Legislature Is Just So-So Solon Says

Whitehurst Supports Constructive Bills; Tough Job

Not so good—not so bad, is the way Representative Murray Whitehurst, home from the legislature, sized up the session just closed.

"I'm not bragging, and I'm not apologizing, either," he said. "We had a tough job, and did our dead level best. The stage was all set for a sales tax. When it was killed, it made all of those appropriations look silly. Governor Cone will be able to figure it out in time. I am thoroughly convinced that the power of veto is a wonderful thing."

And that, in a nut shell, is the story. A lot of bills carrying appropriations were passed to please certain folks, but the legislators had their fingers crossed, and no money was provided. Now Cone can chuck 'em out and no harm is done.

Our state hospital bill, of most interest to Avon Park people, failed of passage, but it was just as well—it would have been thrown in the ash can by the governor, anyway. Especially, if money matters had been mentioned in it. Representative Whitehurst and Senator Murphy introduced companion bills in both houses and did everything they could to get them consideration. Whitehurst finally dragged the house bill out of committee, which was trying to kill it, and which did keep it so long that when it was brought out and placed on the calendar, it never had a chance of getting up for a vote. Whitehurst got a nice vote from the house on his motion to bring the bill out of committee, and thrugh some trading, was able to get the bill on special order of business. But the bill got caught in the jam in the closing days and died there. The senate was hostile to the bill, the committee placing it on the calendar with an unfavorable repart. It never got any further.

The cards were stacked against us from the start. Speaker Wood saw to that with the appointment of a majority of north and west Florida men on the committee. They have the state hospital at Chattahoochee, and are doing very well, thank you, and expect to keep on doing very well just as long as they can, without building any branches anywhere in South Florida. The fight was not against Avon Park. It was against spending any money anywhere in South Florida. In fact, Whitehurst said Avon Park was way out in front of any place else. Avon Park's bill was the only one that made any progress. No other bill came out of committee.

Walter Betts and Charlie Lanier deserve a lot of credit for the work they did in Tallahassee, Whitehurst said. They really worked, and so did Henry Murphy. The bill would have carried in the house, if it had ever come to a vote, Whitehurst believes. But you couldn't do anything. The committee, with a north-west Florida majority had the thing hog-tied. And they never turned it loose until they knew it was too late for it to get through. Smart fellows, those West Florida politicians. Big hearted guys too, Whitehurst says.

Whitehurst and Murphy worked in harmony all during the session. Whitehurst was full of praise for Murphy for the way in which he cooperated with him in getting his bills through the senate. "Every time I called on him, Henry was ready and willing to help. I want the public to know that I appreciate his cooperation."

Whitehurst supported the teachers' retirement act and all school legislation, citrus legislation, reallocation of race track funds to counties, reallocation of gas tax to counties, an dopposed all sales tax measures. He passed two local bills designating 51 roads in Highlands county as state roads, in order that the county could get gas tax money under the new law.

Whitehurst said he supported all conservation bills as sponsored by the state game department and by the Highlands county conservation clubs. He supported the repeal of the one-half percent gross receipts tax and opposed the levy of a 2 percent gross receipts tax.

The drivers' license law, a piece

Fish Fry Next Wednesday Honor Of Ambassadors

Walter Betts and Charlie Lanier, referred to around town as Avon Park's "ambassadors" to Tallahassee, will be honor guests at a fish fry to be held at the municipal airport next Wednesday night at 7 o'clock. These two men left their business places and spent the entire 60 days attending the legislature to look after Avon Park's bill, which they attempted to get through designating the Glenada Hills site for a branch for the state hospital.

In spite of the fact that they were unsuccessful, they did a good job, and the local committee who worked on the roposition from this end are planning the gathering as a testimonial to their good work. The noon meeting of the Rotary club will be omitted and the fish fry will take its place, so all Rotarians will attend. The public is invited. Tickets will be on sale at both drug stores and both hardware stores at 50 cent per person, and tickets should be purchased by Monday night.

Mayor Covington will make an address of welcome, and Walter Betts will give the story of what was done at Tallahassee. City and county officials are expected to be present.

W. M. Reck is general chairman on arrangements, and John Francis will act as toastmaster. Committees have been named as follows:

Cooking: Demos Mandis, chairman; Walter Rutherford, Brisco Willis, Freed Peden, O. C. Wilkes, Durrh Martin and R. R. Brown.

Tables, chairs and utensils: D. G. Perry, chairman; Nelson Smith.

Menu and food: M. V. Pilcher, chairman; Frank Costine, W. R. Carter, Demos Mandis.

Serving: Lester Armstrong, J. L. Wells, C. R. Ginn, Colquitt Pardee, S. S. Thayer, Marshall Jordon, Richard Brown.

C. H. Walker Is Re-Elected Head Citrus Excange

C. H. Walker, of Avon Park, who was elected president of the Florida Citrus exchange on the resignation of W. L. Tilden in April, was re-elected at the annual meeting in Tampa Thursday.

H. E. Cornell, of Winter Haven, was elected first vice president to succeed A. W. Hurley, Winter Garden, whose association, South Lake Apopka, withdrew recently from the exchange.

W. M. Moseley of Fort Pierce, was advanced from third to second vice president to fill a vacancy; J. C. Palmer, of Windermere, was made third vice president, and L. L. Lowry, Winter Haven, fourth vice president.

The board re-elected C. C. Commander general manager and other executive officers, Fred S. Johnston, general sales manager; L. D. Aulls, traffic manager; S. L. Looney, treasurer and comptroller; O. M. Felix, secretary, and Counts Johnson, attorney.

In response to a resolution from Orange county asking for a comprehensie survey of the Florida Citrus exchange by a competent outside authority in an effort to improve its efficiency and service, the board authorized President Walker to appoint a president's committee, to make a study of the suggested needs and report to the board. The report also is to include a recommendation of the survey organization to be employed.

This committee also will assist the president in other matters that come before him.

Other committees:

Farm Credit administration — C. H. Walker, chairman; W. C. Van Clief and William G. Geier.

Marketing agreement and industry and legislative—H. E. Cornell, chairman; J. C. Palmer, H. G. Putnam, L. L. Lowry and C. C. Commander.

Salaries, retains and budget — William G. Geier, W. C. Van Clief, D. A. Hunt, John S. Taylor, jr., and H. G. Putnam.

CATTLE INDUSTRY GROWING IN COUNTY

State - Wide Interest Shown In Growth of Industry Here

The growth of the cattle industry in Highlands County is attracting the attention of people interested in the industry throughout the southern part of the state, County Agent Alsmeyer stated yesterday, especially the improved pasture program which is greatly responsible for the healthy condition of the industry.

A group of over 100 people left the coure house in Sebring Thursday morning to make an inspection tour of the improved pastures in the county.

Before leaving on the tour Mr. Alsmeyer in discussing the growth of the cattle industry in the county state, "that in July 1934 there were only 585 acres of range pasture land owned by cattlemen in Highlands County and about 209,000 acres leased for grazing purposes. Much of the leased land was only by verbal agreement. Today there are over 224,600 acres of pasture land owned by Highlands county cattlemen, and they have over 196,000 acres under written lease. It is expected that three additional tracts, totalling 9,200 acres, will be purchased by cattlemen within the next three weeks. During the past five years 31 per cent of the area of Highlands county has been purchased by Highlands county cattlemen for grazing purposes.

One large company, which owns land in about two-fifths of the counties in the state, reports that in the past three and one-half years, they have sold a total of 490,890 acres, which is 1.4 per cent of the land area of this state. This change in land use and ownership is having a big effect in the entire state. Naturally business men are anxious to learn what is happening in pasture improvement and the cattle business which is so affecting the state."

City Offers Avon Florida Settlement

The city council Tuesday night offered to accept $9228.45 net to the city in full settlement of all taxes, including 1938, from Avon Florida Citrus Corporation, providing the company drop quo-warranto proceedings now pending. City Attorney T. A. McNicholas was instructed to make the offer as a counter proposal, after considering for several weeks the company's offer to pay $8500 in a settlement.

The settlement was figured on a basis of county valuations instead of city assesments figure, which councilmen stated were about three times as high as county figures.

The city also agreed to accept $500 in settlement of taxes of the B. F. Studwell estate.

The council agreed to lease a lot on the mall east of the old Spink property to J. F. Sellars, who is building a bowling alley. Lease was made for three years at $5.00 per month.

DIAMOND BALL RESULTS

Touchton-Smith, Florida Public Service and W. O. W. are leading the city softball league with 1000 per cent each at the end of the first week of play.

Florida Public took a double header from Lake Byrd last Thursday, winning the first game 15 to 6 and taking the second game 11 to 9. Lake Byrd had both games in the bag at early stages, but couldn't hold its advantage as Florida Public came from behind to win both times.

Smith-Touchton won from the Armory 24 to 5 Thursday afternoon and W.O.W. trimmed American Legion 13 to 6.

A triple bill is scheduled for next Sunday afternoon. W. O. W. meets Lake Byrd at 2:00; Smith-Touchton plays Florida Public Service at 3:30; and American Legion and the Armory ring the curtain at 5:00.

Peden Joins Legion Outfit

Freed Peden has joined the American Legion outfit as assistant manager. It will be remembered in the past that Peden was manager of the city diamondball team, which he handled very successfully. The Legion feels fortunate in having him join their organization.

SCOUT HONOR COURT HELD AT LAKE PLACID

Two Boys Advanced To Star Scouts Tuesday Night

Court of Honor of the Highlands district, Gulf Ridge Council, was held Tuesday night at the Lake Placid Presbyterian church, conducted by Rev. S. A. Boyce, member of district advance committee. Two scouts were advanced to Star scout rank, Harry Hinely and Jesse Rowell.

Other awards were presented as follows: first class ranking, Jack Head, and Paul Vilkaitis; second class, Ralph Womble, James Perdue, Billy Archer and Gil Mitchell.

Charles Payne, council bugler, opened the program with assembly, and the scouts and audience sang "America." Rev. Joseph Barton gave the invocation.

Merit badges were awarded for music: Edward Hollenberg, Jimmie Hetherington, Bobbie Keller, Arthur Crews, Walter Martin, and Robert Speer; pathfinding, Roy Henderson and Robert Speer; firemanship, Billy Heim; swimming, Bobby Keller, Jack Head and Jimmie Hetherington; reading, Bobby Speer; mechanical drawing, Jim Heim; and chemistry, Jim Heim.

Scout executive from Gulf Ridge Council, John Hackney, spoke to the assembled group of scouts and friends on "The Value of Boy Scout Work in General." The program closed with the scout benediction.

ORANGE MARKET HITS TOP AT $2.80 MONDAY

Florida Growers Average $1.25 On Tree From Auction Market

Lakeland, June 7.—(Special)—Florida oranges brought the highest price of the present shipping last Monday when 223 cars were sold through the auction market at an average of $2.80 per box, sufficient to return the grower in Florida $1.25 a box on the tree.

The spectacular jump took place in two days' sales, going from $2.34 last Thursday when 132 cars were sold at auction, to $2.58 on Friday, with 90 cars sold.

The $2.80 price on Monday had not been equalled even by early season returns.

Reports also became current that f. o. b. sales in Florida were getting more active, and several substantial carload deals were reported. The better auction price was expected to bring out the cash buyer and substantially increase the offer for fruit.

Supporting the current Valencia movement, the Florida citrus commission last week ran extra large newspaper advertisements in all terminal markets. These stressed the abundant supply of desirable sizes, unusually fine condition of Florida oranges and urged housewives to obtain ample supplies during June. Another large ad will appear this Thursday and Friday.

Grapefruit also showed a sudden sympathetic spurt with the rise in orange prices, with 87 cars selling at auction Monday at $1.92, the highest price showed by any weekly average since the end of the first month of the shipping season.

Through June 3, there had been 20,997 cars of Florida oranges sold at auction at an average of $1.99 per box, compared with $2.24 last year's average on 18,995 cars sold at auction up to the same date.

California has taken a severe drubbing on orange prices so far this season, the auction markets absorbing 14,526 cars at an average of $2.80 per box, compared with 12,708 cars last season up to the same date at $3.80 a box, a reduction of exactly $1 a box or $400 per car on nearly 2,000 cars.

The spurt in orange prices occurred despite much heavier shipments. Florida oranges have averaged consistently higher in price for several weeks compared with last season, the auction price ranging from 25 to 50 cents better on a weekly average for the last several weeks as compared with the same period last season.

Through June 3, there had been 9,270 cars of Florida grapefruit auctioned at an average of $1.74 a box, compared with 8,117 cars up to the same date last season at an average of $2.19. Texas has fared only slightly better than Florida on grapefruit prices this season, disposing of 3,570 cars by auction at an average of $1.89, compared with 3,519 cars last season at $2.08.

Mr. and Mrs. L. S. Brendla will leave soon for White Springs and Jacksonville for a short visit before going to South Carolina for the summer months.

Local Bill Sets Up City Election; Other Measures

Three local bills were passed by the legislature that directly affect Avon Park, Representative Whitehurst said here yesterday. They were sponsored by the city administration.

One changes the city election from December to the first Tuesday in September, 1939 and biennially thereafter. Officers elected are to take office October 1 This bill also amended the charter to allow the city tax assessors to fix valuations in accordance with tree market value and without regard to values fixed by state or county tax asessors, or any general laws or statutes.

Another amendment takes delinquent tax collections out of the hands of the city attorney and turns them over to the city clerk and collectors. Delinquent taxes will be turned over to the city attorney for suit only after other methods have failed:

The third amendment allows the council by ordinance to permit the payment of taxes and assessments in installments, such installments not to exceed a period of time of one year on such amounts or percentages and at such times and on such conditions as the city council may by ordinance determine.

Representative Whitehurst also passed a bill repealing this county's special prohibition law passed by Dr. A. T. Eide in 1937. The law was never used. The Eide law prohibited the possession of liquor for personal use and authorized search by the sheriff without a serach warrant. The law in no way applied to the sale of liquor in the county, and its repeal in no manner affects the present dry status of the county, Whitehurst said.

Whitehurst also passed a local law authorizing the transfer of county bonds, taken in on taxes, to the county school board, to be used for financing schools.

He passed a Sebring zoning law, with a referendum, a county law authorizing the school board and the county commissioners to publish monthly financial statements and fixing the amount of pay for same, and joined in a special bill legalizing the refunding of old De-Soto school bonds.

Whitehurst was co-sponsor of the Everglades Fire Cntrol bill, which had to be repassed over the governor's veto. Twelve counties are affected, Highlands being one of them. The set up calls for an appropriation of $75,000 to be matched with a like amount of federal funds. A board of commissioners; composed of one commissioner frm each county will have control of administering the act.

Governor Cone's Veto Road Bill Does No Harm

Governor Cone vetoed a special Highlands county bill yesterday, designating 51 roads in the county as state highways, but it didn't do any particular harm.

The special act was passed to put the county in line to receive refund on money expended on roads under the gas tax allocation plan, known as bill 802. A lot of other counties passed similar acts, just in case the money is ever paid out under the plan. But Commisioner J. L. Wells said today the veto "didn't hurt anything."

"We wouldn't get any benefit under the law for about ten years anyway, and by that time the law can be repealed or torn up a dozen times," Wells said. "Highlands count will pay out its bonds with gas tax money about 1943. But payments will keep coming from the state for interest for many years yet. So Highlands will continue to get its share of the three-cent gas tax allocation for a long time. After that, there will probably be some other plan, so why worry," the commission chairman said.

The special act was prepared by the commissioners, not because they favored the plan, but because it looked like everybody else was going to get some money, and they figured Highlands should get in there and get what was coming to her.

Other counties which got roads designated by special acts will very likely feel the veto axe too, Wells said.

Surplus Crop Problem of Industry

Todd Explains Bills Designed to Help Citrus Growers

The citrus problem is one of surplus, and legislation designed to eliminate that portion of the crop in excess of the amount that can be marketed profitably to the grower, is the aim of Florida Citrus Growers, of which he is legislative chairman, said E. G. Todd, in a talk before the Rotary club Wednesday.

Todd who has been in Tallahassee during most of the session of the legislature, gave an authentic report on what had been done to help the citrus deal.

"Uncle Joe" Lanier and "Senator" Slappey Betts were welcomed home along with "Hobby Lobby" Todd.

"Statistically the following is the situation in the citrus industry," Todd said. "The orange production in 1928-29 was 33,000,000 boxes and in 1938-1939 has increased to 72,500,000 boxes. It is estimated by 1945 the production will be increased to 80,000,000 boxes. The grapefruit production in 1928-29 was 11,000,000 boxes and in 1938-39, 41,000,000 boxes. An anticipated production of 55,000,000 is expected by 1945. This grapefruit production is conservatively estimated since 40 per cent of the plantings in Florida and 70 per cent of the plantings in Texas are not yet in full production. During this ten year period the population in the United States has increased only 8 per cent or from 121,000,000 to 132,000,000 people, whereas the orange production increase above represents a 5 per cent yearly increase and the grapefruit production a 10 per cent yearly increase.

"In 1928-29 Florida soild 14,500,000 boxes of oranges which returned the grower $20,300,000. In 1938-39, 27,000,000 boxes were sold which returned $8,370,000. In other wrods less than one-half the amount of mone was received for more than twice the amount of fruit sold. In 1928-29, 11,314,000 boxes of grapefruit were sold at a net of $19,120,000, and in 1938-39, 22,000,000 boxes at anet price of $4,400,000—twice the amount of fruit selling with less than one-fourth of the cash returned.

"These statistics furnish the background for the thinking of the growers' organization. They have concluded that the problem is evidently one of surplus. Unlike a manufacturing business, production in citrus groves cannot be stopped or started at will, and production thus adjusted to consumption. So it woul appear that the logical place to attack this problem would be from the standpoint of eliminating that portion of the crop in excess of the amount which can be marketed at the greatest net return to the grower. The determination of the amount of surplus to be destroyed in order to arrive at this maximum return can be definitely ascertained by resort to the experience tables of the Bureau of Agriculture Economics, U.S.D.A. California has used these experience tables to her decided benefit for a number of years. It readily follows that the maximum amount of fruitwhich can be moved and still net the greatest return to the grower must be moved in an orderly manner. These ideas of, first elimination and second, volume pro-ration of movement to market are the answers to our problem which the growers organization present to the Florida Citrus growers. Definite plans for practical application of these ideas have been formulated and are now being presented to the growers of the state through the growers' organization in an educational program which tells the grower, first, what his problem is; secondly, the answer to the problem; thirdly, the things which he must do individually to enable the program to become effective.

"Because of the impracticability of administering volume pro-rate to the individual growers, the growers' organization conceives that the pro-rate of necessity must be laid against the handlers (shippers). They hold also that not less than 8 5per cent of the fruit must be under the control of these handlers in order to make the volume proration effective. It follows, therefore that the growers' organization

$700,000 Building Program Inaugurated in Boys Town

Complete Project Financed By Contributions on 'Pay-as-You-Go' Basis.

Boys Town, Neb., the famous community made up almost entirely of boys between 7 and 17 years of age, is nearly tripling its present facilities with a building program costing $700,000, it was disclosed here yesterday by Mgr. Edward J. Flanagan, founder and director of this unique haven for homeless and abandoned boys.

In an interview at the Hotel Gotham, Father Flanagan, as he is better known, explained that the project, which already is under way, is on a "pay-as-you-go" basis. Its financing, he added, is dependent entirely upon outside contributions.

Mortgages Paid First Costs.

The Father Flanagan Boys Town home—Boys Town's true name—now accommodates only 200 boys, the priest said. Last year alone more than 1,300 applications had to be refused because of limited facilities. The new project will make it possible for 520 boys to be housed and schooled at the home.

Initial financing of the project, Father Flanagan explained, was undertaken with a bank loan secured by mortgages. Included in the project are four new dormitories, a kitchen and a dining hall. Two of the dormitories and the kitchen and dining hall will be completed by August 15, with the other buildings scheduled for completion by January 1, 1940.

Although conducted under Catholic auspices, more than 35 per cent of the present enrollment at the home is non-Catholic, Father Flanagan revealed. The non-Catholic boys are not required to attend Catholic religious services. They are, however, taught to believe in God and to live up to the moral law.

Some day, Father Flanagan said, he hopes to obtain enough funds to build a new Catholic chapel at the home and to turn the present chapel into a non-denominational center for services by Protestant and Jewish clergymen for boys of their faiths.

Takes Keen Pride in Boys.

Father Flanagan is intensely proud of his boys, who, he feels, have more than vindicated his claim that "there never has been a bad boy." Many of them have finished their preliminary studies at the high school maintained at the home and have entered college.

One of the boys, now grown to maturity, will be ordained a Jesuit priest on June 25 and will say his first mass at the home. Others have achieved fame as musicians, baseball players and in other pursuits.

Since 1917, when Father Flanagan founded the home as a refuge for homeless and abandoned boys, a total of 4,532 lads have lived there. With the exception of those at the home now, virtually all of them either have been placed with families or have had positions secured for them or been assisted in other ways.

Father Flanagan is in New York to be initiated as a "Fall Guy" into the Circus Saints and Sinners here next Wednesday. He will be the first clergyman thus honored.

TYPICAL U. S. BOY

Karl McCready, 13 years old, of Louisville, Ky., was chosen from 25,000 entries in a nation-wide contest as the typical American boy. Karl is five feet, one inch tall, weighs 92 pounds, has blue eyes and brown hair. He is the son of a mail carrier. Karl is an accomplished violinist and hopes to become a radio engineer.

Britain Directs Airways To Install Plane De-Icers

LONDON.—At least one of three new methods of preventing ice from forming on the wings and tail surfaces of planes which have been approved by the air ministry must be used next winter by all commercial aircraft in Great Britain.

Two of these are similar mechanical devices. The leading edges of wings and tails are fitted with rubber borders through which a compound is pumped to break up ice which may form. The third method is a paste which can be quickly smeared along the surfaces, and it can be relied on from 12 to 20 hours.

'Pied Piper' Needed on Atlantic Fishing Station

YARMOUTH, N. S.—A "Pied Piper" is wanted on Seal island, a fishing station 25 miles out in the Atlantic ocean from here. The island is reported to have become overrun with rats, which are believed to have escaped there from wrecked ships about four years ago. Fishermen particularly complain about the rats. They eat bait from the lobster traps and deplete the wild ducks and seagulls for which the island is noted.

'ROLLER-HIKER'

Richard Beaudry, 11-year-old lad from Brooklyn, N. Y., turned up at a Boston, Mass., police station recently with the announcement that he had "roller-hiked" from his home. His well-worn skates proved it. Richard was looking for his grandfather, who lived either in Boston or Springfield.

Mite Meadow Mouse Reaches Home After Many Adventures

By THORNTON BURGESS

It often happens in this world,
When all seems wrong and nothing right,
The cloud that blackest seems to be
Is really nearest to the light.

THAT was just the way it was with little Mite Meadow Mouse. There he was in the pocket of Farmer Brown's boy, being carried he knew not where. Somehow he wasn't as much afraid as he might have been. You see, Farmer Brown's boy had been very gentle with him.

"Caw, caw, caw!" replied Blacky in the sauciest manner.

But he was being carried away, and that seemed a very dreadful thing in itself. He felt more lost than ever. What possible chance would there be now of ever getting back home again? Farmer Brown's boy had said something about taking him home, but Mite felt sure that that home was not his home. So he cuddled down in a corner of the pocket, feeling very miserable and helpless. Things certainly did look dark.

Now Farmer Brown's boy had come down to the cornfield that morning to hoe the corn, for already the weeds were springing up between the rows. He scowled over at Blacky the Crow and his relatives, who were making a great racket on the Green Meadows. He shook his fist at them. Then he grinned, for right down in his heart he has a fondness for Blacky, in spite of the mischief he does.

"I suppose I ought not to begrudge you that corn you have pulled up," said he. "No doubt you have paid for it several times over by the grubs and worms you have eaten, but just the same you have made me a lot of extra work. Now, I've got to go way back to the house for some more seed and plant those hills all over again. I thought that scarecrow was going to fool you this spring, but I see it hasn't."

"Caw, caw, caw!" replied Blacky in the sauciest way.

Farmer Brown's boy trudged along the edge of the cornfield with his hoe on his shoulder. Thinking of the extra work he had to do because of Blacky the Crow, he quite forgot the little Meadow Mouse in his pocket. Presently he came to a pile of old cornstalks.

"I may as well leave my coat and hoe here while I go back for that seed," said he.

So he slipped off his old coat and threw it down on the pile of old cornstalks. Then off he trudged to get the seed to plant where Blacky and his relatives had pulled up the young corn. No sooner was he out of sight than Blacky and the others were back in the cornfield deep in mischief again.

Little Mite lay perfectly still for a long time listening and listening. But as he heard nothing but those noisy Crows his courage began to come back. He crept up to the opening of the pocket and peeped out. He could see nothing of the giant who had carried him off and he began to wonder in what part of the Great World he was. He crept out to look about. Then his heart gave a great jump! Somehow those cornstalks looked very familiar. Could it be? No it couldn't be! He must be dreaming! He shut his eyes for just a minute, then opened them again to make sure that he really was awake.

Just then down under him a squeaky little voice sounded. Then another squeaky little voice made reply. Little Mite didn't wait to hear any more. He scrambled down among those old cornstalks as fast as ever he could, calling at the top of his funny little voice. All unknowing, Farmer Brown's boy had brought him home safe and sound.

POTPOURRI

Snow

Snow is not always white. Red and green snow, so colored because of organisms living in the flakes, have been known to fall in northern climates. It is usually white, however, because of the reflection of light on the crystals. Snow crystals always have six sides or points—never five or seven.

Smaller Tables Should Possess Definite Design

By BETTY WELLS

Once in a blue moon it's not a bad idea to cock a shining eye at your incidental tables. Are they odds and ends you've picked up at random? Are they fads that you bought in moments of madness and wish you could get rid of now? In either case, there's no reason why you shouldn't begin to weed out the tables that don't really do things for your rooms. For these should be accents that carry out a definite responsibility in the design of the room. Fortunately small tables aren't so expensive that a lady shouldn't be able to wangle a new one out of the budget every once in a while until she has a selection that is worthy of the other furnishings. Here are some notes on small occasional tables we've picked up recently:

Glass and Mirror Tables—They're very smart details for almost any of the more formal types of rooms. Don't have more than one in a room however—at the very most two—for they are quite glittery and can easily be overdone.

Bentwood Tables—These are featured at the San Francisco Golden Gate exposition and will be shown at the New York Worlds fair. Smartly simple for modern or provincial rooms, we predict that they'll be turning up before very long at very reasonable prices.

A new occasional table reproduced after an old library step.

Eighteenth-Century Tables—There are many perfectly lovely and intricate designs for incidental tables in our heritage from Eighteenth-century England and France. How those craftsmen of that period adored to turn out a novel little table design for some special purpose! There were wig stands, shaving stands, basin stands, not to mention all sorts of plant and pier tables that have been adapted delightfully for contemporary use. But nobody has reproduced the old rent table! Though goodness knows who would want it anyway except as a charming antique. This was an intricate drum type table with little cubbyholes in its base that could be dated. 'Twas made for the landlord to keep track of his rent files.

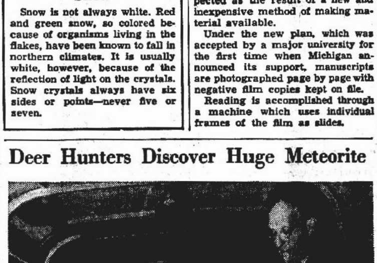
Filming of Manuscripts Cuts Cost of Publication

ANN ARBOR.—A boom in the field of scholarly publication is expected as the result of a new and inexpensive method of making material available.

Under the new plan, which was accepted by a major university for the first time when Michigan announced its support, manuscripts are photographed page by page with negative film copies kept on file.

Reading is accomplished through a machine which uses individual frames of the film as slides.

Deer Hunters Discover Huge Meteorite



A strange metal-like rock found by deer hunters in the lava beds of Modoc National forest near Oakland, Calif., was pronounced a bona fide meteor by Professor Earle G. Linsley of the Chabot observatory, pictured with the find. Largest ever found in California, the meteor weighed more than a ton, and is comparatively new, having fallen in the "last few thousand years."

AVALANCHE OF COINAGE QUESTIONS BOTHER NATIONS

WASHINGTON.—United States treasury officials, having emerged from an avalanche of excited inquiries about the new Jefferson nickel, are finding solace in the knowledge that monetary officials of other countries have similar troublesome coinage problems.

The inquiries, which came in at the rate of more than 50 a day for nearly five months, concerned rumors that the treasury was planning to withdraw the new nickel.

One rumor was to the effect that because the nickels didn't fit slot machines they were being called in by the government. Another said that there was no flag above the "White House" on one side of the nickel, but that rumor was dissipated when it was explained by the treasury that Jefferson's home, "Monticello," and not the executive mansion was engraved on the coin.

The sixty-eighth annual report of the deputy master and comptroller of the royal mint of Great Britain, recently received at the treasury, disclosed a parallel situation.

"Popular interest was, and still is, focused upon the new type of threepenny piece," the report said. "Supplies of the new coin were first issued to the public in April, 1937, and its appearance in circulation was followed by a plentiful crop of rumors—not an unusual phenomenon where new official issues of any kind are concerned. Inquirers asked whether it was true that the issue was to be withdrawn and reminted because, as they had heard, a full stop had been used in the inscription instead of a colon; it was asserted that the issue had been made without legal authority and could therefore be refused as tender for a bus fare or what not.

WEEKLY NEWS ANALYSIS BY JOSEPH W. LaBINE

See Hope for League Rebirth Under New Russ-British Pact; Must Get Rid of Avenol First

(EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper.)

Released by Western Newspaper Union.

INTERNATIONAL:

Rebirth?

Once the white hope of world peace, Geneva's League of Nations buildings are today what one correspondent calls "a stately mausoleum haunted by the ghosts of braver men.' In its heyday the League stood for collective security, later watching Japan, Italy and Germany drift away without enforcing the covenant's spirit because such action might "divide Europe into ideological blocs."

Chief reason for League doldrums is its management. A carbon copy of Great Britain's current appeasement cabinet is Secretary-General Joseph A. C. Avenol, who in recent years has filed the machinery of collective security under lock and key.

Black marks on the League's record include Manchuria, Ethiopia, Spain and China. Each succumbed amid ineffectual, insincere League sanctions which were enforced against aggressor nations only if individual signatories found it "convenient." By this spring Mr. Avenol's back-tracking generalship reached a new low. When Albania protested its seizure by Italy, the secretary "forgot" to circulate its SOS among signatories. There was no reprimand, and at its May meeting Mr. Avenol prevented Russia's ambassador to Great Britain, Ivan Maisky, from reading a letter of protest against Czecho-Slovakia's seizure. At the same time he got the council to postpone any discussion of Albania until next September.

LEAGUE'S AVENOL
He "forgot" Albania's plea.

However, even as the League grows more decadent under Avenol leadership, hope rises for a rebirth of its collaboration machinery. Never a word-mincer, Soviet Russia has enough dislike for powder-puff diplomacy to force Britain and France—the League's other two leaders—into rejuvenating Geneva's halls under the new British-French-Russian mutual aid pact. First hopeful sign is the new treaty's goal of preserving European peace. Second sign: It has been communicated to the League and will possibly operate under the League covenant. But a prerequisite to any such rebirth would be the retirement of Mr. Avenol, whose job rests secure so long as the Chamberlain-Halifax-Hoare-Simon quartet rules Britain.

BUSINESS:

Middleman

Favorite butt of pro-chain store and pro-co-operative movements has been the wholesaler, who in popular notion is excess baggage in the U. S. distribution system. If the middleman could be eliminated, many believe, a bar of soap or pound of coffee would cost John Public substantially less.

To test this theory, New York's Twentieth Century Fund broke down the $38,500,000,000 which U. S. consumers paid in distribution costs for their merchandise during the peak year in 1929. Individual figures and percentages of the *distribution* cost:

Wholesalers ..	(18%)	$ 7,000,000,000
Retailers	(33%)	12,600,000,000
Manufacturers	(24%)	9,100,000,000
Transportation	(23%)	8,800,000,000
Miscellaneous	(2%)	1,000,000,000

Basic conclusions were that wholesalers did not earn excessive profits in 1929 (groceries, 1.3 per cent; confectioneries, 2.2 per cent; dry goods, 2.7 per cent), and that they remain an essential link in the distribution machine.

DOMESTIC:

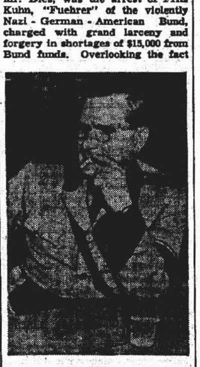
Un-Americanism

To freedom-loving but undemonstrative U. S. patriots, the trouble with anti-Communist organizations is that they are pro-Fascist. Conversely, anti-Fascist groups (like the American League for Peace and Democracy) are more interested in promoting Communism than fighting Fascism.

When he began investigating un-Americanism last year, Texas' sincere Rep. Martin Dies won deserved criticism for letting his committee listen indiscriminately to anyone with an ax to grind. But thanks to Martin Dies the U. S. has become acutely aware of "isms" pounding on its doors.

Biggest threat, inspired by Italo-German success and fostered by depression-made malcontents, are the U. S. Fascists. This spring Fascism reared its head when Mr. Dies revealed a strong anti-Jewish movement led by Maj. Gen. George Van Horn Moseley retired anti-New Deal army officer; Dudley P. Gilbert, New York financier, and such Ku Klux Klannish groups as Knights of the White Camellias, led by George Deatherage of St. Albens, W. Va. Blandly admitting his anti-Semitic sentiments, General Moseley has promised shocking revelations concerning Jews in high places before the summer is over.

Greatest handicap to an impartial investigation of un-Americanism is the very stumbling block Mr. Dies encountered last autumn, namely, ax-grinding. Best example, though in this case probably popular with Mr. Dies, was the arrest of Fritz Kuhn, "Fuehrer" of the violently Nazi - German - American Bund, charged with grand larceny and forgery in shortages of $15,000 from Bund funds. Overlooking the fact that Kuhn participated in Hitler's Munich putsch in 1923, has organized 94 active Bund branches and has done nothing to merit confidence of the U. S., critics looked suspiciously (though probably unfairly) at the two men responsible for his arrest. New York's Mayor Fiorella LaGuardia might have realized his many Jewish constituents would relish any anti-Nazi move. New York's District Attorney Thomas E. Dewey, a potential G. O. P. presidential candidate, could expect excellent publicity from the case.



FUEHRER KUHN
". . . a lot of nonsense."

Said Mr. Dewey: "The indictment shows Kuhn is just a common thief." Answered Fuehrer Kuhn: "It's a lot of nonsense."

SCIENCE:

Probing Atlanta

Long before the Revolutionary war St. James was a thriving capital of St. Kitts island, sometimes called Nevis, located in the Lesser Antilles southeast of Puerto Rico. In 1680 an earthquake dropped St. Kitts and its St. James 300 feet below the sea. This summer an expedition led by Detroit's Capt. Robert Hall plans to walk along St. James' submerged streets in one of science's most unusual expeditions. Connected with the surface only by a small telephone wire, divers will wear new helium-equipped suits which need no lifeline to compressed air machines on deck. Last year Captain Hall made similar experiments in the Lesser Antilles, examining submerged shipwrecks in crystal-clear tropical waters.

Trend

How the wind is blowing . . .

ARMAMENT — Soviet Russia has ordered a 50 per cent increase in her 1939 national defense budget to keep abreast of Germany and Italy. Approximate additional cost: $8,000,000,000.

RUBBER—J. M. Slattery, Fisk tire executive, predicts 50 per cent increase in world rubber consumption during next 10 years. Items: Sponge cushions and mattresses, cushions for railroad tracks, traffic markers, flooring, furniture, packaging materials, plastics and latex garments.

GASOLINE—In 1938, U. S. gasoline consumption was 1 per cent above the previous year, although motor vehicle registrations were 1 per cent less than 1937.

JEWS—A new Berlin ghetto decree places still more drastic restrictions on areas to be inhabited by "non-Aryans."

CLASSIFIED DEPARTMENT

Variety of Cutwork To Beautify Linens

Pattern 1998

Variety's the thing! Here's a collection of border and corner motifs to make your linens look expensive. Cutwork's easy—just buttonhole stitch. Pattern 1998 contains a transfer pattern of 18 motifs ranging from 2½ by 15 inches to 2¼ by 3½ inches; materials required; illustrations of stitches; color schemes.

Send 15 cents in coins for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Please write your name, address and pattern number plainly.

Latent Power

Let the very humblest man know that he may one day have it in his power to help the very strongest man he has ever known.
—Joseph Parker.

MALARIA

Speedy Relief of Chills and Fever

When your teeth are chattering with chills and your body burning with malarial fever, you want timely and reliable relief!

Grove's Tasteless Chill Tonic is the medicine you want to take for Malaria. This is no new-fangled or untried preparation, but a treatment of considerable merit.

Grove's Tasteless Chill Tonic contains tasteless quinidine and iron. It relieves the chills and fever due to Malaria and also tends to build you up. This is the double effect you want.

The very next time you feel Malarial chills and fever coming on, get a bottle of Grove's Tasteless Chill Tonic. Start taking it immediately and it will soon give you relief.

All drugstores sell Grove's Tasteless Chill Tonic—50 cents and $1.00. The latter is the more economical size.

Fragile Habits

Evil habits, once settled, are more easily broken than mended.
—Quintilian.

FOR BOILS

A wonderful aid for boils where a drawing agent is indicated. Soothing and comforting. Fine for children and grown-ups. Practical. Economical.

GRAY'S OINTMENT 25¢

Harm in Flattery

Flattery corrupts both the receiver and the giver.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!

Secret Club Formed by Six Fun-Loving Young Tennesseeans Became One of Most Powerful Organizations of 'Regulators' in U. S. History

By ELMO SCOTT WATSON

(Released by Western Newspaper Union.)

ONE December evening in 1865 six young men were sitting around the fireplace in the law office of Judge Thomas M. Jones in the little town of Pulaski, Tenn., idly gossiping about the affairs of the day. Eventually the talk turned to how dull life seemed in this little town after the thrills and excitement they had known as soldiers in the Confederate army.

What could they do to amuse themselves and help pass away the time while adjusting themselves to the new order of things? Some one—it may have been Judge Jones' son, J. Calvin Jones, or it may have been any one of the other five, Capt. John C. Lester, Capt. John B. Kennedy, Capt. James R. Crowe, Frank O. McCord or Richard R. Reed—suggested that they might organize a new club or society. In the absence of any better suggestion, they decided to go ahead with that idea.

The next evening they met again in Judge Jones' office and formed a temporary organization. They elected a chairman and a secretary, committees were appointed to select a name for the new organization and to draw up rules and a ritual for the initiation of new members. Then they adjourned, to meet a week later to perfect their organization.

Thus was formed the famous Ku Klux Klan of the Reconstruction era, a secret organization that was at the same time lawless and law-preserving, that successfully defied the might of the federal government of the United States and that wrote into our history one of its most thrilling chapters.

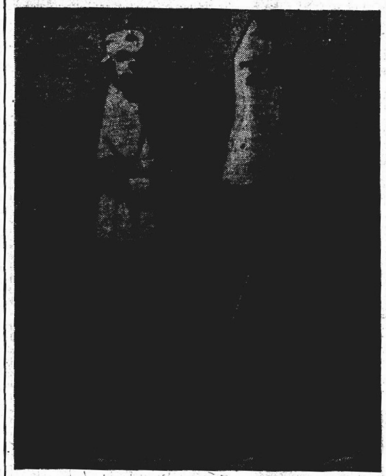
The 'Invisible Empire.'

A complete history of the Ku Klux Klan would fill volumes (it took 13 of them to hold all the testimony given before the joint congressional investigation of the Klan that began in 1870) but a present-day historian has compressed into one volume most of the essential facts about it. He is Stanley F. Horn of Nashville, Tenn., editor of the Southern Lumberman, whose "Invisible Empire—The Story of the Ku Klux Klan, 1866-1871," based upon years of research, was published recently by the Houghton Mifflin company. It is easy to understand how difficult was his task of piecing together the fragments of the story into an authentic and interesting narrative. For the Klan had no written records and the surviving Klansmen—even years later when there was little, if any, reason to fear reprisal—refused to talk.

"The objects of the new society being purely amusement and relaxation all of the original plans and arrangements were decidedly on the burlesque and grotesque side," says Mr. Horn in his chapter on the origin of the Klan. "The names of the officers, as specified in the report of the rules committee, were unusual and unique, the prime consideration being to get as far as possible away from familiar military or political titles."

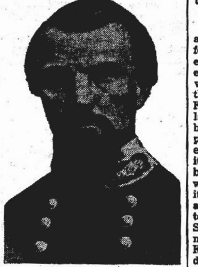
Having decided to call their meeting place a "Den," they gave their chief officer a name appropriate to that—the "Grand Cyclops." The next important official was called a "Grand Magi" and there was a "Grand Turk" to greet all candidates for admission. The secretary was called the "Grand Scribe" and there were two messengers called "Night Hawks" and two guards called "Lictors." Ordinary members were referred to as "Ghouls."

"The titles had no meaning or significance, being selected arbitrarily and solely for their weird and supposedly impressive sound," writes Mr. Horn. "It was just another local secret society of fun-loving young men looking for an outlet for their unemployed energies such as has been formed hundreds of times in the past without any particular purpose. In all probability it would endure but a short time until the attention of the members was directed along other channels. Aside from the condition of affairs and other factors involved, the thing that caused the new organization to attract attention and later to spread beyond any dream of its organizers was unquestionably the impression created and the curiosity aroused by its mysterious, sonorous name. It was the kind of name people liked to repeat, just to hear the sound of its sinister syllables. Even the initials, in their alliterative attractiveness, were an asset."



An illustration from Harper's Weekly for February 19, 1868, showing two army officers posing in Ku Klux Klan uniforms captured at Huntsville, Ala.

Curiously enough, this name, which was to help the society become historic, was chosen quite by chance. In those days Greek-letter fraternities were becoming popular in the colleges and universities of the country so it was only natural, perhaps, that the founders of the Klan should turn to the Greek vocabulary for a suggested name. It was Richard Reed who first suggested the name "Kuklos," from a Greek word from which our "circle" and "cycle" are derived. His companions liked that name but Kennedy, who had an ear for alliteration, suggested that another "K" sound be introduced into the name by adding the word "clan." So, at first, it was spelled "Kukos Clan," then "Kuklux Klan" and finally it emerged as "Ku Klux Klan." Although there are various other versions of the origin of the name, this is the story "as told by surviving charter members and its authenticity seems beyond question," declares Mr. Horn.



GEN. N. B. FORREST

Just as the name of the organization was chosen by chance, so was its official costume. Concerning it the author of "Invisible Empire" says: "Bubbling over with the excitement of their new-found plaything, the young members of the new Ku Klux Klan decided to make a public manifestation of themselves; so, borrowing the familiar idea of the easy Hallowe'en disguise, they wrapped themselves in sheets, mounted their horses and galloped through the streets of the little town, greatly enjoying the sensation they created—particularly the alarm and dismay of the Negroes, to whose superstitious minds the sight of white-sheeted figures suggested nothing but spirits risen from the grave, and who accordingly fled to their homes in panic-stricken terror."

In a short time this terror that was created among the Negroes began to create considerable talk around Pulaski. "It was noticed that prowling freemen who encountered the ghostly horsemen at night were afterwards more inclined to stay at home after dark; and this gave birth to the idea that perhaps the Klan might be used as a means of subduing the undue bumptiousness and the nocturnal prowlings of some of those who seemed incapable of using their new-found freedom discreetly."

It must be remembered that these were uneasy times in the South. Its traditional social structure had been overturned by the liberation of the slaves and these freedmen, suddenly unrestrained, were inclined to make the most of their new irresponsibility, especially since they were encouraged by Northern Carpetbaggers, who had swarmed into the South to take advantage of its demoralized condition, and by Southern Scalawags. It must be remembered, too, that for years the dread of a slave insurrection had been the secret fear of nearly every Southerner. Now with disorders increasing the minor transgressions of the newly liberated blacks seemed to be only a prelude to something infinitely worse. So anything which could hold them in check and avert that possible disaster was not to be lightly dismissed without a trial, at least.

The Klan's First Stage.

"But all this innocent frolic and horseplay on the part of a few small-town youths constituted merely the first stage in the existence of the Ku Klux Klan," writes Mr. Horn. "Throughout the winter of 1866-67 the Ku Klux Klan outgrew the confines of Pulaski and Giles county. Also it began to take on a more serious purpose wherever it had been established. It had grown out of its swaddling clothes and, almost before its organizers realized what was happening, they found it on the eve of branching out as a force of regulation which was to affect the destiny of the whole South. Pulaski, however, remained the nerve-center of the Ku Klux movement. Here was dropped into the pool the pebble whose ripples spread so far."

Just as Pulaski remained the nerve-center, so did the state of Tennessee become the "brain" of the movement. This was due largely to the genius of one man—Gen. Nathan Bedford Forrest, known as the "wizard of the saddle," when he was leading Confederate cavalry during the late war. He became the "Grand Wizard" of the Ku Klux Klan and under his direction the Klan was used as the only weapon which the prostrate South had left to prevent itself from being ground into the dust by the hatred of the Northern Radicals. Then when the control of the Klan began to slip away from the original leaders and thieves and other desperadoes began to use its masks and robes to cloak their own evil designs, it was disbanded.

The story of all this turbulent period is told in "Invisible Empire" whose author concludes his book thus:

"So lived and so died the Ku Klux Klan. It made its name a symbol of terror and desperation. There are today many thousands of Americans who think of it as an indefensible gang of outlaws and murderers. But ask any person who lived in the South during that wild nightmare called the Reconstruction and who saw the Klansmen as they went about their self-appointed, task, ask such a one and from the light in his eyes it will be easy to see that the Klan in his memory is clad in shining armor, sans peud et sans reproche."

"The theory that the Ku Klux were Confederate ghosts was readily accepted by the Negroes generally as being entirely reasonable and credible, and when the Klansmen started to making moonlight visits of a regulatory nature they took their cue from this," says Mr. Horn. For instance, the leader of the Klansmen, after calling the Negro out of his cabin, would complain that he was thirsty and ask the black man to bring him a bucket of water. Usually he would bring the bucket and a gourd dipper, thereupon the ghostly figure would throw the gourd aside and, raising the bucket to his lips, drain it to the last drop. (The Negro didn't know, of course, that the Klansman had a funnel inside his mask and from its end a rubber tube ran down to an oilcloth bag under his flowing robe.)

Having drunk, the white-robed figure would smack his lips appreciatively and exclaim, "My, but that's good. That's the first drink I've had since I was killed at the Battle of Shiloh; and you get mighty thirsty down there in Hell."

A Standard Joke.

"This became the favorite and standard joke of the Ku Klux everywhere during those early days; it was almost the hallmark of a Ku Klux raid—none genuine without it," declares Mr. Horn.

But it was not the only stunt which the Klansmen tried to frighten the superstitious Negroes. Sometimes the leader would put a false head, made of a gourd with a mask attached, on top of his head and wear his robe up over this false head. During the interview, he would thrust the masked gourd at the Negro saying "Here, hold my head a moment." The terror which this request inspired is easily imagined. Sometimes he would ask the Negro to shake hands with him and when the black man reached out he would be met with a hand made of wood and painted white so that it looked exactly like that of a skeleton.

During one such visit in Mississippi the Negro was asked, "Have you got a mattock?" Upon replying that he had, he was told by the ghostly visitor, "Well, come along with me to the graveyard. My headstone is so close to my head I can't rest good in my grave. I want you to help me move it."

A rare Ku Klux broadside warning, printed and posted in Tuscaloosa, Ala.

* * *

"It is particularly interesting to observe the frequency with which the unsung and anonymous but prolific poets of the Reconstruction era were moved to lyrical composition in connection with the rise and fall of the Ku Klux," observes Mr. Horn. He then cites the case of a Carpetbag preacher, named Reverend A. W. Cummings, who became tax assessor and collector in Spartanburg, S. C. When President Grant sent Federal troops to Spartanburg in 1871 to suppress the Klan, the local newspaper, named the Spartan, printed the following "impious gibe" at Reverend Cummings, which it called "A Reverend Gentleman's Evening Prayer":

Now I lay me down to sleep;
I pray thee, Grant, my body keep.
Just let the soldiers round me stand
And drive away the Ku Klux band,
That I may have one night of rest
With consciousness of safety blessed.
And though my conscience sting no more,
I think I may make out to snore.
A grateful song I then will raise,
Thy soldiers and thy grace to praise.
Amen.

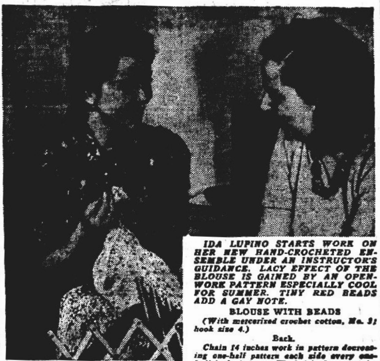
When Gen. George Meade, the victor of Gettysburg, was placed in command of one of the military districts in the South, he issued a general order calling for the suppression of the Ku Klux Klan and forbidding the newspapers to print anything "furthering the Ku Klux cause." Thereupon some unknown poet printed in the Augusta (Ga.) Register and Chronicle the following:

GENERAL ORDER NO. 36,721

Let every Ku Klux Klansman heed
The General Order of General Meade.
His Highness has received a fright
And can not sleep by day or night.
He sees in every Southern man
A member of the Ku Klux Klan,
And every time a ram's horn toots
(Poor fellow) trembles in his boots.

Oh, dear! Oh, dear! how they annoy him,
Hence his orders to destroy 'em.
So let every Klansman heed
The General Order of General Meade;
And all observe this General Rule.
Signed and sealed by Meade
DAMPHOOL

Ida Lupino Learns Crocheting



IDA LUPINO STARTS WORK ON HER NEW HAND-CROCHETED ENSEMBLE UNDER AN INSTRUCTOR'S GUIDANCE. LACY EFFECT OF THE BLOUSE IS GAINED BY AN OPENWORK PATTERN ESPECIALLY COOL FOR SUMMER. TINY RED BEADS ADD A GAY NOTE.

BLOUSE WITH BEADS

(With mercerized crochet cotton, No. 3; hook size 4.)

Back.

Chain 14 inches work in pattern decreasing one-half pattern each side every one-half inch, 4 times. Work 2 inches straight. Increase one-half pattern on each side 6 times, work until blouse measures 12 inches in all. Decrease 1 pattern on each side. Then decrease one-half pattern on each side every row 4 times. Work until armhole is 7 inches in all. Decrease 2 patterns on each side every row, 4 times.

Front.

Chain 8 inches decrease same as back, working one-half inch more to underarm at 8 inches above start of armhole. Decrease 1 pattern at neck edge. Then decrease one-half pattern every row at neck edge until shoulder matches back shoulder. Shape same way as back shoulder, keeping armholes the same length.

Pattern.

1. Ch (chain) 6— skip 2 s. c. (single crochet)—s. c. in next stitch Ch 1, s. c. in next stitch Ch 3 skip 2 s. c. D. C. (double crochet) in next stitch Ch 3 * repeat between *'s.*

*2. Ch 3 * d. c. in Ch 1 between 2 s. c. on row below Ch 3 s. c. in Ch 3 loop on row below Ch 1 s. c. in next loop Ch 3*.*

Repeat these two rows.

String beads on cotton before starting chain—work one bead in chain between s. c.'s on row below in every 5th pattern and every 5th row—alternating beads.

Sleeve.

Chain 10 inches work pattern increasing ½ pattern on each side for 8½ inches.

Decrease 1 pattern on each side work 5 inches decrease ½ pattern on each side every row for 2½ more inches.

NOW IDA IS WORKING ON A PILL BOX HAT WITH THE ATTACHED WIMPLE. THIS SMART FASHION ADDS A DASHING NOTE TO ANY GIRL'S COSTUME.

No. 4 hook and Clark's O. N. T. Pearl cotton

*Ch. 4, fasten with a slip stitch forming a ring. Six s. c. into ring. Two s. c. top of each stitch on row below. Ch. 2—*2 s. c. in next stitch. One s. c. in each of next 2 stitches. *Repeat between *'s around 1 row. Ch. 2 * 2 s. c. in next stitch. One s. c. in each of next 3 stitches. *Repeat between *'s around 1 row.*

Ch. 2—increase 6 stitches around each row evenly spaced, keeping work perfectly flat until crown of hat measures 5½ inches. Fasten off.

Ch. 2½"—s. c., in each stitch of chain.

Ch. 2 turn work 1 s. c. in top of each stitch on row below.

Continue until strip is 21 inches long or desired length.

BACK TO THE DRESS. IDA GETS A FEW POINTERS ON THE SKIRT WHICH IS FASHIONED IN A LOVELY SNOWFLAKE PATTERN.

No. 4 hook and Clark's O. N. T. Pearl cotton.

*Crochet a loose chain over 70 inches long. Crochet on 38 patterns with *8 d. c., skip 2 stitches, make 2 d. c. in next stitch, chain 2, make 2 d. c. back into same stitch, skip 2 stitches *. Repeat between * around the row.*

*Row 2. Chain 4 * work 1 s. c. under chain 2 separating d. c. of row below, chain 2 work 1 s. c. back in same space, chain 2, work 8 d. c. of row below. Chain 2 *.*

Repeat these 2 rows for pattern.

*Work 3 inches. Decrease by making 1 less d. c. in the 8 d. c. group (the following decreases will be made in the same manner). Work 3 inches, decrease; repeat. Work 4 inches, decrease; repeat. Work 3 inches, decrease; repeat twice. Twenty-six inches in all. Finish with beading by making * 2 d. c. Chain 2, skip 2*. Work 2 rows of s. c. around the bottom.*

RIGHT: THIS PHOTO SHOWS IDA LUPINO OUT WALKING IN HER BRAND NEW COSTUME. PRETTY AND PROUD, AS WELL SHE MIGHT BE IN AN ENSEMBLE SHE MADE ALL BY HERSELF.

NOTE HOW THE WIMPLE HANGS FETCHINGLY IN BACK, BLENDING WITH THE LACY BEADED BLOUSE.

THERE IS A SPECIAL PRIDE OF OWNERSHIP IN A DRESS YOU'VE CROCHETED YOURSELF, AND IT ISN'T SO VERY MUCH WORK, EITHER. THE APPLICATION OF A LITTLE PERSEVERANCE NETS AMAZING RESULTS, NOT ONLY IN THE DRESS ITSELF BUT IN AN INTANGIBLE SATISFACTION.

Women's Hats Again!

The costly era in millinery is said to have been from 1903 to 1913, when the Marie Antoinette, Watteau and the Merry Widow hats were in vogue. Willow plumes and bird of paradise feathers were popular at that time.

Cost of Coiffures

In 1938 the 75,000 beauty shops in the United States took in approximately $400,000,000 for permanents and coiffures.

Wild Game in the Everglades

Contrary to the belief held by many that such game as deer, bear, wildcats and weazels are found only in the colder sections of the United States, the warm Everglades of south Florida are the happy hunting grounds of the Seminole Indians for these animals.

Arawaks Had No Farm Tools

The Arawak Indians, original inhabitants of the island of Jamaica, had no agricultural implements.

Uncle Phil Says:

And Criticism, Too

When you don't know much about music, let someone else start the applause.

Skepticism sometimes saves a man from being everybody's fool.

It takes a good deal of wit to perpetrate effective ridicule.

Beyond Estimation

About the weakest of statistics are those that purport to state what crime costs the country per capita.

Occasionally we meet a man who asks for only half a chance, but the majority prefer the chances whole.

One born lazy is generally happily born without cupidity.

Play the Game

Don't ask, "Is life worth living?" You have been dealt the cards.

The man who wants to be good has less opportunity than the man who wants to be great.

A worm may turn, but a sheep never will.

Perhaps the Darky's Ducks Were Storks

A salesman was rattling along a country road in Tennessee, when he came to a ford. A Negro was standing by the little stream where some ducks were swimming. The salesman said: "Can I get through the creek with this car all right?"

"Yes, suh, drive right through."

The salesman, thus encouraged, drove into the stream, only to find that the water was so deep that it flooded his engine.

The salesman turned and said: "What do you mean by telling me that I could drive through?"

"Well, boss, I never knew dat water was so deep. It only comes half-way up on my ducks!"

HOT WEATHER BILIOUSNESS

Have you noticed that in hot weather your digestion and elimination seem to become torpid or lazy? Your food sours, forms gas, causes belching, heartburn, and a feeling of restlessness and irritability. Your tongue may be coated, your complexion bilious, and your bowel action sluggish or insufficient.

These are some of the symptoms of biliousness or so-called "Torpid Liver," so prevalent in hot climates. They call for calomel, or better still, Calotabs, the nauseless calomel compound tablets that make calomel-taking a pleasure.

Calotabs give you the effects of calomel and salts combined, helping Nature to expel the sour, stagnant bile and washing it out of the system. One or two Calotabs at bedtime with a glass of water,—that's all. Next morning your system feels clean and refreshed, your head is clear, your spirit bright, and you are feeling fine with a hearty appetite for breakfast. Eat what you wish and go about your work or pleasure.

Genuine Calotabs are sold only in checker-board (black and white) packages bearing the trade mark "Calotabs." Refuse imitations. Trial package only ten cents; family package twenty-five cents, at your dealer's (Adv.)

Visiting with them last week were H. T. Lander of Orlando and Mr. and Mrs. David Lander of Lakeland. Mrs. Ruth Hylton spent the weekend with them.

Rev. and Mrs. C. R. Mingledorff and children, Imogene and Glenn, left Wednesday for Tampa to attend the Florida annual conference of the Methodist church which is being held there this week. Rev. and Mrs. Mingledorff are located at the Edgewater hotel, and children are visiting among friends there.

Dr. and Mrs. Stanley N. Reeves left Wednesday for their summer vacation trip, which will include visits with relatives in Bowling Green, Ky., and Nashvle, Tenn. Later in the summer they will return home by way of Vidalia, Ga., where they will be guests of Mrs. Reeves' relatives.

Ed Touchton, son of Dr. and Mrs. W. C. Touchton has had as his guest, Willis Moseley, a classmate at Emory University, Atlanta, Ga. They left Wednesday for Atlantic Beach, near Jacksonville, where they are attending a Sigma Chi house party, after which they will both return to summer school at Emory.

Clinton Rector of Washington visited his mother, Mrs. C. H. Rector, last week at the home of Mrs. W. S. Rawlings. Mr. Rector accompanied by his mother left Saturday, the former to return to his home in Washington, while Mrs. Rector went on to Jackson, Miss., to spend the summer with another son, Nelson Rector and family.

BECAUSE LIFE DEPENDS ON TIRE SAFETY—
They Choose
Firestone
CHAMPION TIRES

FIRESTONE WINS 20th Consecutive Victory In Indianapolis 500-Mile Race

WILBUR SHAW,
the 1939 winner

On May 30th, Wilbur Shaw drove to his second victory in the 500-mile Indianapolis Race on Firestone Champion Tires at an average speed of 115.03 miles an hour. Champion race drivers, whose very lives and chances of victory depend on tire safety, know tire construction. That is why they select and buy Firestone Tires for their racing cars.

A merciless sun beat down upon the speedway as Wilbur Shaw drove to victory on Firestone Champion Tires. The blistering brick of the main stretch and the granite-hard surface of the turns and the back stretch put tire safety to the test supreme! Record after record was shattered. Speeds reached as high as 160 miles an hour on the straightaways, as 33 of the fastest drivers in the world waged a breath-taking battle for gold and glory.

Never before in all the history of the motor car have tires been put to such a torturous test. And never before has any tire so firmly established itself as a Champion in construction and performance, as well as in name. Here is dramatic proof of the extra strength which the revolutionary new Safety-Lock cord body provides in Firestone Champion Tires—of the extra protection against blowouts assured by the new and advanced Firestone patented Gum-Dipping process—of the extra mileage resulting from the tougher, wear-resisting rubber compounds in the sensational new Gear-Grip tread.

No longer can there be any question of which tire is *safest.* One tire—and *only* one—provides these exclusive safety construction features. One tire—and *only* one—has been on the winning cars at Indianapolis for 20 consecutive years. Motor car manufacturers enthusiastically adopted the Firestone Champion Tire for their 1939 models. Order your new car equipped with this amazing tire. Or drive in and let us equip your present car with a set of new Firestone Champion Tires, the one tire—and only one that is **safety-proved on the speedway for your protection on the highway.**

GET OUR LOW PRICES ON FIRESTONE TIRES BEFORE YOU BUY

See Firestone Tires made in the Firestone Factory and Exhibition Building at New York World's Fair. Also visit the Firestone Exhibit at the Golden Gate International Exposition at San Francisco.

Listen to the Voice of Firestone with Richard Crooks, Margaret Speaks and the Firestone Symphony Orchestra, under the direction of Alfred Wallenstein, Monday evenings, over Nationwide N.B.C. Red Network.

Wells Motor Co.

106 MAIN STREET
AVON PARK, FLORIDA

THE ONLY TIRES MADE THAT ARE SAFETY-PROVED ON THE SPEEDWAY FOR YOUR PROTECTION ON THE HIGHWAY

Aubrey Roberts Weds Sarasota Girl

Mr. and Mrs. C. H. Kidwell of Sarasota have announced the marriage of their daughter, Cecille, to Audrey Roberts, which took place Monday evening, May 29, at 8:00 o'clock at the Presbyterian manse in Sarasota. Rev. Andrew Caraker officiated in the presence of a few friends and relatives of the couple.

The bride was attractively attired in a navy blue ensemble with modish white accessories and wore a corsage of sweetheart roses.

Immediately after the ceremony the couple left for a brief honeymoon, and upon return will reide in Sarasota, where Mr. Roberts is associated with Badger's Pharmacy.

Mr. Roberts is the son of Mr. and Mrs. W. A. Roberts of this city.

Missionary Society Monday

The regular monthly business meeting of the First Baptist church was held Monday afternoon at the church. The meeting opened with prayer and Mrs. R. H. Lawhon led the devotional.

Mrs. Lawhon presided in the absence of Mrs. David Stuckey, and old and new business was discused. Mrs. J. D. Sherman gave the treasurer's report.

Those present were Mrs. E. C. Wever, Mrs. W. W. McFarland, Mrs. E. Spencer, Mrs. B. F. Martin, Mrs. J. D. Sherman, Mrs. R. H. Lawhon and Mrs. J. R. Bennett.

ON CAMPING TRIP

Peyton Covington, Junion Tuten and Frank England have a yen for the wide open spaces, so they loaded up an old Ford, hitched on a small trailer luggage carrier and left last Sunday for the mountains of North Carolina and Tennessee. They will camp out for the next three weeks around the western North Carolina resort section. Marus Covington went as far as Hendersonville with them.

County Board Donates $25 To Townsend Club

The Highlands county board of county commissioners, at their meeting Tuesday, voted unanimously to donate $25 from the county general fund to help defray the expenses of delegates of the Sebring Townsend Club to their national convention this summer. J. Lee Johnson made the request for the donation as head of the delegation from the club.

Clerk of Circuit Court W. Z. Carson filed his annual estimate of income for the county during the coming year from sources other than current taxes. Being only an estimate based on previous years in which the tax system has been torn to pieces, there is no certainty of the estimate being anywhere near correct, except that it is sure to be fairly accurate as to the amount of delinquent taxes which will be collected, the Murphy Act having wiped out this source of revenue since all that has not been redeemed will now be in the hands of the State Internal Improvement Board.

The board voted to purchase a photostat machine for copying public records, the cost of which is $2,000. This machine will assure the public of an exact and perfect record of all papers filed in the county records; and it is claimed that it will cut expenses in the office as well as speed up service.

Coy Welch, president of the Sebring Chamber of Commerce, and Ford W. Heacock appeared before the board, requesting aid in completing the girl scout house near the court house. The county voted $200.00

Chairman J. L. Wells, Commissioner N. B. Jackson and Clerk H. E. Keller will represent Highlands county on the air tour being sponsored by the state. The tour will consist of one or more planes from each county in the state, which will visit the New York fair and various cities enroute.

Due to the air tour leaving on the 20th, which is the regular meeting day of the board, the meeting date was set for June 15 for the second meeting in the month. The date of the first meeting in July was also changed from the first Tuesday to Monday the third.

Sinclair Building Service Station on Mall and Railroad

Ground was broken this week for the erection of a new Sinclair Oil company service station on the Mall just west of the A. C. L. railroad. The station is being built by C. W. Pabor on two lots owned by him with a 100 foot frontage on the Mall. The station will cost $3500, Mr. Pabor stated.

The new building will be of concrete block and stucco, and the Sinclair type station, with concrete drives, grease racks and all modern equipment installed. When finished the station will be leased to the Sinclair Oil Company. The deal was handled through Spencer Jones, local agent, of Sebring.

UNION CONGREGATIONAL CHURCH

Dr. Alfred C. Elliott, Pastor

June 11 — Sunday school, in charge of Superintendent J. P. Garber, at 9:45 a. m. Here is an opportunity to study the Bible and profit by friendly discussion of social and religious questions. We have classes to suit all ages, each class in charge of a well-trained teacher. Come, and bring your children, and enjoy the friendly atmosphere of this school of religious education. Morning service of worship at 11 o'clock, with sermon by Dr. Elliott, who will speak on "A King Who Prayed." Solo by Mrs. T. J. Ward. Come and hear what this King did for his country in a time of great national peril. He set an example worthy of being followed by all men.

The Ladies' Aid will hold an all-day sewing meeting and covered dish luncheon on Wednesday at the home of Mrs. A. C. Elliott. Work will be done in preparation for the annual bazaar, and all members are requested to be present.

The "Quiet Hour" service will be held on Wednesday at 7:30 p. m. Brief address by the pastor, hearty singing, and an opportunity for prayer. Come and receive the inspiration of forty-five minutes waiting upon God. You will find it a lift when the way is hard, a renewal of strength for the daily task.

The services of worship of this church are open to all, and the public is cordially invited to unite with the friendly members in the reverent worship of God who looks upon all men and women as His dear children.

CHRISTIAN SCIENCE SERVICES

Woman's Club Building.
Sunday school—9:30 a. m.
Services—11:00 a. m.

Subject of Lesson-Sermon: "God, the Preserver of Man."

The public is cordially invited to attend these services.

ON TRADE AGREEMENTS

U. S. Government,
Trade Agreements Committee,
Washington, D. C.

Dear Sirs:

In last August's issue of Holland's Magazine was an article by Secretary Cordell Hull on Trade Agreements. In this article Mr. Hull states to the effect that trade agreements are fair and impartial because every citizen has a right to place his views and wishes before the Trade Agreements Committee, which will be given consideration and study.

Therefore I hereby wish to place my views and wishes before them for consideration and weight.

Please for the sake of suffering humanity in Florida families, recommend to Congress the passage in full of our Hon. J. H. Peterson's bill which he has introduced in Congress pertaining to lifting Florida producton allotment of sugar n the future.

We in Florida are almost limited to one natural resource, an which we, as all other states, must either build up or fall down as to our livelihood and asset to our government. And that is our agricultural possibilities, which are very seriously torn to pieces because of foreign shipments into our own markets of our own consumption. We do not have a big variety of resources which we might fall back on to earn the necessities of life as do the western cattle people, or other parts of the U. S. And as a result we are a good capable, taxpaying part of the U. S., capable of furnishing the entire rest of the U. S., with fresh vegetables and highly capable of producing more sugar now than the 28.6 per cent now allowed a foreign country smaller than we, who are no part of the U. S., of whom we have absolutely no obligations to support and who pay no part whatsoever of our heavy tax burdens. And while we feel kindly to Cuba as we do all nations, it is not our obligation nor duty to flood them with a production of our own consumptin of sugar and by the same act deprive and cause suffering to the families of Florida, who are a tax paying part of the U. S. and whom the U. S. is mutually obligated to the support of each other.

Not only would this restore us to our only possibilities of a livelihood, benefiting Florida families, but t would benefit the government in many ways: It would place American capital in industrial operation in America producing the sugar consumed in America, and would turn annually millions to the government in corporation taxes, income taxes, industrial sliding scale taxes, taxes from thousands with increased incomes, taxes from business houses through whose hands these moneys would flow; whereas, under the present arrangement the government does not derive one penny of above by American capital operating in foreign countries.

Therefore, I pray of you to recommend the passage of this bill as introduced by our Congressman J. H. Peterson.

Yours very truly,
G. A. HARPER.

Three Games of Softball Sunday

Three games are scheduled for Sunday afternoon in the city diamondball league. Lake Byrd meets W. O. W at 2 p. m.; Smith-Touchton plays Florida Public Service at 3:30 and the American Legion and Armory wind up the session of 21 innings of softball at 5 p. m.

The public is invited to come out to the park Sunday and see the entire outfit perform. Every team is fairly well matched and good games are promised. The games will be seven innings each.

The total land area of Florida is 35,111,040 acres of which approximately 18 per cent is in farm land while about 3,100,000 acres of land are devoted to conservation, a very small portion of which is available for recreation as shown by the parks and recreation survey made by the Florida State Planning Board.

Davis-Mobley Wedding

Miss Villa Mae Davis, daughter of Mrs. [illegible] Davis, of Westfield, N. J., and William Lee Mobley of Dade City were married Saturday evening at 5:00 o'clock, June 3 at a beautiful and impressive ceremony at the home of the bride-groom's sisters, the Misses Mattie and [illegible] Mobley of Dade City. The Rev. Albert A. Stalck pastor [illegible] Baptist church officiated in the presence of a gathering of friends and relatives.

The ceremony was performed in the living room which was decorated with roses, shasta daisies and other summer flowers, the improvised altar being banked with floor vases of blue hydrangeas with pedestal baskets of pink gladioli forming the background.

The bride, a brunette, was lovely in her white lace afternoon frock of silk [illegible], made on simple lines with a square neck and trimmed with seed pearl buttons. Her small hat, worn with a short veil, was fashioned of white organdy roses with a spray of orange blossoms across the back and streamers of white velvet. She carried a bridal bouquet of bride's roses and lilies of the valley.

Miss Nell Baker, a cousin of the groom, attended the bride, wore a white dress and carried a bouquet of pink roses and blue bachelor buttons. In her hair she wore a small spray of the same flowers.

Mr. Dennis Mobley, brother of the groom, served as best man.

A reception was held after the ceremony for friends and relatives. The bride's table was overlaid with lace cloth and three tiered wedding cake was topped with a miniature bride, groom, and minister, and was surrounded by gardenias and orange blossoms. Tall burning tapers cast a soft illumination over the table. Assisting in the dining room were Mrs. Edwin Gasque, Jr., Mrs. K. E. Pomeroy, and Miss Betty Mobley.

Following the reception, Mr. and Mrs. Mobley left for a short trip, the bride traveling in a powder blue ensemble with white accessories.

Mrs. Mobley attended the Westfield schools. She is well known in Westfield and Dade City, where she and her family spent several winters.

Mr. Mobley, a native of Dade City, attended school there, and Gordon Military College in Barnesville, Ga. He is now connected with the State Road Department, and is located at present in Avon Park.

Roland Droit, Jr. Has Birthday

Roland Droit, Jr., attractive son of Mr. and Mrs. Roland Droit, celebrated his birthday anniversary at a party Saturday afternoon from 3:30 to 5:30, given by his mother at their home on Lake Lotela. A color motif of pink and green was effectively used in all appointments.

Enjoyable games were played on the lawn until late in the afternoon at which time delicious refreshments of ice cream and cake were served in the dining room.

The beautiful birthday cake that formed the centerpiece for the dining table was iced in green, and held four small lighted pink candles in clever love bird holders. Novel paper hats were given as favors.

"Sonny" received a number of gifts from his young friends sharing the pleasant occasion with him who were Eileen Sachsenmaier, Peggy Martin, Barbara Jolly, Betty Rose [illegible], Mary Jim Davis, Kitty Lou [illegible], Delores Costine, Betty Childers, Lynn Longbottom, Betty Jo [illegible], Alyne Reed, and Mel Bass, Dale Geiger, Franklin Welch, Mickey Ware, Frankie England, Jackie Ward, Jimmie Prentice, Thomas Thayer, Max Maxwell, M. L. [illegible].

Frieda Garrett Has Birthday

Mr. and Mrs. Albert Garrett entertained her daughter, Fraida, on Tuesday evening at their home in celebration of her birthday anniversary. A pink and white color motif was in evidence in the party appointments. Bouquets of roses, [illegible] and other cut flowers were used for decorating the home for the occasion.

A number of interesting games were enjoyed during the evening, after which refreshments of angel food cake and punch were served. A prettily decorated birthday cake containing thirteen pink candles graced the center of the dining table.

Friends invited were Madge Pilcher, Ruth Pendleton, Dorothy Lawhon, Winifred Demorest, Jimmie [illegible], Bobbie Keller, Dale McFarland, Walter Martin, and Billy Archer.

Weir's Hosts Tuesday Evening

Mr. and Mrs. Gordon Weir were hosts on Tuesday evening at their home at the Lakeview apartments when they entertained in honor of Mr. and Mrs. William Mobley, whose recent marriage in Dade City was of interest to friends here. A springtime atmosphere was created in the rooms by a tasteful arrangement of spring blossoms in pastel shades. Pink roses were also used in decorating the party rooms where six tables of bridge were in play. Attractive tallies in a bridal design were used in the games.

Mrs. Richie Green won high score prize for the ladies and received a piece of costume jewelry. High score for the men was won by Carl Jolly, whose prize was a pen knife. Mr. and Mrs. Mobley were presented a Fostoria cream and sugar set as guest prize. Later in the evening angel food cake with tinted whipped cream, topped with a cherry, and fruit punch were served.

Friends invited were Mr. and Mrs. C. W. Jolly, Mr. and Mrs. John [illegible], Jr., Mr. and Mrs. Frank [illegible], Mr. and Mrs. Chas. Pardee of [illegible] City, Mr. and Mrs. Francis Shockley, Mr. and Mrs. Richie Green, Mr. and Mrs. Eugene [illegible], Mr. and Mrs. Earl Ware, Mrs. Laura Pardee Ward, Mrs. [illegible] Wilkes, Mrs. C. H. Pardee, Mr. and Mrs. S. C. Pardee, Mr. [illegible] Pardee, Jr., Miss Carmen [illegible], Miss Verna Heim, Mrs. [illegible], and Ben Stewart.

Banquet Thursday At Baptist Church

The Junior Royal Ambassadors and their counselors, Paul A. McFarland and Floyd Patterson, were delightfully entertained at a banquet in the church dining room on Thursday evening, June 1, by the Junior Girls Auxiliary of the First Baptist church and their sponsor, Miss Tommy Lee Green. The dining room, with its decorations of spring blossoms, provide a perfect setting for the affair.

A Japanese motif was cleverly emphasized in the banquet appointments, and the tables, which were arranged in U shape, were attractively decorated with colorful garden flowers placed at intervals along the table.

Novelty booklets in the form of a small boat, bearing on the front cover a red [illegible] boat and a white sail with the letters, G. A. and R. A. inscribed, in the front, held the program and menu. The menu consisted of sliced ham, green peas, potato salad, sliced tomatoes, hot rolls, butter, iced tea, peach halves and cake.

Miss Winifred Demorest was toastmaster for the occasion, and one of the features of the evening's program was given by the members of the two organization's on "Our Hospitals in Foreign Lands." Those taking part were Lena Mae Perry, Betty Joe Wells, Dorothy Lawhon, Sammy Longbottom, Alfred Englemann, jr., Ruth Pendleton, Dorothy Walker, E. C. Wever, and Barbara Lawhon. Small Japanese vases containing an individual spring blossom were given as favors.

Those enjoying this delightful affair were Lena Mae Perry, Dorothy Lawhon, Barbara Lawhon, Virginia Spencer, Margaret Dilley, Dorothy Walker, Winifred Demorest, Ruth Pendleton, Betty Lynn Helms, Jeanene Brown, Delores Crosby, Betty Joe Wells, Elizabeth Bradbury, Helen Bradbury, Yvonne Head, Peggy Joe Smith, Alfred Engleman, jr., Paul [illegible], Sammy Longbottom, Charles Bennett, Melvin Mann, E. C. Wever, Roland Dilley, Frank Camp, jr., Donald Ford, Jean Sanders, Harry Sanders, Carold Peterman, Henry Foster, and the sponsors and counselors Miss Tommy Lee Greene, Paul A. McFarland, Floyd Patterson. Other guests for the evening were Mrs. Paul A. McFarland, Clement McFarland and Miss Minerva Perry.

Sunday School Picnic Monday

All children of the Sunday school department of the Methodist church were invited to attend a weiner roast and swimming party given on Monday afternoon at the home of Mrs. C. E. Lanier, in honor of Imogene Mingledorff, who with her family left Wednesday to attend the Florida annual Methodist conference which is being held in Tampa this week.

The children all met at the Methodist hut and from there went out to Mrs. Lanier's home on Lake Lotela. Swimming was enjoyed all afternoon, after which a picnic supper was served on the lawn. Home made ice cream was made out on the lawn and was served later in the afternoon.

About forty attended and those helping entertain the children were Mrs. W. A. Luthye, Mrs. Rex Reed, Mrs. W. T. Connell, Mrs. C. E. Lanier, Mrs. E. H. Ware, and Mrs. Hayes Maxwell.

Monday Bridge Club Met in Sebring

Members of the Monday night bridge club were entertained on Monday evening at the home of Mrs. Tom Jones in Sebring. Roses were used to decorate the party rooms where two tables were placed for play.

High score club prize was won by Mrs. Fieldings, second high awarded to Miss Gwendolyn Wever, and Mrs. Fieldings received floating the prize. Mrs. Bill Sachsenmaier won the bingo prize. Tuna fish salad, deviled eggs, olives, saltines, and fruit punch were served later in the evening to the guests.

Club members present were Mrs. Roland Droit, Mrs. Bill Sachsenmaier, Miss Gwendolyn Wever, Miss Hazel Cameron, Mrs. Francis Shockley, Mrs. Richie Green, and Mrs. Fieldings of Sebring.

Mr. and Mrs. Atkins Entertained

Mrs. A. E. Hollingsworth was hostess on Sunday evening at her home on Butler avenue, when she entertained at a lovely dinner in honer of Mr. and Mrs. Harmon Atkins, whose recent marriage took place in May. The rooms were attractively arranged for the occasion.

Covers were laid for fourteen guests and the delicious dinner was served at five-thirty o'clock at the beautifully appointed dining table, after which the evening was spent informally.

Friends invited to share this occasion with Mr. and Mrs. Atkins and their hostess were Mr. and Mrs. Ray Wells, and son Lawler, Mr. and Mrs. D. B. Farnell, Mr. and Mrs. Theo Weisheyer, Mr. and Mrs. Ivor Farnell of Lake Wales, and Mr. and Mrs. M. G. Huebner.

Johnson's Hosts To Thursday Club

Mr. and Mrs. Floyd Johnson were hosts on Thursday evening to members of their bridge club and additional guests, at their home. Red and white dahlias, and roses decorated the party rooms most attractively.

High score prize was won by Mr. and Mrs. E. L. Roberts, and Mr. and Mrs. J. L. Wells received second high. Mr. and Mrs. Chas. Sherman were presented the floating prize. Punch was served during the games.

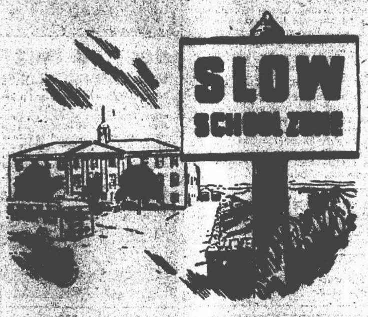
After the usual number progressions a delicious salad course with iced tea were served to member and guests present who were Mr. and Mrs. Chas. Moffett, Mr. and Mrs. Milford Dilley, Mr. and Mrs. Raymond Dilley, Mr. and Mrs. E. L. Roberts, Mr. and Mrs. Lester Amstrong, Mr. and Mrs. John Hood, Mr. and Mrs. J. L. Wells, Mr. and Mrs. Chas. Sherman.

Ladies Aid Have Luncheon

Dr. A. C. Elliott, pastor of the Union Congregational church was guest of the Ladies' Aid at a covered dish luncheon on Wednesday at the home of Mrs. L. E. Bass. The tempting luncheon was served at one o'clock.

In the afternoon all the ladies sewed for the annual bazaar which they have each year.

Those present were Dr. and Mrs. A. C. Elliott, Mrs. Harry Dilley, Mrs. John Hood, Mrs. E. O. Willims, Mrs. E. L. Thomason and Mrs. Bass.



22% of the pedestrians killed in traffic accidents are under 15 years of age. In one year, some 2,600 children between the ages of 5 to 14 years were killed by automobiles and 90,000 were injured.

Children are impulsive. Caution comes with age. In their play and on their way to and from school, children do not think of the traffic hazards. That is why school zones are often marked to caution drivers.

Men of the 300 employees of Florida Public Service Company operate cars and trucks. They are local citizens living in the communities where we do business, members of local organizations with children in local schools. They are, therefore, doubly interested in safety in the streets and highways. Their acceptance of their responsibility is indicated by their record for the first nine months of 1938—.79 accidents for every 100,000 miles traveled. This compares with about 2.7 accidents per 100,000 miles for the public utility industry as a whole.

TAUCK STUDENT TOURS
7 THRILL-PACKED DAYS for HIGH SCHOOL BOYS Seeing NEW YORK and WORLD'S FAIR $39

OPPORTUNITY of A LIFETIME

to see the World's Fair and wonders of New York at such an amazingly low price. Live in a college dormitory and enjoy the campus life of Fordham University . . . see "The World of Tomorrow" in hundreds of exhibit buildings, the display of foreign nations, and the colossal amusement section of the World's Fair. Visit Radio City and see and hear a real radio broadcast; go aboard an ocean liner; inspect a giant newspaper plant; see great ships of the U. S. Navy and other unforgettable wonders of the "Big City". Tours begin on Sundays . . . never a dull moment for 7 full days!

FATHERS and MOTHERS

This Student Tour will do your boy a world of educational good. Leading educators supervise the program of the Tour . . . young college men act as counsellors, one for every six boys . . . a staff of physicians and nurses of the college infirmary guard his health. Your boy will be in safe hands, under expert care and guidance. Make it possible for him to enjoy this fine, lowest educational tour.

REMEMBER $39 INCLUDES

all meals and room in college dormitory, all World's Fair admissions, all sightseeing and other scheduled features, even tips . . . in fact

all expenses in New York . . . everything

except Railroad Transportation to and from New York. Any Coast Line Ticket Agent will be glad to furnish literature and complete details of these tours and quote the low round trip fares to New York. Give him a call today!

CHAPTER X—Continued

—10—

Miss Moss asked: "Why didn't Mr. and Mrs. Hurder wake up, I wonder?"

Clint suggested: "Smoke got them, maybe."

But June said: "They slept pretty soundly, usually. And Aunt Evie gave them some warm milk when she put them to bed." Her voice for a moment was dry, as though it might crack. She repeated: "They slept soundly."

Tope looked at Miss Moss; and then he asked awkwardly: "About Mr. and Mrs. Hurder. How—what do you think?"

"They were unconscious," Clint explained. "The firemen got a pulmotor. Doctor Cabler was there. I didn't wait to hear. I brought June away."

Miss Moss said: "I'm glad you did, Clint. Miss Leaford, I'm going to put you to bed in our spare room. Clint, you will stay here tonight?"

June protested: "Oh, I don't want to go to bed."

And Tope reflected: "Funny that the fire department took so long to answer." He asked Clint: "Mrs. Taine or any of them surprised to see you there? Surprised to see June up and dressed?"

Clint nodded, with a smile at June. "Matter of fact, we had quite a row," he admitted. "June and I had Mr. and Mrs. Hurder out of the house when Mrs. Taine got there. She asked if they were dead, and I didn't know. So she knelt down to feel them, and then Asa came along, and she told us to carry them into the Bowdon house. We did, and about that time the firemen got there, and I went outside again and took June with me."

The others were listening intently, and Miss Moss watched the girl and liked her. "But Mrs. Taine came out after us," he explained. "June had on a new dress that Asa had given her, and Mrs. Taine didn't approve of that. She wanted to know why June wasn't in bed and asleep, and who I was, and about this dress . . . She had burned her hand, and maybe that upset her, but she was pretty unpleasant, and I got good and mad.

"Finally she told June to go into the Bowdon house and take off that dress and go to bed, and I got up on my ear. I told her June was coming home with me."

June lifted her head; and Clint held her close. "Mrs. Taine thought I was crazy," he said. "But June stood up for herself."

"I told her I never would live there again," the girl cried, in a sudden passion of grief and woe. "Oh, I can't go back. Ever! It was terrible, always, there."

Miss Moss came quickly to her side. "Now that's enough for tonight," she decided. "I'm going to put you to bed, child. Come."

"No, no," June protested. "I can't. I don't want to be alone."

The Inspector said soberly: "The fire chief figures the fire was set. Gas exploded in the cellar." Miss Moss nodded; and Tope exploded in a grim wrath: "I told Heale, days ago, that when a man starts killing, he may go on."

She touched his hand, comforting him; and he asked: "What do you think?"

She hesitated. "If Rab Taine was in Providence, and Asa and Mrs. Taine and Mrs. Bowdon were together, then only Mr. Taine was alone."

"They found Taine asleep in a chair in the kitchen of his house," he said. "I asked Heale. But Glovere's still missing."

She looked at him curiously. "Asleep?" she repeated. "But Miss Leaford said they saw Mr. Taine turn out the light!"

"She said they saw the light go out," Tope corrected. "Mrs. Taine said the lights went out in the Bowdon house, too. But anyway, Taine was asleep in the chair when they found him. Or pretended to be."

Miss Moss considered. "I should like to know," she reflected, "why his light went out?"

"Heale told me once that the three houses were all on one meter," Tope recalled. "Wired from the Hurder cellar. The fire might have shorted the wires, or melted them."

"Then why did the current go off in the Taine house before the fire started?" she insisted. "And what started the fire? And why did it spread so fast? And why was the department so slow in answering the alarm? And how did Mrs. Taine burn her hand?"

Inspector Tope made a gesture of amused surrender. "I don't know Mrs. Tope," he protested. "Wish I did."

She nodded, smiling faintly. "I'll take care of Miss Leaford," she promised. "While you find out the answers!"

CHAPTER XI

Tope and Clint arrived at Kenesaw Hill toward four in the morning, to find the house all collapsed into a mass of timbers through which like rats the little flames still played. And all about, in a thin circle, curious folk were standing by. Clint pulled up beside the road, and Inspector Heale saw their arrival and came across to meet them.

"That you, Tope?" he asked. "Young Jervies with you? Where's the girl?" He was peering into the car.

Inspector Tope said: "Mrs. Tope put her to bed. She was tired out. Clint here can tell you all there is to tell."

Heale nodded. "You spotted the fire, didn't you, Jervies?" he asked.

So Clint told his story, briefly, the Inspector listening without interruption till the young man was done. Then Inspector Heale began to question him; and Tope left them together and walked over toward the fire. There were two or three scores of people here, roused by the alarm or wakened by the glare of the flames against the rainy sky, and come to watch the conflagration to its end. Tope moved among them quietly, listening to the fragmentary conversations here and there.

Then he saw Asa Taine, in the shadows by the old barn, talking to someone—Lissa Thayer.

Her countenance was in darkness, since Asa stood between her and the fire, so Tope could not see her expression; but he saw Asa bend nearer her, his arms encircling her in a swift embrace, his face close to hers.

"This was a spare, thin woman."

Then someone called Tope's name, and the old man saw Lissa slip away into the darkness as Heale and Clint came to his side. At the same time Asa recognized Clint, and he approached them.

"Hullo, Jervies," he said, in a friendly tone. "What have you done with June?" Heale and Tope were a little to one side.

"I took her home," Clint explained. "I thought she ought to get away from here."

Asa nodded approvingly. "It's been hard on her here, even before tonight," he assented. "But if you don't bring her back, you'll have a hornets' nest around your head. They won't let her get away." He grinned encouragingly. "Stick to her, Jervies. Hang on to her. Don't let them scare you."

"I'm keeping June," Clint told him stoutly. He spoke to Tope, uneasily. "I'm pretty tired," he said. "I'll go home, if you don't mind. Be with them there."

Tope nodded; and Asa turned and saw the Inspector. "Hullo!" he exclaimed in surprise. "Inspector Tope, eh?" He looked past Tope at Heale, a swift conjecture in his eyes.

Clint departed, and a fireman joined them. Water dripped from the rim of his white helmet, and his rubber coat was glistening. He said to Inspector Heale: "We can't do a thing for hours yet. Too hot."

Asa demanded: "Do what? What do you mean?"

Inspector Heale hesitated. "This is Chief Mason, Tope," he explained; and then to Asa: "Why, Mr. Taine, we think this fire was set."

"Set?" Asa was rigid. Tope, watching him, thought the man used an effort to control his voice. "Why?"

"To kill Mr. and Mrs. Hurder," said Inspector Heale harshly.

For a long moment there was silence. Chief Mason moved away, back to the fire. Asa stood thoughtful, with bowed head. Then his eyes shifted, and he looked past Inspector Heale, and called in a low tone: "Rab!"

Inspector Tope swung around in time to see Rab Taine coming toward them from the direction of the old barn.

"Hullo," he said in a level monotone. "What's the matter, Asa?"

And Asa told his brother: "This is Inspector Heale. He thinks the fire was set, to kill Grandma and Grandpa Hurder."

Tope watched Rab intently. "Set?" the young man exclaimed. "Kill? For heaven's sake, why should anyone—" He stared from one to another. "Why should anyone do that?" he demanded.

"Same reason someone killed Mrs. Leaford," said Heale implacably; and Rab cried:

"Aunt Kitty? Why, she took an overdose—"

But Heale said grimly: "Oh, she was killed, all right." There was something like a harsh triumphant relish in his words. "Murdered, Taine! And so were these old folks tonight. Or Mrs. Hurder, anyway. Mr. Hurder may get well."

"For heaven's sake," Rab protested, "if you thought that about Aunt Kitty, why haven't you done something before now? Why haven't you said so before? You might have prevented this tonight!"

Inspector Heale confessed: "I figured there'd be a better chance of finding out—"

"Blast it!" Rab cried. "You've fiddled around with your figuring; and now— You're as bad as—"

But Asa interposed reasonably: "Steady, Rab. I guess Inspector Heale used his best judgment. After all, he couldn't be sure Kitty was poisoned. Maybe her heart cracked, let go."

He added: "And this tonight may have been an accident. You can't tell."

Inspector Heale asked Asa: "Where were you, tonight?"

Asa looked at him slowly, then grinned. "You cross-examined me once before, Inspector," he remarked, in a dry amusement. "Tonight? I was asleep on the couch in the dining-room next door." He nodded toward the Bowdon house.

"Asleep, eh?"

"Till Mother woke me, yes."

"Where was she?"

"With Grandma Bowdon."

"Dressed, were you?"

"Shoes off, and coat," Asa answered.

Rab interrupted: "Asa, you said they questioned you before? You knew what they thought about Aunt Kitty?"

"They told me, yes," Asa explained.

Rab cried: "Then why didn't you tell us?"

But Tope, in the background, suggested mildly:

"I hear you were in Providence tonight, Mr. Taine."

Rab stared at him almost truculently. "What of it?" he demanded and turned away.

"Do you mind my questions, Asa?," Tope asked.

"No," Asa assured him. "Anything you like."

"Mrs. Leaford leave a will?"

"No."

"Mr. Bowdon? Mr. Hurder?"

"Yes, of course."

"What were the terms?"

Asa looked at him thoughtfully; and he glanced at Inspector Heale. He said: "I'll tell you anything I can, but I can't help you on that. My father drew the wills. You'll have to ask him."

"Where is he?" Inspector Heale demanded. "Where was he tonight?"

Asa smiled faintly. "He went to sleep in a kitchen chair after supper," he explained. "Mother found him still asleep there when she went to telephone Rab."

"Asleep through all this hullabaloo?"

"He's stone deaf, you know."

Tope asked gently: "Taine, if one of the connections didn't do this, who did? Anyone live around here who might? Jim Glovere, or the Thayers?"

He saw Asa taut and stiff, like a fencer on guard; but before he could reply, Rab spoke at Tope's elbow. The young man had returned unseen, and he said in the tone of one conveying an order that must be obeyed:

"My mother wants a word with you gentlemen. Please follow me."

Without the slightest hesitation, Tope moved briskly after Rab. Heale almost reluctantly followed him, but Asa stayed behind.

When Tope and Inspector Heale followed Rab into the house where lamps were burning to replace the now useless electric lights, there was stir and movement behind the closed doors of the dining-room in which Denman Hurder still lay unconscious and near death; and the parlor doors likewise were closed. But Mrs. Bowdon and Mrs. Taine waited for them in the sitting-room; and Mrs. Bowdon was in a chair that faced the door by which they entered. Tope had an impression of mass, of a white mass that would not easily be moved. Her hair was white; so was her cheek; so was the shapeless dressing gown she wore. She sat in a ponderous immobility which had nevertheless a suggestion of power held in restraint; and her eyes were alive and hard and cold.

Mrs. Taine, on the other hand, met them at the door. This was a spare, thin woman; her thin hair was black; her cheek was sallow; her lips were thin. She spoke in a soft sibilance, in keen syllables that suggested the slicing stroke of razor-blades.

"I sent for you gentlemen," she told them simply. "My son tells me you are circulating the suggestion that Mrs. Leaford's death, and the tragedy tonight, were not accident but design. I will not permit such nonsense. If such rumors become current, I shall know whom to blame, and I will hold you both responsible. Let the talk end here and now. I bid you good day."

Inspector Tope waited for Inspector Heale to speak. Rab exclaimed, in a restrained anger: "You heard her, gentlemen. That is all."

And when Heale still was silent, Mrs. Bowdon said, without moving her lips: "Outrageous. Impudent audacity. Clowns."

"One thing more," Mrs. Taine remembered. "Mr. Clinton Jervies took June Leaford away with him, against my express wish. She must be back here in the morning. We take care of our own, we Kenesaws; we ask no favors anywhere. See to it that this is done, or I shall know what steps to take."

Heale remained mute; but Tope suggested gently: "How old is Miss Leaford, ma'am?"

Mrs. Taine looked at him. Most people were somewhat melted by Tope's mild kindliness, but she was not. "She is of age, yes," she said calmly. "But that is immaterial. She is an inexperienced child, quite incompetent to decide things for herself. Kitty Leaford was no fit mother for her, but I have done my duty by June, and will continue to.

But Inspector Heale found his tongue at last, forgetting his awe of these two women in remembrance of his duty and his rights. "Now, wait a minute," he insisted. "You folks on the Hill have gone your own gait in a lot of things; but this looks like murder to me, and it's my duty to check up on it. Some questions I want to ask you. I know you're feeling pretty bad right now, so if you want to wait till morning—"

Mrs. Bowdon said heavily: "There is nothing I can tell you. My husband lies dead in the house. I wish to be alone."

(TO BE CONTINUED)

Personality Will Determine the Best Vocation to Follow, Says Physician

In keeping civilization going, the introverts—those persons whose interests are mostly personal—furnish most of the ideas; the extraverts, or socially minded people, turn the wheels, Paul Popenoe declares in his article "Extravert or Introvert?" in the November Hygeia.

Temperamental differences are of vital importance in vocational guidance, many a maladjustment of adult life being due to the fact that an extravert is trying to do an introvert's job, or vice versa.

On the whole, extraverts naturally tend to succeed best in occupations that bring them into contact with other people and that demand aggressiveness, decision and action. Introverts will be found predominantly in places where they can work alone and in creative fields, such as art, science and literature.

An extravert girl might fail as a sculptor but succeed admirably as a teacher of art to large groups of people. An introvert who goes into law will not be likely to win fame as a jury lawyer but will naturally gravitate into office work.

In the family, each plays a different role, and each must be treated accordingly. One is as good as the other; but one is by no means the same as the other. Successful parenthood will take account of the differences.

The extravert child will please his parents by making a good social adjustment without any special help; he will make good marks without much effort, will take the leadership in school activities, will be popular with associates because always ready with a joke or retort.

The introvert is usually the opposite of all this. His interest and attention are turned inward rather than outward. He is more concerned with his own thoughts than with what is going on around him outside. He will be modest, unassuming, cautious, critical, persevering.

Why Bread Is 'Staff of Life'

There is a natural reason why wheat bread is called the "staff of life." Wheat has some elements which make it different from other grains. One of these is found in wheat flour protein. When wheat flour is mixed with water it forms a substance called gluten. This is gum-like and rubbery and is the best measure of quality in wheat.

AROUND THE HOUSE

Preparing a Chicken for Roasting.—Brush chicken over with olive oil. This makes it tender, and the flavor is improved.

• • •

To Clean Pewter.—Wash the articles in hot water with a paste made of soft soap and powdered pumice stone. Then polish with a cloth or chamois leather.

• • •

Coffee Hint.—Should coffee not be freshly ground, place the required quantity in a pan and shake over a low heat for a moment before infusing. The flavor will equal that of newly bought coffee.

• • •

Shellacking Chairs.—A coat of clear shellac over the seats of rush-bottom chairs will greatly prolong their lives and keep the reed from splitting.

• • •

Fruit Stains. — Rub powdered borax on fruit stains; then pour boiling water through the fabric before washing and boiling it.

• • •

Hair Hint.—Lemon juice added to the rinsing water will help to preserve the color of fair hair and also make it bright and glossy.

• • •

Use for Newspapers.—Put a thick layer of newspapers under your carpets. Moths will then give them a wide berth, and your carpets will have the tread of a soft pile. Moreover, the layer of paper will prevent dust working up from the floor into the floor covering.

QUICK QUOTES

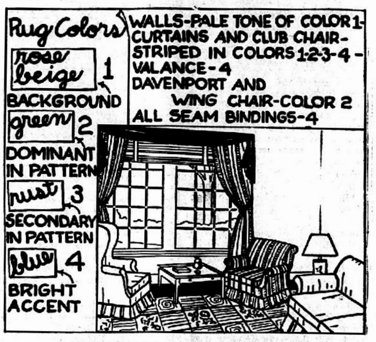
Sentinel Features

PUBLIC ECONOMY

"I AM for a government rigorously frugal and simple, applying all the possible savings of public revenue to the discharge of the national debt; and not for a multiplication of officers and salaries merely to make partisans, and for increasing, by every device, the public debt."—*Thomas Jefferson.*

HOW TO SEW

by Ruth Wyeth Spears



Right Colors for Curtains and Slipcovers.

"DEAR MRS. SPEARS: I have your Book 1—SEWING for the Home Decorator, and the directions for slipcovers are so clear in the sketches that I have decided to cover my living room furniture which consists of a davenport, a club chair and a wing chair. I would like to have your suggestions for colors for these and for curtains."

With this letter there was a detailed description of the rug in the room. It is not important that the rug color scheme be followed exactly, but do make a little chart of the rug colors as shown here at the left. If you do not wish to repeat the background color for your walls, use a pale tone of one of the other colors. A stronger tone of any color in the rug may become your accent color.

NOTICE: Book 1—SEWING for the Home Decorator, and No. 2, Gifts, Novelties and Embroideries, are now 15 cents each, or both books for 25 cents. Readers who have not secured their copies of these two books should send in their orders immediately, as no more copies will be available, when the present supply is exhausted. Your choice of the QUILT LEAFLET illustrating 36 authentic patchwork stitches; or the RAG RUG LEAFLET, will be included with orders for both books for the present, but the offer may be withdrawn at any time. Leaflets are six cents each when ordered separately.

Send your order at once to Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

ASK ME ANOTHER

A Quiz With Answers Offering Information on Various Subjects

The Questions

1. How many days in a fortnight?
2. Of what country are the following the emblem: the thistle, the shamrock, the maple leaf, the lily?
3. Which is heavier, a pint of cream or a pint of milk?
4. What is a counterpane?
5. Does an electric light bulb shine or glow?
6. Are a turtle and a tortoise the same?
7. What does the title "Mona Lisa" mean?
8. How many Shetland islands are there?
9. Are passports required when flying to foreign countries?
10. Where in the Bible does it say that a woman should not whistle?

The Answers

1. Fourteen.
2. Scotland, Ireland, Canada, France.
3. A pint of milk. The cream floats to the top of the milk.
4. A coverlet for a bed.
5. Both. Glow means to shine with intense heat.
6. Strictly speaking, turtle means members of the order which live in water, and tortoise, members which live on land.
7. Mona is an abbreviation for madonna (my lady). Lisa is a proper name.
8. There are more than a hundred, but only one-fourth of them are inhabited. All are very small.
9. Yes.
10. There is no verse in the Bible relating to a prohibition of a woman's whistling. The reference may be to the old English proverb: "A whistling woman, a crowing hen is neither fit for gods nor men." The origin is unknown.

All for a Friend

It is a noble and great thing to cover the blemishes and to excuse the failings of a friend; to draw a curtain before his stains, and to display his perfections; to bury his weaknesses in silence, but to proclaim his virtues upon the housetop.—South.

Make a habit of reading the advertisements in this paper every week. They can save you time, energy and money.

THE EQUIVALENT OF THIS MUCH EXTRA SMOKING PLEASURE IN EVERY PACK
CAMEL
TURKISH & DOMESTIC BLEND CIGARETTES

IF you want smoking pleasure at its best—and a sound buy, too—Camel's your smoke. There's more tobacco by weight in Camels, compared to the average of 15 other of the largest-selling brands tested. Besides, Camels burn *slower* than any other brand tested—25% slower than the average time of the others. Thus, Camels give you the equivalent of *5 EXTRA SMOKES PER PACK!* Add the bonus of Camel's costlier tobaccos, and it's clear why Camels are America's favorite cigarette! Smoke Camels . . . for *PLEASURE* plus ECONOMY!

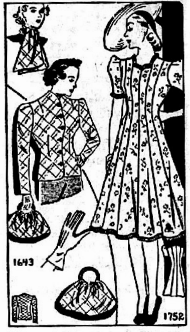
Home Sewn Aids To Summer Beauty

ADD variety and color, as well as smartness, to your summer wardrobe by making the charming accessory set in gay printed cottons like linen, pique or gingham. It's very easy to do—even the gloves, which have the new, roomy, blunt fingers. Your pattern (1643), includes a step-by-step sew chart that tells you exactly what to do.

This princess dress for afternoons is exactly what you want for hot summer days. This style (1752) is refreshingly simple, and it has a beautifully smooth, slim figure-line, upped sleeves, and a square neckline dipped in the front to make it more becoming. The frills at the neckline, sleeve edges and foot of the skirt, make this dress very feminine and flower-like. And it's so easy! The dress itself practically puts itself together, and the frills can be sewn in, in no time! Linen, voile, silk print organdy or flat crepe are pretty materials for this.



The Patterns.

No. 1643 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 2⅓ yards of 36-inch material for jacket; ⅓ yard for gloves, and ⅛ yard contrast; 1⅛ yards for scarf; ⅝ yard for bag.

No. 1752 is designed for sizes 12, 14, 16, 18 and 20. Size 14 takes 4¾ yards of 39-inch material; 4¾ yards of pleating or ruffling.

New Spring-Summer Pattern Book

Send 15 cents for Barbara Bell's Spring - Summer Pattern Book! Make smart new frocks for street, daytime and afternoon, with these simple, carefully planned designs! It's chic, it's easy, it's economical, to sew your own. Each pattern includes a step-by-step sew chart to guide beginners.

Send your order to The Sewing Circle Pattern Dept., Room 1324, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

To Find Our Duty

This truth comes to us more and more the longer we live that on what field or in what uniform or with what aims we do our duty matters little, or even what our duty is, great or small, splendid or obscure. Only to find our duty certainly, and somewhere, somehow, to do it faithfully, makes us good, strong, happy and useful.

NERVOUS?

Do you feel so nervous you want to scream? Are you cross and irritable? Do you scold those dearest to you?

If your nerves are on edge and you feel you need a good general system tonic, try Lydia E. Pinkham's Vegetable Compound, made *especially for women.*

For over 60 years one woman has told another how to go "smiling thru" with reliable Pinkham's Compound. It helps nature build up more physical resistance and thus helps calm quivering nerves and lessen discomforts from annoying symptoms which often accompany female functional disorders.

Why not give it a chance to help YOU? Over one million women have written in reporting wonderful benefits from Pinkham's Compound.

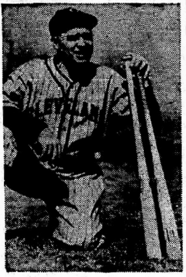
Baseball's Best Pilots Played 'Average' Game

By ROBERT McSHANE

ANOTHER major American crisis developed not long ago when "Columbia Lou" Gehrig benched himself after establishing what may be an all-time record for consecutive games. Plainly the iron man was nearing the end of the trail.

Huge, salty tears were shed over Gehrig's impending doom. What did baseball intend to do for the man who has done so much for it? Who would reward him with a managerial job? Forgotten was the fact that Gehrig hasn't yet retired, that he isn't a decrepit individual requiring a guiding hand to steer him to the closest relief agency.

But the American sports-loving public is like that. Let one of its heroes start slipping and the hue and cry is nation wide. He must be rewarded. What can we do for him? The fact that the big sports figure may make more in a week than the average person does in a year is seemingly beside the point.



OSCAR VITT

It was a black mark against baseball, according to calamity howlers, that Babe Ruth wasn't given a manager's job when he retired. He was the game's most colorful figure, packing the stands wherever he appeared and giving the best years of his life to the diamond wars. Ruth was the highest paid baseball player in history, signing contracts at a top price of $80,000 per year. That total didn't include income on royalties and syndicated newspaper stories. Yet Ruth's failure to find an executive position caused widespread wailing.

Unsung Heroes

Overlooked is the fact that each year a lot of fast, smart ballplayers go by the boards. They, too, have devoted their best years to the game, but when the final day rolls around they cast an agonized eye over the bank book and wonder where they're going to open a filling station or lunch counter. They did a lot for the game, but they weren't heroes.

There seems to be some good reason why great baseball stars aren't usually picked when managers are appointed. Some of them have, such as Tris Speaker, Cobb and Walter Johnson. But they didn't last. The most successful managers seem to be those men who were good players, but not great ones.

Connie Mack, the most widely known, was once a catcher—and a good one. But experts don't rate him with Kling, Bresnahan and Archer.

Oscar Vitt, Cleveland manager, was formerly a major league infielder. He isn't remembered for his outstanding ability as a player. Rather he was a reliable performer who played a steady game. So was Fred Haney, manager of the Browns, also a former infielder.

Joe McCarthy, the most successful manager in baseball, could never make the grade as a big-league player. A second baseman, McCarthy's fame as a player never spread past the minors and his ability was never tested in big-time competition.

Success Stories

Casey Stengel and Jimmy Dykes were better than the average ball player in their best years, but neither of them were world beaters. Since they shed their uniforms they've been doing better than all right. Del Baker of the Tigers was a catcher in his day, but didn't do so well in the majors. That didn't prohibit him from becoming a good manager.

With so many players of average ability making the grade as managers, it seems more than coincidence that the stars fail in an executive capacity. It seems, though, a waste of sympathy to shed tears over a great man whose playing career is drawing to a close. He has made money, has a host of friends and admirers and has led the kind of an existence he wanted. Because baseball doesn't offer him a manager's job it doesn't mean that moguls of the game are hard-hearted wretches, casting off a man when his usefulness is over. A man may be a great ball player, but lack the essential qualifications of a good manager.

Fortunately, ball club owners realize that.

Jack of All Trades

ONE of baseball's sensations—though not for his playing ability—is Morris (Moe) Berg, scholar, gentleman and catcher for the Boston Red Sox.

Not that Moe isn't a good baseball player. He is. But he's such a versatile individual that his accomplishments in other fields tend to awe the average onlooker.

To begin with, Moe can talk fast and furiously in five different languages, and has a working knowledge of about a dozen more. He studied Romance languages at Princeton, graduating in 1923. He originally planned on going to the Sorbonne in Paris to study phonetics, but decided to finance his continued education by playing ball with Brooklyn. He played the summer of 1923 and then went to Paris.

When he came back the following summer the Dodgers weren't particularly impressed. The winter spent in study hadn't helped his hitting, so he was sold to Minneapolis. From Minneapolis he went to Reading in the International league, and from there to the Chicago White Sox in 1925.

Deciding on further education, Moe enrolled in the law school of Columbia university. He passed the New York state bar examinations in 1929. His comprehensive knowledge was ably demonstrated recently when he appeared on a quiz program over a nation-wide hookup. He astonished even his fellow broadcasters with his rapid-fire answers to the brain-stumping questions.

In addition to his other accomplishments, Moe is familiar with the scores of several operas, and is a lover of the drama. A real gourmet, he knows the best restaurants in all the cities on the big league route.

Moe, despite his amazing versatility, is primarily a baseball player. He doesn't want to be known as a lawyer or a linguist, he wants to be looked upon as a conscientious, hard-working catcher.

He played on the 1933 Washington team, under Manager Joe Cronin, and Cronin, Berg's boss now on the Red Sox, will attest to Berg's value to the team which won the American League championship. He plays a steady, consistently good game, and though no second Babe Ruth, manages to be a dangerous hitter in a pinch.

Nor does he play baseball for the money involved. He has been a well-paid player, and in addition, is a member of a New York law firm, and a director of two New Jersey manufacturing plants.

Sport Shorts

AFTER losing the first heat in which she started, Nancy Hawks, first trotting horse to beat 2:05, won 45 straight and never lost another race . . . Carl Hubbell never argues with umpires, believing it to be bad luck. That's probably the reason Umpire George Magerkurth says Hubbell is the easiest player in baseball to get along with . . . Manuel Salvo, Giant pitcher, was a floorwalker in a San Francisco department store during his off seasons there . . . George Sisler, member of baseball's Hall of Fame, recently traveled a thousand miles to deliver one pitch. Guest of honor at a Wichita semi-pro game, Sisler arrived from St. Louis during a driving rain. The game was postponed, but Sisler made his one pitch, then caught a train for home . . . Bad news item: Tommy Farr says he is coming back to America to fight Max Baer again . . . Billy Conn recently announced that he will not become a heavyweight fighter, but will content himself with being the best light-heavy . . . Warner Brothers expect to sign Spencer Tracy to play the lead role in "The Life of Knute Rockne" . . . The Philadelphia White Elephants were renamed the Athletics when Connie Mack took over the club in May, 1901.

Carl Hubbell

Tommy Farr

Hated Chore

SOUTHERN football coaches have revealed that they would like to eliminate spring football practice—but like the man who held on to the tiger's tail—they don't dare let go.

Spring football practice is a dreary spectacle. The players have never been enthusiastic about it, but turn out because they're afraid some hard-plugging individual, who may have less ability but who shows more interest in the game, will be on the first string line-up in their place the next fall.

Coaches probably don't deserve much sympathy. They are paid for year around work, but the players, at least theoretically, receive nothing for their services.

The Southern coaches, nevertheless, have a good point. Naturally, spring practice gives the squad a head start on signals and formations. But if all schools abandoned the spring practice season and started from scratch they all would have the same chance. And it would relieve the possibilities for injury during the early season.

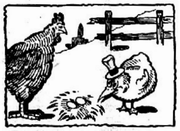
TWINS



Duck—My, they look alike!
Hen—Of course, they're twins.

Wrong Party

Four good fellows, old friends, met after long years in an Irish provincial town. They visited an inn and had several drinks. Then all four left for the railway station. On arrival at the train, three of the four got in and the train pulled out, leaving the fourth fellow standing on the platform, laughing until he was weak.

Station Master—What the devil are you laughing at?

Fourth Fellow—Shure, they were supposed to be seeing me off.

QUITE THE ROUNDER

"He tries to give the impression he's been round a great deal."
"So he has—round town."

Impossible

Aunt Martha went to a sports meeting for the first time. The pistol went off, and the men sprinted.

Aunt Martha turned to her nephew—And do these men really think they can catch up with that bullet?

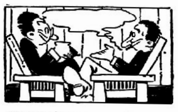
At His Post

The taxi was going very slowly and the passenger was in a hurry.

"I say," he shouted, "can't you go any faster?"

"Course I can," came the retort; "but I ain't allowed to leave the taxi."

SKIMMING THE SURFACE



"Beauty is skin deep."
"That's enough. Nobody wants an X-ray photograph of his sweetheart's physiognomy."

Goes Without Saying

Sergeant—If anything moves, you shoot.

Sentry—Yes, sir. And if anything shoots, I move.

Rejected Suitor—No, no, Joan, don't give me back the ring. After all, what's $6.75 to a man with a broken heart.

Or Wash Your Face?

Teacher—Remember, Jimmy, a job done well never wants doing again.

Jimmy—Did you ever mow a lawn?

Not to Blame

"Darling," said the young husband, "what a peculiar flavor this stewed steak has!"

"I really cannot account for it," replied his wife. "Indeed, in order to take away the unpleasant taste of the onions I scalded them in eau-de-Cologne."

MALARIA!

If you are run-down and "no good" due to Malaria, *try* Wintersmith's Tonic! Thousands of people all over the South "swear by it"—*millions* of people, for over 70 years, have said it's *the thing* for Malaria. . . . The small bottle costs only 50 cents—yet may convince you that it's what you *need.* TRY Wintersmith's. That's all we ask.

WINTERSMITH'S TONIC

Greater Need

Just now there is a great clamor and demand for "culture," but it is not so much culture that is needed as discipline.—W. G. T. Shedd.

Too Late To Classify

RUSSELL KAY

Well, the great Raspberry Festival is over and while things didn't exactly turn out the way some folks would have liked to have it, nevertheless there was no great harm done.

The Legislature tried its best to please everyone and if you ask me they did a swell job of it. One crowd wanted bigger and better appropriations and I mean they got 'em. Some wanted to be "let alone" so they were taken care of very nicely. Nobody wanted any more taxes, and so the TAXPAYER was considered.

All in all the boys didn't do much but mill around and dope out a nice little financial cross-word puzzle and then hand it over to Governor Fred to solve.

And right now Florida should be happy indeed that she has a Governor who is able nad courageous enough to do just that. All along he has insisted that we needed no more taxes. He pointed out that if things were left as they were we'd come out all right.

Thinking to force a "sales tax," an effort was made to appropriate so much that there would be no other way out, but it didn't work and now all Fred has to do to put things in order is simply veto three little bills and we'll sail along in nice shape.

The hand writing on the wall at this time indicates that Governor Fred will exercise his veto power on the three measures in question: the bill repealing the one-half of one percent gross receipts tax, and the two on gas tax allocation — better known as "801" and "802." Of course, such action on his part might make a few folks terribly unhappy, but it will please the bulk of the taxpayers and permit us to carry on just like we were doing.

The schools and the old folks will get what they were getting, the bills will be paid, and if we should get in the hole at any time there should be in the neighborhood of two millions additional revenue in the Road Department and in a pinch Fred could call up Arthur Hale (just as Martin, Carlton and Sholtz did) and give him a nice "I. O. U."—for the Road Department ought to be gettin' used to it by now and another million or two in "I. O. U.'s" shouldn't do any harm.

But Fred probably won't stop at just vetoing the three measures I mentioned. When he gets his pencil sharpened he may decide to veto a lot of other apprapriations for this and that, which he considers unnecessary.

But you can depend on it, Fred was sincere and meant what he said when he told us not to worry as things would turn out all right. For the first time a lot of folks are finding out that Fred is a "right smart" governor. Papers that have ridiculed and laughed at him on other occasions are now singing his praise.

The lobby lizards are happy of course, for they were very successful in getting appropriation bills passed and earned the money they got fro mthe special interests they represent. At the same time, the fact that there is no money to meet 'em with is not their fault, so when Fred gets through with his little veto job they can all count on going back to Tallahassee in another two years an try again.

The "tragic situation" pointed to in such alarm by certain legislators and private interests has turned out to be just another bugaboo. No one has been hurt. We escaped the "sales tax" and are going to find in the end of the day that we are pretty well off. If we have to do a bit of economizin' here and there it won't hurt us, and we'll find that business will go on as usual, the old folks will be cared for, the schools will stay open, and with Governor Fred lookin' after us we'll continue to get by and at the same time keep on eatin' "a little higher up on the hog."

And if any of you folks are sitting around waitin' for Fred to call an extra session on account of the "emergency"—well, you're just wastin' your time and you might as well forget it and get back to your knittin'.

Surplus Crop Industry Problem

(Continued from page one)

must fist determine which handlers will cooperate in this program of elimination and volume control and secondly, they must develop the type contracts to be entered into between the growers and such handlers; and thirdly they must present to a grower the names of those shippers who will cooperate. The grower is then in a position by virtue of the control of the manner in which he sells his fruit to control his industry.

"I mentioned the above outline of plan and policy of the Florida Citrus Growers, Inc., as a preliminary to a discussion of the legislative program attempted by this organization at the recent session of the legislature.

This program had two major objectives:

(1) The prevention of shipment of green or immature fruit and fruit otherwise unfit for consumption, and (2) the regulation of the flow of fruit to market in an orderly manner. The laws to effectuate the first of these objectives were all passed but the laws covering the second objectives failed of passage.

To better understand these laws, I will regroup them for purpose of discussion here today, as follows:

1. Laws affecting the fruit prior to its delivery to the packing house. (a) The maturity law. (b) the frozen fruit law and (c) $6000.000 appropriation bill for the further study of maturity.

2. Laws governing processiong or what happens to the fruit between the front and back doors of the packing house. (a) Color added law (b) Soaps and waxes law and (c) processing regulation.

3. Laws governing canneries (a) Maturity law, (b) Unwholesome fruit law, (c) Importing law and (d) Embossing law.

4. General laws. (a) wash shed bill, (b) Farm vehicle bill (c) bond and license law, (d) field crate law, (e) Amendment to Section 16 of Citrus Commission Act, (f) $25,000 appropriation to Citrus Experiment station.

5. Laws to regulate the flow to market, (a) Elimination law and (b) marketing agreement.

WRECK IN SEBRING

Word was received here Friday at noon of a serious wreck at Sebring, resulting in painful injury to Fran Sue Macdonald, daughter of Mrs. Frances E. Macdonald, and two young daughters of Mr. and Mrs. Neal Durrance. The three young girls and several others who were not badly injured were enroute to Highlands Hammock for a girl scout picnic when the car in which they were riding is said to have left the road and hit a tree.

Legislature Just So-So Solon Says

(Continued from page one)

of progressive legislation of statewide importance was supported and partly authored by Whitehurst. The committee bill which became the law, was taken from the best features of eight bills of which Whitehurst's was one. Many features of the Whitehurst bill were used. In fact, his bill was the first to be introduced. One feature of his bill used was to administer the law through the Motor Vehicle department, instead of creating a new commission at additional expense. Another feature of his bill used, provides for the low charge—50 cents— for a drivers' certificate. The law provides any car operator must be over 16, chauffers must be 18, drivers of public conveyances must be 21. Any person driving for one year without a traffic violation involving arrest can get a drivers license without examination, and the license is good for three years. It can be renewed every three years without cost, provided the driver has a clean record, Whitehurst said. License can be suspended for traffic violation, drunk driving, ect.

"The legislature is controlled by committees. They are set up by the speaker. Pull goes a long way. Experience means everything. A first term man doesn't get to first base. The important thing for Highlands county to do is to get a good man in Tallahassee and keep him there," said Whitehurst in summing up his observations. "A second term man is three times as good as a first term man. A third term man is ten times more valuable than a new man, and so it goes. The longer he stays there, the better he gets."

Just like wine in the jug . . .

BOYS ARE RETURNED

Williams Jones and Grady Holton, Avon Park youngsters, who decided "to make a little trip" to Bradenton last week, were brought back home last Sunday by Chief W. H. McCarthy. Young Bill Jones, who is the son of Mrs. Lucille Tombaugh said he formerly lived in Bradenton, and when they arrived there after hitch hiking, he went to see a Mr. Layton, gas plant employee, with whom they stayed while there. Mr. Layton notified his mother and McCarthy went after him.

CAMP HIGHLANDS HAMMOCK TO OPEN

Camp Highlands Hammock, beautifully situated on Lake Sebring, three miles from Sebring and adjacent to Highlands Hammock State park, will officially open Monday, June 12, with Pearl Schultz, director of activities and house mother, in charge.

The camp is open to boys and girls from 6 to 16 years of age, who will have the advantage of learning swimming, fencing, horse back riding, wood carving, weaving, dramatics, etc., under the supervision of capable instructors.

Pearl Schultz, director of activities; riding instruction by a graduate of Averett Jubior College and George Washington University; Betty Douglass, dietitian, house keeper and nurse; Captain A. B. Truesdell, commandant, riding, fencing, boxing and canoeing; John Gour, tennis and diving instructor, of Miami Edison high school; Albert Milgram, counselor; University of Pennsylvania, tutoring, riding and swimming; and Elizabeth Townes, junior counselor.

Thursday evening, June 15, a reception and open house will be held to which all in Sebring who are interested are invited.

TO TAMPA, ST. PETERSBURG AND FLORIDA WEST COAST
Two Trains Daily
Morning train leaves Avon Park at 2:13 P.M., for West Lake Wales—parlor bus from West Lake Wales to Tampa and St. Petersburg.
COOL — AIR CONDITIONED Evening train—sleeping cars coaches—leaves Avon Park 1:15 A.M. for Tampa, St. Petersburg and Florida West Coast points, via Central Florida.
