Two government officials "on edge"?

JEROME JONES—EFC administrator and secretary of commerce, pictured sitting on desk as he listens to Representative Diagonal of Michigan charging that the army was building new production plants while many others were idle.

THE WAR:
Up and Down

The war had become an up and down affair, with the Russians winning all along their huge front, the British gaining victories in North Africa with the Germans on the run, and the Japanese generally in the ascendancy on the Philippines and Singapore fronts, but taking a continued whipping at the hands of the Chinese.

Such was the situation as there was no longer any question but that the large and well-equipped army of the United States was on the move to join battle actively in the war, though the detailed whereabouts of that participation was still a closely guarded secret.

Estimates of when the tide of the battle of the ABCD forces against the Japanese in the southwest Pacific would change varied considerably.

Some observers felt it would be weeks, others months, some who were more pessimistic felt it would be a year before enough American pressure could be brought to bear to produce a definite change in the battle.

But that victory would be won in the end, nobody seemed to doubt. They watched the United States moving troops and ships, producing faster and faster more powerful armaments, moving to put new soldiers and sailors into uniform, and could see but one result, eventual victory, perhaps in 1943.

RUSSIA:
Brightest Spot

The Russian front continued to furnish the brightest picture from the Allied standpoint.

Moscow continued to report mass surrenders of German troops without fighting. The Reds also reported large masses of Nazi soldiers in rapid retreat to the southwest from the upper central front, abandoning much material.

The sieges of Sevastopol and Leningrad have definitely been broken, and their garrisons had swept out beyond the city walls to engage retreating Germans and to attempt to form junctions with other Russian troops.

The radio broadcasts picked up from Germany today admitted the situation was serious. One described it as a "crisis, but one with which Adolf Hitler will know how to deal."

Hitler was believed to be planning some sort of major coup, but the nature of it could not be guessed at. He also was variously reported as facing tremendous internal pressure as a result of his break with Von Brauchitsch.

There also had been reports that crack German reinforcements were being flown by gliders to the Russian front to attempt to bolster the cracking Nazi defenses.

MAC ARTHUR:
Tough

Only fragmentary reports at wide intervals, testimony to the increasing difficulties of communications, were coming from the Philippines. Some military commentators saw hope for General MacArthur and his defending forces if they could hold out for three months.

But this was admittedly problematic. How much in the way of supplies and munitions the MacArthur army had was one question. Another was how long these supplies and munitions would continue to get to him.

Admittedly the Filipino-American troops had all the advantage of terrain and superior position. The Marikina mountain range, which they were defending, was lofty, provided much natural fortification, and tactically was the planned line of defense from the outset. This worked out as planned.

MALAYA:
At All Costs

While the British were seriously being forced backward and even backward in Malaya, losing the capital of the Federated Malay States, Kuala Lumpur, Sir Henry Pownall, the commander in the Singapore defense, made the statement that the British plan was divided into two general parts, first the slowing or stopping of the Japanese attack; second, the turning of the British to the offensive and driving the invaders out. He said:

"We are now engaged in the first of these activities."

Returning British wounded, however, paid tribute to the fighting qualities of the Japs, and members of Commando groups said that when confronted with the cold steel the Japs would scramble up into tall trees, from which they would hurl grenades at the British men-at-arms with explosive cocoons.

They were said to be adept at hiding in small places, and that at times Japs would come from directions in which it did not seem possible that soldiers could find cover.

B.A.F. activity over the peninsula was constantly on the increase, however, and American-made bombers, some of them flown by Eagle fliers with the volunteer Chinese air force, were bombing Japanese bases in Thailand and Indo-China from Burma flying fields.

The picture was not generally optimistic in Malaya, but it was regarded as far from hopeless, at least at present.

PRODUCTION:
On Home Front

All over the United States groups of workers were getting together and adopting resolutions to speed up their effort, and some factories producing war materials were reporting as much as 70 per cent added output since the declaration of war.

Ships of war were being launched and put into commission as rapidly as possible. The Liberty ships were going into the water at scores of shipyard ways.

Wright Field, Dayton, Ohio, received several large new gliders for test, gliders said to have a wingspread of 80 feet, probably capable of transporting soldiers in large numbers.

Swiftly they had been put under test, their pilots from the new schools which are training men to manage these motorless ships, which possibly may be towed in "trains" to be released over territory in which it is desired to land troops.

In the invasion of Crete, Germany used hundreds of them, reportedly landing 15,000 troops that way, also large numbers of light field guns and ammunition.

The newest glider training school is at Twenty-Nine Palms, Calif., turning out classes every four weeks, the students being already graduate pilots.

The gliders were so large that in test runs they were towed by a Wright field by trailer truck they had to be broken into two assemblies.

PRICES:

The price control bill finally was passed in such a form that it was said to have been a major defeat for the administration. Although the senate passed it 83 to 1, the farm-revenue amendment passed only 53 to 31.

As the bill went into conference it was expected that opposition, as senators, such as possible farm price raises that the cost of living could reasonably advance 25 per cent before the price control administration could do anything about it.

'Tin Ear'

TROY, N. Y.—Dr. Donald A. Wilbur of Rensselaer Polytechnic Institute is shown testing a sound detector hastily constructed in the institute's physics laboratory to determine how effectively such cheaply built devices might be adopted throughout the country by air raid spotters. A few boards, a phonograph horn, a microphone and a battery-operated amplifier and ear phones are the ingredients of the detector that can pick up the sound of bombers flying to ten miles distant.

DEFENSE:

Reorganization

President Roosevelt recognizes growing congressional dissatisfaction over the Civilian Defense team, composed of Mayor LaGuardia and Mrs. Roosevelt, and while he did not detract away from him, he brought Dean James J. Landis of the Harvard law school down to Washington to take actual charge.

The house had made discreet representations to the President that Mayor LaGuardia, as head of the nation's largest city, had plenty to do to see that New York's defense situation was cared for, and had no time to see to the country as a whole. They also hinted around that Mrs. Roosevelt could only be considered a part-time executive, and that the CDD needed hard work and full time.

They recommended it be put into the hands of the war department. President Roosevelt's answer was Dean Landis, but in the meantime the house voted an inquiry into the manner in which the problem had been handled.

Mayor LaGuardia, Mrs. Roosevelt and Paul W. McCullitt had been summoned to testify.

SHORTAGES:

U. S. Feels Pinch

One after another shortages of various commodities and manufactured products began to be felt, and the average American began to feel the pinch of war as he never had felt it even at the height of the last World war.

Some of these shortages could be traced to lack of raw material from the south Pacific; others to the demands of the war upon industry, still others on both.

First came the rubber shortage and the consequent rationing of tires, directly due to the Philippine situation; second was the abrupt ending of production of new passenger cars and commercial trucks, and the rationing of them.

In line with this came difficulties in delivering milk and other commodities in larger cities and towns.

The cut-off in sugar caused a price rise and the government moved to buy in the major portion of the Cuban crop. In many cities this precipitated a panic purchasing of sugar, with the result that grocers started rationing it themselves.

It also was reported that there soon would be instituted the rationing of spare parts and batteries, probably of other manufactured goods associated with the auto industry.

MISCELLANY:

Samie Barbara, Calif.: Mickey Rooney, No. 1 film star, married a little-known 18-year-old movie actress, Ava Gardner from North Carolina.

New York: Joe Louis defeated Buddy Baer in a one-round knockout and then had announced he would enlist in the army, not waiting for the draft.

Ragson, Bureau: A Japanese air raid threw three elephants into a panic and they stampeded, causing considerable confusion before they were recaptured.

Rome: Italy had confiscated the entire filling station network of the Texas company within its borders, it had been announced.

London: Britain was still further cutting its food ration as the demands began to flood in from the South Pacific campaign.

Tokyo (by radio): A 30 per cent tax increase has been necessary in Japan to finance the new war expenditures, it was announced.

Berlin: Dispatches from Tokyo told of Seno Ory, famous Jap pole-vaulter, being killed in action as he led a landing party on Luzon.

Brown Boys in Blue

The navy department has established naval reserve officers training corps at various colleges throughout the nation. Typical of these is the unit at Brown university, Providence, R. I., where the navy has a long base at nearby Newport. These photos take you to Brown, and show you how the Brown boys in blue are learning the arts of the seagoing warrior to man the fortresses of floating steel that are our first line of defense.

Like the generations of Brown sons who have fought in every one of America's wars since the Revolution, these young men are determined to share in America's victory effort.

Loading and firing of naval guns is practiced in this loading machine. Dummy shells are used. A job where teamwork counts.

Naval instructors who teach the Brown boys their gunnery simulate conditions at sea by means of a device that makes the target leave and toss.

"TIN FISH" . . . Studying the after part of a torpedo, one of the most intricate of naval weapons.

CARTER FIELDAir War Losing Prestige to Old Fashioned
Ground Attack . . . War
Economy Will 'Bite'
Deeply . . .
(Old Spadecore-WNU Service.)

WASHINGTON—This war, Roosevelt and Churchill are agreed, will not be won by a blockade, and it will not be won by bombing.

This last was a hard decision to make. Both men had hoped so strongly that when anti-Hitler air power reached sufficient superiority over the Nazis, the Germans could be bombed into submission. Perhaps the failure of Hitler to bomb the British into submission should have convinced them earlier. But they were counting on something else. They were counting on the thought that the German morale was not as tough a fiber as the British. They recalled that it was a collapse of German morale which ended the last war, not the victories won by the Allies in the field or on the sea.

But there has entered another factor, which a year ago was not considered important. This is anti-Semitism. It is pertinent, true, as was figured a year ago, that no amount of anti-aircraft defense can prevent bombing. But the battle of Moscow has proven definitely that the anti-aircraft is good enough, the bombers can be forced to fly so high that, because of no bombing, they cannot hit specific objectives, particularly if the objectives are not military.

Anti-Aircraft Defense

Another point down the same alley is that the anti-aircraft defense of Berlin has made it very expensive indeed for the British to bomb that city. Just at present it happens to be in one of these phases of every military cycle. First, a new offensive weapon is invented or perfected, and for some time after that the offensive has the advantage.

Then some defensive measure is conceived, and the advantage goes the other way.

The Germans won their smashing victories in France and Belgium and Holland when the passer strategy was new. It did not work so well after the Russians had studied it for more than a year and worked out a defense. The same thing has been true of bombing. In aviation officer in the U. S. army, discussing the proposed bombing of objectives in Japan, said it would be surprising if the Japs have not learned something—first, from the fact that Berlin was making it difficult for British bombers, and later from the brilliant air defenses of Moscow.

It is really this development, taken together with the supreme necessity of not weakening the Soviet front against Hitler, which brought President Roosevelt and Prime Minister Churchill to the logic of Stalin's not attacking Japan yet.

But by the same token all this spells a defeat for A.E.F. money or later, BEFORE we can have peace.

Headache Coming

The war will not end until we have reached the highest possible tide of war economy, and touched the very edge of peace-time conditions. This spells a headache for AFTER the war. It is generally realized in the government, and players are accordingly being made to take care of this peace-time problem.

Here and there are optimists who insist that the war is a long period of prosperity right after the final armistice. They base their theory on the pattern followed after the last war, when it was not until 1939 that economic difficulty appeared.

It is a theory easy to understand. When several years have passed with good earnings for everyone willing to work, and with all the people deprived of a number of things they would like to have the simple reason that they cannot buy them. It is obvious that there will be tremendous piled-up demand.

Perhaps the best illustration will be automobiles and auto supplies. By the end of two years more of war, to say nothing of five, there will be millions of people in a country who want new automobiles, and who have the money to pay for them. There will be people who have been employed at good wages all through the war, but who have been unable to spend all their money. There will be smaller large groups who have had their old autos in storage because they could not get time for them.

So there will be a magnificent market for autos and supplies which will take a year or two of the auto factories have been turned back from wartime to peacetime production before these wants can be satisfied.

The same is true, though the whole probably will amount to less than that, for many other things. In many other lines—electric and gas refrigerators, vacuum cleaners, there cannot be a demand for these things running into hundreds if not thousands of categories.

Unlimited Supply of Manganese

South Dakota Ore Tested In Plan to Find Supply Of Vital Metal

CHAMBERLAIN, S. D.—The first step toward development of an almost unlimited supply of domestic manganese was taken recently when production was started at the federal bureau of mines experimental plant near here.

F. D. DeVaney, metallurgist in charge, estimates that an average of 500 tons of crude ore will be processed daily until freezing weather, and again in the spring. The ore will be shipped to government refining plants at Boulder, Nev., and Provo, Utah, where it will be used in experiments.

Admitting that the South Dakota ore probably is too low-grade for use in normal times, Mr. DeVaney said the government expects to develop an important emergency source in the South Dakota field.

Manganese is regarded as one of the most important strategic materials in which the United States is deficient. About 14 pounds are used as a hardening agent in the manufacture of a ton of steel. In recent years the United States has imported 80 per cent of its requirements, chiefly from Russia. The remainder has come from small deposits in Arkansas, Montana and Virginia.

Enough for 1,200 Years.

According to the metal resources board, the nation has only a 18-month supply of manganese on hand, and imports have virtually consumed deposits of Cuba and Brazil. To top resources and send the ore to the United States.

The South Dakota deposits are believed to be the largest in the country. A report of the U. S. Geological Survey this year estimates the deposits at 10,000,000,000 tons of low-grade ore, enough to supply the present steel industry in the United States for 1,200 years.

Engineers in charge of the experimental plant near here are not optimistic about large-scale production, but explain that even the 500 tons of ore being processed daily would produce enough manganese for the manufacture of 500 tons of steel.

The 500 tons of steel, they say, are equivalent to the amount used in building 500 automobiles. A 30-day run at the experimental plant would

Minute Make-Up

By Gabrielle

Eyes to left, eyes to right! That's a good exercise for tired eyes. Camouflage lines under the eyes by blending make-up carefully. From powder gently around the eyes. A pretty eye makeup will draw attention away from eye lines.

First, apply a little eye cream. Then apply colored eyeshadow. Brush your lashes with mascara to make them look more lustrous! (Ladies' Home-Johnson-WHU Service.)

Air Raid Precaution

Miss Mary Bennett and Girl Scouts at the New York Institute for the Education of the Blind helped officers in the Bronx during recent air raid drills. Miss Mary Bennett carries a blind "casualty" in the ambulance.

NAVY CONTRACTS NOW GIVEN TO SMALL INDUSTRIES

WASHINGTON.—A new system for the distribution of contracts was announced by the navy as a means of bringing help to the country's "upstart areas." A relaxing of specifications was being ordered wherever possible. It was stated, to award the manufacture of defense materials.

The program, as described by the navy, is designed to facilitate delivery of essential materials and to

within the heretofore limited field of manufacturers who could produce according to the former specifications.

New systems also are being worked out to ease the method of making first contracts for small manufacturers whose efforts to obtain contracts heretofore have been regarded as handicapped by red tape.

The effort to assist various areas,

A Skeleton From Mussolini's Air Force

During the British drive into Libya, the Royal Air Force and Royal Australian Air Force played back with German air power. It was mastery of the air by the Imperials that enabled the ground forces to smash German Gen. Erwin Rommel's combined Panz-Infantry armies in the desert. There have been no doubt the details of an Italian fighter plane shot down "somewhere in Libya."

By Thornton W. Burgess

REDDY FOX IS VERY CURIOUS

DANNY MEADOW MOUSE had been pretty still for a long time inside the old tomato can in which he had found refuge from Reddy the fox.

"If I stay here long enough he'll get tired and go away, if he hasn't already," thought Danny. "This has been a pretty restless night so far and I find that I am a little tired. I may as well take a nap while I am waiting."

With that Danny curled up for a nap in the old tomato can. But it wasn't meant that Danny should have that nap. He had closed his eyes, but his ears were still open and presently he heard soft footsteps drawing near. His eyes flew open and he forgot all about sleep. "Now, what under the sun could Reddy have been after here?" thought Reddy. "The grass isn't

act without waste of time with Reddy Fox, and he started at a smart trot toward the patch of short grass, where he had seen Reddy the Hawk striking at something on the ground. As he drew near he crept very softly until he reached the very edge of the open patch.

There he stopped and looked sharply at all eyes. There was nothing to be seen but an old tomato can. He dropped down by Farmer Brown's boy on his way home from fishing in the Smiling Pool a long time before.

"Now, what under the sun could Reddy have been after here?" thought Reddy. "The grass isn't

"Oh, dear! I hope he doesn't find out I am here," thought Danny.

long enough for a grasshopper to hide in, and yet Reddy didn't get what he was after. It was very queer."

He trotted out on to the patch of short grass and began to run back and forth with his nose to the ground, hoping that his nose would tell him what his eyes couldn't. Back and forth, back and forth, he ran and then suddenly he stopped.

"Hill!" exclaimed Reddy. He had found the scent left by Danny Meadow Mouse when he ran across toward the old tomato can. Right up to the old can Reddy's nose led him. He hopped over the old can, and on the other side he would find no scent of Danny Meadow Mouse. In a flash he understood and a gleam of satisfaction shone in his yellow eyes as he turned back to the old can. He knew that Danny must be hiding in there.

"I've got you this time!" he snarled, as he sniffed at the opening in the end of the can. (Associated Newspapers—WHU Service.)

Private Deserted by Army Stays at Post 30 Hours

BALTIMORE.—Private Victor Golas, who obeyed orders literally and became a "forgotten soldier" through 30 hours of direct firing, got a pass on the back and a detour home.

Maj. A. H. Kratzke, commander of the military police detail with which the Corp. Edward M. Golas was first contacted, said the selectee was serving, told Private Golas "you are to be congratulated" and "in the army, an order is an order and must be obeyed."

So Golas, who stuck by his post at a railroad crossing through rain and gloom of night long after the last truck of his motor company had gone by, received a train ticket to Massachusetts. He also managed to catch up on his sleep. It hours' worth—at a military police dormitory.

Crowd in Argentina

Buenos Aires Film CORONA, ARGENTINA.—Two hundred citizens armed with sticks stormed a movie house where a group of Germans was viewing a propaganda film showing Nazi military power.

The film was burned while citizens shouted: "Long live democracy. Down with Nazism."

Trip to Moon? Yes, by 2041, Says Scientist

LOS ANGELES.—A trip to the moon may not be as fantastic as it sounds. Our greatest scientist may make the first one. In the opinion of Dr. Dinsmore Arter, director of the Griffith Astronomical observatory.

Dr. Arter predicted that man's first visit to the moon would take less than "some time within the next 100 years—no more."

The first flight, he said, depends on the development of a new element, known as Uranium 235, now being studied at the University of California at Berkeley.

"It is possible to send objects to moon right now," the scientist said. "It is almost a matter of fuel and cost. It has been estimated the cost of a rocket to span the 23,000 to 25,000 miles would be about \$100,000,000."

He revealed that once on the moon there would be no trouble leaving. The takeoff would be simple because the planet's gravitational pull is only a sixth that of the earth.

What to Do

BY PHYLLIS BELMONT

Do you chatter on and on and bore all your time? Stop. Listen to what you are saying and you'll soon curb this tendency to go into endless details that don't add a thing to the subject you are discussing. Whatever impression you make on people meet it is a direct result of how you express yourself.

You may be dressed in the latest style and look perfectly stunning, but when you open your mouth to tell a simple incident, the words just roll out the first thing you know your listeners, whom you had listened to with such a good impression with your wardrobe, are fascinated, but far from charmed, by your speech.

Another particularly annoying habit some people have is taking the words right out of your mouth and finishing your sentences for you. Of course, it is fun for a while to see how close they come to filling in with what you were going to say—but it's more fun, and certainly more polite on their part, to allow you to finish your sentences without constant interruption. (Ladies' Home-Johnson-WHU Service.)

Spit Dust

STAGE SCREEN RADIO BY VIRGINIA VALE (Released by Victor-Newsweek Unit.)

CLAUDETTE COLBERT'S dressing room has been doing a bit of traveling, to the amazement of inhabitants of Los Angeles who saw the one-room bungalow riding along on a truck one evening. It was made for Miss Colbert at the Paramount studios, when she was working in "Skylark." She was so proud of it that she had it taken in to the Century-Fox when she began "Remember the Day." Back she went to Paramount, then, for the new Preston Sturges picture—and back, too, went the bungalow.

Metro-Goldwyn-Mayer is rushing to the nation's theaters a two-reel release special, "War Clouds in the Pacific," which is being shown by the Canadian government just before December 1. It proved to be so popular that MGM officials ordered a second number of prints so that the picture would be available for simultaneous showing in many theaters throughout this country.

Joe E. Brown, wearing women's clothes for the first time on screen in Columbia's "Shut My Big Mouth," has set a record for speed in dressing which will make him

JOE E. BROWN

line stars look to their laurels. Turning himself with a stopwatch, Brown has streamlined the routine until he can dress completely from petticoats to hat and wig in one minute and forty seconds.

Hugh Herbert, the W. W. C. man, will have the principal male role in the new version of "Mrs. Wiggs of the Cabbage Patch," the role played by W. C. Fields when last the picture was made. Carolyn Lee will play the youngest daughter, the role which brought screen fame to Virginia Weider.

Patricia Morrison's been playing hostess to a solid silver pagoda valued at more than half a million dollars. It was smuggled out of China, and will be taken on tour later. It weighs 1,300 pounds.

Ed East and Polly have just finished their second "Kitchen Quiz" film for Columbia pictures, featuring the helps for housewives which popularized the team on thousands of radio programs. The first "Kitchen Quiz" was aimed at comedy; this second one is serious.

Parks Johnson and Wally Buttsworth have offered their Vox Pop interview program to President Roosevelt, the army and the navy for whatever use it can be put to in international service, morale building and entertainment.

The popular CBS "Whodunnit" mystery series broadcast Thursday evenings has a group of rabid mystery fans continually watching for slips on crime technique and deduction; when they think they've discovered a discrepancy they cheerfully write to Lew K. Lawnsforth, who writes the scripts—and says he can feel them hanging over his shoulder whenever he sits down to work.

It's Ginger Rogers who draws the coveted assignment to star in the screen version—in color—of the highly successful stage play, "Lady in the Dark." This is the second season that Gertrude Lawrence has appeared in it on the New York stage. The leading role requires someone who can sing, dance, act—and wear clothes well. Ginger's a natural for it.

Bob Burns, the "Arkansas Traveler," gets a duplicate of an expert referee's award with three bars; he won it as a marine during the first World war, and lost it—friends have been checking records, and finally got him what you might call "a reasonable facsimile."

ODDS AND ENDS—Guest stars on the new "Shirley Temple Time" program receive beautiful gold watches from Shirley's sponsors. (Among them, New York's Margaret Hayes, in actuality not a model in "Take a Letter, Darling.") Macdonald Carey's letter, which was read by Hollywood, Paramount has renewed his contract. "KIDS current Lum and Abner picture will be released by RKO under the title of "The Bachelor Bachelor." The Associated New York Herald-Examiner noted that Hope Ring Hershman the most "photo-genous" members of the film capital.

HOUSEHOLD HINTS

Don't open cans or chop ice in the sink—you will damage the enamel.

Don't keep green bananas in the refrigerator. They ripen at room temperature.

If you like the flavor of cloves, try adding a few whole ones to the fat in which doughnuts are fried.

Patibushes, when not in use, should be soaked in turpentine and washed in warm soapsuds before they are stored away.

Moisten dry stove polish with kerosene instead of water and your stove will take on a better polish.

Keep spleen tightly covered and away from the head. Otherwise, much of the flavor may be lost.

It is time to change the water in the goldfish bowl when the water is so warm fish come to the top of the bowl for air. Goldfish like to be kept cool.

MURPHY'S ENTERTAIN
Mr. and Mrs. H. O. Murphy were dinner hosts on Tuesday to Roy Acuff and his Smoky Mountain Boys of Nashville, Tenn., and Robert Lund, who accompanied them. This group is heard in "Grand Old Opera" each Saturday night over the radio. They were heard in Frostproof on a program there, and went from here to Arcadia.

Congregational Missionary Society Meets

The "Covenant Circle" Women's Missionary Society of the United Congregational Church met on Wednesday at 8:00 P. M. at the home of Mrs. Robert Mayack. The meeting was called to order by the President, Mrs. A. C. Elliott, who presided at the business session. A special collection of \$10.00 was taken as a contribution of the Society to the "Woman's Gift fund," and will be presented at the Florida State Conference in April, and dedicated at "The National Council of Congregational Churches" to be held in June 1943, at Hanover, New Hampshire.

Miss Katherine Cutler conducted the devotion, and the program was then turned over to the Program Committee. The main feature of the program was a short broadcast from countries where missionaries of the Congregational Christian Church are serving, and members heard messages from Athens, Greece; Phenix, Natal, South Africa; Abingdon, India; San Francisco, for the Philippines; Mr. Robert McClure, for China. Those taking part in the broadcast were: Mrs. Beulah Osgood, Mrs. Robert Mayack, Miss Katherine Cutler, Miss Daisy Smith. Mrs. Beulah Osgood also conducted a quiz in Congregational Church history, beginning with the foundation of the Congregational Church in this country. Miss Daisy Smith sang a solo and Mrs. Robert Mayack presided at the piano.

The following members were present: Mesdames C. S. Donaldson, A. C. Elliott, Wm. Hauptmann, J. W. Jordan, Maude McCord, J. Lutton, Eva Neill, L. H. Park, E. L. Thompson, Sam Wild, B. G. Williams, W. H. Yates, R. Mayack, B. Osgood, C. Medley, J. Griffiths, Misses Alice Davidson, Daisy Smith, Marjorie Marwin.

Visitors present were: Mesdames Johnson, South Bend, Indiana, Board, Pittsburgh, Pa., Ayers, Bradenton, Florida, E. G. Smith, Green Bay, Wisconsin, Powers, Greenwich, Connecticut; Leslie W. Smith, Peppers, New Hampshire; German, New York City, E. R. Nelson, Ithaca, Michigan; Wilson, New York City, Stella Sonnemann, Avon Park, Florida; Groves, Indiana, Pa. Robinson, Avon Park, Florida. Miss Martha Feather, Avon Park Florida.

Florida Writers Project of Work Projects Administration, under supervision of Dr. Carita Doggett Corse of Jacksonville, has compiled and written a number of booklets for the State Department of Agriculture which has recently published them.

Jackson Circle at Methodist Hut

The Jackson Circle of the Methodist Women's Society of Christian Service met at the Hut on Tuesday afternoon. Mrs. C. H. Harris vice president of the society, led the devotion, and Mrs. C. H. Harris conducted the business meeting. It was planned to hold a chicken patte supper early in February, the date to be announced later.

Those present were: Mrs. Jaa. Alchington, Mrs. J. H. Kirkwood, Mrs. C. H. Harris, Mrs. Rosenberg, Mrs. Estelle Sonnemann, and Mrs. C. H. Harris.

Jeanine Creus Is Hostess to G. A. S

The G. A. S. of the First Baptist Church met at the home of Jeanine Creus Monday afternoon. Mrs. C. R. Wierfield presided with the group, who enjoyed an afternoon of mission study, preceded by a business meeting.

The ladies served a delectable refreshment course consisting of sandwiches, cookies, hot chocolate and whipped cream, at the close of the meeting to the present who were: Barbara and Margaret Lawless, Lillie Mae Collins, Jeanine Creus, and Mrs. Wierfield.

Noted Lecturer To Speak Here Jan. 28

Miss Alma Bailey, of the International Christian Fellowship, will speak at the reception room of the Florida Public Service company, on Wednesday afternoon, Jan. 28 at 3:30 o'clock. Her demonstration of the use of the visual aid in teaching the Bible, will be of great benefit to all leaders of young people, and Sunday School teachers. The program is sponsored by the International Christian Evangelical Fellowship, of which Miss Alma Bailey is a nationally known speaker, and Avon Park is indeed fortunate that she is including this city in her tour. The public is cordially invited to hear her on Wednesday afternoon.

Parish Supper Is Enjoyable Event

Members and friends of the Episcopal Church enjoyed their first parish supper of the year, at the parish home on Wednesday evening. A beautiful cold supper was served, buffet style, and consisted of a variety of delicious home cooked foods. Mr. and Mrs. E. J. Wood favored those present with a duet, and Mrs. Wood, with a solo, as a part of the entertainment for the evening, which also included group singing. About eighty attended the delightful affair.

Florida Writers Write Books For Agriculture Dept.

Florida Writers Project of Work Projects Administration, under supervision of Dr. Carita Doggett Corse of Jacksonville, has compiled and written a number of booklets for the State Department of Agriculture which has recently published them.

These booklets make a worthwhile addition to any library. They are also being sent to many northern schools and colleges to form a part of libraries for reference work and Florida study.

A post card to the Department of Agriculture will bring you these interesting booklets anywhere in Florida and then for a few cents you can send them to other states in unsealed envelopes.

Following is the booklet list:

Seminole Indians in Florida, Groves Your Own Vegetables, Home Gardening for National Defense, Termites and Other Insect Pests, A Graphic Review of Florida Agriculture, Agricultural Cooperation in Florida, Co-Operative Agriculture in Florida, Florida's Sugar Bowl, Limes and Lemons in Florida, Tung Oil Industry in Florida, Buckeye Tropical Fruits in Florida: Story of Sea Island Cotton, Better Pastures in Florida, Joberg Lettuce, Pineapple Growing in Florida, Broccoli Growing.

Other booklets will soon be published, watch this paper for announcements. These booklets also make valuable additions to club libraries and assist in presenting Florida's contribution to the nation.

Mrs. Barbara Dorsey Spoke Before Tourist Club Tues.

Mrs. Barbara Dorsey of Florida Writers Project, spoke before the Avon Park Tourist Club, Tuesday night, January 20. Her subject was "Song Bird Landscapes and Their Contribution to National Defense." A large audience greeted Mrs. Dorsey and her talk was of interest.

This talk was one of a series of "Talks on Florida and its Contributions to National Defense," presented as a Community Service by Florida Writers Project of Work Projects Administration, to make Service Men, Winter Guests, and the general public better acquainted with Florida. Locally it was sponsored by Avon Park City Council and Highlands County Commissioners. Other talks of this series will be presented by Mrs. Dorsey in the near future.

UNION CONGREGATIONAL CHURCH

Dr. Alfred C. Elliott, Pastor

Wednesday 7:45 P. M. Mid-week devotionals.
The Public is cordially invited, especially the stranger and the poor.

Income Tax Notes To Be Offered By Treas. Dept

To make it easier for taxpayers to meet the increased taxes required by the National Defense Program, the Treasury Department is offering for sale two series of notes, both dated August 1, 1941, and maturing August 1, 1943.

In January of each year two new series will be provided so that a taxpayer can always purchase notes during the entire year in which he is receiving his income for use in payment of taxes due the following year. The reason for the two-year note is to permit a taxpayer, if he so desires, to begin saving in January of one year and continue through that year to save for his taxes due the following year.

All notes are sold at par and accrued interest. When presented in payment of income taxes they will be received at par and accrued interest up to and including the month in which such taxes are paid. Interest will not accrue before the maturity of the notes. If not presented in payment of income taxes they will be redeemed for cash under certain specified conditions at the purchase price plus the accrued interest. In other words, the taxpayer, if he redeems the notes for cash, gets back just the amount he paid.

Complete information about these Treasury notes will be found in a Treasury Department Circular available at local banks. Federal Reserve Bank and branches, or Treasury Department, Washington, D. C.

BASKETBALL FORFOUNDED

The high school basketball game between Avon Park high school and Frostproof has been postponed from Friday night to next Monday night at 7:30, on account of the blackout. Both boys and girls will play.

When the archer misses the center of the target he turns around and seeks for the cause of his failure within himself.—Confucius

S. P. LONGBOTTOM, As Executor of Said Estate, Jan. 15, 1943.

CHURCHES OF CHRIST. SCIENTIST

"Truth" is the subject of the Lesson-Sermon which will be read in Churches of Christ, Scientist, throughout the world on Sunday, January 25.

The Golden Text is: "God shall send forth his mercy and his truth" (Psalm 137:8).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "We give thanks to God and the Father of our Lord Jesus Christ, praying always for you, for the hope which is laid up for you in heaven. . . . Which is come unto you, as it is in all the world; and bringeth forth fruit, as it doth also in you, since the day ye heard of it, and know the grace of God in truth: (Col. 1:3, 5, 6, 7).

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Prayer cannot change the unalterable Truth, nor can prayer alone give us an understanding of Truth; but prayer, coupled with a fervent faith, leads to knowledge and to the will of God, will bring us into all Truth" (p. 11:27-31).

W. M. RECK MOVES TO RIDGE FUEL BUILDING

W. M. Reck has moved his real estate office from the Jacaranda Arcade to an office in the Ridge Fuel company building.

(Seate No. 16, 1943)
Notice is hereby given that I, T. Williams, Lake Florida, holder of the Certificate of Application for the State of Florida, No. 16, 1943, have filed same in my office and made application for the same to be heard thereon.

Each certificate embraces the following described property in the County of Highlands, State of Florida: to-wit: Lot 6 and 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877,

Vitamins Required for Youthful Health, Looks

WHEN winter comes, can sniffling be far behind? They can if you're the live, singing, joyful health that vitamins give you. We need all the vitamins to keep our youth and looks. But especially need foods containing vitamin A—yellow fruits and carrots, sweet potatoes and parsley—to resist common colds.

Such a diet need cost no more than the meals you have now. Our 25-page booklet suggests menus bursting with vitamins, gives "Keep Fit Diet" and a chart showing vitamin content of everyday foods. Explains role of vitamins in retaining health, energy, looks. Tells it ways to preserve vitamins in cooking. Send your order to:

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—Dr. Alan Hirsch, the anthropologist, has decided to plan to measure the skulls of all congressmen, in his studies of head-size and contour.

Studying Skills. In their relation to intelligence. The congressman didn't like the idea and nothing came of it.

Studying Skills. Rather than study Dr. Leonard Carmichael, president of Tufts college, gave better co-operation. In August, 1960, the government put him at the head of a committee of experts to work up a national health index. They have completed an index of several hundred thousand good brains.

This committee was known as the National Roster of Scientific and Specialized Personnel, and now there has been added to it a special committee on wartime requirements for specialized personnel, with Dr. Carmichael as chairman. The obvious function of the committee is to find good brains and recruit them.

Since the first World War, the classical Binet-Simon intelligence quotient has gained by steady repairs and betterments. The inquiry now covers not only the question of whether we know much of anything but whether we have any sense.

In 1959, we saw an experiment in a progressive school in San Francisco which saw some pertinent to what Dr. Carmichael and his committee are trying to do. They picked a group of high I.Q. boys, of superior heredity and cultural background, and then they picked some less favored lads, of low I.Q. from the North Beach foreign section. They gave each child a certain amount of money, told him to buy some thing, start trading and report gains or losses in two months. When the bell rang, most of the off-stocking lads had lost their shirts and the few who had managed to fatten up holdings up to sizeable juvenile fortunes.

From this, the pedagogs figured something like survival intelligence as distinguished from merely superimposed and possibly non-convertible cultural intelligence. It is unquestionably survival intelligence that Dr. Carmichael and his brain-indexers are looking for, as their study has to be with particularized, specialized, useful, workable skills.

Dr. Carmichael, one of the most distinguished of modern psychologists, was born in Philadelphia in 1894, and was educated at Tufts and Harvard, and taught at Princeton and Brown before becoming president of Tufts in 1958.

DOWN near Windy Gap, on the edge of Death Valley, we knew a big, dead-end cop-puncher who doubled in dancing and fighting and dancing.

President Quizon who could dance down any body in those parts. Elsewhere, we have found this unique blend of talents only in Manuel Quizon, recently inducted into his second term as president of the Philippines.

Mr. Quizon negotiated for Philippine independence in the New York studio of Arthur Murray, the dancing master. Dancing is his art, his recreation and his driving passion. Four hours a day went to dancing when he was cutting the islands adrift—with second thoughts later. The first dancing shift was from 10 o'clock until noon. The hours from one to three went to Philippine independence, and then the dancing picked up from three to five.

The bright-eyed, coffee-colored little man with the dancing smile, so capricious, whimsical and Wilson that the President put a declaration for Philippine independence shap-hang into the Democratic platform. But in the Haves-Cutting Mill, enacted in 1935, Sen. Quizon found a one-way tariff against, unsatisfactory guarantees as to the attitude of Pacific powers, and other defects, and started dancing and negotiating his way around these obstacles.

He is said to be just about the nearest politician to the business. He is university trained. His father was a Filipino and his mother half Spanish. He smokes cigarettes in an endless chain, dancing or sitting still, gesticulates fluently and turns the sharp spotlight of a keen, agile, realistic mind on matters at hand. He was wounded in the Philippine war for independence and the years later with the jungle disease, somewhat of a handicap in his later career by the rampant and belittled Gen. Emilio Aguinaldo, President Quizon is 59.

SPEAKING OF SPORTS

By ROBERT McSHANE

Submitted by WNU Newspaper Editor

THE effect which military service has on America's athletics is becoming more and more visible. There is a great deal of football over the future of baseball, football, horse racing and other events which hold the sports spotlight during the year.

Report men know that team caliber will not be as high as it has been in the past. Major league stars like Bob Feller, Hank Greenberg and Ted Williams will not be so good this coming season. Bernie Bierman, Minnesota's great coach, has been called to active service. College and professional football teams must give up some of their big men.

Many of sport's greatest spectacles have been—and will be—cancelled or postponed. In the interests of the nation's welfare it has been half hearted to eliminate many of these "weekend" such as the annual sports meet at Indianapolis and various racing meets.

But this does not mean that athletes will be allowed to die. When a heart game and a prize fight or an auto race is cancelled, it means no more than the elimination of a contest. From now on, however, it is a very different matter, but they won't make the athletes as much as they would make their regular day in and day out.

Undoubtedly there will be some curtailment of athletic activities. Commuters with electric cars will have to make a move. But a big-time program still is in the cards. We will have our baseball, our football and our horse racing. They are almost a necessity.

The fact that every army, navy and marine unit has its athletic teams indicates the importance of sports to the service. Equally important is the morale of those who are on the home front who are helping to the best of their ability.

The overall program may be cancelled to a greater extent in future months. Right now it is the consensus that changes will be reduced in quality than in quantity. We will have almost no complete program, but many of the superstars will be missing.

There will be no complaints on that score from thinking people. Our country needs men who are fitted by training for leadership. It needs physically able, alert, quick-witted, energetic men. A large share of these men should come from the gridiron, the diamond and the ice. If not, then we must realize that sports have been a tragic waste of time, money and enthusiasm.

Bowling—The Right Way

By LOWELL JACKSON

(This is one of a series of lessons in bowling by Lowell Jackson, one of the best bowlers in the world. He has won 100 national titles and is a 13-year league average of 233.)

More Important
"We trust, Sir, that God is on our side."
"It is more important to know that we are on God's side."—Ralph Waldo Emerson.

Every Home Needs a "Gummi"

Have you ever noticed how many of the people you know are taking "Gummi" for their colds, coughs, and sore throats? It's the most effective remedy for these ailments. It's the most effective remedy for these ailments. It's the most effective remedy for these ailments.
