business, mister, that ain't hay.

And there's this matter of featherbedding. The magazine Railway Age cites this example:

"A regularly assigned freight train made a round trip of 50 miles. On the first of the trip the train carried only passenger cars. At the turning point the crew was required to back its passenger cars to a point where the engine was turned and given necessary attention by the engine house foreman. Returning, the train carried only freight cars back to its starting point. The adjustment board held that the fireman was entitled to three days' pay for the one day he worked—(1) a day's pay in passenger service for hauling the passenger cars from the initial terminal to the turning point; (2) a day's pay as hostler for taking the engine to the enginehouse; and (3) a day's pay in local freight service for taking the freight cars back to make standing point. And, furthermore, the board held that all other firemen who had performed similar service on that train over a preceding period of three years were entitled to 'back pay' on the same basis."

Such flim-flamming at that, rare as it may be, has no place in union practice.

Well, that's how we see it. We believe that railroad employees, in general, have been better paid

than almost any other big group of workers. You have kept your wages high by building strong unions. The public has a good deal of confidence in your patriotism and loyalty. But if you insist on a \$900,000,000 wage increase, or any large part of it, and keep demanding checks how you can do it, you will lose public sympathy and support. You will become unpopular in the eyes of the people as that old fudge-grump, John L. Lewis. Then which there is none whicker.

TOO LATE TO CLASSIFY

By RUSSELL KAY

Gigantic new industries have been built and old ones revived and rejuvenated because some guy refused to think orthodox and permitted his imagination to "run with the ball." Christopher Columbus, Alexander Graham Bell, Thomas A. Edison and a flock of others refused to take "no" for an answer and faced the meers and jeers of a cocksure wise-guy world for many a weary and trying year before their sanity was established and the public impressed.

Getting closer to home, it wasn't so many years ago that a courageous and enterprising young chap named Porter, growing citrus fruits in the Indian River section, went back to his back yard and found a flock of Brown chickens and horse-lungs when he decided to quit shipping fruit in nose lead barrels and start packing boxes where the fruit was washed, polished and packed in boxes. A smart cracker named H. "Punch" Citrus Laundry and everybody, like little Andrew, laughed and laughed.

But Porter brought premium prices and it wasn't long before the whole blamed industry went into the laundry business in a great big way.

Over in Deland right now another young chap named Ted Shawn Jr., one of four brothers running the Bob White groves and packing house near Deland Springs, is looking with a ja-ga idea and has been attempting to market "potatoes" for domestic consumption.

Ted's idea was to find a market for the over-sized fruit unsuited for shipment and he figured if it could be offered the consumer could, ready to eat, be an attractive feature to form a new market. Enthusiastic, he presented the brain-strut to citrus leaders. They were kind, patted him on the back, felt sorry for his mad idea and said, "Well, you know, now run along home and prove it and we'll wait, but right now we got a lot of other things to worry about—the public and the advertiser and the market to sell all our fruit."

So Ted put his egg back in his pocket and went home to figure out how to make it stick. He ended and proved that the world was wrong. From the time he started to market his "potatoes" he had prepared transparent wrapper made from synthetic material known as Pyrofilm which stretches tightly over the peeled fruit, affording complete protection and at the same time displaying it temptingly to the prospective customer.

Then he peeled and wrapped a large quantity of fruit and "went to the ball game." It was a lovely hot day and the fans were still there with their "longest hands" out. "Have an orange," Ted said, passing 'em out through the crowd. They took 'em greedily, ate 'em, and smiled for him.

So he went back the next day with a larger supply, and this time he SOLD 'em, in competition with soft drinks. But they think the hot cakes and he was cleaned out in no time. It worked, but the baseball season was nearly over and he had to figure out other ways to display and sell his product.

He put the old bean in high gear again and before long had rigged up an electric refrigerator with a front in which he displayed the tempting juice balls, cooled, peeled and ready to eat, at a popular local service station. Motorists hot and tired from their long drives, found the "potatoes" most refreshing. Here, too, the new product was sold out in a hurry. The refrigerator was filled and refilled and still he couldn't meet the demand.

Encouraged by the results already achieved with the new packaged rubber company engineers are now in Florida trying to perfect a machine that will automatically wrap and pack fruit in Pyrofilm at the rate of thousands of pounds per hour, so that it is pointed out that fruit so wrapped is protected from all forms of deterioration and the process is not costly.

Publisher Billy Waddell of the Volusia County Mirror, who contributed the data from which this column was prepared, is enthusiastic over the prospect of an entirely new and profitable market for large quantities of Florida fruit through the establishment of thousands of retail outlets for the sale of peeled, ready to eat oranges, not only in Florida but throughout the north and east, which he contends would introduce Florida citrus to countless new customers who otherwise would never become acquainted with the quality and taste of our fruit. Anyone interested can secure more detailed information by writing The Volusia County Mirror, Deland, Florida.

We Don't Like Any But Have To Choose

By Dr. John H. Shuman

President of Webster College

BARBON PARK, FLA., Sept. 4

—War, like politics, makes strange bed-fellows, and for the same reason: decent men and nations frequently must make choice between two evils, and on choosing must bid the lesser abomination.

We Americans have been loath to admit, even to ourselves, the necessity of some of the choices that have been thrust upon us.

We have clung to the hope that the gangsters of the totalitarian Rome-Berlin-Tokyo axis, in their avowed quest for world domination would be in some way fettered that we are in this world and would leave us alone.

With the greatest industrial development, the most productive farms and the richest mines of the world, we have clung to the hope that conquerors, whose principal objective is the acquisition of productive resources, will observe their treaties and maintain peace with us after violating their pledged word to each democracy of Europe.

Hitler's unprovoked attack upon the ally who had made possible all his earlier successes has done much to give realism to our thinking. We realize that he had much more to lose in democratic America, and infinitely less to gain by conquest than by a successful compulsion here.

So we Americans find ourselves repeatedly forced to choose between unpleasant alternatives, either of which we would reject instantly if we were presented to us as a single proposition.

Let's make some choices; between men, between governments, between war aims, and between races.

Hitler or Stalin? Each is a blood-stained tyrant. To choose between them is to choose between two evil, pledged word is worthless. Stalin

measured strong people of his own race who related him. Hitler was a subject race who took only to be persecuted to live in their slavery. This is the more despicable?

Nazism or Communism? Both are hateful to us. They have so much in common that we ordinarily may say they are the same because such is an oppressive totalitarianism. They differ at just three essential points. Russia closes the churches for religious anarchy, permitting Christian worship in the home, while the Nazis actively seek to return to primitive paganism.

Communism puts title to all property in the state and uses the profits in line of taxes for the people, while Nazism preserves a privileged class and cast for whom the common people are but cannon-fodder. Communism holds all races and peoples to be equal and preaches a world-wide level of equality, while Nazism holds to the doctrine of the superior race, the Herrenvolk—which shall rule the world, and to which all other races, including ourselves, shall be subject.

Of these three points which is worse, Communism or Nazism? Events are compelling us to choose. Britain's war aims, or Germany's? Britain has steadfastly tried to preserve the organization of the world as it stood in the period of its greatest prosperity and peace. That means preserving the not too admirable British empire system, but it also means preserving freedom and civilization in the fourteen conquered democracies of Europe, in South America, in Asia and Africa, and in North America. Germany has tried to subjugate the world to a new order of Prussian domination, and is making substantial progress. Our every decision aids one or the other. Which do we choose to aid?

Russia or Japan? Russia has made a substantial legal Christianity, but permits no church. Japan is the home of the Shinto religion, worshipping the Emperor as the Son of Heaven, child of the rising sun.

Business Communism gives its service at least to the welfare of the masses of men. The Japanese masses are property of the Son of Heaven, power to its military clique. Such industrial leadership as exists in Russia is Orthodox, Christian, liberal, scientific, essentially Christian. The intellectual leadership in Japan is correspondingly Oriental, Mongolian, particularistic, dictatorial, essentially Shinto.

On all these alternatives Americans must choose. Hitler, Mussolini, Stalin and Matsuoka have forced the choice upon us.

"Eye Stones" Are Source Of Income

DELRAY BEACH, September 4 (FWS)—Most folks never heard of "eye stones," and if asked would guess them to be some new disease discovered by oculists. But to residents of Delray Beach they are a source of income, though to most beach visitors the income is of the silly-money type.

Sifting through the sands of Delray Beach, however, in search of the tiny fragments of shell used by oculists to remove foreign bodies from the eyes, proved an interesting diversion while otherwise waiting for a sun tan to appear.

New York oculist supply houses pay \$4 a thousand for the rounded bits of shell, and report a shortage in the "crop."

Making Perfumes From Florida Fruit Flowers and Herbs

CLERMONT, Sept. 4 (FWS)—Converting the oils of Florida fruits, flowers and herbs into perfumes is all in a day's work to Vito Martini of this city.

From the flowers and fruits he has made perfumes as the Christmas Nights type which sells for \$2.00 a quart. These include L'Orange, Evening in Paris, Chanel

and many other types. The formulas which he uses are a closely guarded secret. However, the perfumes are prepared by extracting the oils from the fruits and flowers by addition in alcohol. They are then blended with balsams, gums and oils—waxes and aged for several months in glass-lined tanks.

FOR COUNCILMAN

I hereby announce my candidacy for councilman of the City of Avon Park, subject to the voters on Sept. 8th, 1941. Your vote and support will be appreciated.

If elected I promise to deal fairly and impartially with every citizen in town to the best of my ability.

R. E. Booth.

FOR COUNCILMAN

I hereby announce my candidacy for the office of city councilman of the City of Avon Park, Fla., the election to be held on Tuesday, September 9, 1941. I solicit your support and vote and if elected I pledge to use my best efforts for the betterment and welfare of Avon Park.

R. A. (Ed) DeLaney.

FLORIDA PUBLIC SERVICE CO.
A REPORT TO OUR CUSTOMERS
IN HIGHLANDS COUNTY

Avon Park Power Plant, Florida Public Service Company

A \$46,000 PAYROLL

The Florida Public Service Company employs 31 persons in the county. Payroll for this district amounts to \$46,047.53 for the year ending July 31, 1941.

These employees with their families total 104 people, citizens - residents - consumers, in the county.

The size of the payroll is largely due to the location of one of the company's power plants at Avon Park. Electric power from this plant is transmitted throughout the company's system.

TAXES

This Company is one of the larger taxpayers in the City of Avon Park and County of Highlands. Our tax contributions help to support local government and materially reduce the burden on other local taxpayers.

REDUCED RATES

In the face of increased costs, the company has adhered to its policy of reducing rates whenever it is economically feasible. Domestic electric rates were again simplified in 1940 bringing a reduction to a great many of our customers.

Low utility rates are an attraction to any community. Florida Public Service Company's electric rates are among the lowest in the state.

This report is necessarily brief and limited in scope. We will be glad to receive criticisms or suggestions and to answer questions concerning the activities or policies of the Company.

Our wish, as yours, is for the increasing growth and prosperity of Avon Park and Highlands County.

Respectfully submitted,

W. H. Bland
Vice President & General Manager
Florida Public Service Company

CONSTRUCTION WORK

Extensive improvements have been made on the company's lines in Highlands County during the past year. This meant considerable sums were spent in the county to improve your service. Transmission and distribution circuits were overhauled and revamped. Improvements to the power plant and to the Avon Park Water System were also accomplished.

DEFENSE

THIS COMPANY is supplying electric service for U. S. Army needs on its system. In addition, the company's interconnections with the lines of other power companies enable it to transmit power to areas in other states where needed for defense industries. In June alone 4,600,000 kilowatt-hours of power were sent to such areas.

Fourteen of the company's employees have been called to service in the armed forces, two of them from Avon Park.

Post-War Food Problem Needs Intelligent Study

Method of Handling and Sharing Surpluses Could Have an Important Effect on World's Economic Future.

By BAUKHAGE
National Farm and Home Hour Commentator.

WVU Service, 1342 N. W. W. Washington, D. C.

"The most surprising thing, of course, is a real egg for breakfast." The speaker was an Englishman who had just arrived from London and had flown from Nova Scotia to Ottawa, Canada. We were sitting in the Ballroom club in Ottawa, the third war-capital which I have visited since 1939.

As I watched my English acquaintance enjoy his Canadian salmon and deep dish pie, I realized how bad the food situation in England must be. To the English I have been writing about the millions of eggs which have been shipped across the Atlantic under the Lend-Lease law and the millions of dollars worth of cheese and butter and fruits which have been purchased for the purpose of supplying the British Isles with American farm products.

The people in England are worse off now, as far as food goes, than at any time during the World War," said the Englishman, "and I'm not sure how to remember how bad that was."

It must have seemed strange to me that a nation that in the capital of a nation at war and enjoying everything a generous table can afford, there is, of course, no lack of food for the British. There is only lack of ships.

I myself found it difficult to get these people to understand the capital. There are plenty of uniforms. This city of Ottawa, like Washington, has greatly increased in population; new temporary buildings have sprung up and others are in the process of construction. Even the beautiful new Supreme Court building is being planned and the director of information and other war-time bureaus; paid and unpaid sign posters and stenographers hurry along the corridors where the stately justices wait to be taken over by the government. We haven't quite come to that yet.

Some Ghosts Present
And in these crowded government buildings the same ghosts walk which haunted our own capital. Like the United States, Canada is thinking about starvation in the midst of plenty, and she is doing so because it is not only in terms of feeding her own country, but of the terrible problem she must face with her farm surplus after the war.

"We shall be eating less American potatoes next year," said a Canadian official to me. "We shall go without green peas at Christmas time, but it won't be because we can't get them. It will be because we have our American dollars to pay for war supplies from the United States."

Canada is building new granaries to store the wheat with which the barns are bursting. What is stored in church cellars and in every available corner. This growing surplus is a greater threat to the balanced economy of the nation than the dislocation of social and industrial life caused by the war.

But what is to happen with that grain and the other raw materials which the war is over and starving Europe has no money to pay for them? It is exactly the same question our own farmers face.

Well, here is the answer which is being given serious consideration by Canadian economists and their inspiration comes neither from the theories of conservative capitalists nor from those who like to try to win the teachings of Karl Marx. It comes from the twelfth chapter of St. Paul's Epistle to the Romans. This is the passage:

"Vengeance is mine; I will repay, saith the Lord. Therefore if thine enemy hunger, feed him; if he thirst, give him drink; for in so doing thou shalt heap coals of fire on his head."

This is the text of a plain talk by Gilbert Jackson, who has caused considerable comment by officials and others who are able to understand the problems of peace to come. Mr. Jackson has a very practical reason for making this admonition of St. Paul the basis for a policy which he urges be carried out after the war. He proposes a plan to give a very great part of Canada's surplus to the 60 millions in Europe who will be starving, impoverished.

BRIEFS . . . By Baukhage
Did you know that you will soon be able to buy deluxe savings stamps at your nearest retail store? If the old retail store on your main street is no longer in business, the government needs the steel for defense. The Transportation Department of the O.P.A. estimates that there are 22,000 tons of abandoned rail cars in city streets, and because of the O.P.A. it is the source of scrap metal.

to-stricken and probably leaderless when the war is over.

Important Effect
"On our immediate treatment of these people when the war ends," says Mr. Jackson, "may depend the future of Europe, in permanence; whether those 600 millions will ever be steady customers of our goods; whether the new countries, including Canada (Mr. Jackson refers elsewhere to the United States as one of the new countries) must now try somehow to live, without the world market which was the reason for their existence."

"The problem," he goes on to say, "of course is international. It is not a counsel for Canada, but for Britain and ourselves, for our sister dominions in the war, and for that most resolute and helpful of non-belligerents, the United States."

Britain, it is pointed out, will have no surplus stocks of her own but will probably still have large balances in the Western Hemisphere, particularly in South America. She therefore can help her share in this enterprise.

"One Sam, Mr. Jackson says, is no 'Fair Godfather'; he can't sit alone and enjoy everything a generous table can afford. There is, of course, no lack of food for the British. There is only lack of ships."

I could get no government official to express open opposition to the plan, but I found no one who refused to recognize that some such step was being taken. And that is something from a nation bending its every effort, as Canada is, to perfect its military machine.

An Excellent Book
On Defense Achievement
My Uncle Job, I said, "that mine adversary had written a book."

My adversary hasn't but my assistant has, or at least she, and some brilliant Washingtonians have collaborated on a volume of the white and black, entitled, "America Prepares for Tomorrow."

Uncle Job, I am unable to say who edited and contributed to this very excellent record of American defense achievement. At least I can't say their creation as Job wished, to condemn them out of their own mouths. There is nothing to condemn. It is a good book as we must know the latest word as to just what the United States government is doing for defense, how the various departments and agencies—including 20 new ones—are functioning.

According to Mr. Boutwell, when the reader for Harper & Brothers, who published the volume, read the manuscript, she said:

"It filled me to read this book out up and die."

War's Effect
On Average Canadian
Now is the average Canadian feeling the war today?

Most intimately, of course, when the picture of a young fellow appears in the paper, reported by the war ministry as killed or missing. Canada has more than a thousand such casualties as reported up to July 1. She has raised five divisions for overseas service. A sixth will be raised. Ninety thousand men are overseas; 300,000 are on active service elsewhere.

Coal, gas, certain food products such as pork and cheese which will be used for export will probably be rationed soon. As early as last fall, aluminum went out of civilian use. There is an 8 per cent sales tax on a large range of manufactured products. It is an available wholesale tax and so isn't so noticeable.

Canada feels that the real pinch is in the pocketbook. A married Canadian with no dependents pays \$75 on an income of \$1,500 a year. The \$5,000-a-year man pays \$1,000 income tax. The \$10,000 income man pays \$2,000. Higher brackets turn over more than 50 per cent to the government.

To the average American, the general assumption is that Canada is virtually all English; they naturally consider themselves more or less a part of the British Isles. About 10 of the 11 millions of the population of the Dominion of Canada, less than half are of English, Scotch, Welsh, or Irish descent. Three and a half millions are French-speaking. The rest are from most of the races of Europe.

"We want to war at Britain's side because we believe here is the right side," said Sir Alexander King, Canada's prime minister.

PATTERNS

SEWING CIRCLE

your entire wardrobe. For this style is diffused by a very pretty collar arrangement—a ruffled edge collar to be worn under the dress revers, so that just the ruffling shows. Send for Pattern No. 1435-B at once, and make it your new dress.

Make this dress in any pastel or dark colored crepe, or in a pin dot cotton or silk crepe. Then the contrast of a white ruffle around the collar will stand out prettily. If the dress is to be of a printed crepe the ruffle might be of Irish crochet or Valenciennes lace; if it is a plain color the ruffle may be of organza or net.

Barbara Bell Pattern No. 1435-B is in sizes 34, 36, 38, 40, 42, 44 and 46. Size 38 takes 6 1/2 yards; 39-inch material in 3 1/2 yards to trim. Send your order to:

What Foe Told General Who Couldn't Hold Line

There is a fine story being told of Marshal Foch.

One day during the last war when the position of things was critical and further retreat would have endangered the whole line, one of his divisional generals sent him a message saying that he could not continue to hold a certain line of trenches which had become untenable.

In reply, the marshal sent him this message:

"If you cannot hold on, you must advance."
It is a great motto for life, and the power to advance in such circumstances is where the great test comes.

Tobacco tops the gift list with 20 per cent of the total. The gift is a gift of a carton of cigarettes. A gift of a carton of cigarettes is a gift of a carton of cigarettes.

ASK ME ANOTHER?

A General Quiz

The Questions

1. Is the American flag ever flown after sunset?
2. What "First Lady of the Land" was born in England?
3. What is surrounded by the chromosphere?
4. The minimum age for representatives in the congress of the United States is what?
5. What is the population of Iceland?
6. In the navy, a captain's boat is called what? An admiral's?
7. Is a congressman, judge or lawyer subject to charges of libel?

The Answers

1. Yes, but only on the Capitol, the House and Senate Office buildings in Washington.
2. Mrs. John Quincy Adams was born in London of an American father.
3. The sun (a mass of incandescent gases).
4. U. S. representatives must be 21 years of age.
5. The last census (December 31, 1930) gave 118,888.
6. While performing official duties, a congressman, judge, or lawyer may say or write malicious and untrue things about a person without being subject to charges of libel.

The Cost of a City Attorney

in Avon Park, Fla.

Do the people of Avon Park know what a City Attorney has cost this city during the past 10 years. The following figures are a summary of payments and credits to former city attorneys. They were taken from the books at the City Hall and can be verified by any tax payer.

For The Year Ended Sept. 30	Salary	Tax Collection Fees	Foreclosure Fees and Costs	Special Legal Fees	Total Fees And Costs
1932	375.00	1,658.16	4,970.33	50.00	7,053.49
1933	300.00	1,400.00	660.96	1,213.00	3,573.96
1934	300.00	1,400.00	69.85	75.00	1,844.85
1935	300.00	1,400.00	8,538.96	83.98	10,322.94
1936	300.00	1,400.00	1,094.54	242.50	3,037.04
1937	300.00	1,400.00	1,430.68	218.23	3,348.91
1938			1,424.96	3,450.00	4,874.96
1938	450.00			200.00	650.00
1939	600.00			678.45	1,278.45
1940	600.00	1,223.44	243.60	685.30	2,752.34
1941	600.00	1,343.37	1,405.95	6.15	3,355.47
Totals	4,125.00	11,224.97*	19,839.83	6,902.61	42,092.41

* Tax collection's fees estimated years 1933 thru 1937, based on other years' collections.

The present council realised the uselessness of these excessive costs, took "the bull by the horns" and dispensed with the services of a city attorney.

This made possible a great saving to the tax payers and on this one thing alone the present Council should be RE-ELECTED.

The present Council has worked for the advancement of Avon Park in numerous ways. They have spent much time and effort and should be given another term to complete the good works they have begun.

Round About Avon Park

By W. C. Beckett

The Election.
Avon Park voters spoke and elected another council to serve the city for the next two years. They also returned Mayor M. E. Covington for another term by an overwhelming majority. They elected to the council four new men and one lady. And when we say "lady," we mean lady in every sense of the word. For Miss Tompkins is a real lady in every way and the voters evidently knew her worth.

We see no reason why the new council will not work in harmony for the good of Avon Park as a whole. They all know the city's problems and are sound and substantial citizens. Ed Delaney, who led the ballot is an old hand at city government having served before on the council. He is reported to know the city better than "silver to silver."

S. E. Booth is no new comer in public affairs. He served on the county board of public instruction and is now clerk to the board of county commissioners. He is a good man to have around and has a mind of his own.

The three councilmen returned to office, Earl Ware, Park Anderson and Miss Tompkins, have all been involved in the present problems of the city. They have shown their ability in the past and their decision to continue them in office.

So let everyone cooperate with the new council and all pull together for the advancement of Avon Park. Avon Park has a great future and there is no sense of reason for bickering to retard its progress.

Defense Stamps

Avon Park merchants are co-operating in the nation-wide movement to help sell defense stamps. They are stocking the stamps and selling them along with their regular line of merchandise to all who wish to invest and help in the defense of the country.

Defense savings stamps are a good investment for all citizens. They provide a safe way to invest and help in the defense of the country. They also provide a source of income for the government.

Railroad Crossings

We don't know what the law is on the subject but we believe that something should be done about freight trains blocking street crossings for an undue length of time. Both railroads are reported guilty of offense but the Atlantic Coast Line has come to our personal attention to a greater extent. They continually block the Pleasant street crossing. The crews are evidently to blame and maybe are too lazy and indifferent to cut the train while they are switching the rest of the train.

City Council Held Meeting Thursday

Avon Park's city council held two meetings Thursday. In the morning, at an adjourned regular session, they ratified the contract with the Florida Public Service Co. for extending the water main from the end of the Mall to the airport. R. R. Brown, local manager for the city council, said both A. I. Lockwick and the army officials had approved the contract as it related to water pressure and the size of the pipe which will be six inch.

Council also canvassed the returns of Tuesday's election and confirmed the results.

They also gave J. J. Still leave of absence until the end of the month with pay until the 15th. It will be up to the incoming council as to whether he is rehired or not. Several of the council members still the parks and streets. Miss Mattie Tompkins raised the only objection to the action taken.

C. P. Anderson agreed to supervise the park work until the end of the month.

The council met in the evening and set up an equalization board to hear complaints as to property assessments.

LOCAL SCHOOLS HAVE 641 PUPILS ENROLLED NOW

Little Change in Numbers For Avon Park; De Soto City And Lake Placid Show Big Increase

According to Dr. S. N. Reeves, supervising principal, there are approximately 641 pupils enrolled to date in the Avon Park schools for the new term which began Thursday last week. There are 325 in the first six grades, 190 in the seventh, eighth and ninth grades, the junior high and in the senior high which comprises the tenth, eleventh and twelfth grades, there are 126. The total is about the same as last year, when there were 638 pupils.

Superintendent F. N. K. Kelly said there were 11 more pupils than last year when the Sebring school opened Monday and no more have enrolled since then. The De Soto City, The Sunland many as last year and the Lake Placid schools have had a big increase over last year. These increases are due to the many families moving into the area on account of the work at the basic flying school between Sebring and De Soto City. The enrollment in the Sebring school has increased but the Venus enrollment is smaller due to the fact that a number of pupils from there are attending the Lake Placid high school.

There are eight new teachers on the Avon Park faculty this year. W. L. Williams and James E. Crosby will have charge of the vocational training; James A. Davis will teach English, history and first year Spanish. R. T. Wood is on the high school staff and Mrs. Fred Peden is back at her old post as commercial teacher in the Phillips Yates for the sixth grade. Mrs. J. H. Singletary has one of the fourth and fifth grades. Mrs. Will Drawdy one of the second grade. Another change is the required 30 minute devotional every morning. Dr. Reeves has this to change.

The setup in the vocational training is giving fine results. Dr. Reeves said yesterday. He said that the boys' instruction in metal working, auto mechanics and radio work. An old car is being used to illustrate and is being entirely rebuilt. Dr. Reeves said.

Ministerial Assn. Is Organized Here
On Friday afternoon September 5th the following pastors of their respective churches met in the study of Rev. J. P. Dalton to formulate plans and to organize the Avon Park Ministerial Association. Rev. I. B. Brown, Rev. Alfred C. Brown, Rev. G. E. Brown, Rev. W. D. Croft secretary. Each first Monday was designated as the time for the regular monthly meeting.

On Friday afternoon September 5th the following pastors of their respective churches met in the study of Rev. J. P. Dalton to formulate plans and to organize the Avon Park Ministerial Association. Rev. I. B. Brown, Rev. Alfred C. Brown, Rev. G. E. Brown, Rev. W. D. Croft secretary. Each first Monday was designated as the time for the regular monthly meeting.

The October meeting of the association is to be held in the home of Rev. Alfred C. Elliott, pastor of the Congregational Church.

Nothing Further In Quo Warranto

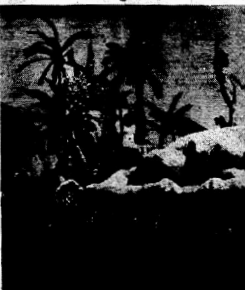

There are no further developments in the quo warranto suit filed last week by C. C. Pardee, former city attorney, against H. G. Livingston, city manager for the city council. The suit was set for a hearing on Monday afternoon but according to Livingston, Pardee failed to appear.

The suit is for Livingston to show cause why he is acting as city manager. Pardee claims to be the only and legal attorney to represent the city. The opinion has been expressed that the suit was brought and filed just previous to the city election purely for political effect.

District Governor Will Address Lions

Wilfred Roberts, district governor of Lions International, will be the speaker at the Avon Park Lions Club meeting next Monday night. On this occasion the Lionesses are expected to attend the gathering of the club.

Florida Sweepstakes Winner

THE FLORIDA EXHIBIT FLOAT was the grand sweepstakes award in the annual "Miss America" parade at Atlantic City, September 2. "Miss Florida," Miss Strother of Miami drove a superbly harnessed to three leading stallions over breaking waves. "Miss Florida," Queen of the Tuleo Honey Festival of Wewahatcha, sat on a garden bench in a Florida garden while behind her against a Florida sun stood Jane Langstaff (right), Queen of the Orange Festival. The float was in blue and silver with great conceptions of oranges and a golden sun in the rear.

One Sale And Many Rentals Made To School Officials

One home has been sold and a number of houses and apartments rented to military and civilian personnel who will be connected with the Lockheed Aviation Military Academy soon to open here, according to Walter S. Betts, local real estate broker.

A new home on the west shore of Lake Placid, owned by E. G. Todd, has been sold to R. E. Beeler, flight director of the school. Rentals include the Jack Head home on Lake Byrd to John Abbott, flight commander; One of the E. G. Todd houses on Lake Lotella to L. A. P. Sights, commanding officer of the military detachment; The Cannon home to Wm. Love, flight commander; the Mel Bass home to L. A. Bennett; The Miss Mattie Thompson home at Highland Lakes to Col. Pidgeon, director of academics; the Dr. Able cottage at Highland Lakes to F. E. Seltzer and one of Dr. Able's apartments to one of the Covington apartments to Mr. Minor, an A. and E. mechanic.

All of the rentals were made on a year's lease basis. Mr. Betts said. The Raab Apartments have been purchased by W. T. Connell and he is planning to redecorate and do some remodeling.

Cecil Clements Gets Degree In Chemical Eng.
Cecil Clements, son of Mr. Charles Clements of this city, received his degree in Chemical Engineering from Auburn University at Auburn, Ala., at the graduation exercises of that institution on August 15.

Cecil attended Marion Military Institute at Marion, Ala., his freshman year, where he was a member of the Glee Club. He transferred to A. P. I. his sophomore year and at that institution he was a member of Delta Sigma Phi social fraternity, and of the Auburn chapter of the American Society of Chemical Engineers. He was secretary of the latter organization his junior year and vice president his senior year.

He is returning to Auburn this week to work on his master's degree in Chemical Engineering. He will be accompanied to Auburn by his sister, Miss Jane D. Croft, secretary. Each first Monday was designated as the time for the regular monthly meeting.

On Friday afternoon September 5th the following pastors of their respective churches met in the study of Rev. J. P. Dalton to formulate plans and to organize the Avon Park Ministerial Association. Rev. I. B. Brown, Rev. Alfred C. Brown, Rev. G. E. Brown, Rev. W. D. Croft secretary. Each first Monday was designated as the time for the regular monthly meeting.

The October meeting of the association is to be held in the home of Rev. Alfred C. Elliott, pastor of the Congregational Church.

AVON PARK TIMES

[VOLUME XIII—NUMBER 29] AVON PARK, FLORIDA, FRIDAY, SEPTEMBER 12, 1941

L. C. M. Ellenberger Died On Tuesday; Buried Thursday

Ira C. M. Ellenberger, a resident of Avon Park for the past 22 years, passed away Tuesday noon in a Sebring hospital. He was 77 years of age. Services were conducted Thursday afternoon at the residence on Tulane Circle with Rev. G. Roberts of the Methodist church in charge. Interment was in Bougainville Cemetery.

Funeral services were conducted by Rev. G. Roberts at 2:30 p. m. at the residence on Tulane Circle. Mr. Ellenberger was born at Gateburg, Pa. on October 30, 1863 and was educated at Pennsylvania State College. He was a former principal of the Avon Park schools and also helped organize the P. T. A. here. He had been very active in church and school affairs but had been in failing health for the past several years.

They survive the widow, Mrs. Mary Ellenberger of this city and three daughters, Mrs. H. S. Bowen of Sunbury, Pa., Mrs. Charles E. Dinsinger of Washington, D. C. and Mrs. John C. Sullivan of Rochester, N. Y.; one son, Hugh Ellenberger, three nephews and one niece.

Great Activity Now In Evidence At The Airport

Greater activity is now in evidence at the airport with erection of the hangars scheduled to start in the immediate future. Final arrangements have been made for the water line from the end of the Mall to the port. The connection has been made by the Florida Public Service Co., who are waiting on two one inch pipe to complete the work. Though the courtesy of E. G. Todd a temporary line has been installed so that the foundation for the hangars can be started once and to provide five private of train passengers expected to arrive.

Eleven cars loaded with the hangars are expected here this week. They have been shipped from Oklahoma City and erection will start as soon as possible. The ground for the hangars, just east of the runway, has been cleared and another crew of men is busy filling trees and clearing more ground.

A number of maintenance men have already arrived and their equipment has been stored at the old hangar pending erection of the new buildings. These men are quartered at Lake Byrd Lodge.

Work on renovating Lockheed Industries Highland Lakes Hotel, is proceeding as fast as possible. The kitchen is being completely remodeled and new oil ranges installed. All the rooms are being repainted and new screens put to the windows and doors. Showers are being installed in the new buildings. Recreation facilities for the cadets provided on land being cleared south of the main building. The new buildings are being erected in one and around the hotel.

Personnel of the Lockheed Aviation Military Academy is arriving at the hotel and their military and military and many army uniforms are in evidence around town.

County Judge Urges Drivers To Obtain Licenses At Once

Judge T. A. McNicholas has asked for the full cooperation of county drivers in applying for new operator's licenses. Last year approximately 1500 licenses were issued in Highlands county in comparison with 300 which have been issued so far this year.

The great differentiation in figures is caused by the fact that in other years many of the applications were not made early in the year. Under the present amendment made at the recent session of the legislature, any person desiring a license must either present a Florida 1940-41 license or the license from another state. If the driver is not at the present time in possession of his operator's license, he must take an examination.

District Scout Meeting Held Tuesday Night At Hotel Santa Rosa

Tuesday night the Highlands District Scout meeting was held at the Hotel Santa Rosa. Lake Placid men present were the Rev. S. A. Boyce, Jessie Rowell, Arthur Austin and Fletcher Payne. Avon Park representatives were M. V. Picher, Dr. Marshall Jordan, J. F. Longbottom, Frances Shockey. Sebring was represented by Fred Will, Dr. H. W. Martin and M. M. Ferguson.

Assistant Scout Executive Troy Smith of Tampa was present at the meeting.

The next court of honor for scout advancement will be at the court house November 3.

VOTERS MADE CHANGES IN CITY COUNCIL

Mayor Covington Re-elected; Three Of Old Council Are Returned To Office; DeLaney Is High Man.

Avon Park voters returned Mayor M. E. Covington to office Tuesday as well as three members of the present administration. Two new councilmen were elected. The present members re-elected were E. H. Ware, C. P. Anderson and Miss Mattie Tompkins. The new ones are E. A. (Ed) Delaney and S. E. Booth. Delaney has served on the council before with distinction and school affairs but had been in failing health for the past several years.

Covington polled 868 votes to James M. Lantieri 311 in the mayor's race. DeLaney was high man in the vote for councilman. He scored was 757. Next came Booth with 537. Third was Ware with 469. Miss Tompkins fourth with 467 and Anderson fifth with 457.

The other candidates and their votes were: Dr. C. S. McKnight, 449; B. A. Frazier, 438; Charles H. Lewiston, 428 and Max Wild, 412.

E. A. DeLaney and S. E. Booth will take the places of Dr. McKnight and Lantieri on Avon Park's governing body.

As counting the ballots progressed there was little doubt that Covington, DeLaney and Booth were sure of election, as they jumped into the lead from the start. The rest of the candidates moved back and forth on the tally sheets and it was left for the last count or so ballots counted to determine who would be elected.

An examination of the ballots as they were counted indicated that the voters voted for the candidates who had no classification under straight tickets. There were a number of straight tickets voted but also a very large percentage of mixed ballots. Candidates from both sides getting much support on one ballot.

Selective Service Classification Is Not Permanent

The local selective service board through their secretary, Geo. E. Sebring, issued a warning this week that no classification under selective service system is permanent. At any time the case of a registrant may be reopened and he may be reclassified.

The local board shall keep informed of the status of classified registrants. If a registrant is questioned or physically reexamined, employers may be required to furnish further information. Public officials and employers may be required to make investigations; and other steps may be taken by the board to keep current and informed concerning the status of classified registrants.

Each classified registrant shall, within ten days after a change in status occurs, report to the local board any fact that might result in his being placed in a different classification. Any other person should within ten days after knowledge thereof, report to the local board any fact that might result in a registrant being placed in a different classification.

"Hangar" Sandwich Shop In Connection With Gas Station

"The Hangar" is the name C. O. Price is giving the new sandwich shop he is opening in connection with the Sinclair service station on the Mall east of the A. P. I. tracks. He expects to have everything ready to open this weekend, with parking space for several cars. He will also give curio service, he says.

Mr. Price also announced that Mr. and Mrs. William Hurst will be connected with him in the business. Mrs. Hurst is especially qualified in making sandwiches, having been an assistant manager in charge of sandwiches at Woolworth's in Miami and Orlando for the past three years. Mr. Price says.

County May Have Money Coming From Gas Tax Surplus

The status of Highlands county as regards the division of the gas tax surplus under the law passed four years ago is the subject of legislation being determined by three auditors sent here by the State Road Board for that purpose.

The auditors, P. B. Warren, Fred A. Durranne and Kenneth Overstager are auditing the county records and will report on the gas tax which may result in the county being allotted a considerable sum for road construction in the county by the state.

If the audit shows the county is entitled to a share of the surplus it will be sent to the county when and where the state deems to the best advantage.

The Parent Teacher's Association of this city will entertain the Thursday evening at 8 p. m. at the Winter Guest Club honoring the school and the faculty. All patrons of the school and friends of the school are cordially invited to attend this reception.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON
(Continued from Page 1)

NEW YORK.—It was quite by accident that Little Dorothy Dale of Kansas became a sorceress and overthrew the Wicked Witch of the East and Patriotic Songster freed the en-
Inspiring a New Slave and Upurge of Faith

We wondered why Lucy Monroe, the "star spangled soprano," kept reminding us of all this and now it is all clear. Miss Monroe's mother, Anna Laughlin, was the first Dorothy Dale, in "The Wizard of Oz," with Fred Stone, and when the daughter made her musical comedy debut in "Louie the Fourteenth," in 1925, old-timers in the audience, this one among them, were moved to polka-dance and all but fearful memories by the winsome daughter's resemblance to her mother. Little Dorothy Dale was forever young, still in a land of enchantment, still there was to it.

The secrecy of Miss Monroe, opera, concert and stage, is, unlike that of Dorothy Dale, quite premeditated, and involves a somewhat wider outreach in world liberation, but at a time when people are hoping that somebody will pass a miracle, she has become our national patriotic songster and song-leader, here and there everywhere, and at the convention of the Veterans of Foreign Wars at the Philadelphia Municipal stadium recently, she led the second "community sing" in a series of great public invocations of old-time patriotism throughout the country. More than 10,000 persons attended the first one at Washington several weeks ago.

The "star spangled" phase of Miss Monroe's career began in 1927 when she was made official soloist for the American Legion. This stirred in her deep patriotic fervor which found a response in her audiences everywhere.

She is an eighth-generation American, trained as a singer entirely in this country. She made her Metropolitan debut in "La Boheme," in the spring season of 1927.

IN THE first World war, facing a hurry-up job of army morale-building, they slammed Irving Berlin into a corner and told him to dish up a few red morale broadsides. He made his first "Up Army Morale" away from lines from the first one.

"Don't you worry, mother darling. Although the skies are gray, For there's always a little bit of sunshine. In the Y-M-C-A."

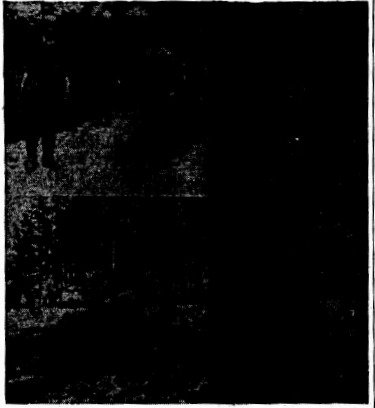

This time they pick for the bucking-up job a eugenicist, population expert, commercialist, business researcher, corporation executive, art connoisseur, banker, and traffic expert—all in the one distinguished person of Frederick Osborn, of New York. The war department names him as head of its morale branch, with the temporary rank of brigadier general.

The appointment may or may not have something to do with the recent disputing magazine articles about interest in the new army. General Osborn has been occupied, as a dollar-a-year man in Washington, as a consultant in various endeavors and has been chairman of the army and navy committee on joint recreation. Hence it is possible that he is appointed to the army post had been decided upon before the recent flare-up about discontent among the National Guard and selectees.

Whatever the appointment may mean, the choice of a civilian for this office is a precedent. General Osborn replaces Brig. Gen. James A. Hite. Furthermore there is disclosed here a trend away from shoreward as an old-timer, dependable morale butter, Billy Rose of Broadway was back in New York a few weeks ago, after a season with the army morale-builders. He was all roused up. "Nothing happened," he said. "They told me my blueprints were wonderful, the ideas were wonderful and I was wonderful. Then they said good-bye. That's all I expect to happen."

General Osborn, never a hooper or spouter, is 51, the son of C. Osborn, distinguished New York lawyer, and an alumnus of Princeton university who started a career of business management in 1912. His book, "Preface to Eugenics," published last March, reveals uneasiness about the falling birth rate and the urgency of nice people having more children. He has six. Always in deadly earnest, he's farthest north from Broadway, and Irving Berlin's little bit of sunshine in the Y.M.C.A. Possibly a highly technical war demands that kind of morale-builder.

Nazis Kept on the Alert

Gerrilla warfare is admittedly a thorn in the side of Germany's invading army. Top photo shows German troops in a village watching the windows of the houses in an effort to catch snipers. At bottom, German troops have dropped to the side of the road to flank an enemy patrol after learning the patrol was headed towards them.

Quick on the Trigger

The motorcycle scout shown in this photo demonstrates how he would act if an "enemy" plane attacked the back of a village. The soldier quickly dismounted and set his automatic rifle into play against the plane.

On Their Toes in the Desert

Daylight patrols in the western desert carried out daily by the South African Infantry brigade quickly maintain the unit on its proverbial toes, and when the long journey is over these toes need a rest. The waves along the beach have a cooling effect, and shoes are piled neatly, military style, on the sand.

A Free Show for New Yorkers

Spectators aboard the boat in the background of this photograph get a full view of the city from Battery Park. The first one given to determine just how much the city can hold and what they could do in the event of an emergency.

Confers With Hull

Admiral Kichiburo Nomura, Japanese envoy, after conference with Secretary of State Hull, both Nomura and the secretary refused to divulge the nature of their conference.

Attorney General

President Roosevelt has named Solicitor General Francis Biddle (above) as attorney general, in succession Robert H. Jackson, now associate justice of the Supreme court. Biddle is 58.

In Unison

Members of the Hawaiian team who competed against all-star Pacific coast aggregation at Los Angeles swimming stadium, churn through the water with machine-like precision. They have just returned from the nationals.

Trapshoot Champ

Walter Talbot, of Detroit, grasps happily after winning the Grand American trapshoot leading first prize of \$1,000 at Vandalia, Ohio. He has been at it only one month.

How to Cook It

MARK THE MOST OF YOUR LEFTOVERS! (See Recipes Below)

THINKED TO TEMPT . . .
Leftovers on purpose! There are so many delicious ways of using leftovers, why not call them "planned ahead?" Casseroles, meat loaves, soups and so on will do much to turn the big ends of yesterday's dinner into "come-on."

The trick is not to serve the same old hash or stew in the same old way, but to give leftovers fresh faces with fresh recipes. Like many busy homemakers, you, too, can discover the economy, both in time and money, of buying and preparing a large roast, or more than enough vegetables, with leftovers in mind.

You can't always make mainline foods come out even. So, let's be practical about the situation. If you serve roast chicken or baked salmon for Sunday dinner, plan to do all sorts of things with the leftover portions for weekday meals.

Here's a roll call of leftovers and how to fix them—proof that "day-after" foods can be not only good, but delicious!

Summery Meat Pie.
(Serves 6)
2 pounds beef neck or shank or
3 1/2 cups leftover meat, cubed
2 tablespoons flour
2 tablespoons lard
1 small onion, sliced
1 green pepper, chopped
1 cup carrot slices
Sliced mushrooms
Salt and pepper

Have the beef neck or shank cut into 1-inch cubes. Dredge in flour, seasoned with salt and pepper. Brown meat in hot lard with onion and green pepper. Cover with hot water and let simmer 1 hour, with kettle tightly covered. Transfer to baking dish, add carrots and mushrooms. Thicken meat liquid, pour over meat and vegetables. Cook in moderate oven (350 degrees) about 40 minutes, then pile a border of mashed potatoes around the edge, and bake till potatoes brown.

Salmon a la King.
4 tablespoons butter
4 1/2 tablespoons flour
1/4 cup milk
1/4 pint milk
1/4 small green pepper
2 cups flaked salmon
2 egg yolks
1/2 cup mayonnaise
Salt and pepper to taste

Melt butter, blend in flour, add the milk and cook slowly, stirring constantly until thickened and smooth. Add green pepper and flaked salmon. When hot, add egg yolks which have been beaten, cook a moment, then fold in mayonnaise and seasonings. Heat again and blend thoroughly. Serve this mixture in the center of a rice ring which has been turned out on a serving platter or in a buttered pan and garnish with the buttered peas and sprinkle with paprika.

LYNN BATH:
When brown sugar hardens so that it cannot be measured accurately, spread it in a shallow pan and heat it slowly in a 275-degree F. oven. If too high a heat is used, the sugar caramelizes. Stir and melt it with a fork. Only enough sugar to be used at one time should be softened, as it hardens again as soon as it is cold.

To sour one cup of milk, put one tablespoon of vinegar in a half cup of milk with sweet milk. Stir well.

To clean silverware, mix one tablespoon soda with one tablespoon salt with one quart of water. Boil the silverware in this in an aluminum kettle until the tarnish is removed. Rinse and rub dry.

Give the baby his cod liver oil in the bath tub to avoid the brown stains on blankets and clothes that are so hard to remove.

Flowers as Emblems

Flowers form the national emblems of many countries. There is the rose of England, the thistle of Scotland and the shamrock of Ireland. The lotus blossom belongs to both Egypt and India, the fleur-de-lis to France, while Japan claims the chrysanthemum and Spain the pomegranate.

The maple leaf of Canada was adopted because her soldiers used branches from this tree to camouflage their uniforms when fighting the War of 1812.

Comfort that runs deep
How beautiful is modesty! It winnows upon all beholders; but a word or a glance may destroy the peace that hath been for thee.—Tupper.

THE AMERICAN STORY

Much of the talk nowadays is of the commodity shortages caused by war priorities. In a world at war, military needs necessarily come first and civilian needs second.

Not enough attention has been paid to the remarkable fact that, in spite of the magnitude of our arms effort, the American people have been caused so little discomfort.

Everywhere else in the world the strictest kind of rationing is the rule. Only in the United States is there abundance of all the necessities and many of the luxuries.

That is partly due to the fact that this is a rich country, possessed of boundless resources. But resources in the raw are of value to no one. They must be produced, processed, manufactured, distributed, before they can contribute to economic and social life.

It is American private enterprise in the manufacturing field which is producing the tools of war in an ever-increasing stream—and at the same time producing enough of the tools of peace to maintain the highest standard of living on earth.

It is American private enterprise in the raw material field which is producing those vital commodities—oil, metals, coal, timber, etc.—which fuel and supply our factories.

It is American private enterprise in the merchandising field which is making available to all the people the food, clothing, and household goods which they enjoy in infinitely greater abundance than the people of any other land. You may patronize a big store or a little store, a chain store or an independent store—whichever it is, it represents a miracle of service, efficiency and economy.

It is American private enterprise in the service field—transportation, light and power, communication, etc.—which is rendering still another unpassed and essential contribution to the unswerving, protection and maintenance of the American system.

That is the American story—the story of American private enterprise, in a thousand fields of activity. It is responsible for our greatness as a nation. It is responsible for the creation of a defense machine which will make us the foremost military power.

THOSE VITAL VITAMINS

While the American people take eating for granted with little thought about the vitamins in the food they eat, except maybe the vitamins in the food they worry more about their figures than about their health, the doctor carries on in his effort to bring better health through proper eating.

Dr. Russell Wilder, physician on the Mayo Clinic staff at Rochester, Minnesota, has been promoting nutrition as a national defense factor. He maintains his leadership over the defense nutrition drive by virtue of his chairmanship of the Food and Nutrition Committee of the National Research Council—a quasi-official agency from which the government draws technical advice on defense problems.

Dr. Wilder contends that vitamin B1 is grossly deficient in the U. S. diet and suggests that some of the country's labor unrest can be attributed to a B1 deficiency in the diet of the worker. B1 is recognized as the nerve and morale vitamin.

Dr. Wilder's committee has been concentrating on adding B1 to the U. S. diet—primarily through the new "Enriched Flour" and "Enriched Bread," twin foods at whose birth Dr. Wilder officiated.

Good health is good defense against an enemy, the same as good tanks and guns. The American medical profession knows this and is doing all it can to speed plans for a better diet and better health, which mean a stronger nation.

DRIVE TOWARD STATE SOCIALISM

The Portland, Oregon, Journal recently observed that it has no objection to public ownership of power—but that public ownership, if established, should be through the action of the people, and not by dictatorial abuses of government officials.

"Otherwise," says the Journal, "it would be government without consent of the governed. If that happens, democracy is dead."

The drive of Federal officials to force socialization of the electric industry, provides an ominous example of the desire of a certain group of politicians to "govern without consent of the governed." Every known device of propaganda and political pressure has been used in an attempt to make the people destroy a great tax-paying, privately-owned, public-utility industry, and to replace it with a politically-owned and managed industry. The government has offered financial inducements to cities and states to persuade them to go into the power business. Laws have been proposed and passed which have given the Federal government centralized control over the resources which properly belong to the states. Public servants who are promoting socialized power have not hesitated to go to the most outrageous extremes of calumny and abuse when private citizens who object to destruction of private enterprise, have opposed them.

The power socialization drive is preventing the private electric industry from expanding at maximum speed. It is destroying the rights of states to control their own natural resources. It is creating politically enforced shortages of power. It is causing waste and confusion and delay. The power politicians seem primarily more interested in political gain than in the electric industry. They are more interested in the electric industry than in the power. They are more interested in the electric industry than in the power. They are more interested in the electric industry than in the power.

STRAFEFUL WAGE PROTESTING

The various railway labor unions are now making wage demands on the carriers which, if granted in entirety, would increase the railroad operating expense by the incredible sum of \$800,000,000 a year. A simple set of figures illustrates just what this would mean to the travelers and shippers of the United States.

Last year, total passenger fares collected by all the American railroads aggregated \$417,000,000—less than half as much as the unions are now demanding in higher wages!

The railroads' average revenue per car of freight last year was \$129.89. So it would take nearly 7,000,000 carloads of freight to pay for the increase cost of the railway unions' demands. That is as much freight as was loaded in the first 2 1/2 months of this year—months when, due to the defense program, traffic was at unusually high levels.

And here, finally, is the most startling comparison of all: Nine-hundred-million dollars is more than the railroads ever earned in any year after paying expenses, taxes and other costs. Last year the railroads earned a net of but \$200,000,000—less than one-quarter of what the unions are demanding!

The moral is clear. Granting of these astounding wage demands would make it necessary to immensely increase railroad charges for passenger and freight service.

It would disrupt the entire economy of this country. It would be a long step toward inflation. The cold figures tell the story.

"During the first full year of rearmament, less than half of the \$12,710,000,000 of Federal expenditures went for defense. . . . We spent more on routine, domestic affairs than on getting ready to fight."—Los Angeles Times.

TOO LATE TO CLAYTON

BY RUSSELL KAY

While Fall does not officially set until September 21, for most of us the summer is over when schools re-open and we experience the hustle and bustle that attends getting the kiddies up and off to their regular routines and rhythms.

Driving to work this morning, I encountered hundreds of bright-eyed youngsters of all ages making their way to the school house. They were clean, neatly dressed, smiling, happy kids.

Passing a Junior High I noted numerous cars lined up at the curb. Others were coming and going as parents brought their children and their neighbors' children to the "door of learning."

Of course there was nothing new or startling about this sight. We have all seen the same thing many, many times. It was typically American. The question that framed itself in my mind today, however, was one that never occurred to me before: "How much longer?"

I could not help but contrast American children with those of other countries today. I could not help but ask myself: "How long" will it be before dread and fear replaces the happy smile on young faces, before gas masks become standard equipment? "How long" before studies will be interrupted by wailing sirens and, like baby chicks in the shadow of the hawk, will these kids be rushed into underground bomb shelters? "How long" before here and there attractive school buildings will be reduced to a heap of smoldering rubble?

But a little over a year ago parents in peace loving Holland, Belgium, Norway, Denmark and other countries sent their children off to school clean, neat, well fed, bright eyed, smiling and happy. Those were neutral countries. Though war raged all around them they felt that since they had not taken sides, were observing the strictest neutrality, they were safe—and besides, they had treaties.

Today these nations are enslaved. Families have been separated. Hunger and want stalk through the streets and schools as they operate under the control and domination of a ruthless dictator. Education has become a farce. Propaganda and falsehood have become the text books to teach young minds to hate and fear their fellow man. Fear and terror reign supreme. Death and debris have been added to the curriculum. Survival has not helped them, for now they become a battleground where the bombs and bullets of conqueror and defender are a menace day and night.

Parents of Dutch, Belgian, Norwegian and Danish children are very different from American parents. They are kindly, hard working, peace loving folks. They were proud of their clean, progressive communities. They loved their homes and their children and asked only to be allowed to live in peace, to worship as they chose, and to educate their children to become good citizens.

Before destruction descended upon them, appeasers assured the populace that "It couldn't happen here." They continued to do business with Hitler and were careful to do nothing that might be termed an "unfriendly act."

United and alert, these small democratic nations together with the aid of their more powerful allies, might have defended themselves against aggression, but individually they fell, and their only hope of defense lay with the states which they were to be defended and killed into inactivity by those who preach appeasement.

The dictators HATE America above all other nations. We already have done more to stay their progress and hamper their plans than any other country. They have taught their children and their people to hate us and we will never be forgiven. Let Russia and Britain fall, and with our backs to the wall, we would feel the heavy hand of war as no nation ever has felt. We would be crushed, our children and mine would be the ones to pay.

We can face the facts now and while there is still time, unite in thought and action to destroy our enemies, and because we have the resources to do so, we will win. We will succeed. But if we hesitate, if we remain reluctant and full ourselves to meet, we face destruction, and when our turn comes there will be no DELIVERER!

Union Congregational Church

Dr. Alfred C. Elliott, Pastor

Sunday School at 10:00 A. M.

with classes for all ages. Topic for adults: "The Eternal God: The Source of Help." Come, and discuss with us this topic.

Morning worship service at 11:00 o'clock, when Dr. Elliott will speak "The Frugal Expenditure of Love," Special music by the choir.

The "Governance Circle" Women's Missionary Society will meet on Wednesday at 8:00 P. M. at the home of Mrs. W. H. Yates. The devotional service will be in charge of Mrs. C. S. Donaldson, and a book review on "The Church Serving the Migrant" will be presented. All members are urged to attend this meeting.

The Pastor, officers, and members of this church cordially invite all who desire spiritual communion and renewed worship to join in this hour of worship.

Church of Christ, Scientist

"SUSTAINANCE" is the subject of the Lesson-Sermon which will be read in Churches of Christ, Scientist, throughout the world on Sunday, September 14.

The Golden Text is: "The things which are seen are temporal; but the things which are not seen are eternal" (I Corinthians 4:18).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "And God said, Let there be light: and there was light. And God saw the light, that it was good: And God said, Let the earth bring forth grass, the herb yielding seed, and the fruit tree yielding fruit after his kind, whose seed is in itself" (Gen. 1:5, 6, 9, 11).

The Lesson-Sermon also includes the following passages from the Christian Science Textbook: "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Infinitude Mind creates and governs all, from the mental molecule to infinity. This divine Principle of all expresses Science, and a part throughout His creation, and the immortality of man and the universe. Creation is ever appearing, and must ever continue to appear from the nature of its inexhaustible source" (p. 207-24-29).

Miami City Speed Limits

MIAMI, Sept. 11 (PNS)—Strict enforcement of Miami's speed limits went into effect last week when hundreds of motorists were stopped by traffic officers and cautioned to keep within the 30 mile per hour limit. Miami's police chief, J. J. Gelles, estimates that strict observance of speed in the Miami area alone will result in a saving of 7,500,000 gallons of gas in the next year. Not only will reduced speed serve to cut down the amount of gas used, officials point out, but it should materially reduce the number of accidents.

80 Miami Beach Gas Stations

Eighty Miami Beach gas stations closed all day Sunday and 2,000 motorists who were expected to observe all day Sunday closing next week 101 stations in Broward county adopted the Sunday shut-down, closing from 7 P. M. Saturday evening until 7 A. M. Monday morning.

Special Meeting Of Commissioners On Regional Housing

TALLAHASSEE, September 11.—The meetings of the Board of County Commissioners, to be held the week of September 15th, have been requested by Governor Fernald to be held in Tallahassee for the purpose of considering the necessary resolutions to create and establish the Central Florida Regional Housing Authority in the Counties of Citrus, Duval, Hardee, Highlands, Indian River, Manatee, Marion, Okaloosa, Orange, Osceola, Palm Beach, Polk, St. Lucie, Sarasota and Sumter, according to Ammon McClinton, State Housing Commissioner.

The Highlands county meeting has been called for next Wednesday evening, September 17, at 8 o'clock at the court house.

Notice of public hearing to be held by the Board were published last week. The County Agent, County Home Demonstration Agent, Farm Security Administration Supervisor, local realtors, building and loan officials, bank officials and civic leaders have been invited to attend the hearing. The Governor has advised the Chairman of the Board that the State Housing Commissioner will attend the meeting to explain the entire program.

For this County to benefit by the USHA-Aided Rural Housing program, it is necessary that the County Commissioners adopt certain resolutions to comply with the Rural Housing Act. The resolutions enacted at the 1941 Session of the Legislature.

After the formal action to comply with the legal requirements, and upon the recommendation of the Board of County Commissioners, the Governor will appoint one person from each of these Counties as a Commissioner of the Central Florida Regional Housing Authority. The appointments will be made and then apply to the Federal States Housing Authority for an earmarking of the \$200,000, which was allocated last May for the construction and operation of 250 low cost rural homes for farmers, sharecroppers, tenants and rural wage workers.

After the appointment of the Commissioners of the Authority, they will then meet and select a chairman, who may then formally apply for the earmarking. After an earmarking, the Authority will make a survey of the 16 Counties and prepare an application to the USHA for a loan contract which is to be approved by the President.

Sherman Sees Axis Triumph Spur To American Fascism

By Dr. John H. Sherman

President of Webster College

BRANSON, Mo., Sept. 11.—Much is written and said concerning our danger from Axis aggression to our possessions or our trade routes. That Hitler and Mussolini both intend such aggression has been confirmed by the recently published statements of Stanner, Goebbels, Bismarck, and Goebbels, as well as by earlier admissions of the dictators themselves.

Japan, too, continues warily but without serious pauses her steady encroachments upon the Philippines, Hawaiian Islands, the Panama Canal, and our sources of supply in the East Indies.

There seems to be no ground for doubt that aggression against us is certain. Even the isolationists admit this, advocating through preparation for defense but preferring to defend on our own soil rather than upon the approaches to it.

As one who loves American constitutional democracy, I write to state my conviction that American institutions and all our American ways of life in economics, politics and religion, will be more endangered by a Nazi victory, followed by no aggression upon us, than by any other conceivable condition.

The greatest danger to American democracy is the danger from within. There are many fascist organizations in America operating much more openly and aggressively than the Communists dare do, and some of them have developed great skill in the art of winning unthinking support from persons untrained to the fear of Communism.

Such persons are prone to forget that the correct defense against Communism is by democratic means, not by democracy more attractive, rather than by espousing the extreme opposite.

Even a greater danger to democracy lies in the many highly respected patriotic organizations which have become quite definitely leaders in their policies and without fully realizing the fact. The firm foundations of fascism everywhere are a exaggerated nationalism, racial hatred and persecution, religious bigotry, economic exploitation of the weak, and suppression of opposing opinions. These anti-democratic tendencies are apparent among many organizations which started with high purposes.

Many individual Americans of high place and great power have

recently shown their anti-democratic leanings. This Jew-baiting of Father Coughlin, Harry F. du Pont, the "200 percent" nationalism of our service organizations, the persecution of our friends of the negro by Talmadge, Ryan, and their followers; the rabid indifference to the plight of the share-cropper and the "hole-in-the-wall" farmer; all these and many more are indications of a latent fascism which is ready to spring to life activity when furnished any viable cause.

Even the organization which calls itself "America First" is led by a man who has never criticized Hitler or his Nazi party, and whose wife has mentioned Christianity and capitalism together as two things she is no longer quite sure about, in a book which defends Nazism, Fascism and Communism as "the wave of the future."

I believe it very apparent that if the Axis be permitted to triumph, and America stays out of the war as that anti-democratic sentimentalist gold no hard one of war hatred around which to crystallize, we will find these anti-democratic individuals and groups eagerly asserting that democracy is inefficient and out-moded, and that we Americans should recognize the pattern of Hitler's new world order.

Democracy's greatest danger is from within, if Hitler triumphs. Democracy will be safe when all democratic peoples fight for it.

Two Hostesses To Philanthra Class

Mrs. Frank Costine and Mrs. J. B. Costine, Jr., were hostesses of Tuesday evening to the members of the Philanthra Class of the First Baptist Church at the home of Mrs. Costine for their monthly business and social meeting. A lovely arrangement of roses and bowls of various mixed fall flowers were used in decorating the room where the guests gathered.

During the business hour, Mrs. H. H. Shepherd, president, presided, and Mrs. R. H. Lawhorn was in charge of the devotional hour.

The evening was delightfully spent playing Pit. At the close of the evening, refreshments of ice cream topped with cherries, cake and salted nuts were served to Mrs. R. C. Weaver, Mrs. Jack P. Dalton, Mrs. S. P. Longbottom, Mrs. R. H. Lawhorn, Mrs. M. M. Foster, Mrs. E. Ray Wells, Mrs. Durrah Martin, Mrs. W. B. Archer, Mrs. R. H. Shepherd, Mrs. Charles Clements, Miss Gail Oren, Miss Eva Cump, Mrs. Alia Bell, and the hostesses, Mrs. Costine and Mrs. Costine.

Woman's Society Circle One Met

Circle One of the Woman's Society of Christian Service of the Methodist church met Thursday night at the home of Mrs. A. Mc Kee Ewell. Vases of pink vases and other mixed pink flowers decorated the room.

The book, "Upgraded Americans" was studied, the leaders being Mrs. Orr, Mrs. Maxwell, Mrs. E. A. Gerrard, Mrs. Harry Jackson and Mrs. G. B. Hall. Mrs. Orr also led in prayer.

A business session was conducted with Mrs. Gerrard as chairman. The hostess served delicious refreshments of frozen pineapple salad, saltines and cookies. Guests of Mrs. Ewell were: Mrs. G. B. Hall, Mrs. T. P. Turner, Mrs. H. W. Redick, Mrs. C. M. Gerrard, Mrs. H. A. Gerrard, Mrs. J. H. Redick, Mrs. Harry Jackson, Mrs. L. I. Hall, Mrs. L. M. Orr, Mrs. Hayes Maxwell and Mrs. J. T. Lamb.

Circle One Met With Mrs. Touchton

Mrs. Fred Touchton entertained the members of Circle One of the W. M. S. of the first Baptist Church at her home on Monday afternoon. Mrs. Touchton, circle chairman, was in charge of the meeting. Mrs. S. P. Longbottom led the discussion of the lesson from the study book, "Missionary Lessons from the Bible."

Dainty refreshments were served late in the afternoon to Mrs. B. J. Martin, Mrs. Otto Risig, Mrs. J. B. Costine, Jr., Mrs. E. Croft, Mrs. Chandler Wingfield, Mrs. S. P. Longbottom, Miss Mary Lutha Touchton, and Mrs. Touchton.

Mrs. and Mrs. Ed Welch left Monday for a vacation to points in Tennessee.

Mrs. Peden Hostess At Bridge

Mrs. Fred Peden was charming hostess on Saturday afternoon at her home to a number of friends for bridge. The floral decorations in the rooms where the guests gathered featured roses and sin-

Following several progressions, scores were tallied and Miss Iva Phillips received an Evening in Park bath powder and toilet water for holding high, and Miss Mildred Milnes was presented a pair of wall plaques for holding second high. Late in the afternoon, a delicious course of ice cream and ginger ale was served to Miss Millie Pearson, Miss Alma H. Lawhorn, Mrs. Cook, Miss Julia Norstie, Miss Elizabeth Green, Miss Sarah Brown, Miss Iva Phillips, Mrs. Charles Sherman, Miss Mildred Milnes, Mrs. Philip Boardman, Miss Otto Metcalfe, Miss Frances Lurvey and the hostess, Mrs. Peden.

Circle Two Met With Mrs. Lawhorn

Circle Two of the W. M. U. of the First Baptist Church met with Mrs. R. H. Lawhorn Monday afternoon. Mrs. J. H. Singletary opened the meeting with prayer, and Mrs. Lawhorn, president, presided over the business session. Mrs. S. J. Pendleton taught the lesson from the study book, "Missionary Lessons from the Bible," and closed the hour with a prayer.

The hostess served delicious ice cream and cookies to the following members: Mrs. Erice Willis, Mrs. S. J. Pendleton, Mrs. D. T. Lockett, Mrs. Ernest Spencer, Mrs. J. H. Singletary, Mrs. R. P. Sappleton, Mrs. E. C. Weaver, and Mrs. Lawhorn.

Trump-It Club With Mrs. Deshong

Mrs. Collin Deshong was hostess on Thursday afternoon at her home in sebring to the members of the Trump-It Club. Lovely seasonal flowers were used in decorating the party room.

A delicious sweet course and iced tea was served at the beginning of the afternoon, followed by several progressions of bridge. When the scores were tallied, Mrs. H. G. Thompson held high score and received a lovely hand knitted purse. Mrs. Helen Ginn was second and was presented a hand-knitted handkerchief. Mrs. T. J. McGinnis, Jr. received floating prize, a set of pot holders.

Legion Auxiliary Met Monday

The American Legion Auxiliary met on Monday evening at the Customer's room of the Florida Public Service Company. Mrs. Ruth Cline presided over the meeting at which time routine business was discussed. Present were: Mrs. D. C. Perry, Mrs. Ruth Cline, Mrs. Ben Stewart, Mrs. W. J. Pratt, Mrs. Charles Sherman, Mrs. David Stuckey, and Mrs. Mary Holcombe.

JOHN WAYNE

St. Margaret's Guild Meeting

The St. Margaret's Guild of the Episcopal Church met Wednesday at the home of Mrs. Sue Gregory at Lake Byrd Lodge. Following the delicious covered dish luncheon, a business meeting was held with Mrs. R. I. Brown, president of the group, in charge.

Mrs. Thompson Is Circle Hostess

Mrs. R. B. Thompson was hostess Tuesday at noon to the members of the Woodman's Circle with a covered dish luncheon at her home. Seasonal flowers were used in decorating the party room.

Following a delicious luncheon, a business session was held with Mrs. Harry Jackson presiding. Present were: Mrs. Harry Jackson, Miss Daisy Ten Eyck, Mrs. Lawrence Johnson of Lakeland, Mrs. Harvey Hardin, Mrs. W. R. Redick, Mrs. J. T. Lamb, and the hostess, Mrs. Thompson.

Mrs. C. H. Walker Is Bridge Hostess

Mrs. C. H. Walker entertained a few friends Monday at noon with a delightful bridge luncheon. Following a tempting two-course luncheon, several progressions of bridge were enjoyed by the guests. Mrs. J. Paul Garber held high score at the conclusion of the game.

S. Side Baptist W. M. U. Meeting

The W. M. U. of the South Side Baptist Church met Sunday afternoon at the church. Mrs. Clifford Lassiter, president, opened the meeting with a song. Mrs. L. E. Morgan had charge of the Royal Service program. Mrs. Lockett of Wauschula concluded the meeting with a very interesting talk.

The next meeting of the group will be at the home of Mrs. James Finnell on Monday evening, September 22, and all members are urged to be present.

Mrs. N. A. Stewart of Columbus, Ga., Is the Guest of Her Son and Daughter-in-Law, Mr. and Mrs. Ben Stewart.

Mrs. W. M. Reck left last week end for Pittsburgh, Pa., where she will visit friends and relatives for some time.

Mrs. C. H. Pardee, Mrs. S. C. Pardee, and Miss Mary Pardee were business visitors in Tampa Thursday.

Miss Home Bryant of Sanford has arrived in Avon Park and assumed her duties as secretary at the Jacarana Hotel.

Mrs. H. G. Thompson of Montgomery, Ala., arrived Monday for a visit with her daughter and son-in-law, Mr. and Mrs. J. B. Francis.

Miss Ruth Wild, daughter of Mr. and Mrs. Max Wild, left Tuesday morning for Tallahassee where she will attend Florida State College for Women this winter.

Weyman Carver, son of Mr. and Mrs. R. A. Carver of this city, left Tuesday morning for Gainesville where he will enroll as a freshman at the University of Florida.

Charles Shepherd, son of Mr. and Mrs. C. H. Shepherd left Tuesday morning for Gainesville where he will begin his sophomore year at the University of Florida.

Charles Locke and family have rented the lovely home of Mrs. Jean Ricketta on Lake Lotella recently, and expect to be located there a year or more.

F. M. Wolf returned Wednesday from a two week trip to Washington, D. C. Baltimore, Md., Richmond, Va. and other northern points.

Mrs. Rosa Blanton of Mulberry is the guest of her daughter, Mrs. Vera Vismar, this week. They have both recently returned from a visit to Clearwater Beach.

TROPICAL SKATER

No, this isn't Santa Henle in California. It's Ice-Capt Shirley Davies in the Tropical Garden at the Florida State Exhibit in Atlantic City.

Dim Study Lights Harm Young Eyes

Homework, required reading and long hours of study in preparation for exams are just as much a part of school life as regular attendance at classes. If a child is to receive high grades, this work at home must be done without tiring him excessively, or straining his young eyes.

He should, of course, have a room or place of his own, in which he can study regularly, and in privacy. Proper selection and care of the lighting arrangements in this room are of the utmost importance, both in the amount of success he enjoys in doing the work, and in protecting his eyes from eyestrain.

Recommended Lighting An I. E. S. lamp on his desk is recommended by lighting authorities. This lamp filters out harsh glare, supplying only soft, steady light that is kind to his eyes. The shade, diffusing bowl and height of this certified lamp are all carefully and scientifically designed to provide the best and safest in modern lighting.

If his room is spacious, a ceiling fixture to spread cheerful light throughout the room, and to avoid shadows and gloom, should be in use. When there is only one bright area in an otherwise dark room, each time he glances up from his work, his eyes are shocked by the sharp contrast.

Parents who question the ability of the lighting in their child's room to protect his sight can very easily verify their suspicions.

Avon Park Young Folks Returning To Colleges

About this time each year, with school bells ringing for their younger brothers and sisters, the young men and women of Avon Park of college age prepare to leave for their respective colleges and universities. Among those who have left, or will leave within a few days for various colleges in the south, from Avon Park are: Miss Mary Pardee, who will return to Stetson University at Deland; Miss Gail Oren, who will return to Wheaton College, in Wheaton, Ill.; Charles Shepherd, returning to the University of Florida at Gainesville; Miss Dorothy Hughes, who is beginning her senior year at Florida State College for Women at Tallahassee; Miss Jean Hart, who will enroll for her senior year at the University of North Carolina at Chapel Hill, N. C.; Miss Barbara Betts, who has gone to Brenau College, at Gainesville, Ga., to enroll for her senior year; Miss Nancy Betts, who has also returned to Brenau College, at Gainesville, Ga.; Miss Jane Clements, who will enroll at Alabama Polytechnic Institute at Auburn, Ala. for her sophomore year; Ralph Helm, who is returning to the University of Florida at Gainesville; Weyman Carver, who will begin his freshman year at the University of Florida at Gainesville; Miss Ruth Wild, who is attending Florida State College for Women at Tallahassee; Miss Frances Brown, who will begin her Junior year at the University of Georgia at Athens, Ga.; Miss Elsie Dickinson, who will return to Trevecca College at Nashville, Tenn.; and Cecil Clements, who will graduate with a B. S. degree from Alabama Polytechnic Institute, at Auburn, Ala.

Local Teacher Given Certificate

State Superintendent Colin Engle said today that Mrs. Edna Coker, of Sebring, and Mrs. Ruth Cook Dransky, of Avon Park, have been awarded Florida teaching certificates based on four years of college training.

Pepper Still Wants Cross State Ditch

JACKSONVILLE, Sept. 11 (FNS)—Senator Claude Pepper here last week declared the future of the Florida ship canal was "bright," that it was making substantial progress. He said that the proposal for the canal was now in its proper place in the House and Harbors bill and he predicted it would remain there when that bill comes to the floor of the House of Congress. He further gave positive promise that he would fight to preserve it in the bill when in Senate committee and again on the floor of the Senate.

He explained that if the canal were now in existence it literally would act to increase the number of tankers available to supply the Eastern Seaboard.

FORD GOOD DRIVERS LEAGUE

LET THE ENGINE HELP YOU MAKE

At any speed—other than very

very low—let the engine help you

make the most of the road and it

doesn't require any gas. In using

the engine for a brake, leave the

clutch in the "up" position, and

stopping point. Then kick the clutch

pedal to make the stop. In the il-

lustration, the left foot is getting ready

to depress the clutch pedal when the

right foot and engine have slowed the

car down to the proper speed.

If you can see far ahead that you

must make a stop, the engine can

much of the braking for you and

thus save the brakes from excessive

wear.

State Air Squadron Gets Fine Publicity

WEST PALM BEACH, Sept. 11 (FNS)—Florida is indebted to Art Kell, publicity director of West Palm Beach, for nationwide publicity given this state through a feature article in last month's issue of "The Sportsman Pilot," an aviation magazine read by civilian aviation enthusiasts throughout the country.

Kell points out that Florida today is showing the way in civilian air defense through the establishment of the "First Air Squadron, Florida Defense Force," with headquarters established at Morriston Field, West Palm Beach, which now numbers 67 members and has 27 planes in service. Credit is due Captain Wright Vermilye, Jr., President of the Palm Beach Aero Club, for its organization, and it is the first civilian squadron in the United States to receive official recognition.

Regulations call for 3-year enlistments, specific training similar to National Guard operations, and uniforms, as well as arms, are furnished by the state as provided by recent legislative action.

FLORIDA PUBLIC SERVICE BELLS DEFENSE STAMPS

Florida Public Service Company is one of the first organizations in the State of Florida to cooperate with the Treasury Department by helping in the sale of Defense Savings Stamps. The Defense Stamps have been on sale in all Florida Public Service offices since the first of August. They are offered at the Cashiers' desks for the convenience of the public. A brisk sale has been reported.

Smile Awhile

That Was Proper
Father and son were running a business.
"Dear in mind," said the father, "I am the main support of the firm."
"Right!" said the son. "You're on our billheads as J. Brown, Prop."

No Burden
"No doubt you will allow me to make my family with me," said the husband, who had been backward with his wife.
"Certainly," replied the landlady. "Your other collar is desirable."

Later Acquaintance
The harassed husband was bemoaning his lot.
"But," said his friend, "I know your wife Gertrude as a child—she was just 'Gert' to me!"
"Well," came the answer, "she's just 'rude' to me!"

Urban—Has Jack ever kissed you when you were with him?
Urban: No, but he thinks he has.

Free-Shell
They were just married and she had cooked her first chicken.
"What did you do to it, dear?" he asked. "I had did you stuff it with, I didn't require stuffing, darling," she replied. "I won't follow."

Cutting Reply
"Your hair needs cutting badly, sir."
"No it doesn't; it needs cutting well. You cut it badly last time."

If Jacobs Protested—
Abrams Had a Remedy

Abrams and Jacobs took up golf. One afternoon they were playing for a stake of one dollar a hole, and the competition was spirited. Abrams drove into a bunker. With his iron he made four ineffectual swipes, raising the sand in clouds. Then he stopped, picked up the half-buried ball, and tossed it out on the fairway.
"Look here!" roared Jacobs. "You couldn't do that. It's against the rules."
"I've already done it," said Abrams, calmly.
"But I tell you it's against the rules. What am I going to do if by such tricks as that you win?"
"Sue me," said Abrams.

HOLDING COMPANY EVIL EXPLORED

Dr. Waterman, Professor of Finance at the University of Michigan, recently prepared a statistical study of utility holding companies for submission to the SEC which is of great interest. It amounts to a definite denial of misconceptions concerning holding company operations, which have long existed in many minds.

First, the study shows that the operating subsidiaries of holding companies usually charge lower rates for service than do other utilities.

Second, it shows that the larger subsidiaries of holding companies charge the very lowest rates to consumers.

Third, it shows that the distance at which operating subsidiaries are located from holding company headquarters, has no bearing on their efficiency and economy.

Fourth, the effectiveness of state regulation is not influenced by the holding company, as the states have adequate power to control the operating subsidiaries.

Fifth, it shows that the investor in holding companies is given the same protection as the investor in other types of utilities.

Those who fear the nation's laws should take note of this. The Holding Company Act, which contains the notorious "death sentence" clause, was based on the untenable supposition that holding companies were 100 per cent evil, and should be ruthlessly destroyed. Under that law, the largest and most efficient power systems in the country are in danger of being broken into bits, at immense cost to their investors, their employees, and the communities and consumers they serve. The achievements of the holding company, which has been largely responsible for the creation of low-cost, highly-rated electric service to all the nation, would thus be abrogated.

Dr. Waterman's study is in accord with that of other experts, who believe that mutually regulated holding companies are vital to utility progress. The death sentence provision of the holding company law must be corrected.

HAS LABOR GONE MAD?

The railway labor unions are now demanding wage increases averaging 43 per cent. If these increases were granted in toto, the additional wage cost to the railroads would be \$900,000,000 a year. F. J. Gavin, president of the Great National Railway Union, recently pointed out just how big a sum \$900,000,000 is.

It is more than four times the sum that Congress has authorized to be distributed to farmers this year in parity payments on the five basic crops.

It is more than the value of all the wheat and potatoes produced in the United States in 1939.

It is more than the total annual gross revenue of the United States Postal department.

It would take every cent of the total railroad freight revenue for the first two and one-half months of this year.

This gives you an idea of what the railway labor unions are demanding. And railway labor is, generally speaking, the best paid on earth. A computation based on Social Security Board figures for 1939 (the latest statistics available) shows that the average annual earnings of railroad employees were approximately 50 per cent more than the earnings of employees of other industries. And railroad working conditions, hour provisions, etc., are extremely favorable to the worker.

Furthermore, the \$900,000,000 demanded is more than 20 times the average net income of the railroad industry during the ten years which ended in 1940. If the demanded wages had been in effect last year, the railroads would actually have lost \$480,000,000. Granting of these astronomical wage demands would make absolutely unavoidable a tremendous increase in the rates the railroads charge for transportation. And that would be a long step toward ruinous general price inflation. Has the leadership of railroad labor gone absolutely mad?

HENDERSON & CO. ARE ATTACKED

Chairman Martin Dies doesn't declare any moratorium on Communists, and despite friendly relations between the United States Government and Soviet Russia, Dies finds no reason to suppress his opinion that Leon Henderson of the Office of Price Administration and Civilian Supply should be made to "walk the plank" and take with him some of the principal members of his organization, who are also accused of being traitors to the Communist movement. Mr. Dies goes into details in a letter to the President.

Evidently Chairman Dies is not very likely to get easily angry—even if he is given White House cooperation. Inasmuch as Harry Bridges is still enjoying the glorious climate of California after several years of demands, prosecutions, and investigations of his right to remain in the United States because he is alleged to be a Communist.

The only real good that can be accomplished through the Dies letter to the President is that it may attract public attention to Henderson, who should be judged by his official acts in connection with his position as a key man in National Defense. In that connection he has issued some of the most extraordinary orders with the control of American citizens and business that could be conceived, or concocted by the human mind. There is a sort of a pause in enforcing objections to Communism since Churchill and Roosevelt called Russia as "a friend in need who had been a friend indeed" in founding the "strut" of Hitler.

The Senate of the United States has been inclined to judge Henderson on his merits. A lot of the statements believe he has no authority to fix prices,

and muddle so many problems relative to national defense.

WHO PULLS THE STRINGS?

Millions of good citizens in this country have watched the various government investigations of Harry Bridges, and Pacific Coast labor leader, and alleged communist.

Deportation proceedings against him have been hanging fire for years. The Federal Bureau of Investigation has completed its job of presenting evidence to the Department of Justice for deportation, and yet no action is taken.

If Mr. Bridges wants to stay in this country, why has he remained an alien citizen for 17 or 18 years? Should aliens guide the destinies of labor in our nation?

How many more years will those responsible for the conduct of this case, play horse with the American people, the FBI which has done excellent work in unearthing alien activities, and with Mr. Bridges himself?

How much longer will this farce continue?

READING FOR BREAD AND WATER RATONS

President George S. Benson of Harding College, Searcy, Arkansas, recently appeared before a House Committee and presented a detailed report on how the Federal Government can be at least \$20,000,000—and none of the culprits advocated would in any way affect the defense drive. They would all be made in non-essential undertakings.

Sometime ago, the Secretary of the Treasury, also testifying before a Congressional Committee, said that non-defense expenditures could be reduced \$1,000,000,000 or more.

Yet Congress, so far, has shown absolutely no disposition to make any reductions in spending. It is simply piling the gigantic defense expenses on top of our already distorted budget. Unless an avalanche of public force a change in that attitude, there will be but one end—national bankruptcy, national disaster, national collapse, and bread and water rations for every man, woman, and child in the land.

TOO LATE TO CLASSIFY

BY RUSSELL KAY

After spending the better part of his life in the newspaper business, Charlie Foreman found himself out of a job a couple of years ago and at that time jobs were pretty hard to get.

For a chap who has kept busy all his life, this business of having nothing to do is mighty hard to take. Charlie just had to do something, so he began to tinker around in his work shop at home, repairing this or that, and searching some employment that would bring in a shakedown or two.

He fixed up a sunbather in his spare time and one day he happened to pick up a magnifying glass, you know, the kind we all played with when we were kids, focusing rays through it on a leaf or piece of paper to set it afire.

Charlie was struck with an idea. Why not use a powerful magnifying glass for sun-bathers instead of ordinary glass, and thereby get much more intense heat with less heating surface required? He started to experiment and for the better part of two years has been developing a new and novel type of sun-water heater.

He has secured his patents and now is installing them and they work like a charm. He even built a small unit with a box only 2 by 4 feet for a trailer, which provides the vehicle with scalding water at all times, heat the entire house in winter and cool it in summer, with no fuel or power required, this being taken from the rays of the sun gathered by his remarkable device which he has named "Magniflex."

Something New Under the Sun.

Steam radiators will provide the heat for the house in winter and insulated tanks will store hot water. In summer by applying sun heat to a refrigeration unit just as gas heat now is used in mechanical refrigerators to produce ice, he figures that the sun's rays can be employed the year around to keep your home at an even comfortable temperature from one installation.

In the meantime, in collaboration with Dr. Albee of Venice, he built a special sun box, using screens and his special glass will use in ultra-violet ray treatment. The device screens out rays that burn and magnifies the health giving ultraviolet rays.

One of the problems he encountered in building insulated water storage tanks was the question of dependable insulation. Cork was off the market and he had to look around for something else. To his amazement he learned that a chap in Menzies county near his home was processing scrub palmetto roots and that his product was even better than cork for insulation purposes.

Samples of the product were sent to one of the nation's largest manufacturers of cork insulation and they were so impressed by it that they immediately investigated and ordered 40 carloads for their own use.

Authorities claim that the product, which was developed through the experimental efforts of a chap named Keller at Bradenton, possesses all the requirements of a first grade insulation and is equal to cork or fiber glass.

At present no effort has been made other than to market it through the experimental efforts of a chap named Keller at Bradenton, possesses all the requirements of a first grade insulation and is equal to cork or fiber glass.

At present no effort has been made other than to market it through the experimental efforts of a chap named Keller at Bradenton, possesses all the requirements of a first grade insulation and is equal to cork or fiber glass.

At present no effort has been made other than to market it through the experimental efforts of a chap named Keller at Bradenton, possesses all the requirements of a first grade insulation and is equal to cork or fiber glass.

At present no effort has been made other than to market it through the experimental efforts of a chap named Keller at Bradenton, possesses all the requirements of a first grade insulation and is equal to cork or fiber glass.

Sunday School, 9:30 A. M.

Holy Communion and Sermon 11:00 A. M.

Richard I. Brown, vicar.

Union Congregational Church

Dr. Alfred C. Elliott, Pastor

Sunday School at 10:00 A. M.

With classes for all ages. Topic for the month of September is "The Victory." Life is a series of conflicts. In the great conflict between Good and Evil, Right and Wrong, which will win? It is not always true, as Napoleon said, that "God is on the side of the big battalions," for sometimes, "One with God is a majority." One with God is a majority of ultimate and final victory to those who fight for the Right. Come, and let us discuss this topic together.

Morning worship service at 11:00 o'clock, when Dr. Elliott will speak on "The Crying Babel." You are invited to hear this message, enjoy the service and receive the full uplift of this hour of inspirational worship.

The Ladies' Aid will meet next Wednesday night at the Church at 8:00 P. M. Plans for the fall and winter's work will be discussed, and all members are urged to attend.

Churches of Christ, Southeast

"MATTER" is the subject of the Lesson-Sermon which will be read in the Church of Christ, Southeast, following the world on Sunday, September 21.

The Golden Text is: "Love not the world: for all that is in the world is of the world" (1 John 2:15).

Among the citations which comprise the lesson is the following from the Bible: "For we know that if our earthly house of this tabernacle were dissolved, we have a building of God, an house not made with hands, eternal in the heavens. Now he that hath wrought us for the abode of this life is God, who also hath given unto us the earnest of the Spirit" (II Cor. 5:1, 5).

The Lesson-Sermon also includes the following passage from the Christian Science Textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Spirit, God, has created all in and of Himself. Spirit never created matter. There is nothing in Spirit out of which matter could be made, for, as the Bible declares, without the Logos, the Aeon or Word of God, 'was not anything made that was made.'" (p. 307-123).

Large Force Of

Workmen Getting

Flying School Ready

For Early Opening

(Continued From Page One)

Avon Park real estate men announced today that they are preparing to open a flying school for the winter season.

The school will be located on a 200-acre tract owned by a local landowner, and will be operated by a local pilot.

The school will offer instruction in all phases of flying, including private and commercial licenses, and will also offer instruction in the use of gliders.

The school will be open from October 1 to March 1, and will accept students of all ages and backgrounds.

The school will be a valuable addition to the local aviation community, and will provide an excellent opportunity for those interested in flying.

State Farmers Markets and Diversification Helps State

By Clyde J. Baeer

For many years agricultural experts have been preaching the doctrine of crop diversification as the specific cure for financial ills besetting the farmer. The farmer, they say, should not put all his eggs in one basket; he should diversify his crops and his income.

The State Livestock Markets at DeFuniak Springs sold more than \$443,880 worth of stock last year, and sales for July and August of this year amount to more than \$100,000.
