Allied Invasion of Yugoslavia Poses Another Threat to Reich; Plan for Small Standing Army

Revised by Western Newspaper Union

EDITOR'S NOTE: When updates are received in these columns, they are those of Western Newspaper Union's news analysts and not necessarily the views of the publisher.

With U. S. forces edging closer to the Philippines and Japan tied through intensive operations against the Bonaia lying 600 miles from Tokyo, Navy Secretary James Forrestal warned the country that the going would become increasingly rougher as the enemy concentrated its forces for a dash on a shorter front.

In speaking of the enemy's air force, Forrestal said: "The Japs have obviously been saving their planes for the engagement to come. Except for the battle of the eastern Philippines, they have not risked a big aerial battle for months."

In addition to concentrating numbers, the Japs have also been improving the quality of their planes. Forrestal revealed. Said he: "Jap planes of every type . . . now have greater fire power, armament, speed, range and load capacity. United States navy planes have been improved, too, but we don't have as big technical advantages . . . as a year ago."

Entering Chambois, France, the Allies found abandoned, wrecked and burned German equipment, common sights along the enemy's battered retreat route to the Reich.

EUROPE: New Front

For the little man with the clipped mustache, there seemed to be no end of trouble.

Although his broken armies in the west were reorganizing for a stiffer stand against the U. S. and British onslaught, and although his battered armies in the east were slowing the Russians from the Black sea to the Carpathians, the Allies posed still another threat to his narrowing defensive circle by an invasion of Yugoslavia.

As Russian troops tore across Romania into the eastern Yugoslav border near the capital of Belgrade, U. S. and British forces landed on the western coast for a drive inland. As the two Allied armies worked forward for a junction, Marshal Josip Tito's Partisans were active in harassing German troops and sabotaging communications.

The twin offensive in Yugoslavia doubly imperiled the harried locutions of Adolf Hitler.

First, the U. S., British and Russian drives promised to link the Allied armies for a concerted attack against southern Austria and Hungary, and, also to outflank the Nazi main thrusts in Italy to the west; and, second, an Allied junction would cut off an estimated 200,000 enemy troops remaining in lower Yugoslavia, Greece and the Aegean Islands.

Stiffen at Border

Bleated the German ruler to fanatical Nazi guardsmen, telling the U. S. and British drives to the Reich's western frontiers.

"Every day gained now amounts to a reinforcement of our national strength for the defense of the Reich itself."

Partly because of such resistance, partly because the fast-moving Allied armies had outrun their leaders, and, directly to the west, the British supply lines, the U. S. and British thrusts in the Lowlands and France temporarily lost their winning momentum.

Fighting was particularly heavy in northeastern Belgium before the fortress city of Liege and in the rugged Ardennes forest, and directly to the west, Paris, where American troops drew up along the Moselle river for an assault on the German stronghold of the rich industrial Saar basin.

Mounted thickly in the precipitous, wooded heights east of the Moselle, the German artillery maintained a steady drizzle of fire against the U. S. troops seeking to establish firm bridgeheads across the river.

Farther to the south, Lieut. Gen. Alexander Patch's Seventh army driving up from the Mediterranean for a juncture with Lieut. Gen. George Patton's Third army along the Moselle, drove on the Belfort gap, the low lying France between the Vosges mountains of France and Swiss border leading into Germany.

Costly Fighting

Reflecting the strong pressure the Russians were exerting to the northeast of Warsaw, the Germans acknowledged their withdrawal across the Narce river. . . . to avoid the danger of a Russian breakthrough on the southern border of East Prussia.

In withdrawing across the Narce, the Nazis continued their policy of economizing their forces by giving ground when the superior weight of their opponent promised to grind down their manpower.

Because of the proximity of the Russians to German soil, however, the Nazis no longer were free to make wholesale withdrawals, but now faced bloody front-line fighting.

MISCELLANY

OFA VIOLATIONS: In the first half of this year, formal enforcement of Office of Price administration regulations was necessary in 42,000 cases, involving violations of price ceilings, rationing quotas and price ceilings. Action included revocation of 20,000 consumer gasoline ration cards, 4,200 sales of injurious goods, 1,200 triple damage suits, and 2,100 criminal prosecutions.

PACIFIC: Tougher Going

With U. S. forces edging closer to the Philippines and Japan tied through intensive operations against the Bonaia lying 600 miles from Tokyo, Navy Secretary James Forrestal warned the country that the going would become increasingly rougher as the enemy concentrated its forces for a dash on a shorter front.

In speaking of the enemy's air force, Forrestal said: "The Japs have obviously been saving their planes for the engagement to come. Except for the battle of the eastern Philippines, they have not risked a big aerial battle for months."

In addition to concentrating numbers, the Japs have also been improving the quality of their planes. Forrestal revealed. Said he: "Jap planes of every type . . . now have greater fire power, armament, speed, range and load capacity. United States navy planes have been improved, too, but we don't have as big technical advantages . . . as a year ago."

CANNED FOODS: Remove Rationing

Because War Food administrator Marvin Jones advised that available and prospective supplies justified the step, the government removed rationing all canned and processed meats, jellies, fruit butters, asparagus, lima beans, corn, pumpkins, squash, mixed vegetables, baked beans, tomato sauce and purees and all varieties of soups and baby foods.

At the same time, a WPA spokesman said that the removal of rationing will permit the removal of commercial grade bestbeats and meats from rationing lists as of November. At present, sizable markets of grass-fed stock have been refused in various points of utility grade meats. Lighter runs of prime cattle, on the other hand, will continue rationing of top cuts necessary.

Charts Quake

The council is dedicated to the principle, widely accepted both within the government and outside, that all modern warfare is largely won by the use of the aircraft carrier and the robot bomb—all have been responsible for major changes in the nature of the war.

Civilian Contributions

Another thing that keeps firmly in mind is the fact that many of the weapons of modern war, the key principles which go into them, were the product of the civilian mind—the submarine, the torpedo, the motor driven airplane, the internal combustion engine.

DISARMAMENT: Discharge Plans

Total length of service, time served overseas, combat record and dependency will govern the demobilization of soldiers following the defeat of Germany, the army announced.

Under the army's plans for releasing surplus men, each of the first four mentioned factors will be given a certain number of points, with release going to doughboys with the highest ratings. However, the army pointed out, men with qualifications needed for the war in the Pacific will receive first priority for demobilization.

Future Army

Declaring that . . . "a large standing army has no place among the institutions of a modern democratic state," Gen. George C. Marshall told officers planning the postwar military organization to work on a small, efficient force of well-trained citizens.

To accomplish this objective, General Marshall said legislation that congress would pass assumed that every able-bodied American youth to undergo training before placement in the reserves.

Shipping Factor

As a demand was made in congress for an investigation of the war department's handling of shipping, especially in the Pacific, a letter from Gen. Douglas MacArthur told the secretary of shipping that the war department was not a free liberalized policy.

Critics the shipping shortage, Gen. MacArthur said: "The reduction of the United States without replacement of all men who have served a specified length of time would, of course, halt our offensive against Japan and might indefinitely prolong the war."

While the demand was made for the investigation, Rep. Carl Hulseb (Calif.) urged that soldiers stationed in Alaska be rotated by units to other posts.

SURPLUS GOODS Release Vehicles

Excess stocks of war materials are being declared surplus at the rate of 100 million dollars worth a month. Goods "declared surplus" can be sold off as rapidly as possible. Eighty-five per cent of the materials are surplus, and the remainder, at present, and consist of airplanes, motor vehicles, medical supplies and other war materials. It is estimated that have brought 83.8 per cent of original cost.

Archives of Patent

The files of the patent office contain the graphic story of the progress of man's mind. It is the record of the men who helped build this great country of ours. In these files are the records of the hundreds of thousands of inventions that have helped America to become the greatest nation in the world.

Every week, every day, in fact, these files grow larger and larger. It is an interesting, even though most of their

Have You Any Ideas for 'Secret Weapons'? Inventors' Council Wants To Know Them

Many War Machines Were Developed by Civilian Amateurs

Want to help finish winning the war? Well, just settle down some night, light up the old pipe, take out pencil and paper and figure out an easy way of generating an artificial fog—one that can be laid just where you want it and really do the business.

Sounds simple, doesn't it? But the army would give a great deal for a practical solution to the problem of covering advancing troops this way. It can be done. A number of methods have been tried out, but most of them have failed. The council believes that a full-equipped infantryman, but none as yet.

When the soldiers and marines first began landing on Pacific beaches in the face of heavy enemy fire there were scores of suggestions that industry be equipped with shields. This idea had to be discarded, the council says, because the weight of such a shield, if it were to prove capable of stopping a military projectile, would be too great for a full-equipped infantryman to handle.

Idea from Soldiers

Some of the suggestions, however, come from men at the fighting fronts and in army camps. A lieutenant colonel in Italy wrote in with an idea for equipping tanks to blow up enemy mines without danger to the tankowner. His suggestion was equipping a tank with a gasoline explosive absorbing roller, to be pushed ahead of the vehicle as it waded through the mine field.

Another invention which has saved scores of lives is a simple signaling mirror which can be directed straight into the eyes of pilots searching for crews of sunken ships or attempting to confuse or mislead attacking forces.

Many of the ideas adopted, the council's records show, have served to speed up quick repairs in the field. One of the most important of these was the use of high-altitude flares and in life belts, had been shut off by the advancing Japanese. The council's records show that the idea of using flares in life belts, had been shut off by the advancing Japanese.

For example, there is a crying need for some means of controlling fires in tanks until the personnel have had time to evacuate. At present, the council's records show that a small metal container is being used with some success. But the carbon dioxide treatment doesn't serve to break the live explosive and ammunition from exploding within the tank as the fire rages past the tank.

But not all of the inventions and mechanical problems of the armed forces have been solved. Many new ideas are being urged, needed, even in fields where considerable improvements have been made since the start of the war.

Shark Fishing Is the Business Of Florida Town

If you want to learn about shark fishing, Salerno, Fla., is the place to go. Sharking is a growing industry there. They don't go after sharks in Salerno for the fun of it. In recent years it has been discovered that shark liver is phenomenally rich in vitamin A, and therefore valuable medicinally, as the primary urge of the shark hunters was for the liver. However, uses have been found for other parts of the so-called "tiger of the deep." Hides are made into luxury leather; the flesh gives good steaks—if you like shark meat—and the "innards" are dried and ground for fodder and fertilizer. Shark fins are a delicacy in China.

The sharks caught off Salerno and in Hobe sound average 20 feet or more in length. They weigh a ton or more and include such branches of the shark family tree as the mackerel, black leopard, sandbar, hammerhead, black tip, tiger, lemon and white shark.

Shark fishing does not involve the rod-and-reel angling technique. In some parts of the world, the huge fish are harpooned. In Salerno they catch 'em on the assembly line method. A steel chain from 3,000 to 3,500 feet long is strung between buoys at a depth of about 60 feet. Great hooks are attached to the chain at intervals and these hooks are baited with scrap fish. After a sufficient interval the chain is raised by a winch on the fishing boat and the monsters hauled in. Fifty sharks are average catch. There is a record of 135.

A day's haul for one boat. The heap includes lemon shark, tiger shark, hammerhead, and leopard shark. These last are considered the most vicious of the "sea tigers."

A big shark is hauled over the gunwale. A quick flip the sea beast onto the deck at the average weight is more than a ton. It is necessary to use chains for all the tugs, since the shark's double row of keen teeth would nip through any sort of line or rope.

A day's haul for one boat. The heap includes lemon shark, tiger shark, hammerhead, and leopard shark. These last are considered the most vicious of the "sea tigers."

MAKE-UP MAKE-OVERS

That's a speaker, isn't it? But we mean just what we say, "cos this trick is all about the things you can do with your empty lipstick cases and compact. After you've used up your "pucker paint" and "kissie dust" try these:

Bobby Pin Hideaway—Losing a bobby pin is a major calamity for a teen these days, so use an empty (and clean) lipstick case as a bobby pin container. If you want to make it more decorative, paint it with nail polish. As if we had to tell you!

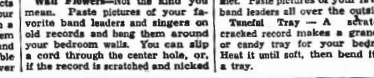

Blitzes in Time—Are you always popping buttons and running ripe in your stockings? For safety's sake, take along a lipstick case filled with needle and thread. Very handy.

PBI Stuff—When you want to pass notes in school, just drop your lipstick case covertly into the person who picks it up! It will find it contains a message (providing you put one in it). Very good way to pass experiments on your night in, and you'll probably have more notes out.

ON THE RECORD

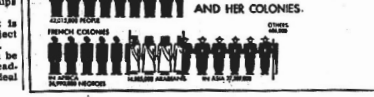

Show me the teen who doesn't like to play the phillies on the phonograph and will show you a blackberry that's white. Or Versa-Versa. Here are some tricks that will away coming swing addies.

Wall Flowers—Not the kind you mean. Paste pictures of your favorite band leaders and singers on old records and hang them around your bedroom walls. You can slip a cord through the center hole, or, if the record is scratched and nicked

HUSBAND IN CHURCH

At last she got him out to church... This man of cheerful sto. She dragged him off from Satan's perch— Manuevered him within. She guided him into a pew, In back of church remote... Where he at once omitted to Take off his overcoat. While all were singing of a hymn— And made him take it off. Her own she did not doff. When time arrived to pass around The regulation plate. His pocketbook could not be found, And soon 'twould be too late. He fished it from his overcoat— Two pennies fell therefrom. The pew seat they resounding anode. Disturbed the tranquil calm. They sounded, as the later said, Like muskies covers flat. Dropped on a concrete pavement dead— They sounded just like that. At last 'twas over—he got him out. He to his home was stumped. Had he been told, without a doubt He would have been well spanked.

Minute Make-Ups

By GABRIELLE

Your makeup should be composed of Lights and Shadows. By careful blending of your foundation cream you can highlight your most attractive features and shadow the plainer ones. For instance, blend eyeshadow on the eyelids to dramatize your eyes if they are your best feature. If not, then soften the eyes with foundation cream on the eyelids. If your chin is too pointed, "shadow" it with darker cream and careful powdering.

Let's try this—WNU Features.

Army Buying Pack Mules For Mountain Transport

The army quartermaster corps is purchasing approximately 2,000 mules for the use of the armed forces.

The mules, of the type most suitable for use as pack animals, are of somewhat smaller stature than those required for draft purposes. They usually weigh from 1,000 to 1,500 pounds, and are capable of carrying loads weighing from 200 to 250 pounds.

Far from being outmoded by mobile warfare, the mule is proving more valuable than ever to the army for supply transportation over rough terrain such as has been encountered in Sicily, Italy and Burma.

In addition to his sure-footedness on mountain trails, the mule is seldom disturbed by the noises of battle when working under combat conditions. Once his reluctance to boarding an air transport or landing quietly and gives little trouble while being transported.

Allied Invasion of Yugoslavia Poses Another Threat to Reich; Plan for Small Standing Army

Editorial Note: When opinions are expressed in these columns, they are those of the writer and not necessarily those of the publisher.

Entering Chambala, France, the Allies found abandoned, wrecked and burned German equipment, common sights along the enemy's battered retreat routes to the Reich.

EUROPE:

New Front

For the little man with the clipped mustache, there seemed to be no end of trouble. Although his broken armies in the west were reorganizing for a stiffer stand against the U. S. and British onslaught, and although he had ordered armies in the east were slowing to the Russians from the Black sea to the Carpathians, the Allies posed still another threat to his narrowing defensive circle by an invasion of Yugoslavia.

At Russian troops force across Romania into the eastern Yugoslav border near the capital of Belgrade, U. S. and British forces landed on the western coast for a drive inland. As the two Allied armies moved forward for a junction, Marshal Josp Tito's Partisans were active in harassing German troops and sabotaging communication lines.

The twin offensive in Yugoslavia doubly imperilled the hurried retreat of Adolf Hitler's forces.

First, the U. S., British and Russian drives promised to link the Allied armies for a concerted attack against southern Austria and Hungary, and, also to outflank the Nazis manning the Gothic line in Italy to the west; and, second, an Allied junction would cut the German line, mated 200,000 enemy troops remaining in lower Yugoslavia, Greece and the Aegean islands.

Stiffen at Border

Bleated the German radio to fanatical Nazi rearguards retreating the U. S. and British drives to the Reich's western frontier.

"Every day gained now amounts to a reinforcement of our national strength for the defense of the Reich itself."

Partly because of such resistance, partly because the fast-moving Allied armies had outrun their lengthening supply lines, the U. S. and British thrusts in the Balkans have France temporarily lost their whirlwind momentum.

Fighting was particularly heavy in northeastern Belgium before the fortress city of Liege and in the rugged Moselle forest, and directly to the east of Paris, where American troops drew up along the Moselle river for an assault on Nazi defenses guarding the rich industrial Saar basin.

Mounded thickly in the precipitous, wooded heights east of the Moselle, the German artillery maintained a steady drumfire against dozens of U. S. troops seeking to establish firm bridgeheads across the river.

Farther to the south, Liege, General Alexander Patch's Seventh army, driving up for a juncture with Liege, General Patton's Third army along the Moselle, drove on the Safford gap, the low lying plain between the Vosges mountains of France and Swiss border leading into Germany.

Costly Fighting

Reflecting the growing pressure the Russians were exerting to the northeast of Warsaw, the Germans acknowledged their withdrawal across the Narew river, "... toward the danger of a Russian breakthrough on the southern border of East Prussia."

In withdrawing across the Narew, the Nazis continued their policy of economizing their forces by giving ground when the superior weight of their opponent promised to grind down their manpower.

Because of the proximity of the Russians to German soil, however, the Nazis no longer were free to make wholesale withdrawals, but now faced bloody front-line fighting.

PACIFIC:

Tougher Going

With U. S. forces edging closer to the Philippines, the Japanese, lashed through intensive operations against the Bonins lying 600 miles from Tokyo, Navy Secretary Tada Yonai revealed that the Japanese forces for a fight on a shorter front.

In speaking of the enemy's air force, Forrestal said: "The Japs have obviously been saving their planes for the engagement to come. Except for the battle of the eastern Philippines, they have not risked a big aerial battle for months."

In addition to concentrating numbers, the Japs have also been improving the quality of their fighters. Forrestal revealed that the "Jap planes of every type... now have greater fire power, armament speed, range and load capacity. United States navy planes have been improved, too, but we don't now have as big technical advantages as a year ago."

CANNED FOODS:

Remove Rationing

Because War Food administrator Marvin Jones advised that available and profitable supplies justified the step, the government removed from rationing all canned and processed meats, poultry, fruit butters, applesauce, lima beans, corn, peas, pumpkin, squash, mixed vegetables, baked beans, tomato sauce and puree and all varieties of soups and baby foods.

At the same time, a WPA spokesman declared that heavy runs of cattle may permit the removal of commercial beef from rationing in October or November. At present, stable marketings of graded beef are restricted in amount to permit the sale of utility grade meat. Lighter runs of prime cattle, on the other hand, are exempt from rationing of top cuts necessary.

Charts Quake

The council is dedicated to the principle, widely accepted both within the government and outside, that all modern warfare is largely a battle of inventive ideas.

Another thing the council keeps firmly in mind is the fact that many of the weapons of modern war, or at least the principles which go into them, were the product of the civilian mind and the submarine, the torpedo, the motor driven airplane, the internal combustion engine.

Naturally, most of the major improvements on the weapons of war come from expert technicians or outstanding engineers, thoroughly familiar with the particular field in which they lie. But many of the 200,000 ideas or inventions that have been submitted to the council since its inception have come from the rank and file of the people.

From farmers, letter carriers, workers, business men, youngsters in school, and even a few women, have come suggestions that have proved of considerable assistance to the government.

CATTLE:

War Prices

As the war entered its sixth year this month, price levels of most commodities have risen to levels higher than they were in September, 1939.

In the Chicago market, cattle that brought \$12 per hundredweight six years ago sold at \$18.25. Since that time, the average price of cattle has risen to \$18.25.

The rise was equally marked in hogs, with head under 240 pounds, which brought \$9 per hundredweight six years ago, selling for the \$14.75 today. As a whole, the average of 1939 was far below the 1944 figure of \$14.75.

Against the top of \$10 in 1939, lambs drew \$14.50 per hundredweight, with the \$20 average of six years ago below this month's mark of \$14.25.

FURLOUGHS:

Shipping Factor

As a demand was made in congress for an investigation of the war department's handling of furloughs, especially in the Pacific, a letter from Gen. Douglas MacArthur stated that the scarcity of shipping hindered a more liberal policy of furloughs.

Citing the shipping shortage, Gen. MacArthur said: "The return to the United States without replacement of all men who have served a specified length of time, of course, halt our offensive against Japan and might indefinitely prolong the war."

While the demand was made for an investigation, Rep. Carl Albert (Calif.) urged that soldiers stationed in Alaska be rotated by units to other posts.

Have You Any Ideas for 'Secret Weapons'? Inventors' Council Wants To Know Them

Many War Machines Were Developed by Civilian Amateurs

Want to help finish winning the war?

Want just settle down some night in that favorite easy chair, light up the old pipe, take out pencil and paper and figure out an easy way of generating an artificial fog, one that can be laid just where you want it and really do the work?

Sounds simple, doesn't it? But the army would give a great deal for a practical solution to the problem of covering advancing troops this way. The council is looking for a simple, effective way of generating this cover.

And while it is looking for a way to create artificial fog, it is also on the alert for any new methods of dispersing such a fog laid down by the enemy. Here, too, a number of methods have been suggested, some have been tried with a degree of success, but the problem hasn't yet been really tickled.

This is where the National Inventors' Council comes in. It was set up by the War Relocation Authority in 1940 to serve as a clearing house for just such ideas that military men might find valuable. Headed by Charles F. Kettering, a past president of the society of Automotive Engineers, and composed of the nation's leading scientists and engineers, it serves as a "funnel" between the American ingenuity of the man in the street and the proper military authorities.

The council is dedicated to the principle, widely accepted both within the government and outside, that all modern warfare is largely a battle of inventive ideas.

The heavily armed and armored tank, the super bomber, the aircraft carrier and the robot bomb—all have been submitted to the council since its inception as war tactics in the battles of this war.

Another thing the council keeps firmly in mind is the fact that many of the weapons of modern war, or at least the principles which go into them, were the product of the civilian mind and the submarine, the torpedo, the motor driven airplane, the internal combustion engine.

Naturally, most of the major improvements on the weapons of war come from expert technicians or outstanding engineers, thoroughly familiar with the particular field in which they lie. CLEM AND MAGGIE
Nationally famous R & A 610 Comedians, who were the hit of the Grand Ole Opry, Tied Show last season, and prior to that were the outstanding stars and features with Boone County Jamboree, of Station WLW, Cincinnati, Ohio, for two solid years. They also had a fifteen minute program every morning over WLW and were known as Clem and Maggie Wilkings. On one broadcast alone, they received over 40,000 fan letters.

Clem and Maggie are just two of the many famous radio "stars" who will appear in the "Grand Ole Opry" on Wednesday, Oct. 4 with the Hillbilly Jamboree in a large tent theatre, seating three thousand and located on Wausau Road.

Cousin Wilber, the nation's greatest hillbilly comedian, Pete Fyle and his Mississippi Valley Boys and Girls, both former stars of WMG Grand Ole Opry, Nashville, Tenn., and a host of famous songsters, dancers, fiddlers, yodelers and musicians all go to make up two hours of solid entertainment and the greatest array of radio talent ever assembled together under canvas.

Doors to big tent open at 7 P. M., and the performance begins promptly at 8:15 P. M. It looks like a big night for local theater goers when these famous former Grand Ole Opry stars come to town.

ALL classified ads cash with order. We have no bookkeeping system as to our for the small amount of money involved in this type of ad. If ad is placed in 10¢ it will run, unless paid for before paper is sent.

HELP WANTED — Electric welder, acetylene welder and cutter, blacksmith, machinist, sheet metal worker. If you can qualify for one or more of the above, let us hear from you. Ulbrich's, Wausau, Wis.

CHARM-KURL PERMANENT WAVE, 50c! — Do your own permanent with Charn-Kurl Kit. Easy to do, absolutely harmless. Requires no heat, electricity, or machines. Safe for every type of hair. Priced by millions including Pay McKenna, glamorous movie star. R. E. Thayer Jamboree Drive Co. Sept. 1-10, 8.

FOR SALE — Complete radio. Latest pre-war model. All modern features. A-1 condition. P. O. Box 544.

LOST — One pair of eye glasses and case. In or around Avon Park. If found—return to Sun Office. Reward. John Brown, 164d.

HELP WANTED, FEMALE — Women needed for upholstery work. Experience unnecessary. Reasonable pay while learning. Opportunity for good pay and permanent position to parties adapting themselves to this type of work. Apply Ware Furniture company.

FOR SALE — Nice young ducks. T. J. Cooper, 137 Cornell St.

FOR SALE — 1935 Chevrolet panel truck, good tires, good condition. Phone 275.

HOUSE FOR SALE — Seven room house and 12 bearing fruit trees, double garage, 108 West Orange St., or phone 674, Avon Park, Fla.

FOR SALE — One pair ladies (Gaynes) galoshes, pre-war brown rubber with slipper fastenings. Size 8. Only slightly used. \$2.00 Inquire Sun Office. Sept. 15, 22.

Church Loyalty Sunday at Congregational

Church Loyalty Sunday will be observed at the Union Congregational Church, Sunday morning at the regular worship service. Visitors are welcomed and the members of the congregation are urged to attend. Rev. Hedgeshelt will preach on the subject, "The Church Really Important?" Parts of the service will be taken by the young people.

During the week beginning September 18, the Emergency Collection of Clothing for Europe will be conducted by Union Congregational Church in cooperation with the United Nations Relief and Rehabilitation Administration. At least 10,000,000 pounds of usable garments — new or used — are urgently needed by men and women and children in the liberated areas.

Mrs. J. Paul Carter will be in charge of the collection. Anyone desiring to contribute clothing for this purpose should bring them to the church during this week.

IN THE CIRCUIT COURT OF THE TENTH JUDICIAL CIRCUIT IN AND FOR HIGHLANDS COUNTY, FLA. IN CHANCERY
GARY W. WILLIAM (BILL) BROWN, Plaintiff,
vs.
ANNIE BROWN, Defendant.

NOTICE TO APPEAR
TO ANNIE BROWN, whose residence is unknown.
You are hereby required to file an appearance in this proceeding within a divorce suit instituted by your husband, WILLIAM (BILL) BROWN, as a ground for divorce, desertion, or before Monday, November 13, 1944, or else a decree pro confesso will be taken against you.

This action to appear shall be published in the Sebring Herald Sun once each week for four consecutive weeks.

WITNESS my hand and official seal of said Court this 15th day of September, A. D. 1944.

Attest: Clerk of the Circuit Court of Highlands County, Florida.

11,000,000 post-war plans

GET it over with. Get back home. Get a job. That is what our fighting men are thinking and talking about.

First—victory. Next—nail down the peace.

Then they want to throw off the rigid regimentation of military life — and not run into the same sort of regimentation back home.

They want to set out for themselves, as Americans always have . . . to use their own heads and hands in fashioning their own destiny.

A job and an opportunity—in the American system of free enterprise. This is the post-war plan of men in uniform.

The Government alone can't be expected to carry out these plans. It's up to every one of us at home to see that they're fulfilled—eleven million times.

We will do our part.

Miss Barbara Betts Bride Elect Is Honored at Tea

Mrs. Walter S. Betts entertained at a lovely tea on Saturday afternoon from four till six o'clock in honor of her daughter, Miss Barbara Betts, whose engagement to Malcolm Elshberg of Minneapolis, Minn., was recently announced.

Thirty fall garden flowers, in dainty pastel shades were used to pleasing advantage in the rooms of the home. The tea table, overlaid with a handsome lace cloth, was centered with a silver bowl, filled with an arrangement of yellow and blue blossoms. Sandwiches, cookies and punch were served from the prettily appointed table. Mrs. Betts was assisted in serving by her daughter, Miss Nancy Betts and her niece, Mrs. Edward G. Touchton.

Friends invited to call during

the designated hours were Miss Elizabeth Hetherington, Miss Jean Hart, Miss Dot Hughes, Mrs. L. C. Davis, Miss Patricia Barry, Mrs. Donald Wiggins, Mrs. W. D. Dorn, Mrs. Earl W. Hart, Mrs. C. Parker Anderson, Mrs. R. R. Porterfield, Mrs. C. E. Lender, Mrs. E. G. Todd, Mrs. E. R. Brown, Mrs. Chas. F. Kenney, Mrs. J. Paul Garber, Mrs. Sue Gregory, Mrs. Dan Ellis, Mrs. Van Snyder, Mrs. John Daley, Mrs. Demos Mandia, Miss Peggy Mandia, Mrs. Win. Bewick, Mrs. E. P. Loomis, Mrs. W. H. McCarty, Mrs. J. A. Johnson, Mrs. H. C. Worden, Mrs. M. G. Whitcomb, Mrs. B. A. Thayer, Mrs. W. C. Touchton, Mrs. Edward G. Touchton, Mrs. R. H. Jordan, Mrs. D. G. Perry, Mrs. F. W. Spitz, Mrs. C. O. Loeck, and Mrs. Win. Wintalsch.

Tirzah Thayer Has Birthday Party Saturday

Tirzah Thayer, dainty young daughter of Mr. and Mrs. S. S. Thayer was hostess to a group of her close friends at a birthday party at her home on Saturday afternoon from three till five o'clock, given in observance of her sixth birthday anniversary.

Many interesting children's games were enjoyed during the party hours, and later, delicious refreshments of ice cream and cake were served. The large white birthday cake was topped with six miniature candles. Favors were novelties.

Mrs. Thayer was assisted in entertaining the happy group by Gloria Garber.

PTA Entertains At Delightful Party Thursday

The parents and teachers enjoyed their "get acquainted" party at the school lunch room Thursday night. Many of the parents had a chance to meet their child's teacher for the first time. A short program was given; Mr. Wilbitt introduced the faculty; Col. P. N. K. Bailey gave a brief outline of the new type of government assistance to school lunch rooms. Mrs. Maude Yarn gave a resume of the outline of the government assisted lunch rooms in the state, and the added opportunities it presented to the child. She stressed that the lunchroom program is to become an inter-related part of the school curriculum. Refreshments of lemonade and cake were served.

Mrs. Davis, the president announced that the regular P. T. A. meeting would be held next Thursday, September 28 at 3:30 in the High School auditorium. All parents are urged to attend.

Miss Peggy Woodall, Publicity Chairman.

St. Margaret's Auxiliary Met on Wednesday

St. Margaret's Auxiliary met at the parish house Wednesday afternoon for the business and program meeting. Mrs. Walter Betts, president, presided at the meeting. Plans were formulated for a parish family dinner to be held next Tuesday evening. Plans were also made for sending overseas Christmas boxes.

During the social hour, Mrs. G. S. McKnight, hostess, served dainty refreshments of sandwiches.

cookies and tea.

Those present included Mrs. Demos Mandia, Miss Peggy Mandia, Mrs. W. H. McCarty, Mrs. C. D. Putney, Mrs. Sue Gregory, Mrs. Dan Ellis, Mrs. Van Snyder, Mrs. Smith, Mrs. E. G. Todd, Mrs. Walter S. Betts, Mrs. Chas. Kenney, Mrs. G. S. McKnight, Mrs. Ralph Herring, Mrs. S. S. Thayer, Mrs. J. A. Johnson, Mrs. H. C. Worden, Mrs. John Daley, Mrs. E. R. Currie, Mrs. George Voorhees, Mrs. R. H. Jordan, and Mrs. W. A. Roberts.

Brotherhood of Baptist Church Has Supper Meeting

The Brotherhood of the First Baptist Church had their regular monthly meeting Tuesday night at 8:00 P. M. in the Church basement. The meeting started with a chicken supper prepared by the ladies of the church. After the supper a short business meeting was held followed by a talk on "Men and Missions" by Rev. E. H. Puryear.

The following men were present: Paul McFarland, M. A. C. M. Crews, Harmon Alkin, Sgt. Ray Phelps, Pfc Paul Mose, Pfc Paul Zylntra, Sammy Longbottom, Rev. E. H. Puryear, A. B. Wilbitt, Gerald Wickler, W. W. Wicker, Sgt. Marvin Powell, E. Ray Wells, T. M. Buggs, M. C. Potter, J. C. Wilcox, F. Longbottom, G. D. Godwin, Albert Demos, Sam Patterson, Capt. B. F. Wiggins, B. F. Martin, R. L. Adams, and Alfred Engelmann, Jr.

Births

Mr. and Mrs. John Brown announce the arrival of a baby daughter, weighing nine pounds, who arrived at their home on Tuesday.

Lt. and Mrs. R. O. Daves of Bristol, Miss., formerly of Avon Park are announcing the arrival of a baby daughter, who was born Saturday, Sept. 16. The little lady has been named Mary Todd. Lt. Daves, a pilot on a B-17, was in training at the Avon Park Army Air Field, and while here the couple resided at the R. G. Todd home. Lt. Daves is now stationed in England.

Mr. and Mrs. Walter Newport of Indianapolis, Ind., formerly of Avon Park are announcing the arrival of a baby daughter, weighing six pounds, who arrived September 18. The little lady has been named Anita Sue.

MRS. REINHART'S SISTER DIES

Mrs. Ruby O. Robinson, sister of Mrs. J. R. Reinhart of Avon Park, passed away at her home in New York City, Saturday, Sept. 16, following a long illness. Surviving relatives include two other sisters, Mrs. A. Pelletier of Saratoga Springs, N. Y., and Mrs. Louise Salmon of New York. Mrs. Robinson has visited Mrs. Reinhart on several occasions, and had many friends here who will regret to learn of her death.

AVON PARK ASSEMBLY OF GOD CHURCH

DO YOU BELIEVE IN DEMOCRACY?

Do You Want to Have a Voice in Your City Government?

Are the citizens and tax payers of Avon Park entitled to know when any drastic change is made in matters that affect everybody within the city?

Should the City Council enter contracts for a period of years that will apparently increase the cost of electric lights for the small user without referring same to a vote of the people?

Do you believe that the City Council should first publicly outline to the users of electricity what the proposition is in regard to buying the distribution system of the present Electric Company, and also what the present company has offered the city in a new contract?

Every tax payer and user of electricity in the City of Avon Park is vitally interested in what might be done, and are entitled to have a full explanation and a chance to approve or reject.

It is just common sense to say that what is now being considered will either increase your electric light bills or increase your taxes and should not be done without your consent.

C. H. WALKER

DEPENDABILITY
