WEEKLY NEWS ANALYSIS

Western Front Aflame as Nazis Strive to Hold Allied Advance; Congress Shapes Postwar Aid

Released by Western Newspaper Union.

EDITOR'S NOTE: These analyses are prepared in these columns, they are those of Western Newspaper Union's news analysts and are not necessarily the views of the newspaper.

As war comes to their aid, German civilians pack belongings and move from battered villages in war zone safety.

EUROPE:

Battles Rage

In some of the bloodiest fighting since D-Day, the whole western front from Holland down to Switzerland was aflame, with Allied forces slugging through stubborn enemy defenses and then holding their own against German counterattacks.

Especially bitter fighting occurred on Lieut. Gen. George S. Patton's Third army front, where U. S. tanks spearheaded a drive on Germany's famed coal and industrial Saar basin, and the enemy lacked back with strong armored forces. As Patton's men edged forward, the enemy fell back on the rugged and wooded slopes of the Vosges mountains, where they were expected to make a stand before retreating to the Siegfried line to their rear.

But German resistance and repeated armored counterattacks also slowed progress at Lieut. Gen. Courtney Hodge's First army to the north of Patton's Third. In this sector, enemy strength concentrated about Trier and Stollberg in an effort to threaten Hodge's drive to the great Rhine and industrial cities of Cologne and Coblenz.

In Holland, an estimated 100,000 Germans fought against anti-aircraft Allied ground forces driving up the western border of the country toward the Zuider Zee, and paratroopers dropped in their rear.

Effect of the Allied drive not only was to threaten the pocketing of these six divisions in western Holland, but also to pull the German line ending to the south of this sector and burst out into the Ruhr valley.

Clawing through the battered "Gothic line" under the cover of the rolling barrage of their massed artillery, Allied forces looked out onto the rich Po valley in northern Italy, as German armored formations sought to stem their rolling advance in the great agricultural and industrial regions.

RUSS BREAK-THROUGH

Heaviest fighting on the eastern front centered in the north, where the Germans claimed more than 600,000 Russian troops were attacking to clear out the Baltic states of Estonia, Latvia and Lithuania.

Despite the Germans' hard defense their lines, built up in the swampy lake country of Estonia and Latvia, the Reds pushed out sizeable gains.

The old Polish capital of Warsaw was a fiery inferno as the Reds pumped shells into the German defenses of the city, and Red troops surging across the Vistula river came to grips with enemy units.

ARMISTICE TERMS

Calling on the nation to "stick to reality and try to build up... existence with the opposition that are left to us," Finnish Acting Prime Minister Ernst von Born disclosed Russian armistice terms to a heavy-hearted people.

Including restoration of the 1940 Russo-Finnish border; cession of Petsamo to the Reds; leasing of the Porkkala peninsula on the Gulf of Finland for a Russian naval base and reparations payments of \$200,000,000, the armistice terms were described as "the hardest... in our history" by Von Born.

Restoration of the 1940 border meant Finland's cession of some of its most highly developed industrial region containing 10 per cent of its population, and cession of Petsamo meant the country's surrender of rich nickel mines.

GAS TEST

Five hundred officers and enlisted men have been commended by the chemical warfare service of the army services forces for voluntarily exposing themselves to lethal gases in order to test a new anti-gas protective equipment.

As a result of the tests, during which men entered gas-filled chambers and contaminated areas, medical officers and research scientists made conclusive evidence that the new protective equipment will be effective against gas warfare.

GREAT BRITAIN:

Building Needs

That rebuilding will provide the base for Great Britain's postwar economy was indicated by the government's recent announcement that 1,250,000 workers would be needed in the construction industry to repair bomb damage.

Contributing to the tremendous damage wrought by the war have been the deadly German bombs, some of which have individually wrecked as many as 1,500 houses, with the average being 400. About 200,000 square yards of bomb, 500,000 window frames and 400,000 doors have been ordered to help repair buildings damaged by the flying bombs.

At the present time 380,000 people are engaged in the construction industry, it was revealed, with many thousands of these women.

POSTWAR WAGES

That British labor will put up a battle to retain its wartime wage increases in the postwar world was indicated by the strike of 14,000 auto workers in Birmingham, England, over assignment of employees to the assembly of a reputedly peacetime product at lower wages than those being paid in the munitions department.

Under the stimulus of wartime conditions, with manufacturers vying for labor, British wages shot up from about \$15 a week to \$25 for men, and from about \$8.50 weekly to \$13 for women.

Because of the competition between themselves and foreign countries, however, British industrialists are expected to demand that wages unless production costs are chopped through an increase in labor efficiency or greater use of machinery.

AMERICAN LEGION:

Wants Strong U. S.

American cooperation with other nations to keep the peace, fearful occupation of Germany and Italy to bring the lessons of war home to their populations, "a compulsory military training for youth, were among the resolutions adopted by the American Legion at its 50th annual convention in Chicago.

Also advocated was retention of necessary bases, maintenance of the

navy at full strength; preservation of free enterprise within the U. S.; stoppage of all immigration until unemployment should fall to around 100,000, and deportation of all subversive aliens to their native countries.

Active in Legion affairs in his home state, where he was credited with bringing Legion gunnista into 55,000, Edward N. Schreiber of Albany, N. Y., was elected national commander.

Also elected were Charles H. Gilbert of Norwich, Conn., mother of two sons in service, was elected president of the Legion Auxiliary.

First bill to get an O.K. and be sent to the White House for the President's signature was the one providing for a three-man administrative board to supervise the disposal of an estimated 160 billion dollars of surplus war goods, with no discrimination to be shown against little business and sale of all war plants over \$5,000,000 subject to congressional approval.

The second bill passed called for establishment of an office of reconversion, which would coordinate the war and peace agencies in the switch-back to peacetime conditions, and also authorized the lending of funds to be used to meet unemployment compensation payments.

CONGRESS:

Charts Reconversion

With the full elections rapidly approaching and congressional leaders pushing to assemble sufficient quorum, the house and senate made preparations for handling the postwar economic crisis and then moved to a recess until November.

First bill to get an O.K. and be sent to the White House for the President's signature was the one providing for a three-man administrative board to supervise the disposal of an estimated 160 billion dollars of surplus war goods, with no discrimination to be shown against little business and sale of all war plants over \$5,000,000 subject to congressional approval.

The second bill passed called for establishment of an office of reconversion, which would coordinate the war and peace agencies in the switch-back to peacetime conditions, and also authorized the lending of funds to be used to meet unemployment compensation payments.

As the first major step to enable the automobile industry to prepare for peacetime manufacture, the War Production Board authorized Chrysler, Ford and General Motors to permit technicians to plan correction of weaknesses in 1942 models; bring about changes in 1943 models; and plan layout, and design major changes in 1944 models. None of the companies are permitted to spend more than \$2,500 monthly for labor material in this work.

discrimination to be shown against little business and sale of all war plants over \$5,000,000 subject to congressional approval.

Hotel Caters Exclusively to Servicemen and Their Families

One of the most unusual hotels in the nation is located in Washington, D. C., where, despite nightly sellouts, accommodations are provided for below OPA ceiling prices.

It is the United Nations Service Center, formerly the Capital Park hotel, now under the exclusive management of the Recreation Services of the War Hospitality committee. The only hotel in the United States taken over completely for this purpose, it is perhaps the largest Canteen in the world for servicemen of all the United Nations, and is operated as a voluntary community project for mental health and sanitation lines.

The United Nations Service Center, located at 17th and M streets, N. W., is a five-story building for children of traveling servicemen. Washington, D. C., is such a hub for the armed services that the Canteen, despite the hotel's size, was forced to take over the adjacent school house, converting it into room for 345 more beds, a total of 570 beds in the hotel and school building.

The huge center was officially opened October 27, 1943, and has been a virtual sell-out of accommodations since. It is the only Canteen that accepts the wives and families of servicemen, as well as these in uniform. No reservations are accepted—first come, first served. This is true of beds, food and bath.

Just recently, the 1,000,000th visiting serviceman, Sgt. J. J. Connor, was Petty Officer 3rd Stashy Wickham of Boston, Mass., stationed at the naval air base, Palmer River, Md.

Has Own "Police Force"

Active in the hotel's management is the general staff, except that 74 former employees of the Capital Park hotel are employed there as members of the Canteen staff. Everything that occurs at the Canteen is approved by the military district of Washington and the Potomac River naval command.

A 24-hour duty is maintained by the Shore Patrol—the Canteen's own police force.

Though much of the Canteen's varied accommodations are free, some services are rendered on a cost basis, which amounts the average

Washington civilian. This is true of laundry service, club dryers, washing machines, valet shops, barber shops and the impressive cafeteria.

The caterers are tremendous projects in themselves. There are two canteens each for officers and enlisted men. Miss Rochelle Z. Kendall of Dallas, Texas, is the Canteen's food expert and nutritionist. Pointing out that the most modern and sanitary method of food catering has been employed there, she said: "Every governmental stress on basic, nutritious foods has been observed by us, as has the general public's interest in the most modern and sanitary method of food catering."

Typical guests at the Canteen are Petty Officer 3rd Stashy Wickham of Boston, and his wife. When Wickham came to the hotel, he was told that he was the one-millionth serviceman to register at the hotel. The Wickhams are shown resting in a corner of the nursery, where they have put seven-month-old Bobby to bed.

Land-Lubbers Become Seamen In Six Months

"All right fellows. Line up on either side of the walk and open up your gear for inspection. No knives, gun, cameras or radios permitted aboard the base."

That's the first order "brought" by the U. S. Maritime Service training station at Sheepshead Bay in Brooklyn, N. Y., last when they "landed" at the world's largest merchant marine training station. Taken in tow by an MA (Master at arms), 24 hours the new recruits are processed through training and their equipment issued.

From their six to six months here, they are equipped with a ship's wheel, binnacle, and compass. As the trainees turn the wheel to accordance with directions of the instructor, the platform rotates.

Topics are kept in view on classroom "bulletin boards" and in the training room, the new recruits move into work week. A variety of duty including "up" is assigned each individual to teach discipline and to attend to necessary station tasks.

Next the apprentice is ready to move into the course of advanced instruction for his preference and tested capabilities qualify him.

Deck trainees, at the end of their training, receive three final weeks of practical duty aboard one of the U. S. Maritime Service training ships which operate on Long Island sound and Chesapeake Bay. Ashore they use ingenious equipment to learn. In one of the large indoor buildings a mockup of a complete ship's bridge is constructed so that men may see the equipment and understand the inter-relationship.

Engine trainees receive instruction in a wide variety of technical courses in both gunnery, physical training and swimming. In the station powerhouse which provides steam for cooking and heating, a Liberty ship engine is installed.

Left, trainees practice fire-fighting on flaming oil in the hold of the S. S. Sheepshead. Right, apprentice seamen are shown the use of the breeches buoy, which has saved many sailors from drowning on sinking ships. All other phases of life-boat are also taught.

Men for the cooks and bakers

schools are selected after a series of special examinations. In addition to standard seamanship courses these men learn butchering, cooking and baking. They are provided with a service paper and a drinking utensil almost exclusively, in place of obsolete and antiquated metal dishes. The possible danger of transmission of disease from mouth to mouth via poorly washed common eating and drinking utensils. More than 50,000 paper cups widely are used. The free nursery at the Canteen, according to Mrs. Luther Gulick, the

Relief At Last For Your Cough

Cremolun relieves promptly because it goes right to the source of the trouble to help loosen and expel mucus. WARWICK MANUFACTURING CORP.
4949 W. Harrison Street, Chicago 46, Illinois

Stockyards Handle Huge Volume, Though Beseet by Help Shortage

Process Millions of Animals With Aid Of Boys and Hobos

By AL JEDLICKA

Like every other business, the nation's stockyards have had their share of wartime difficulties, but with both owners and employees displaying an aggressiveness in solving these problems, the markets have made an outstanding showing in the handling of the heavy runs which have spelled record meat production for the services, civilians and our Allies.

Typical of the nation's yards are those at Chicago, where cattle and hog marketing for the last four years have exceeded those of the immediate prewar period, and where loss of personnel to the armed forces and elsewhere has resulted in a pressing manpower situation.

Contributing to the Chicago stockyard's solution of its wartime problems, is the extremely flexible nature of operations. Assistant General Superintendent Frank Flynn declared, himself associated with the Chicago yards for 41 years, Flynn said that their long establishment has given them the experience of meeting numerous difficulties.

Everyday Weeks in Pens. As a result of this flexibility, Flynn pointed out, such maintenance men as carpenters, etc., have been shifted to actual yarding during the periods of heavy receipts, and then permitted to return to repair work when runs leveled off. However, the yards have still been pressed to man the 4,600 pens for cattle, 2,000 for hogs and 1,000 for sheep, and the 700 crates, that sprawl over the 215 acres.

With labor scarce, and with the yards no longer able to look to the full employment of farm boys because of demands for production at home, they have been compelled to extend the work-day during busier

periods and explore unusual sources of help.

During the summer vacation time, Flynn said, the Chicago yards were able to employ about 30 high school students, who were chiefly used in herding the animals about the scales and pens. But because this number could hardly suffice in handling the employment needs, the yards tried the noble experiment of recruiting transient help from Chicago's steady West Madison street district.

Even Hired Tramps. In attempting to hold on to such help, Flynn said, the yards provide room and board, but with the footers getting rich quick on high wages, the turnover among such recruits has been large.

Another complicating factor in the yards' employment situation has been the highly fluctuating market run. Flynn declared. As an example, he pointed to the exceptionally strong hog receipts of last spring, which stretched the yards' facilities, and the very light shipments of late this summer. Because of the need for retaining the force for future increases, Flynn said, the problem of carrying the help along during the slack is a hard one, with short reductions in working time the best remedy.

Despite the pesky labor problem, however, the yards have been able to handle all of the stock shipped, Flynn said, with holdovers resulting from the packers' inability to absorb the heavy receipts during glut. Because of the existence of more packing plants in the Chicago area during the last war, Flynn said, there was a more rapid movement of stock to slaughter.

In all the Chicago yards' facilities are capable of handling daily runs of 125,000 hogs, 40,000 cattle and 70,000 sheep, but even with heavy wartime production, receipts have not touched any of these capacities.

When the government applied its freeze on cars to aid in procurement for processing mills, the yards were confronted with a real problem to add to their other difficulties, but they then switched to use of wheat and potatoes.

She Looks to America for Winter Clothes

When winter comes soon to western Europe, millions of children will have to stay in bed during the daytime because they have no warm clothing. This little Polish girl is an example of millions who depend upon immediate help from America. In a country where temperatures go as low as 25 degrees below zero and where most homes are unheated, many children lack the clothing to go outdoors. To help relieve suffering of men, women and children in the liberated areas of Europe, the churches, parishes and synagogues of this country are conducting an emergency collection of clothing. The collection is being made in cooperation with UNRRA, which will ship the clothing overseas.

COOKIE CUT-UPS

Here's a gadget pin that's just as much fun to make as it is to wear. Buy some plaster of paris and mix it with water until it is of a smooth, paste consistency. Put a cookie cutter on a hard surface (such as the kitchen table) with a piece of wax paper beneath it. Fill the cutter with the plaster of paris mixture. Before the plaster sets, slip a needle through the hard, slick, and quite hard, stick a safety pin in the back of the cutter. Before the plaster sets, slip a needle through the hard, slick, and quite hard, stick a safety pin in the back of the cutter. Before the plaster sets, slip a needle through the hard, slick, and quite hard, stick a safety pin in the back of the cutter.

TRIXIE TEEN SAYS—You're old enough to form your own opinions about people. Suppose you dated a boy whom your best friends brand as a drip, a goon and a real Sam. You're surprised because you had a good time. In spite of advance reports, you found him bright, smooth and generally attractive. Are you going to drop him because your friends don't approve of him? Or are you going to stand by your own opinion and say, "I'd love to." The next time he gives you a hard time, or when he hasn't had the courage of his own convictions, where are you? Outside, inner, very outside!

Let There Be Light. An optimistic note on the ending of the European war was observed in Washington, D. C. Werker by gas cleaning and setting the scene lights that play on the capital building in peacetime. These lights have not been about since December 6, 1941, for security reasons. It is anticipated that they will be turned on as soon as Germany is defeated.

Predict Helicopters Aid To Fight Forest Fires. WASHINGTON. — An official of the fire control U. S. forest service, predicted that advanced types of helicopters developed during the war will revolutionize fire-fighting. Helicopters can land in small openings in the forest, on small lake, or mountain peaks where it would be impossible for an airplane to land, and men and equipment can be brought within striking distance of the fire.

SEWING CIRCLE PATTERNS

Smart Jumper for Fall Wear Nipped-In Waist, Flaring Skirt

For Her Party

THIS little girl's party frock will make up beautifully in a winter velvet. The nipped-in waist and perky flare of the skirt will make a dress she'll love to wear when parties come along.

Barbara Bell Pattern No. 1210 is designed for sizes 6, 8, 10, 12 and 14 years. Size 6 skirt requires 2 1/2 yards of 30-inch material. Trimming, 5 yards extra. For cutting circle, 1/4 yard of 20-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Barbara Bell Pattern No. 1214 is designed for sizes 12, 13, 14, 15 and 16 years. Size 12 jumper requires 2 1/2 yards of 30-inch material. Skirt—30-inch material, 3 1/2 yards.

For this pattern, send 15 cents, in coin, your name, address, pattern number and size wanted.

But Few Ancient Obelisks Remain Standing in Egypt. Between 2,000 and 4,000 years ago, more than 50 large obelisks were erected in Egypt to preserve, for all time, through their hieroglyphs, the achievements of the Pharaohs. Yet today, only 19 of these monolithic monuments are still standing and only five are in Egypt.

New York has one, London one, Paris one, Istanbul two, and Italy nine, including the largest known, which is 106 feet high, weighs 455 tons and stands in the piazza of St. John Lateran in Rome.

Everybody Loves Them Kellogg's CORN FLAKES. "The Grain is Great Food." Kellogg's Corn Flakes bring you purity all the protective food elements of the whole grain delectable essential to human nutrition.

How to Hold a Husband!

BOB, O.K. Can't you tell I'll always be late to market if we have gone as these every morning!

PEG: Well, we can't, my dear. And my new, quick recipe uses Fleischmann's Yeast, which puts in extra vitamins.

HM...MM...AND JUST THINK, FLEISCHMANN'S IS THE ONLY FRESH YEAST THAT HAS BOTH ADDED VITAMINS A AND D AS WELL AS VITAMIN B COMPLEX.

ALL THOSE VITAMINS GO RIGHT INTO YOUR BREADS WITH NO GREAT LOSS IN THE OVEN. BUT BE SURE IT'S FLEISCHMANN'S YEAST!

The Rambling Rhymster

By LES PLETNER

OLD SONGS

We mind the songs of yesterday—The songs we used to sing and play, They echo through the years.

We think of "Alexander's Band," Also, "Love Letters in the Sand," Which once re-echoed our ears.

Once more we hear "On Moonlight Bay," "We'll hitch old Debbs to the Shay!" They linger in our mind.

We resurrect the lilting strains of "Midnight Choo Choo," "Dream Train," With others of their kind.

We wish these old time numbers had The edge so many a new ballad On many a modern frame.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What though they lacked the smart "Bang-Bang—The crash and bang of current swing, At least they had a tune.

What to Do

By FREDERICK BELMONT

Plan to spend a part of each day with your children. A certain time devoted exclusively to the children and their problems will reward you in time. Your children will be more alert and interested than those on whom no time is spent.

If you have children, their father should give them attention too. Play games with your children, teach them card tricks and simple puzzles to try out their skills.

Children should be taught little courtesies as soon as they can walk and talk. They can learn to acknowledge introductions, eat properly and play fair. They can learn generosity in sharing toys with other children, can be taught modesty and broken of attaching too much importance to themselves.

Children should be taught little courtesies as soon as they can walk and talk. They can learn to acknowledge introductions, eat properly and play fair. They can learn generosity in sharing toys with other children, can be taught modesty and broken of attaching too much importance to themselves.

Dad Has Fine Craft But Mom Is Crafty

MISSOURI, MOBILE, MISS. — J. J. Koudens was in a hospital when she received this wire from her husband, a navy lieutenant.

"She's a fine craft. Her name is USS-157-VIS."

From the maternity ward Mrs. Koudens wired back:

"She's a fine baby. Her name is Margit Ann."

Back-to-Campus Clothes Meet Versatile Collegiate Needs

By **CHERIE NICHOLAS**

THERE are many "must have" items that are needed in every college girl's wardrobe. The grand thing about modern clothes is that they are designed ever so purposefully, to meet the occasion be it this or that. There's this matter of raincoats and damp foggy days, for instance. Regardless of that optimistic refrain "it ain't going to rain no more," it always has and it always will. Which brings us up to the subject of modern raincoats that excel anything that has gone before in way of glamorous eye-appeal.

Being that showers and thunder storms are inevitable in campus life, one of the practical needs in a college-school wardrobe is undoubtedly a sturdy wearable raincoat. The raincoat in these modern times has to be more than just a protection against the elements; it has to have "looks." Your attention is called to the stunning raincoat shown to the right in the illustration. It's everything that a modern co-ed wants in way of the color you like best, for this model comes in bright red, green or blue or in neutral tones. This coat is beautifully fitted with special regard to comfort and ease in wearing but the pride of prizes in this model is its lining or simulated leopard fabric. This lining gives the warmth for cool fall days. What's more, the coat is good-looking enough to wear to sorority teas.

Another essential that should be of first consideration in a well-advised clothes program is a sturdy dress. No matter how many dress-up gowns one can afford to buy, you'll get most satisfaction out of

the down that serves you well day in and day out. It has to be a gay little flatterer too, as is the saucy sweater dress with tasseled cap to match, shown to the left. In this instance, the sweater is brown with blue stripes. The suspender dress is of matching brown. Both garments are of a new rayon jersey that has a wool-like finish. It is an all-the-year-round dress that will prove a perfect joy in the wearing.

Then there are those gay little moments when having a sorority party in a college girl's room means that the youthful hostess has in mind just what she will wear to look modern and definitely stylish. In fact part of the fun of the party will be wearing a striking two-tone that makes fine cerise velvet its fabric theme for the slacks worn with a pailletted white jersey blouse for glitter, as shown centered in the illustration. Note the rise at the waist of the slacks which this charming collegiate is wearing.

Other items of dress that should be on their way to college this fall is a silver-slim black gown given a youthful look with a pert little pom-pom. It's nice to take along a little pink wool bolero to wear at times with this black frock, both for festivity and "just for a change." You might also jot down on your shopping list a jersey scarf-bow, the ends of which you will wind about your head so that it conceals every wispy of hair. This is considered quite a smart gesture. A stunning glitter-belt is another necessary luxury. These bejeweled belts will dramatize even the simplest frock. You'll be wanting also a stunning blazer, likewise a dagger brief-tweed box coat.

Released by Western Newspaper Union.

Peplum Influence

Here is a charmingly simple little frock that interprets the new silhouettes that call for a sprightly little peplum to break the lines of a slim skirt. In this instance, the peplum effect is achieved with a series of little ruffles. The material for this dress is a handsome green and white. Flowers fashioned of the self-fabric are added for decor.

Newest Colors for Fall

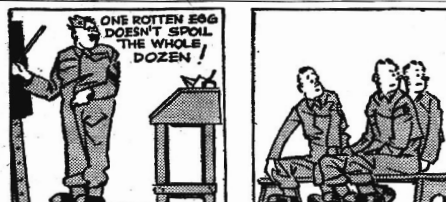

Colors now featuring in the fall fashions are American beauty and Persian blue (a purplish-clear blue) is outstanding. The costume ensemble does all in gray from head to foot with just a color dash in a bit of jewelry or a stunning belt is "the latest."

Motion Picture Town

Kanab, Utah, is the only American town that has made itself into a permanent motion-picture location. Not only does it have fine living accommodations, a vast assortment of props and all its people available to serve as extras or helpers, but it maintains a casting directory which lists the citizens with special talents, their animals and odd pieces of property.

Consequently, the town has been used for the outdoor scenes of 42 pictures since 1922.

NIGHT COUGHS

due to colds are eased, sticky phlegm loosened up, irritated upper breathing passages are soothed and relieved, by rubbing Vicks VapoRub on throat, chest and back at bedtime. Blessed relief as VapoRub PENETRATES to upper bronchial tubes with powerful medicinal vapors. STIMULATES chest and back muscles like a warming blanket.

Often by preventing most of the misery of the cold is gone! Remember—ONLY VAPORUB gives you this special double action. It's time-tested, home-proved... the best-known remedy for relief of all the miserable of children's colds.

VICKS VAPORUB

Upside-Down Lizard

The gecko, a three-inch lizard with an adhesive disk on each of its 20 toes, is the largest animal that can walk up and down walls and across ceilings. Inhabiting warm countries, these lizards are often kept as household pets because they are harmless, and useful in destroying insects.

Post-War Rural Electrification Plans Announced

Extension of the rural electric
 lines in Florida was today an-
 nounced by the Florida Power
 Corporation as part of its post-
 war construction plans. Already
 serving approximately 130 com-
 munities and adjacent rural areas
 in Florida, the company plans
 when restrictions are lifted, to
 extend its rural lines, thereby mak-
 ing electric service available to
 more rural farms and rural com-
 munities in this section. "Even
 under present day restrictions
 some degree of rural electrifica-
 tion is being accomplished," offi-
 cials of the company said today.
 "However, the War Production
 Board limitations are such that
 only reasonably small projects
 may be undertaken. Rural ex-
 tensions may be made under pre-
 sent day restrictions on the basis
 of existing farm animal units and
 certification for such extension
 must be applied for through your
 county War Board."

In discussing this post-war ex-
 tension policy, R. R. Brown, dis-
 trict manager of the company
 said, "Our company has a very li-
 beral rural electrification policy
 and despite restrictions that might
 now exist we will be glad to have
 applicants, desiring electric serv-
 ice, call at our offices in Avon
 Park. Although we are handicapped
 by the manpower shortage, we
 will survey any project at the
 earliest opportunity."

School Library

Students are in earnest about
 their reading this year. They have
 gotten off to a fine start already
 during the several weeks since
 school began.

Mary Ellenbeth Hall of the Sen-
 ior class is library page for this
 semester. Each morning after roll
 call rings, she distributes overdue
 book notices to Home Rooms.

Mr. Whitte presented the li-
 brary with two very valuable
 books, which the school was able

to secure during the summer. "The
 Britannica Book of the Year
 1944" gives a record of the march
 of events for 1943. The Britannica
 Atlas is quite large and contains
 a wealth of maps and statistical
 information. These additions will
 be most useful to students and
 faculty. — Anna Felton, Librarian.

MEMORIAL SOCIETY

(Continued from page one)
 Wilkins, secretary-treasurer; Mrs.
 J. B. Coon Jr., teacher; Mrs. Otto
 Skipper, co-treasurer; Mrs. J. L.
 Collins, missionary and education;

What d'ya mean - 'FREE ENTERPRISE'?

FREEDOM OF ENTERPRISE, for ex-
 ample, has helped the electric companies
 under business management to meet every
 we demand for electric power—keeping
 production steadily up and holding prices
 firmly down. The same freedom of enter-
 prise that built the electric companies, built
 America! There is no substitute for it!

THAT'S just a name for the way
 America works.

It's the simple principle that
 human beings like to get on in the
 world.

That when a man sets out with the
 predetermined goal in his mind to
 be a doctor or a shoe salesman or an
 electrical engineer—that's what he
 wants to be. And he can be.

That when a farmer plows his field
 and plants his seed, he's got a right
 to a life system. A right to buy more
 land—right extend his lines.

That when a business man starts
 a business, he's building for a future

—and nobody can take that future
 from him.

That when any man works hard
 and saves his dollars, those dollars
 are his. He can spend them if he
 likes. Or he can invest his money,
 secure in the knowledge it's work-
 ing for him.

Call that any name you like. Call
 it Free Enterprise or Democracy or
 Opportunity. Whatever you call it,
 it's American-bred-in-the-bone.

Without it, nobody's going to plan
 any farther than tomorrow. Without
 it, there's no incentive to invent or
 invest, discover or develop. Without

it—and don't let any one tell you
 otherwise—this country would lose
 its high place among the nations of
 the world.
