

DOTTED LINE Honeymoon

By JOSEPH McCORD

CHAPTER I

Virgie Blake, second in command of the cigar counter in the Hotel Rayner's imposing lobby, was studying the profile of a guest who stood near one of the large windows. The man, dressed in a tuxedo, was looking across the back of a chair, gazing out moodily into the street where sheets of driving rain marched under a leaden sky. An unlighted pipe was clamped between his teeth. Virgie had approved of this stranger the first time he came to pass the stand. It must have been nearly a week ago. She liked his broad shoulders, the red-tinted eyes under their straight brows, the lean face bronzed by long out-of-door exposure. His lower jaw was heavy with a trifle of crisp dark hair, and in the suit of rough gray tweed. Yet there was an air of strength in all the man's leisurely movements. He gave an impression that he might act with disconcerting swiftness if need be.

Virgie Blake decided pleasantly and promptly that there was "something about him." And let it go at that.

Not quite, for she had taken occasion to glide over to the desk and make a private investigation. The first time she saw this guest asking for his key and letters.

"Oh, Eddie, darling . . ." Virgie smiled persuasively at the room clerk on duty. "Who's the party who just took his key?"

"Forty-sixty-one . . ." Sawyer's forehead traveled down the vertical card file near his elbow. "The name is Cutter—L. M.—from Montreal."

"Thanks."

"Not at all. Is he the day's particular thrill?"

"Eyes, Eddie."

Miss Blake's crimson lips curved in a smile of anticipation today when she observed "466" turn away from the rain-streaked window and stroll directly towards the cigar.

"Smoking tobacco," he suggested affably, resting his arms on the display case. There was a latently sinister smile, too. "Very nearly a draw."

"What brand please . . . Mr. Cutter?"

A faint flicker of amusement showed in the dark eyes at the saleswoman's use of the name. He pointed with the stem of his pipe.

The buyer lingered to open the case. He crowded tobacco into his pipe bowl with practiced care.

"Do you think it's ever going to stop raining?" Virgie ventured.

"You know, this sort of day fairly gives me the jitters," her voice displayed a confidential note. She swayed nearer, in a graceful pose.

"Does it make you feel that way, too?"

"It's not . . . conducive to . . . frenzied . . . enthusiasm." The words were accentuated by the nodding in the direction of a small glass enclosed office not far away. "I should be glad to see your stenographer a bit. She doesn't seem any too busy."

Something in the tone of his voice caused Virgie to take the same direction. She attempted a mysterious smile, as she asked the unexpected question, "Are you a sales?"

"No . . . why?" Cutter did not turn his head as he spoke.

"Then you won't get very far . . . with her."

"I'm only thinking of letters. Doesn't she take dictation?"

"Sure! She's a wit. Sweet kid . . . but funny. I was just trying to give you a tip, that's all." Virgie made the explanation a trifle uncomfortably. She was dumb to pull that one. But it was too late now. Her new friend was plainly interested.

"I'm afraid I don't get it," he admitted, taking his pipe from his mouth. "You're a long ways from salt water here. Should I dash over and tell her the earth. And to make sure about the color of those eyes."

That bothered him most of all. "You know, as long as they stick to their home work, she lets 'em think they're giving her a big moment. If they drop a stitch . . . You know what I mean. She's that way."

"Um . . . mm." Cutter continued to stare at the stenographer as if were the first time he had chance to observe her. Very little more, but his head and shoulders were visible through the glass panel. The glow from a shaded desk lamp shone warmly on her cinnamon-brown hair, a swelling job of shining waves that covered the small bowed head. Apparently, she was reading.

"Pretty hair," Cutter observed reflectively around the stem of his pipe. He might have been speaking his thoughts aloud.

"Gorgeous," Virgie agreed, with commendable enthusiasm. "She's an awfully cute little somebody. That's

et, on top of the magazine she had been reading. Cutter was rewarded with a friendly smile.

"Of all things in the world! Those eyes were blue! So deep a blue they were almost black. Lorraine!" Cutter halted in his tracks, stood staring.

"Is there something I can do for you?"

"No . . . the dictator blurted. "Why, yes! Of course. I had a letter . . . if you're not busy."

Nimble white fingers already were inserting paper in the machine.

"Please sit down. Will one carbon be sufficient?" the little stenographer inquired briskly.

"Fifty. Too much . . . Just a personal letter."

Cutter clumped gratefully into the chair at the end of the desk. However, he did retain sufficient presence of mind to lay his folded newspaper in his lap. One of its column heads was marked heavily with a pencil.

As an afterthought, he fumbled some letters from an inner pocket then managed a surreptitious glance at his paper.

"This is to . . . Royal Allan, I'll have to check on the address later. Just say . . . Dear Roy." A pause. It seemed good of you to take the time to write so soon after you got back. I understand that you wrote up a big find out there in . . ."

Cutter glanced at Miss Anthony to see if she was watching him. She was not. With a fleeting glance, he looked at the name of that place. "He muttered lamely. "Afghanistan, I think."

"The Barmian Valley," his stenographer supplied promptly.

"Of course! Stupid of me to forget. How did you know that?"

"I have been following Mr. Allan's work in the papers. He uncovered an old city there. They think it belongs to a lost race!"

Here was a different Jacqueline Anthony. The traced forward, the rays from the lamp falling on her eyes. Little she knew the eyes were wide. Shining with excited interest. Like a child's.

"And you know Royal Allan, the archeologist?" She said it almost reverently.

"Oh, rather. Old schoolmate." Cutter watched the light play on the waves of that cinnamon-brown hair.

"It must be fascinating to visit such places." Jacqueline's two hands were folded over the typewriter. The letter was forgotten. A wishfulness in her voice matched that of her eyes.

"Then you've never been abroad?" came the crafty suggestion.

"No. Have you?"

"Occasionally. I was fourteen the first time. My dad was going over on business and took me. We crossed on the old City of New York. I remember we hit a storm that scared me out of a week's growth."

"I would have loved that storm. I've never seen a big ship," Jacqueline admitted regretfully.

"I'm surprised you haven't tried the big pond, if you're so keen on ships."

The cinnamon head shook a quick denial. "That takes money," its owner countered lightly. "I do my traveling in books."

"It doesn't take very much these days," Cutter insisted. "You really should do it." He spoke with great earnestness.

"I'd love to. More than anything in the world."

For the once, Jacqueline Anthony seemed to forget that she was conversing with a stranger. Here was a man who had been places. In spite of his careless way of talking, she knew that the world's out of the way places held a lure for him. The two of them belonged to the same restless fraternity. Before she quite realized it, she was telling him something of her own desires.

"It's some sort of obsession," was her explanation. A faraway look had crept into the blue eyes. "I've always been that way. I do read everything I can find about travel . . . strange lands. I even keep an atlas hidden away there and look up all the places."

"I understand that."

"Do you? Everybody around here knows me," she smiled. "I don't wonder. I guess I'm . . . funny." Jacqueline, unconsciously, had adopted Virgie Blake's verdict.

"It's not funny at all," Cutter objected stoutly. "It's . . . it's tragic."

"What do you mean?"

"Just that. The tragedy of youth. Not believing most dreams are possibilities, until it's too late . . . sometimes."

"It's nice of you to put it that way. I'm not . . . so young."

"Not long ago," said Miss Anthony. "In his own mind, Cutter spoke that name without noticing the sudden surprise in the blue eyes watching him. "It only you would say to yourself, over and over and over! 'I'm going to . . . the Barmian Valley . . .'" He smiled a little at the words. "If you'd just do that, you'd begin to believe it. And, if you believed it, it would come true. It would have to. Some day, you'd find yourself there. Don't you see?"

"I only could." The words came across his desk with a little sigh.

"But you can!"

Cutter jerked himself upright. He bent forward until his face was full of the light. The heavens were a determined glint in his dark eyes.

"Why do you say that?" was the girl's startled reply. "How could I?"

"Simple enough. You can marry me. By the way . . . My name's Larry Cutter."

Improve SUNDAY Universal SCHOOL LESSON

By RANDOLPH L. LUNDQUIST, D. D.
Dean of The Holy Bible Institute
(Released by Western Newspaper Union)

Lesson for September 21

Lesson subjects and Scripture texts are prepared by the Bible Institute of Chicago, Department of Bible Education, under the direction of the National Bible Conference.

OVERCOMING THE ADVERSARY

LESSON TEXT—Revelation 12:7-12

GOLDEN TEXT—And they overcame by the blood of the Lamb, and by the word of their testimony; and they loved not their lives unto the death.

War! What a familiar word. Men are saying we should put an end to war. We wish it were possible, but as long as sin rules in the hearts of men, there will be wars; in fact, our lesson tells us of a greater war that is taking place in the heavens. The devil is busy not only on earth, but in the heavenly places, and wherever he is there is war. When Christ, the Prince of Peace, comes to reign will peace come to all the earth.

Our lesson presents three scenes: Conflict in heaven, rejoicing over victory there, and a victory on earth which brought joy to his heart.

I. War in Heaven (12:7-9). A clear, succinct, and helpful word on these verses is quoted from Dr. John R. Brinkley:

"The dispensational interpretation of this passage is that during the period of tribulation, which follows the return of the saints, as described in I Thessalonians 4:13-18; I Corinthians 13:24, 25, and other passages, there will be a war in heaven between Michael and his angels and the devil and his. Satan is not in hell now. It is wrong to teach that he is. He is the prince of the power of the air. He rules the darkness of this world. He inspires wickedness in his domain and on earth. Against these conditions the Christian is solemnly warned to prepare (Eph. 6:10-12). When we say that Satan is in heaven, we do not mean the heaven of the immediate presence of God. The Bible speaks of different heavens and there is even a heaven of heavens (I Kings 8:27).

"From whence come all the currents of wickedness now sweeping over the world—many of them contrary to the wishes of the vast majority of the people? That there is a malignant genius directing sinister operations to hinder and baffle God to the ruin of the human race, to understand. Many people ask, 'Why does not God destroy him?' The answer is to his credit. Satan is his power is coming. He will be expelled from his domain by Michael and his angels. Then, because the people of this world have co-operated with Satan so willingly, he will be allowed to take refuge in the earth. He will come down (v. 12) in great wrath, 'because he knoweth that he hath but a short time.'"

II. Rejoicing in Heaven (12:10-12). If we accept what seems to be the correct view, namely, that the war of Revelation 12:7-9 is fought in the heaven in which the child (v. 3), who is Christ, was born, then it would appear that those who have rejoiced in the victory over the dragon (Satan) would be the Jewish believers who will have come through great tribulation. At the same time it is quite appropriate to apply the truth of the passage to us who now find ourselves in conflict with Satan's powers.

The accuser does not hesitate to appear even in the presence of God to bring charges against us (see Job 1:6-12). But we need not fear him, for he is already judged (I John 3:10) and will (as we see in our lesson) one day be cast down to earth, and (as other Scripture reveals) he will ultimately be cast into the lake of fire (Rev. 20:10).

But he is here now, a supernatural (but not divine) being, plaguing us, tempting us, accusing us. What shall we do about it? As to his accusation, we know we have a just and loving God, and also have an Advocate to plead our causes before Him (I John 2:1). For his present attacks, our lesson gives the secret of spiritual victory in verse 11.

III. Victory on Earth (Rev. 12:11-12). The scene of victorious rejoicing which we see here is evidently in heaven, but it is because of victory on earth. Here are the reasons: "They sing the song of Moses and the Lamb (Rev. 15:2-3) and Rev. 5:9-10). It is right, that we should not do as the Lord should sing, glorifying the name of God (v. 4) and magnifying His great and marvelous works (v. 12). We are to do this, not only again that if we are Christians, we are on the victorious side. The glimpse into the heavens which we find in our lesson should give us the right perspective with which to view the troublesome experiences of this life. It has a plan, and He will bring it to complete and victorious fruition in His own time and His own way."

RALEIGH CIGARETTES

NEWS and VIEWS ON ECONOMIC PROBLEMS

The Senate has approved and returned to the House, for possible amendment, the toughest tax bill in American history. If it passes in its present form—and the odds are a much against any major changes—the American people, next year, will really learn at first hand just how incredibly costly modern war is.

The bill is designed to raise \$3,563,000,000—\$367,000,000 more than the bill originally approved by the House. And it plans to raise it, partly by reaching down into income levels which have never been subjected to direct Federal taxation before.

Most important change in the Senate bill over the House bill was the provision dropping income tax exemptions to \$1,000 for married persons (previous exemption was \$2,000), and to \$750 for single persons (previous exemption was \$500). This change alone, expected to yield an additional \$303,000,000 annually, it is a change which has long been advocated by economists, who believe that the burden of government costs is now so great that the middle and higher income brackets can no longer pay it. Thus, they reason, the only solution is to make the lower brackets feel the bite of taxation too.

This change was suggested by President Roosevelt when the tax bill was still before the House revenue committee, and he is expected to adopt it. It is, therefore, likely that a strong effort will be made in the House now to up the exemption level.

The normal rate of income taxation—4 per cent—is retained. However, surtaxes will be imposed in the lower brackets than before. The surtax rates are very high, ranging from 10 per cent (which must be added to the normal 4 per cent) in the lowest brackets touched, and ranging up to 81 per cent in the top brackets.

The existing personal corporation taxes will be retained and, in addition, surtaxes of 6 per cent on the first \$25,000 of net income and 7 per cent on income above that amount, will be levied. Further, excess corporation profits will be levied at 10 per cent of excess profit, but not more than 25 per cent. The rate will go up until it reaches 40 per cent. Present rate is 30 per cent. Present rate at that level is 50 per cent.

Lastly, the bill levies a number of so-called "miscellaneous" taxes which fall into the sales and excess classifications. There will be a 7 per cent excise tax on automobiles manufactured, plus a 5 per cent annual use tax on all automobiles—a provision which amounts to a Federal car license fee. Wine taxes will be almost doubled and hard liquor taxes will be upped from \$3 to \$4 a gallon. Ten cent taxes will be levied on local phone bills, theatre tickets, radios and other musical instruments, sporting goods, household equipment, photographic apparatus, etc., etc.

Heavy as this tax bill is, few believe that it will prove adequate. Soon our arms spending alone will reach \$10,000,000 a month—nearly as much as the new bill is designed to raise in an entire year. Total arms and aid-to-democracies spending will probably reach and perhaps surpass \$50,000,000,000, depending on how long the war lasts. Many an authority is convinced that this bill is only a taste of what is to come—and that next year or the year following, the Congress may have to pass another tax bill which will make this one seem mild by comparison.

When the news broke that the Federal Reserve Board was preparing regulations to control installment credit, buyers rushed in to buy cars, refrigerators and similar goods before the deadline, in fear that the new rules would make installment purchasing next to impossible. Now, however, the rules have been issued, and it appears that this fear was generally unfounded. All they do is to prevent the issuance of excessive credit, and to make illegal certain credit practices which industry and financial authorities alike have long considered unsound and potentially dangerous.

You'll have to pay a third down when you buy your new car, the trade-in of your present car may be used for all or part of that third, as in the past; and maximum period of payment is 18 months. If you want a new refrigerator, ironing board, electric dishwasher, washing machine, room-unit air conditioner, radio set or musical instrument, you must pay 20 per cent down and the balance in 18 months. For furniture, water heaters and pumps and other home items, only 15 per cent need be paid down, and 18 months credit period is allowed. On materials for house improvement or alteration, there is no limitation on the percentage of credit that may be issued, up to \$1,000, but the payoff must be made in 18 months.

Some think that in the future these rules will have to be made far stricter, in order to conserve

Importance of Southern Forests Shown by Exhibit Train

This is the first all-forest exhibit train operated by Seaboard Railway in cooperation with the United States Forestry Service and the Forestry Department, and is designed to encourage the private owner to give his woodlands proper protection and care. The three-car display of exhibits shows various

tropical forest fires as a destroyer of vital resources which must be destroyed by fire in order to preserve the Southern and National forests. It is also designed to impress the public with the benefits and wide use of forest products, as well as sharpen his awareness to the need of adequate fire protection methods. Enlightened self-interest is one of the best ways to spread the forest conservation idea. The exhibit was constructed around this idea, states C. A. Gillette, Industrial Forester of the Line. The Forestry Train is on its scheduled southern tour of fifty stops in towns and cities served by Seaboard.

General rules for the show are: Except in the individual calf and the "pen of five" classes, no exhibitor will be permitted more than one entry. The exhibitor must have owned the entry at least three months prior to exhibiting. Applications for entry must be made 10 days in advance of the show.

Cattle should be gentle, and full or partially full, for about ten days in advance of the show.

Cattle must be delivered to the show before 11 a. m. on October 8. Exhibitors must feed and water their own stock.

Exhibitors may not interfere with judges in any way. Judges' decisions will be final. Exhibitors must be present at the judging, and must handle their stock as directed.

Stock entered as breeding cattle three years or older, must be proved breeders. High grade females must show a preponderance of beef blood of the breed they represent. Only recognized pure breeds will be permitted to show. This includes native Florida stock.

Cattle From Nine Counties Will Be Shown At Arcadia

Some Florida residents will be able to see for themselves just what improvements have been made in Florida cattle when the largest range cattle show ever held in Arcadia comes at the Arcadia Livestock Market October 8, at 10 a. m.

The best stock from DeSoto, Alachua, Polk, Hardee, Highlands, Glades, Lee, Charlotte, Sarasota, and Manatee counties, with particular stress being laid on calves and feeder steers, will be shown. The show is strictly limited to range stock, and the show will in no way be patterned after the "fat cattle" shows held frequently in other sections, as the purpose is mainly to emphasize the growing importance of the range cattle industry, and improvements being made in these cattle by the experiments in cross breeding during recent years.

Cattle to be shown will include: high grade and pure bred females, with nothing less than half breed permitted; pure bred or registered bulls, or their equivalent in conformation, quality and finish; stocker steers, range raised; and 1941 bred slaughter calves. In the breeding classes, competition will be limited to stock in the same breed.

Classes are: Brahmas, Herefords and Devon stock will be judged in two classes: Females, including cows 2 years and more, and heifers from one to two years; bulls in three age groups, from six months to one year, from one to two years, and two years and over.

Other classes are: Native cows, native cows with calf, native cow with half bred calf, half bred dry cow, half bred cow with three quarter blood calf. Individual calf registrations will be in two classes: pure Brahmas, and any other breed. The showing of pens of five calves also is divided between Brahmas and other breeds.

Feeder steers, five or more head, will be divided in three groups: Under 450 pounds, from 450 to 550 pounds, and over 550 pounds weight. E. H. Vance, DeSoto county agricultural agent, is in general charge of the show. Others on the show committee are: Dick Koley, Ed Welles, Hooker Parker, J. L. Dabson, Earl Crowley, L. Alderman and W. L. Woods.

Auxiliary Meeting The American Legion Auxiliary will hold its regular meeting Monday night, in the Red Cross sewing room, at the city hall. The evening will be spent in sewing.

Peace is the happy, natural state of man; war, his corruption, his disgrace—James H. Thompson.

Committee Appointed Animals must be of fair flesh, quality and condition, balance style, no grossness, and must be smooth, vigorous and thrifty.

No exhibitor can enter in more than five classes. Exhibitors assume all liability for loss, death or injury of his cattle.

A committee, with arbitrary power to settle any differences that may arise, and to determine eligibility of all entries, will be set up.

No awards have been entered for the following breeds: Shorthorns, Angus, Brown Swines, Santa Gertrudis. Owners of good stock in these breeds have been asked to display them at the show to acquaint the public with the breeds.

General award classes are as follows: Brahmas, Herefords and Devon stock will be judged in two classes: Females, including cows 2 years and more, and heifers from one to two years; bulls in three age groups, from six months to one year, from one to two years, and two years and over.

Other classes are: Native cows, native cows with calf, native cow with half bred calf, half bred dry cow, half bred cow with three quarter blood calf. Individual calf registrations will be in two classes: pure Brahmas, and any other breed. The showing of pens of five calves also is divided between Brahmas and other breeds.

Feeder steers, five or more head, will be divided in three groups: Under 450 pounds, from 450 to 550 pounds, and over 550 pounds weight.

E. H. Vance, DeSoto county agricultural agent, is in general charge of the show. Others on the show committee are: Dick Koley, Ed Welles, Hooker Parker, J. L. Dabson, Earl Crowley, L. Alderman and W. L. Woods.

Auxiliary Meeting The American Legion Auxiliary will hold its regular meeting Monday night, in the Red Cross sewing room, at the city hall. The evening will be spent in sewing.

Peace is the happy, natural state of man; war, his corruption, his disgrace—James H. Thompson.

CALL MEETING OF LEADING CITIZENS

National Planning Board Officials To Address Meet Here Wednesday

A survey of the needs of this county, caused by the location of defense training units here, will be made next week by George Simons of National Resources Planning Board. Charles P. Helfenstein, executive secretary of the state planning board, arranged for the survey. W. L. Quinlan, associate planner of the state planning board, announced yesterday.

A meeting is to be held Wednesday, September 24, in Sebring at the Municipal Recreation building, to which all civic and community leaders are invited.

The meeting and survey has been arranged at the request of city and county officials confronted with meeting problems brought on by the location of two flying schools in the county. Mr. Simons was asked to come here and make a survey.

He will arrive in the afternoon and make a trip over the area prior to the meeting in the evening where the major items of housing, health, recreation and education will be discussed, and plans made to take care of present and future needs.

In addition to local officials expected to attend the meeting, all county officials will be requested to attend as well as city officials.

Avon Park, DeSoto City, Lake Placid and army officials from the Air Corps and Engineering Corps now stationed here.

Representatives of all civic and welfare groups will be urged to attend the meeting. Mr. Quinlan stated, it will require the combined efforts of everyone in the county to take care of the problems confronting the community without placing a burden on a few who too often take the burden of community problems, he continued.

Unemployment On The Down Grade

TALLAHASSEE, September 12 (FNS)—A ten percent increase in employment and a sixteen percent decrease in unemployment compensation payments were reported last week by Chairman Boyce Williams of the Florida Industrial Commission, the comparison based on figures for the same period last year.

Primary increases in employment have been in construction, ship building and aircraft industries. Williams said that an increased demand for industrial labor is anticipated for this year and in 1942.

White collar workers also are finding it much easier to obtain employment. Several cities in the state report a shortage of capable experienced stenographers, clerks and bookkeepers. Tampa business executives only last week complained of their inability to get good stenographers and typists and wage scales for this class of workers has increased materially in the past few months.

TO LIST FLORIDA'S INDUSTRIAL FACILITIES

State Defense Council To List State's Industrial Resources

Tallahassee, Sept. 18.—To list Florida's industrial facilities which can best be utilized to the benefit of the national defense program, the State Defense Council launched a survey of the state's industrial resources here today.

Governor Spessard L. Holland, chairman of the SDC, outlined the survey in a letter to the industrial leaders of Florida.

"Federal agencies state that the No. 1 Defense Problem of the United States is the encouragement of subcontracting, as the latest means of increasing defense production. In order to 'farm out' contracts, however, it is essential that there be available for ready reference a complete and comprehensive inventory of machinery and facilities. Your plant facilities may be of vital importance in the present national emergency and I know I can count upon your prompt patriotic cooperation."

Detailed questionnaires are being mailed to business units throughout the state and through the information secured the SDC believes that the battle of production for the defense of civilization can progress smoothly in Florida with a minimum dislocation of ordinary industrial arrangements.

Industrial leaders of Florida will be asked to answer such questions as to number and size of buildings, machinery in operation, raw materials used in production, and other questions the answer to which will give light on the possible utilization of plant and machine facilities.

"This is not just another survey of business," explained George Burr Jr., executive director of the SDC. "It is an inventory of what Florida has that the country may need. In filling out these forms the business men of Florida are taking a forward step in defense assistance as there have been many instances in which plant equipment and facilities have been turned to defense work where no one had previously figured such a change possible. The information compiled from these questionnaires will not be made public, and the only agencies to have access to the formal inventory will be the Office of Central Distribution of the OPM and other governmental agencies interested in extending subcontracting into plants which had not previously been engaged in defense production."

Sat On Rattler— Escaped Being Bit

BUNNELL, Sept. 11 (FNS)—Bill Floyd of Leesburg claims he is the only man in this section who ever sat on a rattlesnake 15 minutes without getting bitten.

Working on a road construction job near here, Floyd sat down to eat his lunch in the soft mud. When he got to his feet about a quarter hour later, he looked down and saw that he had been sitting on a two-and-a-half-foot ground rattler.

The weight from Floyd's body had pushed the rattler's head in the mud so the snake couldn't strike. Floyd is displaying the six rattlers and a button to his friends.

Teachers To Meet Again In Tampa

TAMPA, Sept. 11 (FNS)—Tampa was again selected for the annual convention of the Florida Education Association and dates for the meet were set for April 11-13, 1942.

This will be the fourth meeting held in Tampa in the last five years and the date was set later for the coming meeting in the hope it will enable those to provide more rooms. Last year 6,728 teachers and school officials attended the convention and the question of finding accommodations was a problem.

The decision of the board of Directors to meet in Tampa for the year was announced by Dr. G. Ballard Simmons, President of the F. E. A. this week.

"Federal agencies state that the No. 1 Defense Problem of the United States is the encouragement of subcontracting, as the latest means of increasing defense production. In order to 'farm out' contracts, however, it is essential that there be available for ready reference a complete and comprehensive inventory of machinery and facilities. Your plant facilities may be of vital importance in the present national emergency and I know I can count upon your prompt patriotic cooperation."

Detailed questionnaires are being mailed to business units throughout the state and through the information secured the SDC believes that the battle of production for the defense of civilization can progress smoothly in Florida with a minimum dislocation of ordinary industrial arrangements.

Industrial leaders of Florida will be asked to answer such questions as to number and size of buildings, machinery in operation, raw materials used in production, and other questions the answer to which will give light on the possible utilization of plant and machine facilities.

"This is not just another survey of business," explained George Burr Jr., executive director of the SDC. "It is an inventory of what Florida has that the country may need. In filling out these forms the business men of Florida are taking a forward step in defense assistance as there have been many instances in which plant equipment and facilities have been turned to defense work where no one had previously figured such a change possible. The information compiled from these questionnaires will not be made public, and the only agencies to have access to the formal inventory will be the Office of Central Distribution of the OPM and other governmental agencies interested in extending subcontracting into plants which had not previously been engaged in defense production."
